4333. ——. *Assoc.with* Redruthite and Tenorite, in quartz. *Loc.* Alliance Mine, Morinish Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 43-57, and G.S.M.

4334. ——. *Assoc.with* Copper Pyrites, in quartz reef *Loc.* Morinish Goldfield (*ante*). *Ref.* Q.M.

4335. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Mary Flornece Reef, Blacfellow's Gully, Morinish Goldfield (*ante*). *Ref.* G.S.M.

4336. ——. *Assoc.with* Iron Pyrites and Galena, in quartz reef. *Loc.* Welcome Mine, Morinish Goldfield (*ante*). *Ref.* Q.M. and P.R.S.Q., vol. 4, p. 47 (1887).

4337. ——. *Assoc.with* Galena and Ironstone, in quartz. *Loc.* Miner's Dream Mine, Bob's Cr., 4 miles E.N.E. of Bouldercombe, Mt. Morgan (Crocodile) Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 132, p 16 (1898).

4338. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* **Mt. Usher** Mine, Gavial Cr., 6 miles N.E. of Mt. Morgan (Crocodile Cr.) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 15 (1898), and G.S.M.

4338A. ——. *Assoc.with* Telluride of Gold and Silver, Iron Pyrites, and Zinc Blende, in calcite and quartz. Anglo-Saxon Mine, Mt. Usher, Gavial Cr. (*ante*). *Ref.* O.R.

4339. ——. *Assoc.with* Chromite and Chrome Ochre, in serpentine. *Loc.* **Mt. Wheeler,** 3 miles N. of Cawarral Rail. Stn. (Yeppoon line), 26 miles (by rail and road) N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 69 (1887).

4340. ——. *Assoc.with* Limonite. *Loc.* Dawn of Hope Mine, **Ridgelands Goldfield,** 20 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

4340A. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Nil Desperandum Mine, Ridgelands Goldfield (*ante*). *Ref.* G.S.M.

4341. ——. In quartz. *Loc.* Morning Star Mine, Ridgelands Goldfield (*ante*). *Ref.* A.R.D.M., p. 118 (1900).

4342. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Native Cat Extd., **Stanwell Goldfield,** 16 miles (by rail) S.W.byW. of Rockhampton (Central line). *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.M., A.R.D.M., p. 119 (1900).

4343. ——. In quartz. *Loc.* Stony Cr., Stanwell Goldfield (*ante*). *Ref.* G.S.Q. Pub. 131 (1898).

4344. ——. In quartz. Table Mt., 4½ miles E.byS. of Stanwell Rail. Stn., 20 miles (by rail and road) S. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131 (1898).

4345. ——. *Assoc.with* Limonite and Manganese-dioxide, in quartz. *Loc.* Taranganba Gold Mine, 1½ mile S. of Yeppoon Rail. Stn., 36½ miles (by rail and road) N.E.byN. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 50, p. 2 (1889).

4346. ——. *Assoc.with* Galena and Cerussite, in quartz. *Loc.* Magpie Lode, Carmilla Mine, Connor's Range, nr. Broadsound, 30 miles N. of **St. Lawrence.** *Co.* Murchison; *Dist.* Port Curtis. *Assay:* Gold = 1 dwt. 15 gr., and Silver = 9 oz. 5 dwt. 5 gr. per ton. *Ref.* G.S.Q. Pub. 141, p. 5 (1898).

4347. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Mouth of Inlet, near Green Hill, 40 miles S. of Mackay. *Co.* Murchison (*ante*). *Assay:* Gold = 4 oz. 18 dwt. per ton. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

4348. ——. *Assoc.with* Copper. *Loc.* E. side of Green Hill, 40 miles S. of Mackay. *Co.* Murchison (*ante*). *Assay:* Copper = 12 per cent., Gold = 5 dwt. per ton. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

4349. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Langdale Hill, nr. Tooloombah Stn., 26 miles S. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 84, p. 9 (1892).

4350. ——. In quartz reef. *Loc.* Alliance Mine, **Rosewood Goldfield,** 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis (*ante*). *Ref.* G.S.M.

4351. ——. *Assoc.with* Iron Pyrites, in quartz and chlorite. *Loc.* Caledonia Reef, Rosewood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 49, p. 7 (1889).

4352. ——. In quartz reef. Golden Bar Reef, Rosewood Goldfield (*ante*). *Ref.* Q.M.

4353. ——. *Assoc.with* Copper Pyrites and Copper Oxides, in quartz. *Loc.* Gt. Northern Copper Mine, Rosewood Goldfield (*ante*). *Ref.* G.S.M.

4354. ——. *Assoc.with* Calcite and Chlorite. *Loc.* Rosewood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 73 (1887), and G.S.M.

4355. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Westwood Reef, 5½ miles S.E. of Westwood Rail. Stn., 36½ miles (by rail and road) S.W. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Assays:* Gold (1) = 9 dwt. 2 gr., (2) = 2 dwt. 14 gr., (3) = 2 dwt. 14 gr. per ton. *Ref.* G.S.Q. Pub. 103, p. 30 (1895).

4356. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Mt. Hope or Homeward Bound Reef, **Cania Goldfield,** 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis.

4357. ——. *Assoc.with* Copper Pyrites, Molybdenite, and Calcite, in quartz. *Loc.* Mt. Rose Reef, Cania Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 9 (1885), and G.S.M.

4358. ——. *Assoc.with* Mispickel, in quartz. *Loc.* Wild Horse Reef, Cania Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 9 (1885).

4359. ——. In quartz reef. Antonio's Mountain, **Mt. Morgan (Crocodile Cr.) Goldfield,** 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* Q.M.

4360. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz reef. *Loc.* Champion Lease (190), 1 mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 132, p. 12 (1890).

4361. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Clanricarde Mine, 4 miles S.S.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 103, p. 30 (1895).

4362. ——. *Assoc.with* Copper Pyrites, in quartz reef. *Loc.* Crow's Nest Mine, 3 miles W.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 9 (1898), and G.S.M.

4363. ——. *Assoc.with* Limonite, in quartz reef in granite. *Loc.* E. of Glen Dee, Dee R., 5 miles E.N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 161, p. 15 (1901).

4364. ——. In decomposed granite. Deep Shaft, Greenvale, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.M.

4365. ——. *Assoc.with* Iron Pyrites, in quartzite. *Loc.* Gt. North Lode, 3½ miles N.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 103, p. 29 (1895).

4366. ——. *Assoc.with* Iron Pyrites, Limonite, and Calcite, in euritic granite. *Loc.* Hidden Treasure Mine, Mundic Cr., 1 mile W.S.W. of Mt. Morgan Goldfield Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 132, p. 11 (1893), and 161, pp. 9-12 (1901).

4367. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Hit or Miss Mine, Mt. Morgan Goldfield (*ante*). *Ref.* Q.M.

4368. Gold. *Assoc.with* Iron Pyrites, in gossan, quartzite, and conglomerate. *Loc.* Light of Day Gold Mines, Mt. Gilmore, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 132, p. 11 (1898), and 161, pp. 5-8 (1901).

4369. ——. *Assoc.with* Iron Pyrites, in quartzite lode. *Loc.* Morganite Mine, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 161, p. 12 (1901).

4369A. ——. *Assoc.with* Hematite and Limonite, in lodes. *Loc.* Mt. Alexander Mines, 8 miles E.S.E. of Mt. Morgan Rail. Stn., and 32 miles (by rail and road) from Rockhampton, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 17 (1898).

4370. ——. *Assoc.with* Silver, Copper Pyrites, Iron Pyrites, Hematite, Magnetite, Limonite, Göthite, Pyrolusite, and Satin-spar, in vesicular quartz, quartzite, and kaolin. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 17 (1884), 132, p. 8 (1898), and G.S.M.

4371. ——. *Assoc.with* Iron Pyrites, Copper carbonate, and Ironstone, in serpentine and quartzite. *Loc.* Mt. Morgan North Mine, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 8 (1898).

4372. ——. In conglomerate. Central Mine, Mt. Victoria, 3 miles W.S.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 12 (1892), and 103, p. 28 (1895).

4373. ——. *Assoc.with* Hematite, in quartz. *Loc.* Manukan Mine, Mount Victoria (*ante*). *Ref.* G.S.Q. Pub. 87, p. 11 (1892).

4374. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Mundic Reef, near Mt. Morgan Rail. Stn., Mt. Morgan Goldfield. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.M.

4375. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Peut's Reef, S. of Champion Gully, 1 mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 12 (1898).

4376. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Mispickel, and Zinc Blende, in quartz reef. *Loc.* Queen of the Valley Mine, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898), G.S.M., and Q.M.

4377. ——. *Assoc.with* Iron Pyrites, in quartzite. *Loc.* Rockhampton Prospecting Co.'s Area, 1¼ miles W.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 10 (1898).

4378. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz and calcite. *Loc.* Roxburgh Mine, 6 miles N.E.byE. of Mt. Morgan Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 132, p. 14 (1898).

4379. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* St. Gothard Mine, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 16 (1898).

4380. ——. In quartz reef. Strover's Mine, Mt. Morgan Goldfield (*ante*). *Ref.* Q.M.

4381. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, in quartz and calcite. *Loc.* Struck Oil Lease (186), 5 miles E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*. *Assay:* Gold = 156 oz. 13 dwt. 9 gr., and Silver = 17 oz. 2 dwt. 7 gr. per ton. *Ref.* G.S.Q. Pubs. 103, p. 29 (1895), and 132, p. 14 (1898), and G.S.M.

4382. ——. *Assoc.with* Iron Pyrites, Tourmaline, and Calcite, in quartz reef and in aplite. *Loc.* Union G.M. Co.'s Lease, Mt. Morgan Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 40 (1887).

4383. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Welcome Mine, Champion Gully, 1¼ mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

4384. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Windsor Mine, Mt. Morgan Goldfield (*ante*). *Ref.* Q.M.

4385. ——. *Assoc.with* Chalcedony, in cement. *Loc.* **Moondilla Goldfield,** 10 miles S. of Adavale, 90 miles (by rail and road) W.N.W. of Charleville. *Co.* McKinlay; *Dist.* **Warrego.** *Ref.* G.S.Q. Pub. 78, p. 1 (1891).

4385A. ——. Bingera, 3 miles S.S.E. of Birthamba Rail. Stn. (Mt. Perry line). *Co.* Cook; *Dist.* **Wide Bay.** Gold rush took place here in 1852, but was declared a "duffer."

4386. ——. *Assoc.with* Silver and Iron Pyrites, in quartz. *Loc.* Black Snake Reef, **Black Snake Goldfield,** 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

4387. ——. *Assoc.with* Silver, in quartz. *Loc.* Homeward Bound Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.M.

4388. ——. *Assoc.with* Silver and Copper Ores. *Loc.* Kilkivan Gold Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

4389. ——. *Assoc.with* Silver, Copper Pyrites, Redruthite, Pyrrhotite, Mispickel, Galena, and Stibnite. *Loc.* Mariner's Reef, Black Snake Goldfield (*ante*). *Analysis and Assays of Ore: See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

4390. —— *Assoc.with* Iron Pyrites. *Loc.* Queensland Freeholds Co.'s Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 53 (1897).

4391. ——. *Assoc.with* Silver, Galena, Native Copper, and Copper carbonate, in lode. *Loc.* Mt. Terrible Lode, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

4392. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Rose, Shamrock, and Thistle Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

4392A. ——. *Assoc.with* Copper carbonate, Hematite, and Magnetite, in quartz. *Loc.* Rose, Shamrock, and Thistle Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

4393. ——. *Assoc.with* Silver, Iron Pyrites, and Tenorite, in quartz reef. *Loc.* Stony Ridge, Black Snake Goldfield (*ante*). *Yield:* Gold = 1 oz. 6 dwt. 16 gr., Silver = 87 oz. per ton.

4394. ——. *Assoc.with* Ironstone, in quartz and calcite. *Loc.* Tableland Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

4395. ——. *Assoc.with* Silver, Iron Pyrites, Copper Pyrites, Galena, Mispickel, Zinc Blende, and Schorl. *Loc.* Victoria Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.M.

4396. ——. In quartz. Gt. Tasman Reef, Glastonbury and Widgee Creeks, **Glastonbury Goldfield,** 7 miles W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.M.

4397. ——. Crystallised in an aggregation of cubes. *Loc.* Mt. Doran Mine, Glastonbury Goldfield (*ante*). *Ref.* B.D.

4398. ——. In gossan. Royal David Reef, 1 mile from Dryfesdale, Glastonbury Goldfield (*ante*). *Ref.* G.S.M.

4399. ——. In quartz reef. "Without-a-Friend" Mine, Glastonbury Goldfield (*ante*). *Ref.* G.S.M.

4400. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Empress Reef, **Jimma (Yabba) Goldfield,** 35 miles S. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 169, p. 15 (1901).

4401. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Malachite, Bismuthinite, Magnetite, and Limonite, in lode. *Loc.* Kabonga Mine, **Kilkivan Goldfield,** 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897), and G.S.M.

4402. ——. *Assoc.with* Manganese-dioxide and Native Arsenic, in porphyry. *Loc.* Long Tunnel P.C., Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886), and G.S.M.

4403. ——. *Assoc.with* Calcite, in white porphyry. *Loc* Long Tunnel 2 North, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886).

4403A. ——. *Assoc.with* Iron Pyrites, in quartz and gossan. *Loc.* New Year's Extd. Claim, Kilkivan Goldfield (*ante*). *Ref.* A.R., p. 202 (1909).

4404. ——. *Assoc.with* Azurite and Malachite, in quartz leader. *Loc.* New Year's Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 2 (1886).

4405. ——. *Assoc.with* Calcite, in quartz. *Loc.* Perseverance Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886).

4406. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Rise and Shine Mine, Kilkivan Goldfield (*ante*). *Ref.* G.S.M.

4406A. ——. In quartz. Gold Top Prov. Goldfield, 4 miles N.W.byW. of Kilkivan Rail. Stn., Kilkivan Goldfield (*ante*).

4406B. ——. *Assoc.with* Iron Pyrites and Ironstone, in quartz lode. *Loc.* P.A. 815, 7 miles (by road) W. of Kilkivan. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* A.R., p. 235 (1910).

4407. ——. In quartz. Colo Gold Mine, **Marodian Goldfield,** 12 miles N.byE. of Kilkivan Rail. Stn., 60 miles (by rail and road) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 10 (1902).

4408. ——. In calcite. Three Bells Mine, Running Cr., Marodian Goldfield (*ante*). *Assay:* Gold = 7 dwt. per ton. *Ref.* G.S.Q. Pubs. 59, p. 8 (1890), and 179, p. 10 (1902).

4409. Gold. *Assoc.with* Iron Pyrites, Copperas, Tenorite, Galena, Calamine, and Zinc Blende. *Loc.* Beer and Dawson's Lease, **Yorkey's Goldfield,** 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

4410. ——. *Assoc.with* Iron Pyrites, Hematite, Graphite, and Calcite, in lode in diorite. *Loc.* Campbell's Reef, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902), and G.S.M.

4411. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Hematite, and Zinc Blende, in quartz. *Loc.* Ortt's Mine, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

4412. ——. *Assoc.with* Stibnite, Iron Pyrites, and Galena, in quartz reef. *Loc.* Triad Lease, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 7 (1902).

4413. ——. *Assoc.with* Calcite and Magnesite, in quartz. *Loc.* Waratah Lease, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 7 (1902).

4414. ——. *Assoc.with* Iron Pyrites, Stibnite, and Cervantite. *Loc.* Yorkey's Surprise and Zealandia G.M. Leases, Surprise-Zealandia Reefs, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 5 (1902).

4415. ——. *Assoc.with* Silver and Copper Pyrites. *Loc.* Blue Bell P.A., 32 miles from Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* B.D.

4416. ——. In quartz. Sel. (1486), nr. Devil's Mountain, Par. of Brooyar, 17 miles N.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.M.

4416A. ——. *Assoc.with* Stibnite. *Loc.* Mt. Rose, Glenbar Stn., 20 miles W. of **Tiaro** Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Ref.* L.C.B.

4417. ——. *Assoc.with* Iron Pyrites, Copper carbonate, Mispickel, Limonite, and Zinc Blende, in quartz, calcite, and gossan veins. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar Hd. Stn., 20½ miles W. of Tiaro Rail. Stn. (North Coast line) (*ante*). *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

4417A. ——. *Assoc.with* Silver in quartz. *Loc.* Chinaman's Cr., trib. of Mary R., nr. Mt. Ubi, W. of **Blackall Range,** 15 miles W.byS. of Palmwoods Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub, 196 (1905), and A.R., pp. 83, 95, 96 (1907).

4418. ——. In quartz veins. Walli and Chinaman's Creeks, near Mt. Ubi, W. of Blackall Range (*ante*). *Ref.* G.S.Q. Pub. 196, pp. 4, 5 (1905).

4419. ——. Por. (1187), Par. of Brooyar, nr. Wide Bay Cr., 15 miles N.W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* O.M.

4420. ——. Imbil, Yabba River, 8 miles from Kandanga, 15 miles S. of Gympie. *Co.* Lennox (*ante*). *Ref.* O.M.

4421. ——. In quartz. Alliance 1 S. Lease (625), Dodd's Reef, and Reef on south side, **Gympie Goldfield,** 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 32 (1889).

4422. ——. In quartz and black shale. *Loc.* Caledonia United Lease (312), Alma, Lady Mary, and Caledonia Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 24, 34 (1889).

4423. ——. *Assoc.with* Mispickel, in quartz reef. *Loc.* Columbia Consolidated Mine, Gympie Goldfield (*ante*). *Ref.* G.S.M.

4424. ——. In quartz. Columbia and Smithfield Lease (672), Columbia Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 26 (1889), and 76, pp. 4, 5 (1891).

4425. ——. In quartz. Crown and Phœnix Lease (361), Reef 156 feet from shaft, and No. 2 Reef (Western Reef of Phœnix 4 N.), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 34 (1889).

4426. ——. In quartz. Crown and Phœnix Extd. Mine, New Zealand and Crown Reef, and Phœnix Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 6 (1891).

4427. ——. Ellen Harkins Lease (568), Ellen Harkins Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100 (1895).

4428. ——. In quartz. Ellen Harkins 1 N. Lease (634), Ellen Harkins Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100 (1895).

4429. ——. In quartz. Ellen Harkins 1 South Lease, Ellen Harkins Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100 (1895).

4430. ——. In quartz. Ellen Harkins S. and Wilmot Lease (669), Reef at 518 feet depth, probably the Monkland and Reef cut at 618 feet depth, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 22 (1889).

4431. ——. In quartz. Glanmire P.C. Lease (598), Glanmire, and No. 1 and No. 2 Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 18 (1889)

4432. ——. In quartz. Glanmire N. Lease (579), Nos. 1 to 9 Reefs, Gt. Eastern and Monkland Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 20 (1889), and 76, p. 3 (1891).

4433. ——. In quartz. Glanmire 1 N. Lease (602), Gt. Eastern, Orient, and Diorite Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 3 (1891), and 100, pp. 8, 9 (1895).

4434. ——. In quartz. Glanmire 1 N. Lease (602), 7 nearly parallel Reefs, known as Nos. 1 and 2 (probably the Glanmire Reef), 3, 4, 5, 6, 7, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 19 (1889).

4435. ——. In quartz. Glanmire 3 and 4 N. Lease (331), two main Reefs called 1 and 2, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 20 (1889), and 76, pp. 3, 4 (1891).

4436. ——. In quartz. Glanmire 5 N. Lease (522) Reef, probably a continuation of one seen in crosscut of S. United, between the Smithfield and Columbia Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 21 (1889).

4437. ——. In quartz. Glanmire and Monkland S. Lease (833), Inglewood, Monkland, "Old Eastern," Gt. Eastern Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 15 (1889), and 100, p. 7 (1895).

4438. ——. *Assoc.with* Iron Pyrites, in carbonaceous shale. *Loc.* Golden Crown Lease (613), Phœnix, Crown, and March Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 30, 31 (1889).

4439. ——. In quartz. Gt. Eastern Lease (588), "Old Eastern" and Gt. Eastern Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 17 (1889).

4440. ——. In quartz leaders. Gt. Eastern Extd. Mine, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 3 (1891).

4441. ——. In quartz. Gt. Eastern 1 N. Lease (872), Orient Reef, and two reefs and leaders, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 21 (1889), 76, p. 3 (1891), and 100, p. 9 (1895).

4442. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Gt. Eastern 2 Lease (779), Inglewood Reef, and No. 3 Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 2 (1891), and 100, pp. 5, 6 (1895).

4443. ——. In quartz. Gt. Eastern 2 N. Lease (724), Orient and Diorite Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, pp. 3, 4 (1891), and 100, pp. 8, 9 (1895).

4444. ——. In quartz. Gt. Eastern 1 S. Lease, Orient Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 3 (1891).

4445. ——. *Alloyed with* Silver, in Telluride Ore. *Loc.* Gt. Eastern 2 S. Mine, Glanmire and Monkland S. No. 4 Reef, Gympie Goldfield (*ante*). *Assay:* Gold = 130 oz. 16 dwt. per ton; Silver = 3339 oz. 3 dwt. 8 gr. per ton; Tellurium = 5·26 per cent. *Ref.* G.S.Q. Pubs. 76, p. 3 (1891), 196, p. 25 (1905), and G.S.M.

4446. ——. In quartz. Gt. Eastern and Orient Lease (821), Orient Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 9 (1894).

4447. ——. In quartz. Gt. Monkland Lease (629), Glanmire and Monkland Reef, and reef containing small veinlets of calcite, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 18 (1889), and 100, p. 8 (1895).

4448. ——. In quartz. Gt. New Zealand Lease (815), Western and Annie Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 6 (1891), and 100, pp. 15, 16 (1895).

4449. ——. In quartz. Gympie Golden Crown Mine, Peter and Paul and All Serene Reefs, Two Mile, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 7 (1891).

4450. ——. In quartz. Hilton Extended Lease (638), Hilton and Hamburg lines of reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 31 (1889).

4451. ——. In quartz. Inglewood United Lease (814), Inglewood Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 8 (1895).

4452. ——. In quartz. Lady Mary N. Lease (505), Lady Mary Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4453. ——. In quartz. Lady Mary 2 N. Lease (411), Lady Mary, Alma, Caledonia (or Middle) Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 35 (1889).

4454. ——. In quartz. Lady Mary 3 and 4 N. Lease (228), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 35 (1889).

4455. ——. In quartz. Lady Mary 5 N Lease (653), Lady Mary Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 32, p. 9 (1887), and 52, p. 35 (1889).

4456. ——. In quartz. Lady Mary 7 S. Lease (670), Alma, Lady Mary, and Caledonia Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 33 (1889).

4457. Gold. In quartz. London Lease (673), London and German Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4458. . In quartz. Louisa N. Extd. Mine, Louisa Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4459. ——. In quartz. Lucknow P.C., Lucknow Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4460. ——. In quartz. Monkland 1 S. and Abyssinia Lease (518), Monkland Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 21, 22 (1889).

4461. ——. In quartz. Monkland 7 and 8 S. Lease (597), Monkland and Glanmire Reefs, and reef which is probably the Great Eastern, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 18 (1889).

4462. ——. In quartz. New Zealand P.C. Lease (393), New Zealand and Annie Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 33 (1889).

4463. ——. In quartz. New Zealand South Lease (655), New Zealand, Crown, and March Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 32 (1889).

4464. ——. In quartz. New Zealand South Junction (626), Eastern and Western Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 29 (1889).

4465. ——. In quartz. Nicholl's Lease (327), Inglewood, Monkland, Glanmire, "Old Eastern," and Gt. Eastern Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 16 (1889), and 100, p. 7 (1895).

4466. ——. In quartz. O'Connell P.C. Lease (620), Beehive, Louisa, and O'Connell Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4467. ——. In quartz reef. Oriental 1 N. and Glanmire Mine, Gympie Goldfield (*ante*). *Ref.* G.S.M.

4468. ——. In quartz reef. Otago North Mine, Gympie Goldfield (*ante*). *Ref.* G.S.M.

4469. ——. In quartz. Perseverance and Nil Desperandum Lease, Perseverance Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 31 (1889).

4470. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Phœnix Lease (829), western reef of the North Smithfield, Gympie Goldfield *ante*). *Ref.* G.S.Q. Pub. 100, p. 12 (1895), and G.S.M.

4471. ——. In quartz. Phœnix N. Freehold Lease (649), Phœnix Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 34 (1889).

4472. ——. In quartz. Phœnix 1 N. Lease (834), All Serene, Phœnix, Western, Smithfield, and New or Eastern Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 29 (1889), and 76, p. 3 (1891).

4473. ——. In quartz. Phœnix 2 N. Lease (805), Phœnix and other reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 13 (1895).

4474. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Phœnix 3 N. Lease (799), Victory Reef, and branches of Phœnix Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 32 (1889), 100, p. 14 (1895), and G.S.M.

4475. ——. In quartz. Phœnix 4 N. Lease (713), Victory, Smithfield, and Phœnix Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 3 (1889), and 100, p. 15 (1895).

4476. ——. In quartz. Phœnix 5 N. Lease (648), western and eastern reefs of the Crown and Phœnix, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 34 (1889).

4477. ——. In quartz. Phœnix 1 S. Lease (825), Banana, Wilmot Extd., Wilmot, Phœnix, Little Wonder, and St. Kilda Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, (1889), and 100, p. 10 (1895).

4478. ——. *Assoc.with* Iron Pyrites and Galena, in quartz and calcite. *Loc.* Phœnix 2 S. Lease (512), Monkland (Shannon) Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 24 (1889).

4479 ——. In quartz. Phœnix Golden Pile Lease (817), Eastern (Western Smithfield), Western, and other Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 4 (1889), and 100, p. 14 (1895).

4480. ——. In quartz. Phœnix P.C. Lease (514), Phœnix and Phœnix Eastern Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 27, 28 (1889).

4481. ——. In quartz. Scottish Gympie Gold Mines, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 166, p. 6 (1901).

4482. ——. In quartz. Shaun O'Farrell and South New Zealand Lease (634), now Ellen Harkins 1 N., Ellen Harkins Reef, and supposed Hilton Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 27 (1889).

4483. ——. In quartz. Smithfield N. Lease (626), Smithfield and Western Smithfield Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 5 (1891), and 100, p. 13 (1895).

4484. ——. In quartz. Smithfield 1 N. Lease (707), Columbia Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 13 (1895).

4485. ——. *Assoc.with* Native Arsenic, in quartz reef. *Loc.* Smithfield No. 1 North, Gympie Goldfield (*ante*). *Ref.* B.D.

4485A. ——. In quartz. Smithfield 2 and 3 S. Lease (316), Smithfield and Columbia Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 22, 23 (1889).

4486. ——. In quartz and calcite, spotted with chlorite. *Loc.* Smithfield United Lease (319), Smithfield and Columbia Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 23 (1889).

4487. ——. In black shale. Sultan 1 N. Mine, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4488. ——. In quartz reef. Sultan and Lucknow Lease (864), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 16 (1895).

4489. ——. In quartz. Two-mile Gold Mines, Peter and Paul and All Serene Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 166, p. 16 (1901).

4490. ——. In quartz. Union Extended Lease (511), Monkland Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 22 (1889).

4491. ——. In quartz. Walton Extended Lease (409), Mt. Pleasant and Walton Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

4492. ——. *Assoc.with* Iron Pyrites, in calcareous shale and quartz. *Loc.* Wilmot Extd. Lease (807), 628 (?), Wilmot (or Middle), Western, and Russell Reefs, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 24 (1889), and 100, p. 10 (1895).

4493. ——. *Assoc.with* impure Graphite. In many of the quartz reefs on the Gympie Goldfield (*ante*).

4494. ——. In quartz. All Serene Reef, in Phœnix 1 N. Lease, Gympie Golden Crown Mine, and Two-mile Gold Lease, Two Mile, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 7 (1891).

4495. ——. In quartz. Alma Reef, in Lady Mary, 2 N. Lease (411), Caledonia United Lease (312), and Lady Mary 7 S. Lease (670), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, (1889).

4496. ——. In quartz. Annie Reef, in New Zealand P.C. Lease (593), and Gt. New Zealand Lease (815), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 33 (1889), and 100, p. 15 (1895).

4497. ——. In quartz. Banana Reef, in Phœnix No. 1 S. Lease (825), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 10 (1895).

4498. ——. In quartz. Beehive Reef, in O'Connell P.C. Lease (620), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4499. ——. In quartz. Caledonia Reef, in Lady Mary 3 and 4 N. Lease (228), Lady Mary 2 N. Lease (411), Caledonia United Lease (312), and Lady Mary 7 S. Lease (670), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4500. ——. In quartz. Columbia Reef, in Columbia and Smithfield Lease (672), Smithfield, 1 N. Lease (707), Smithfield United Lease (319), and Smithfield 2 and 3 S. Lease (316), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100, p. 13 (1895).

4501. ——. In quartz. Crown Reef, in Golden Crown Lease (613), and New Zealand S. Lease (655), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4502. ——. In quartz. Diorite Reef, in Gt. Eastern 2 N. Lease (724), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 4 (1891), and 100, p. 9 (1895).

4503. ——. In quartz. Dodd's Reef, in Alliance 1 S. Lease (625), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 32 (1889).

4504. ——. In quartz. Ellen Harkins Reef, in Ellen Harkins 1 N. Lease (634), 1 S. Lease (636), and Lease (568), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100 (1895).

4505. ——. In quartz. German Reef, in London Lease (673), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4506. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Glanmire Reef, in Glanmire P.C. Lease (598), Monkland 7 and 8 S. Lease (597), Nicholl's Lease (327), and Gt. Monkland Lease (629), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 100 (1895).

4507. Gold. In quartz. Reefs Nos. 1 and 2 (probably branches of Glanmire Reef), in Glanmire 1 N. Lease (602), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889), and 100, p. 7 (1894).

4508. ——. In quartz. Glanmire and Monkland S. No. 4 Reef, in Gt. Eastern 2 S. Lease, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 5 (1895).

4509. ——. *Assoc. with* Galena, in calcite and quartz. *Loc.* Gt. Eastern Reef, in Glanmire N. Lease (602), Monkland 7 and 8 S. Lease (597), Gt. Eastern Lease (588), Nicholl's Lease (327), Glanmire and Monkland S. Lease (403), and Glanmire 1 N. Lease, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), 76 (1891), and 100 (1895).

4510. ——. In quartz. Hamburg and Hilton Reefs, in Hilton Extended Lease (638), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 31 (1889).

4511. ——. In quartz. Inglewood Reef, in Gt. Eastern 2 Lease (779), Glanmire and Monkland S. Lease (833), Inglewood United Lease (814), and Nicoll's Lease (327), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 76, p. 2 (1891), 100, pp. 5, 6, 7, 8 (1895).

4512. ——. In quartz. Lady Mary Reef, in Lady Mary N. Leasehold (686), N. Lease (505), 5 N. Lease (653), 3 and 4 N. Lease (228), 2 N. Lease (411), and 7 S. Lease (670), and Caledonia United Lease (312), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, pp. 36, 35, 83 (1889).

4513. ——. In quartz. Little Wonder Reef, in Phœnix 1 S. Lease (825), Gympie Goldfield (*ante*).

4514. ——. In quartz. London Reef, in London Lease (673), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4515. ——. In quartz. Louisa Reef, in O'Connell P.C. Lease (620), and Louisa N. Extended, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4516. ——. In quartz. Lucknow Reef, in Lucknow P.C., Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4517. ——. In quartz. March Reef, in Golden Crown Lease (613), and New Zealand S. Lease (655), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4518. ——. In quartz. Monkland (Shannon) Reef, in Phœnix 2 S. Lease (512), Ellen Harkins S. and Wilmot Lease (669), Union Extended Lease (511), Monkland and Abyssinia Lease (493), Monkland 1 S. and Abyssinia Lease (518), Glanmire N. Lease (579), Gt. Monkland Lease (629), Monkland 7 and 8 S. Lease (597), and Nicholl's Lease (327), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4519. ——. In quartz. Mt. Pleasant Reef, in Walton Extended Lease (409), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

4520. ——. In quartz. New Zealand Reef, in New Zealand P.C. Lease (593), New Zealand S. Lease (655), and Crown and Phœnix Evtended Lease, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), and 76, p. 6 (1891).

4521. ——. In quartz. O'Connell Reef, in O'Connell P.C. Lease (620), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 36 (1889).

4522. ——. In quartz. "Old Eastern" Reef, in Gt. Eastern Lease (588), Nicholl's Lease (327), and Glanmire and Monkland S. Lease (403), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4523. ——. In quartz. Orient Reef, in Glanmire 1 N. Lease (602), Gt. Eastern 1 N. Lease (872), Gt. Eastern 1 S. Lease, Gt. Eastern and Orient Lease (821), Gt. Eastern 2 N. Lease (724), Gympie Goldfield. *Ref.* G.S.Q. Pubs. 76, p. 3 (1891), and 100, p. 8 (1895).

4524. ——. In quartz. Perseverance Reef, in Perseverance and Nil Desperandum Lease (622), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 31 (1889).

4525. ——. In quartz. Peter and Paul Reef, in Gympie Golden Crown Lease, Two-mile Gold Mines (1220), Two-mile, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 7 (1891).

4526. ——. In quartz. Phœnix Reef, in Phœnix 1 N. Lease (353), 2 N. Lease (339), 3 N. Lease (515), (799 (?)), 4 N. Lease (648), N. Freehold Lease (649), 1 S. Lease (355), (825 ?), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52 (1889), 100, pp. 13, 14 (1895).

4527. ——. In quartz. Phœnix Reef (western and eastern), in Phœnix 5 N. Lease (648), and Golden Crown Lease (613), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4528. ——. In quartz. Russell Reef, in Wilmot Extended Lease (628), (807 (?)), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 24 (1889)

4529. ——. In quartz. Smithfield Reef, in Smithfield N. Lease (626). United Lease (319), 2 and 3 S. Lease (316), and Phœnix 4 N. Lease (648), (815 (?)), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 23 (1889), and 100, p. 14 (1895).

4530. ——. In quartz. Smithfield Western Reef, in Smithfield N. Lease (626), Phœnix 1 N. Lease (834), and Phœnix Golden Pile Lease (817), Gympie Gldfield (*ante*). *Ref.* G.S.Q. Pub. 100, pp. 12, 13, 14 (1894).

4531. ——. In quartz. Western reef of Smithfield North, in Phœnix Lease (829), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 12 (1895).

4532. ——. In quartz. St. Kilda Reef, in Phœnix 1 S. Lease (355), (825 (?)), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 27 (1889).

4533. ——. *Assoc.with* Hessite, in quartz reef. *Loc.* St. Patrick's Reef, Gympie Goldfield (*ante*). *Ref.* A.R., p. 154 (1908).

4534. ——. In quartz. Reef (probably the Sydney Reef), in Walton Extended Lease (409), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

4535. ——. In quartz. Main Reef, Nos. 1 and 2, in Glanmire 3 and 4 N. Lease (331), Gympie Goldfield (*ante*). *Ref.* G.S Q. Pub. 52, p. 20 (1889).

4536. ——. In quartz. Two Reefs, in Gt. Eastern 1 N. Lease (705), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 21 (1889).

4537. ——. In quartz. Victory Reef, Phœnix 3 N. Lease (799), and Phœnix 4 N. Lease (713), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 14 (1895).

4538. ——. In quartz. Walton Reef, in Walton Extended Lease (409), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

4539. ——. In quartz. Western Reef, in Wilmot Extended Lease (807), Phœnix 1 S. Lease (825), Phœnix Golden Pile (817), and Gt. New Zealand Lease (815), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 100, p. 10 (1894).

4540. ——. In quartz. Western and Eastern Reefs, Phœnix 5 N. Lease (648), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52 (1889).

4541. ——. In quartz. Wilmot Reef, Phœnix 1 S. Lease (825), and Wilmot Extended Lease (628), (807 (?)), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 52, p. 24 (1889), and 100, p. 10 (1894).

4542. ——. *Assoc.with* Iron Pyrites, Galena, Zinc Blende, and Siderite, in quartz reef between walls of slate and diorite. *Loc.* Enterprise Reef, on br. of Cochrane Cr., 5½ miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pubs. 52, p. 12 (1889), and 159, p. 2 (1907).

4543. ——. *Assoc.with* Galena and Zinc Blende, in quartz. *Loc.* Exhibition Reef, 6 miles N. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

4544. ——. In quartz reef. Gt. Gorge Mine, nr. O'Leary's Crossing, nr. Curra, 8 miles N.W. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 159, p. 31 (1901).

4545. ——. In quartz. Ora Reef, 7½ miles N. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

4546. ——. *Assoc.with* Iron Pyrites and Galena, in quartz. *Loc.* Veteran Reef, 7 miles N.N.W. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

4547. —— (traces). *Assoc.with* Stibnite and Cervantite, in calcite lode. *Loc.* Gympie Antimony Mine, nr. Sel. 3482, Chatsworth Scrub, 7 miles N.N.W. of Gympie. *Co.* March (*ante*). *Ref.* B.D.

4548. ——. *Assoc.with* Iron Pyrites, in gossany quartz. *Loc.* Devil's Mountain, 17 miles N.W. of Gympie. *Co.* March (*ante*). *Assay:* Gold = 1 oz. 9 dwt. 9 gr., Silver = 6 dwt. per ton. *Ref.* A.R., p. 157 (1908).

4549. ——. *Assoc.with* Silver, in quartz. *Loc.* S.E. of Devil's Mountain (*ante*). *Assay:* Gold = 5 dwt. 14 gr., Silver = 5 oz. 8 dwt. per ton. *Ref.* A.R., p. 160 (1908).

4550. ——. In quartz. Mt. Kelly, 3½ miles S.W. of Traverston Rail. Stn. (North Coast line), 16½ miles (by rail and road) S.E. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 94, p. 7 (1893).

4551. ——. In quartz reef. Mt. Smyth, 3½ miles S.W. of Traverston Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 94, p. 7 (1893).

4552. —— (traces). In quartz. *Loc.* Angabunga R. (below Camp 14), 64 miles N.W. of Port Moresby, **Brit. New Guinea.** *Ref.* A.R.B.N.G., p. 92 (1894).

4553. —— (traces). In quartz reef. Damora, Rossel Is., 480 miles E.S.E. of Port Moresby (*ante*). *Ref.* A.R.B.N.G., p. 91 (1894).

4554. —— (traces). In quartz reef. Rossel Is. (*ante*). *Ref.* G.S.Q. Pub. 55, p. 1 (1889).

4555. —— (traces). In quartz reef. Yongga Bay, Rossel Is. (*ante*). *Ref.* A.R.B.N.G., p. 91 (1894).

4556. Gold. *Assoc.with* Iron Pyrites, Psilomelane, Hematite, and Limonite, in quartz reef. *Loc.* Caledonia Claim, Sudest Is., 448 miles E.S.E. of Port Moresby, Brit. New Guinea. *Assay:* Gold = 9 dwt. 17 gr., Silver = 1 oz. per ton. *Ref.* G.S.Q. Pub. 85, p. 29 (1892), and G.S.M.

4557. ——. In quartz reef. Missing Link Claim, Sudest Is. (*ante*). *Ref.* G.S.Q. Pub. 85, p. 30 (1892).

4558. ——. In quartz. Rattle Snake Reef, Sudest Is. (*ante*). *Ref.* A.R.B.N.G., p. 96 (1894).

4559. ——. *Assoc.with* Iron Pyrites, in quartz reef. *Loc.* Busai, Woodlark Is., 384 miles E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

4560. ——. In quartz reef. Woodlark Is. (*ante*). *Ref.* G.S.M.

Gold-bearing Minerals. *See* Associated Metallic Minerals *under* Gold.

Gold Bores (records incomplete)—

Charters Towers Diamond Drill Bores (4). (No. 1, 564 ft.; No. 2, 578 ft.; No. 3, 517 ft.; No. 4, 2,135 ft.) *Co.* Davenport; *Dist.* North Kennedy. *Ref.* A.R.D.M., 1882, p. 12 (No. 1 Bore); 1883, p. 16 (Nos. 2 and 3 Bores); 1894, p. 158 (No. 4 Bore).

Clermont Alluvial Bores, Deep Cr. and Wild Cat Lead. *See* G.S.Q. Pub. No. 176, pp. 29, etc. *See* Geol. Surv. Pub. List for title.

Dunrobin Park, nr. Yaamba, Fitzroy R., Rockhampton District. *Co.* Livingstone; *Dist.* Port Curtis. Sunk for alluvial gold; no record available. *Ref.* A.R.D.M., 1889, p. 60.

Gympie Bores—

Ashton's (Diamond Drill). Lady Mary P.C. Lease (L. Mary and N. Zealand), corner of Alma and Pollock streets, Caledonia Hill. Depth, 740 ft. Sunk in 1879 by Hester. *Ref.* B.D.

Bore No. 1 (Diamond Drill), nr. corner of Excelsior, Perseverance, and River Roads. Depth, 630 ft. Sunk in July-December, 1890, by J. Cole. *Ref.* G.S.Q. Pub. 76, p. 2 (1891).

Bore No. 2 (Diamond Drill), nr. south-east corner of Mark lane and Watt street, close to Ellen Harkins Workings, Mt. Pleasant. Depth, 2,025 ft. Sunk in 1891-1892 by J. Cole. *Ref.* G.S.Q. Pubs. 94, pp. 4, 5 (1893), 100, p. 3 (1895).

Deep Lead Bores, on south side of Mary River. Note: Beehive Co. sunk six bores (41 ft., 50 ft., 51 ft., 47 ft., 56 ft., and 73 ft.), and another company sunk two more bores, all in 1880. *Ref.* A.R.D.M., 1880, p. 15.

Monkland Bore (Diamond Drill), S. Glanmire and Monkland Mine. Sunk from bottom of S. Glanmire and Monkland Eastern Shaft (Old Great Eastern Extended Shaft) at 990 ft. Depth of bore, 1,734 ft. Year, 1904. Sunk by Morgan Jones (Goldfields Diamond Drilling Co.). *Ref.* "Gympie Times," 8th July, 1905.

West of Scotland Mine Bore (Diamond Drill). Leases 1127 and 1128, Noosa Road. Sunk by Morgan Jones (Goldfields Diamond Drilling Co.) from bottom of shaft at 3,136 ft. Depth, 875 ft. Year, 1904. *Ref.* B.D.

Croydon Bores—

Iguana Hill (720 ft.). *Par.* Croydon; *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 17 (1896).

Highland Mary Bores (Nos. 1, 2, and 3). *Par.* Croydon; *Co.* Surrey; *Dist.* Burke. No. 1 (496 ft.), H.M. No. 1 S. Block. No. 2 (267 ft.), H.M. No. 1 N. Block. No. 3 (266 ft.), opp. the Glengarry. *Ref.* G.S.Q. Pub. 118, p. 21 (1896). Diagram of No. 1 Highland Mary Bore in A.R.D.M. 1891.

Gold Cr. (Pors. 23B, 241, and 289.) Brookfield. *Min.Ref.* Gold, *see* 4206; Iron Pyrites, 5341, 5342; Ironstone, 5613.

Golden Gate Centre, Croydon Goldfield. *Min.Ref.* Alunogen, *see* 4; Argentine, 564, 565; Calcite, 463-467; Chalcanthite, 1317; Copper Pyrites, 2102; Epsomite, 2611; Fluorspar, 2654; Galena, 2698-2701; Gold, 3505-3519; Graphite 4578-4580; Halite, 4560; Hematite, 4691; Heulandite, 4819; Iron Pyrites, 4948-4952; Ironstone, 5494-5496; Limonite, 5801; Magnetite, 5968; Mispickel, 6644; Serpentine, 7378; Siderite, 7403; Silver (native), 7546; Stilbite, 7662; Vivianite, 7920; Zinc Blende, 8054.

GEOLOGICAL NOTE: The country rock is biotite granite, the most important reef in the locality being the Golden Gate. The gold, associated with fine particles of galena, occurs in shoots in the reef, the stone being rich where the adjacent granite is highly graphite-bearing. Barren quartz also occurs in the reef, and is known as "buck." *See* G.S.Q. Pub. No. 202 for details and maps.

Goslarite. *Syn.*, White Vitriol, Zinc Vitriol. *Compo.*, Sulphate of zinc. *Colour*, usually white. *Lustre*, vitreous. Astringent. Soluble in water. *H.* = 2-2·5. *Sp.gr.* = 1·9-2·1.

4561. ——. As a secondary deposit. Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

Göthite. *Syn.*, Gœthite. *Compo.*, Hyd. oxide of iron. *Colour*, yellowish and brownish black. *Lustre*, adamantine. *H.* = 5-5·5. *Sp.gr.* = 4-4·4. *Contents* (*max.*), Iron 63 per cent.

4562. ——. *Assoc.with* Redruthite, Malachite, and Limonite, with traces of Gold and Silver, in quartz and schist. *Loc.* Mountain Maid M.L. (526), Columbiad Group, Duck Cr., 1¼ mile S.W. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 140, 141 (1908).

4562A. ——. *Assoc.with* Gold, Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

4563. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in chloritic schist *Loc.* Brilliant M.C. (159), Timberoo Group, Friedman's Cr., 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 179, 180 (1908).

4564. ——. *Assoc.with* Limonite, Azurite, and Malachite. *Loc.* Lakeside, nr. Degilbo Rail. Stn. (Gayndah line), 58 miles (by rail) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* A.R., p. 134 (1908).

4565. ——. *Assoc.with* Limonite and Turgite. *Loc.* Por. 1847, Rolleston, Pittsworth, 31 miles (by rail) S.W.byS. of Toowoomba (main line). *Co.* Aubigny; *Dist.* **Darling Downs.** *Analysis:* Iron = 49·9 per cent., Titanium = nil, Silica and insoluble = 10·1 per cent., Phosphorus = 0·34 per cent., Sulphur = trace. *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

4566. ——. *Assoc.with* Limonite and Turgite. *Loc.* Por. 2188, Rolleston, Pittsworth (*ante*). *Analysis:* Iron = 52·3 per cent., Titanium = nil, Silica and insoluble = 8·9 per cent., Phosphorus = 0·2 per cent., Sulphur = trace. *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

4567. ——. *Assoc.with* Hematite, Limonite, Iron Pyrites, Mispickel, Cassiterite, Azurite, Malachite, Wolfram, Websterite, Fluorspar, Chlorite, Penninite, and Topaz, in quartz lodes. *Loc.* Tin Mines, Coolgarra, Return Cr., 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell. *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

4568. ——. In stalactitic form. Stradbroke Is., Moreton Bay, 24 miles E. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* P.R.S.Q., vol. 4, p. 61 (1887).

4569. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Hematite, Magnetite, Limonite, Pyrolusite, and Satin-Spar, in vesicular quartz, quartzite, and kaolin. *Loc.* Mt. Morgan Mine, Mt. Morgan Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* **Port Curtis.** *Ref.* P.R.S.Q., vol. 4, p. 61 (1887).

Gould Co. Cook Dist. *See map*, Pl. 8.

Gould's Sel., Por. (137), Par. of Logan, N. of Beaudesert. *Min.Ref.* Coal, *see* 1779A.

Goulvain (Dobu) Is., Brit. New Guinea. *Min.Ref.* Opal *var.* Sinter, *see* 7024; Sulphur (native), 7669.

Govatt's Bore. *See under* Artesian Bores. No. 40.

—— and Ore's Bore. *See under* Artesian Bores. No. 234.

Government Assistance to Mining. (Prospecting, Deep-sinking, Machinery.) *See under* Subsidies for details.

Government Analyst Fees.—Charges for gold and silver assays, £1; for gold, silver, and copper, £2; coal, £1 to £2, according to amount of work required. Write to Geological Survey Office or Gov. Analyst for further particulars.

Government Geologists of Queensland—

Aplin, H. D'O.—
Geologist of Southern Queensland, 1868 and 1869.

Daintree, R.—
Geologist of Northern Queensland, 1868 to 1871.

Gregory, Sir A. C.—
Geologist of Southern Queensland, 1875 to 1879.

Jack, Dr. R. L.—
Geologist of Northern Queensland, 10-7-1877 to 1891.
Then Government Geologist of Queensland, 1892 to 16-9-1899.

Rands, W. H.—
Assistant Geologist, 24-12-1883 to 1898.
Acting Government Geologist of Queensland, 1898 to 1899.
Government Geologist of Queensland, 1899 to 30-6-1902.

Dunstan, B.—
Assistant Geologist, 11-3-1897 to 1902.
Acting Government Geologist of Queensland, 1902 to 1908.
Government Geologist of Queensland, 1908 to date.

—— GEOLOGISTS PRIOR TO SEPARATION OF QUEENSLAND FROM NEW SOUTH WALES—
Clarke, Rev. W. B., 1853 (?) to —
Stutchbury, S., Government Geologist of N.S. Wales, 1850 to 1855.

—— GEOLOGISTS (ASSISTANT)—
Maitland, A. G., 6-12-1888 to 20-10-1896.
Skertchly, S. B. J., 19-6-1895 to 1-7-1897.
Cameron, W. E., 11-3-1897 to date.
Maclaren, J. M., 21-3-1900 to 31-1-1901.
Ball, L. C., 16-8-1900 to date.
Jackson, C. F. V., 8-2-1901 to 31-5-1903.
Marks, E. O., 19-11-1908 to 31-7-1913.
Saint-Smith, E. C., 4-1-1913 to date.

Government Mining Journal (Queensland). First issue, June, 1900. First Editor, late W. O. Hodgkinson. Present Editor, W. J. Morley (appointed July, 1900). Issues: Vol. 1 (1900) to date. Subscription: 6d. per copy; 6s. per annum; posted within Commonwealth, 6s. 6d.; beyond Commonwealth, 8s. per annum. Issued on the 15th of every month. *Publishers:* Gordon and Gotch, Queen street, Brisbane. Circulates throughout the Commonwealth, New Zealand, Gt. Britain, America, France, Germany, etc. *Contents:* General Articles relating to Mining Operations, Mining Machinery, and Ore Treatment; Reprints of Geological Survey Official Reports; Wardens' and Mines Inspectors' Reports; London and Commonwealth Metal Market Quotations; Records of Mining Companies' Output and Operations; Official Mining Statistics concerning Mineral Yields, etc., etc.

Government Mining Journal Special Report—

See also under name of Author.

(1) Red Queen and Black Diamond Mines, near Taromeo. By L.C.B. Vol. 1, p. 198 (1900).
(2) Murphy's Cr. Coal Measures. By W.H.R. Vol. 1, p. 212 (1900).
(3) Coen Goldfield. By W. M. Lee-Bryce, Warden. Vol. 2, p. 130 (1901).
(4) Montalbion and neighbouring Silver-Lead Mines. By T. B. Mackinlay, Inspector of Mines. Vol. 2, p. 131 (1901).
(5) Queensland Goldfields—On the Conditions and Modes of Working. By Wm. Blane. Vol. 2, p. 207 (1901).
(6) Queensland Silver-Lead Mines, Ltd., Lawn Hills. By Messrs. Armstrong and Carter. Vol. 2, p. 329 (1901).
(7) Ravenswood Ore (Refractory), Treatment in England of Lancashire Lass sample by May's Process. Report to Agent-General by Mr. Cornish. Q.G.M.J., vol. 2, p. 406 (1901).
(8) Hamilton and Coen Goldfield. By W. M. Lee-Bryce, Warden. Q.G.M.J., vol. 2, p. 432 (1901).

—— ——, Stanthorpe. *Min.Ref.* Cassiterite, *see* 984.

Grantham (14 miles from). *Par.* Whitestone. *Min.Ref.* Limonite, *see* 5900A.

Graphite. *Syn.*, Plumbago. *Compo.*, Carbon, often containing impurities, such as clay, iron, etc. *Colour*, steel grey, iron black. *Lustre*, metallic. Greasy. *Streak*, black. *H.* = 1-2; *Sp.gr.* = 2·09-2·3. *See map*, Pl. 5.

Geological Note: Pure graphite in workable quantities is unknown in the State, but inferior kinds are not uncommon. At Mt. Bopple a bedded deposit of large extent is found to be suitable for all purposes to which common graphite is applied. It has been formed by the alteration of beds of coal near intrusive rocks. On the Croydon Goldfield the reefs which pass through graphitic granite are often exceedingly rich in gold, and on the Gympie Goldfield reefs coming in contact with slate beds containing graphite are nearly always gold-bearing. *See* G.S.Q. Pub. No. 203 for Mt. Bopple notes.

Statistics: *See tables and diagrams*, Pls. 41, 45, 46-46A, 53.

4603. —— (impure). In sedimentary rocks. *Loc.* Sels. 776 and 777, Par. of Eton, Homebush Hill, about 9 miles S.S.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 203, p. 10 (1906).

4604. ——. *Assoc.with* Gold, in siliceous schist. *Loc.* Carrington's Sel. (32), Coomera R., 38 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward; *Dist.* **Moreton**. *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

4605. ——. In Sandstone. Stanwell Quarry, 16 miles (by rail) S.W.byW. of Rockhampton (Central line). *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

4606 ——. *Assoc.with* Iron Pyrites, Hematite, and Calcite, with traces of Copper, in diorite. *Loc.* Campbell's Reef, Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 179, p. 8 (1902), and G.S.M.

4607. ——. In quartz reef. *Loc.* Columbia and Smithfield Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March; *Dist.* Wide Bay. *Ref.* L.C.B.

4608. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Smithfield United Mine, Gympie Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 45 (1887).

4609. —— (impure). *Assoc.with* Gold. In many of the quartz reefs on the Gympie Goldfield (*ante*).

4610. ——. *Assoc.with* Anthracite Coal, in sedimentary rocks. *Loc.* Mt. Bopple, 3 miles S.E. of Netherby Rail. Stn. (North Coast line). *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pubs. 59, p. 4 (1890), and 203, p. 8 (1906).

4611. ——. An accessory constituent of schistose rocks. Brit. New Guinea (Port Moresby), 380 miles N.byE. of Cooktown. *Ref.* G.S.Q. Pub. 85, p. 31 (1892).

Grassdale, 2 miles E. of Belmont. *See under* Q.G.M.J., Report No. 99A.

Grassmere Station Bore. *See under* Artesian Bores. No. 279.

Grass-stone. *Syn.* Sagenite, *var. of* Quartz containing needles of Rutile. *See under* Rutile.

Grass-tree Cr., trib. of Annan R., S. of Cooktown. *Min.Ref.* Cassiterite, *see* 780.

Grass-tree Goldfield—

Situation: *See maps,* Pls. 14, 15. 17 miles S.byE. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. Centre about *Lat.* 21° 20′ S., *Long.* 149° 25′ E.

Discovery: In 1886.

Proclamation: First (and only one) gazetted, Nov. 14th, 1894, as follows:—Commencing on the sea coast at the south-east corner of portion 1401, and bounded thence on the north by that portion bearing west to portion 949; on the west by that portion bearing south to portion 1137, by that portion east and south to portion 976, and by that portion east and south to Cabbage-tree Creek; on the south by that creek downwards easterly to the south-west corner of Reserve for Public Purposes pro-

Grass-tree Goldfield—*continued:*

claimed in the *Government Gazette* 29th September, 1894, page 693; on the east by the west boundary of that reserve bearing north about thirty-seven chains, by the north boundary of same east to the sea coast, and thence by the sea coast north-westerly to the point of commencement.

Area: 1,328 acres (2$\frac{3}{40}$ sq. miles).

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagrams,* Pls. 36, 46, 46a, 47.

Mineral References: Gold, 4108-4116; Iron (Ironstone) 5585, (Limonite) 5885.

Geological Note: The original rocks appear to have been sandstones and shales. These have been altered and partly replaced by intrusive dykes, the whole of which, sedimentaries and dykes, having subsequently undergone a considerable amount of decomposition. The lodes at the Grass-tree Hill are of large dimensions, being made up of breccia, diorite, kaolin, ironstone, and other rocks, and containing from traces up to several ounces of gold per ton.

Geological Publications: Reports—Nos. 53 (1889) and 93 (1893). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Mackay.

Inspector of Mines: Stationed at Rockhampton.

Green Hills Goldfield—

SITUATION: *See maps*, Pls. 8, 9, 32. The goldfield is 24 miles S.W.byS. of Georgetown, Etheridge Goldfield. *Cos.* Gilbert and Lang; *Dist.* Cook. Centre about *Lat.* 18° 30′ S., *Long.* 143° 15′ E.

DISCOVERY: In 1896.

POPULATION: Included in Etheridge Goldfield return.

AREA: 128,640 acres (201 sq. miles).

PROCLAMATION: First (and only one) gazetted, 23rd April, 1896, as follows:—Commencing on the right bank of the Gilbert River at the south-west corner of the Green Hills No. 8, and bounded thence on the north by the south boundary of that run and a line east about 11 miles; on the east by a line south 10 miles; on the south by a line west to the Gilbert River, by that river upwards to the north-east corner of Green Hills No. 11 Run; again on the south by the north boundary of that run and a line west about 11 miles; on the west by a line north 10 miles; again on the north by a line east to the Gilbert River, and by that river downwards northerly to the point of commencement.

MINERAL STATISTICS: *Included in* "Other Goldfields" *in tables and diagrams*, Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold (alluvial), *see* 3213, 3214, (nugget) 3438, (reef) 3744, 3745; Zircon, 8218.

WARDEN: Stationed at Georgetown.

INSPECTOR OF MINES: Stationed at Croydon.

GEOLOGICAL NOTE: This field has not been geologically examined. No reports have been issued concerning its features.

Greenhill Outcrops Lode. *See* MacFadzen's M.F. 1749.

Green's Cr., trib. of Will's R., Cloncurry. *Min.Ref.* Chrysocolla, *see* 1523; Copper Pyrites, 2204-2207; Covelline, 2375; Iron Pyrites, 5131; Malachite, 6265.

Grindstones. Sandstones suitable for grinding purposes are common in many localities, more particularly in the Ipswich and Burrum Coal Measures. On these fields fine-bedded sandstones occur, equal in abrading properties to any of the material obtained outside the State, and works have recently been established near Helidon to manufacture grindstones by machinery from the sandstone in the vicinity.

Gympie Goldfield—

Situation: *See maps,* Pls. 4, 5, 27. The city of Gympie is 106 miles (by rail) N.byW. of Brisbane, on North Coast Line. *Cos.* Lennox and March; *Dist.* Wide Bay. Centre about *Lat.* 26° 11′ S., *Long.* 152° 30′ E.

Discovery: Alluvial gold was discovered near the site of the Town Hall by Nash in September, 1867, and was first reported on the 17th October of the same year. In November, 1867, the first reef was found in Sailor's Gully, and named the "Lady Mary." Gympie was known as the Currie Diggings when the gold was first found. Platinum was discovered in the alluvial gold workings in Brickfield Gully in 1869.

Railway Base for Yabba and Glastonbury Goldfields, and Neardie Antimony Mines.

Population: 16,171 (Census, 1911).

Rainfall: Yearly average, 1902 to 1907, 43·13 inches. Wet days, 99,

Proclamation of Field: First gazetted, 10th October, 1867; last, 16th July, 1877, as follows:—Commencing at the junction of Glastonbury Creek with the Mary River and bounded on the north-west by a line bearing north 45 degrees east to the Maryborough and Gympie Road; thence by that road north-west by about 255 chains in a direct line to the divisional boundary on Curra Run; thence by that boundary bearing north 26 degrees east about 270 chains to the police boundary; thence on the north by that boundary east 360 chains; thence on the east and north-east by a line bearing south 113 chains; thence by a line bearing south 45 degrees west to watershed of the Mary River; thence by that watershed south-east about 9½ miles in a direct line; thence on the south-east and

Gympie Goldfield—*continued:*

south by a line bearing south 45 degrees west to the Mary River at the 26-mile tree about half a mile below the junction of the 6-Mile Creek; thence by the Mary River upwards to its junction with the 4-Mile Creek; thence on the south by a line bearing west to the watershed separating Pie Creek and the Mary River; and on the south-west by the said watershed north to the junction of Pie Creek with the Mary River; and thence by that river to the point of commencement.

Area: 76,800 acres (120 sq. miles).

Leases: Gold-mining Leases and Applications, 78; area, 1,705 acres. Mineral Leases, 2; area, 28 acres. Miners' Homesteads, 2,698; area, 37,016 acres (1912). For plans of leases in various years *see* list in Annual Reports *under* Dept. of Mines.

Mineral Statistics:

Gold, *see tables and diagrams*, Pls. 36, 46, 46A, 47.
Silver, ,, — Pls. 37, 46, 46A.
Manganese, ,, — Pls. 40, 46, 46A.

Gold, Average Values: Alluvial, Quartz, Cyanide, etc. *See under* Gold.

Statistical Note: Greatest recorded annual gold yield (1903), 147,622 fine oz.; value, £627,058. Smallest recorded annual gold yield (1879), 31,684 fine oz.; value, £134,585. The first annual yield of gold recorded (1878) amounted to 34,248 oz. From 1881 to 1901 the yields of gold fluctuated between 50,000 and 90,000 oz. In 1903 the yield increased to 120,000 oz., and the three years following averaged nearly 117,322 oz. The subsequent six years' yield fell off considerably, and in 1912 the yield was only 39,508 oz. Total yield of gold to end of year 1912 is 2,653,293 fine oz.; value, £11,270,466, equal to 14·98 per cent. of the whole gold production of the State.

Mineral References: **Gold** (alluvial), *see* 3412-3419, (nugget) 3449-3450A, (reef) 4421-4541; Platinum, 7074, 7074A; Silver (Hessite), 4816-4818, (Silver) 7543, 7544; Telluride Ore, 7704, 7705; Lead (Altaite), 3, 3A, (Galena) 3080-3088; Copper (native), 2015; Antimony (Stibnite), 7658, 7659; Molybdenite, 6867; Zinc Blende, 8214, 8215; Manganese (dioxide), 6493-6495A, (Psilomelane) 7105, 7106, (Pyrolusite) 7134, (Rhodenite) 7323A; Cobalt (Asbolane), 124; Arsenic (native), 101-103; Iron (Iron Pyrites), 5457-5467, (Ironstone) 5634, (Mispickel) 6812, (Pyrrhotite) 7165; Coal, 1824; Graphite, 4607-4609. Other Minerals: Actinolite, 4871; Asbestos, 114A; Augite, 143; Calcite, 559; Chlorite, 1469; Felspar, 2649; Hornblende, 4849, 4872A; Jasper, 5649; Magnesite, 5964A.

Geological Note: The rocks in and around Gympie consist of Permo-Carboniferous slates, shales, sandstones, limestones, conglomerates, and tuffs, with inter-bedded and intrusive volcanic rocks. Three defined slate beds are known as the 1st, 2nd, and 3rd series respectively. Between the 1st and 2nd there is a "Greywacke" series, between the 2nd and 3rd "Greenstone," below the 3rd "Diabase" and below this an inconformable series of altered shales, sandstones, conglomerates, etc. On the First Bed there rests a "Conglomerate" series with "Plumbago" bands, and above this, in ascending order, limestones and shales. Gold-bearing reefs traverse the country, but, as a rule, are only productive where they are in contact with slate carrying graphite or anthracite. Marine fossils occur in most of the strata.

Geological Publications: Reports—Nos. 52, 76, 100, 156, 166, 175. *Maps* No. 139. *See under* Geol. Sur. Pub. List for titles. *See also under* Q.G.M.J., Reports Nos. 42, 54. *See also* list of maps *under* Department of Mines Publications. *See also* Supplementary Report List, Nos. 5, 37, 86, 124, 130, 134.

Warden and Inspector of Mines: Both stationed at Gympie.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Drainage Board: Constituted to make proper provision for the drainage of the deep ground, and for the prevention of the flooding of mines by surface water. The Drainage Board report (1895) contains drawings of the dams which have been constructed underground to prevent the flooding of the workings of the whole of the Gympie deep mines in the event of an abnormal rise of the Mary River.

Gympie Goldfield—*continued*:

Drainage Board Areas.—List of mines within the Drainage Board Areas, 23rd February, 1912 (under the prov. of the Mining Act of 1898):—

Northern Drainage Area—

1395—Alliance and Sunburst
893—Australasian
1245—Black's New Zealand
1417—Black's United
1490—Black's United
1292—Block
1480—Bonney, F.C.
1507—Brown, William
1092—Columbia Consolidated
1093—Columbia Consolidated
1106—Columbia Extended
1107—Columbia Extended
1393—Columbia, 3 N.
845—Columbia Smithfield (in part)
1358—Columbia Smithfield
897—Columbia and Smithfield, 1 N.
993—Columbia and Smithfield, 2 N.
1496—Great Northern
1401—Great Northern, 1 N.
1388—Great Western
1486—Jackson, J.
860—Lady Mary, 7 South
1230—Lady Mary, 7 S.
1321—Lady Mary, 7 S.
1364—Lady Mary, 7 S.
1457—Lady Mary, 7 S.
1384—Laing Syndicate
1470—Lewis, A. A.
1047—March and Crown Extended
— —Moodie, D.C.
1481—O'Regan, B.F.
829—Phœnix
834—Phœnix, 1 N.
799—Phœnix, 3 N.
713—Phœnix, 4 N.
1495—Phœnix, 5 N.
817—Phœnix Golden Pile
1055—Phœnix Golden Pile
1462—Smithfield
626—Smithfield North
707—Smithfield, 1 N.
885—Smithfield and Phœnix G.P.
1482 Sym, T. H.
1503—Victory
895—Victory, 1 N.
1461—Victory, 1 N.

Southern Drainage Area—

1459—Barns, A. J.
1467—Barns, J. A.
845—Columbia Smithfield (in part)
579—Glanmire North
1315—Glanmire, 1 N.
1287—Glanmire, 3 and 4 N.
833—Glanmire and Monkland S.
1365—Great Eastern
872—Great Eastern, 1 N.
647—Great Eastern, 1 S.
721—Great Eastern, 2 S.
1347—Great Eastern, 2 S.
1348—Great Eastern, 2 S.
1242—Great Eastern and Orient
1469—Griffiths, W. T.
1367—Monkland 7 and 8 United
1441—Monkland 7 and 8 United
1377—McLeod's New Wilmot
327—Nicholls Lease
206—Oriental Consols
1218—Oriental Consols
1363—Oriental Consols
1463—Oriental Extended
1000—Oriental and Glanmire
1066—Oriental and Glanmire North
1109—Oriental and Glanmire, 1 N.
1412—Oriental and Glanmire, 1 N.
1049—Oriental and Glanmire, 2 N.
1468—Oriental and Glanmire, 2 N.
1027—Oriental and Glanmire, 1 S.
1122—Oriental and Glanmire, E.
1123—Oriental and Glanmire, E.
1247—Phœnix, 2 S.
1257—Phœnix, 2 S.
1033—Scottish Gympie Gold Mines
1225—Scottish Gympie Gold Mines
1327—Scottish Gympie Gold Mines
1328—Scottish Gympie Gold Mines
873—Smithfield, 2 and 3 S.
876—Smithfield, 2 and 3 S.
1485—Webb, A. E.
1378—Wilmot Extended
1456—Wilmot Extended

Gympie Stock Exchange: Sec., Jas. MacDonnell

Gympie Chamber of Commerce and Mines: Sec., P. King.

Gympie Technical College: For mining subjects taught *see under* "Technical Colleges."

Crushing Mills: Fifteen batteries (507 stamps), including some on the outfields. Several idle. Charges, 7s. to 8s. per ton.

General Information: Consult *Pugh's Almanac*, *Queensland Post Office Directory*, *Post and Telegraph Guide*. Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Local Newspapers: *Gympie Times* and *Gympie Truth*. (*Gympie Miner* has stopped publication, but its files contain much useful data about mining matters.)

Gympie G.F. Bores. Ashton's; No. 1 and No. 2; Monkland; and West of Scotland. *See under* Gold Bores.

—— Golden Crown Gold Mine, Gympie Goldfield. *Min.Ref.* Gold, *see* 4449.

—— Mine, Horn Island Goldfield. *Min.Ref.* Gold, *see* 3810; Iron Pyrites, 5094.

—— Road, Caboolture. *Min.Ref.* Beryl, *see* 296.

—— ——. Nr. North Pine Rail. Stn. *Min.Ref.* Kaolin, *see* 5697a.

Gypsey Plains Sub-artesian Bore. *See under* Artesian Bores. No. 269.

Gypsum. *Compo.*, Hyd. sulphate of lime. *Colour*, usually white or colourless. *H.* = 1·5-2. *Sp.gr.* 2·3. *Vars.*, Alabaster (fine-grained and compact), Satin spar (fibrous), Selenite (pearly and crystallised). *Contents* (*max.*), Lime 32 per cent.

GEOLOGICAL NOTE: Bedded deposits of Gypsum occur in Western Queensland in rocks belonging to the Cretaceous System. They are more or less impure and of very limited extent, and are frequently associated with Opal. Other gypsum deposits in the State are usually in the form of veins, one of which, at Mt. Elliott, in the Cloncurry District, has yielded beautifully clear crystals of selenite varying up to six inches in diameter and several feet long.

USES: *See* note under Calcium.

4613. ——. *Assoc.with* Epsomite, in decomposed slate. *Loc.* Gaeta Goldfield, 30 miles N. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* O.R.

4614. ——. As twinned crystals, in alluvial deposits. *Loc.* Cabbage-tree, 40 miles S.W. of Miriam Vale Rail. Stn. (North Coast line), 83 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* L.C.B.

4615. ——. Koorboora Well, Koorboora Rail. Stn. (Chillagoe line), 108 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.**

4616. ——. Winton, 132 miles (by rail) S.S.W. of Hughenden, 368 miles (by rail) S.W.byS. of Townsville (Great Northern line). *Co.* Ayrshire; *Dist.* **Gregory North.** *Ref.* Q.M.

4616A.—— ("Workable thickness, great purity"). *Loc.* Chollarton, nr. Collingwood, about 32 miles W. of Winton Rail. Stn. (Gt. Northern line), 368 miles (by rail) S.W. of Townsville. *Co.* Ayrshire (*ante*). *Ref.* G.S.Q. Pub. 92, p. 401.

4617. ——. In large quantities. *Loc.* Carbine Cr., br. of Diamantina R., 106 miles W.N.W. of Windorah. *Co.* Currawilla; *Dist.* Gregory North. *Ref.* B.D.

4618. ——. *Assoc.with* Opal, in ferruginous rock. *Loc.* Opalton Mineral Field, 60 miles S.S.W. of Winton Rail. Stn. *Co.* Fermoy; *Dist.* Gregory North. *Ref.* G.S.M.

4619. ——. In sandstone. Richmond Downs, 69 miles W.byN. of Hughenden Rail. Stn. (Northern line). *Co.* Rupert; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 10, p. 2 (1885).

4620. ——. *Assoc.with* Gold, Iron Pyrites, Calcite, and Chalcedony, in quartz. *Loc.* North Australian Reef, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 4, pp. 36, 72 (1887).

4621. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc Blende, Calcite, and Chlorite, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879); P.R.S.Q., vol. 4, pp. 36, 47 (1887); G.S.M., and W.C.T.

4622. ——. Top of Tableland, near Houghton Valley, 49 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 2, p. 34 (1879).

4623. ——. In quantities. *Loc.* Rosebrook Station, Mayne R., trib. of Diamantina R., 117 miles W. of Longreach Rail. Stn. (Central line). *Co.* Rosebrook; *Dist.* Kennedy North. *Ref.* B.D.

4624. ——. *Assoc.with* Chrysocolla, Pyrolusite, Galena, Cerussite, and Calcite, in garnet rock. *Loc.* Mt. Moss S. Lease (168), (Elsie Shaft), Kangaroo Hills Mineral Fields. *Co.* Wairuna; *Dist.* Kennedy North.

4625. ——. *Assoc.with* Copper carbonate. *Loc.* Jack's Cr., Bowen R., 55 miles S.byW. of Bowen. *Co.* Drake; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 4, p. 24 (1879).

4626. ——. *Assoc.with* Copper carbonate. *Loc.* Low Ridge, E. of Jack's Cr. (*ante*). *Ref.* G.S.Q. Pub. 4, p. 24 (1879).

4627. ——. As twin-crystals, at contact of granite and sedimentary rock. *Loc.* near Sunbeam Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South (*ante*). *Ref.* G.S.M.

4628. ——. As penetration-twin crystals. Isabella Claim, Mt. Wyatt Goldfield, 60 miles S.S.E. of Ravenswood. *Co.* Sellheim (*ante*). *Ref.* G.S.M.

4629. ——. In patches in coal measures. *Loc.* near Balmoral Brick Works, Bulimba Cr., 7 miles E.byN. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* B.D.

4630. ——. Redbank, Woogaroo Cr., 17 miles (by rail) S.W.byS. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.M.

4631. Gypsum (pink). Calliope River, 10 to 24 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.M.

4632. ——. Half a mile W.N.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (North Coast line). *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

4633. ——. **Alabaster** (*var.*). Winton, 132 miles S.S.W. of Hughenden Rail. Stn., and 368 miles (by rail) S.W.byS. of Townsville (Great Northern line). *Co.* Ayrshire; *Dist.* Gregory North. *Ref.* Q.M.

4634. —— ——. Calliope R., from 10 to 24 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* Q.M.

4635. ——. **Satin Spar** (*var.*). Mt. Gregory, nr. Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.M.

4636. —— ——. In sandstone caves. "Amphytheatre" at Glen Houghton, Upper Dawson River, 35 miles N.W. of Taroom. *Co.* Labouchere; *Dist.* Leichhardt. *Ref.* B.D.

4637. —— ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Hematite, Magnetite, Limonite, Göthite, and Pyrolusite, in vesicular quartz, quartzite, and kaolin. *Loc.* Mt. Morgan Mine, Mt. Morgan Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), and 132 (1898).

4638. ——. **Selenite** (*var.*) Hughenden, 236 miles (by rail) S.W.byS. of Townsville. *Co.* Douglas; *Dist.* Burke. *Ref.* G.S.M.

4638A. —— ——. *Assoc.with* Gold, Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptose, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, and Chlorite, in quartz, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 219, 224 (1908).

4639. —— ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Malachite, Azurite, Manganese-dioxide, and Hematite. *Loc.* Griffith Mine, Julia Cr., 2 miles S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), 134, p. 11 (1898), and G.S.M.

4640. —— ——. *Assoc.with* Iron Pyrites, in shale. *Loc.* Silver Spur Mine, near Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 150, p. 14 (1900).

4641. —— ——. Winton, 132 mles (by rail) S.S.W. of Hughenden, 368 miles (by rail) S.W.byS. of Townsville (Great Northern line). *Co.* Ayrshire; *Dist.* **Gregory North.** *Ref.* Q.M.

4642. —— ——. As large clear crystals, sometimes several feet long and several inches thick. *Assoc.with* Native Copper and Copper Pyrites, in vughs. *Loc.* Mt. Elliott Copper R.C. (No. 3, etc.), Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.M.

4643. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Old Warrior Reef, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

4644. —— ——. *Assoc.with* Copper carbonate. *Loc.* Manchester Reef, Marengo Goldfield, 30 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

4645. —— ——. Peak Downs (Clermont) Goldfield, 229 miles (by rail) W.byN. of Rockhampton (Central line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.M.

4646. —— ——. In excavation at gasworks. *Loc.* Bulimba Road, Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* Q.M.

4647. —— ——. *Assoc.with* Copper Pyrites, Iron Pyrites, in veins. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* **Port Curtis.** *Ref.* B.D.

4648. —— ——. Bingera, 52 miles E. of Thargomindah, 59 miles W. of Cunnamulla Rail. Stn. *Co.* Wellington; *Dist.* **Warrego.** *Ref.* B.D.

Gypsy King Tin Mine, Kangaroo Hills Mineral Field. *Min.Ref.* Cassiterite, *see* 1153A.

—— Reef, left-hand br. of Palmer R., Palmer Goldfield. *Min.Ref.* Gold, *see* 3683A.

Haddon (Ten Mile) Bore. *See under* Artesian Bores. No. 363.

—— Co. Gregory South Dist. *See map*, Pl. 18.

Haddon's Bore. *See under* Artesian Bores. No. 229.

Hadleigh Castle Mine, Rochford, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4034.

—— —— Tin Mine, Herberton. *Min.Ref.* Cassiterite, *see* 1091.

Hæmatite. *Syn.* Hematite, *which see.*

Half-moon Sub-artesian Bore. *See under* Artesian Bores. No. 154.

Haighmoor Colliery, North Ipswich Coal Area. Mining operations commenced here in 1865. *Min.Ref.* Coal, *see* 1740.

Hail Cr., trib. of Bee Cr., W.byS. of Mackay. About *Lat.* 21° 26′ S.; *Long.* 140° 27′ E. *Min.Ref.* Coal, *see* 1701.

—— and Cooper's Creeks (flat between), 60 miles S.byW. of Mackay. *Min.Ref.* Opal (wood), *see* 7009.

Halifax Bay, 36 miles N.W. of Townsville. About *Lat.* 18° 55′ S.; *Long.* 146° 30′ E. *Min.Ref.* Bismuth (ore), *see* 355; Bismutite, 405; Molybdenite, 6859.

Halite. *Syn.* Rock salt, common salt. *Compo.*, Chloride of sodium. *Colour*, white, reddish, colourless. *Taste*, saline. *H.* = 2·5. *Sp.gr.* = 2·1-2·2. *See* notes under Salt Manufacture.

USES: *See* note under Sodium.

4649. ——. As surface deposits. Albert River, Burketown, Gulf of Carpentaria. *Co.* Porchester; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 180, p. 13 (1902).

4650. ——. As incrustations on decomposed intrusive dyke rock. *Loc.* Roger's No. 1 and other mines on the Golden Gate line of Reef, 4 miles N.W. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

4651. ——. As an incrustation. Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* **Burnett.** *Ref.* B.D.

4652. ——. Upper Burnett, about 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 55 (1887).

4653. ——. Impregnating kaolin. *Loc.* Cork Stn., Diamantina R., 80 miles S.W. of Winton. *Co.* Rosebrook; *Dist.* **Gregory North.** *Ref.* G.S.M.

4654. ——. In cubical crystals. *Loc.* Herbert R., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* Q.M.

4655. ——. In mineral water. Nettle or Innot Hot Springs, 8 miles E.byN. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 60 (1900).

4656. ——. Sylvester Creek, trib. of Herbert R., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 55 (1887).

4657. ——. In sandstone. Bohle R., 7 miles W. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 55 (1887).

4657A. ——. Lake Buchanan, about 80 miles S.S.E. of Pentland Rail. Stn. (Northern Rail. line). *Co.* Albany; *Dist.* **Kennedy South.** *Ref.* G.S.M.

4657B. ——. Lake Galilee, 50 miles N.E. of Aramac. *Co.* Gayundah. *Dist.* Mitchell.

4657C. ——. Lake west of Lake Philippi, near Western border of the State. *Lat.*, 24° 15′. *Co.* Eyre; *Dist.* Gregory North.

4657D. ——. Lake near Lake Muncoonie, near Western border of the State. *Lat.*, 25° 10′. *Co.* Weramo; *Dist.* Gregory South.

4658. ——. In vesicular basalt. *Loc.* Bundamba, 21 miles (by rail) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* P.R.S.Q., vol. 4, p. 55 (1887).

4659. ——. *Assoc.with* Atacamite, in friable sandstone. *Loc.* Moonmera Copper Mines, near Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 195, p. 27 (1904).

Half-moon Sub-artesian Bore. *See under* Artesian Bores. No. 154.

Hall Sound (Delena), Brit. New Guinea. *Min.Ref.* Limestone (coralline), *see* 727.

Halliday's Reef, Canoona Goldfield. *Min.Ref.* Gold, *see* 4315A.; Iron Pyrites, 5398A.

Halloysite. *Compo.*, Hyd. silicate of alumina. *Colour*, usually whitish. *Lustre*, rather waxy. Translucent in water. *H.* = 1-2. *Sp.gr.* = 1·8-2·4

4660. ——. Nigger Cr., br. of Wild R., 3 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

4661. —— (green), in basalt. Battery Well, Deep Ground, Black Ridge, 12¾ miles N.byW. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q., Pub. 201, p. 109 (1906).

4662. ——. In basalt. Junction of Dawson and Dee Rivers, 56 miles S.S.W. of Rockhampton. *Co.* Kimberley; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 21 (1901), and G.S.M.

4663. ——. Sherwood, 7 miles (by rail) S.byW. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* G.S.M.

4664. ——. Near Taringa Rail. Stn., 4 miles S.S.W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* Q.M.

Halpin's Camp, Irvinebank. *Min.Ref.* Cassiterite, *see* 864.

—— Cr., br. of California Cr. *Min.Ref.* Antimony, *see* 72; Cassiterite, 1080; Copper (ores), 2031; Silver, 7460.

Hambleton Plantation, 7 miles S.S.W. of Cairns. *Min.Ref.* Psilomelane, *see* 7085.

Hamburg Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4510.

Hamilton, nr. Brisbane. Post Tertiary Fossils. G.S.Q.P. 150, p. 15 (1899).

Hamilton Bore. *See under* Artesian Bores. No. 432.

—— (W.B.) Bore. *See under* Artesian Bores. No. 168.

—— Co. Gregory North Dist. *See map*, Pl. 20.

—— Downs Bores. *See under* Artesian Bores. No. 284.

—— Creek Group of Copper Mines, Cloncurry. *Includes* Manxman, Mt. Olive, Gipsy's Warning, May Queen M. Leases, and Yamamilla M. Freehold. *Min. Ref.* Copper carbonate, *see* 1870.

Hamilton Goldfield—

Situation : *See maps*, Pls. 8, 9. The township of Ebagoolah is about 33 miles (by road) W. of Port Stewart, and 173 miles N.W.byW. of Cooktown. *Co.* Coen; *Dist.* Cook. *Lat.*, 140° 5′; *Long.*, 143° 15′.

Discovery : Gold discovered by John Dickie at Ebagoolah, January, 1899.

Population : 101 (estimated, 1910).

Proclamation of Field : First gazetted, 2nd January, 1900; last alteration, 13th July, 1900, as follows, viz. :—The whole catchment area of the Lukin River from a gum-tree marked broad arrow over Y1 on the eastern boundary of Yarra No. 1 Block to the east.

Area : 528,640 acres (826 sq. miles).

Leases : Gold-mining Leases and Applications in force—4; area, 40 acres; 1912. Miners' Homesteads and Applications—42; area, 38 acres; 1912.

Principal Mining Centres : Yarraden, Ebagoolah, Potallah Cr., which also include Corbett's Gully, Dickie's P.C. Gully, Dick's Gully, Gold Mt. Gullies, Good Luck Gully, Hit-or-Miss Gully, Jackson's Gully, Looking Glass Hill, Nuggety Gully, Peterson's Gully, Queensland Gully, Ross's Well Gully, Slaughter-yard Gully, Steele's Gully, Tasmania Gully, and The 4-Mile.

Mineral Statistics : Gold, *see tables and diagram*, Pls. 36, 46-46A, 47.

Statistical Notes : Greatest recorded annual gold yield (1900), 8,300 fine oz.; value, £35,256. Smallest recorded annual gold yield (1901), 750 fine oz.; value, £3,186. Hamilton is one of the latest discovered goldfields, but the yields of gold have become less and less every year. The total yield to end of year 1912, 43,945 fine oz.; value, £186,667. This is equal to 0·25 per cent. of the whole gold production of the State.

Mineral References : Gold (alluvial), *see* 3210, 3211, (reef) 3700-3712; Lead (Galena), 2740-2741A, (Massicot) 6525; Iron (Hematite), 4705, (Ilmenite) 4891, (Iron Pyrites) 5030-5033, (Limonite) 5839, (Mispickel) 6679. Other Minerals—Hypersthene, 4878; Sillimanite, 7423; Talc, 7673.

Hamilton Goldfield—*continued:*

GEOLOGICAL NOTE: The prevailing rocks are schists and granites, the former probably being metamorphosed sedimentary rocks, the latter occurring as intrusive dykes. Diorite is also present in the vicinity. Quartz "blows" are common throughout the locality, but the gold-bearing quartz reefs are confined to a zone near the junction of the schists with the granites.

GEOLOGICAL PUBLICATIONS: Reports Nos. 163 (1901) and 209 (1907). *See under* Geol. Surv. Pub. List. for titles; *see also under* Govt. Mining Jour., Report No. 8.

WARDEN: Stationed at Cooktown. INSPECTOR OF MINES: Stationed at Croydon.

CRUSHING MILLS: Three Batteries (25 Stamps). Charges, 20s. per ton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

GENERAL INFORMATION: Consult *Pugh's Almanac; Queensland Post Office Directory; Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Hamilton King Reef, Hamilton Goldfield. *Min.Ref.* Gold, *see* 3703.

—— River, 144 miles S. of Cloncurry. *Min.Ref.* Opal (precious), *see* 6939.

GEOLOGICAL NOTE: The rocks consist of sandstone, etc., of Rolling Downs Formation (Lower Cretaceous), on which there rest outliers of Desert Sandstone (Upper Cretaceous). To the N.W. these formations overlie metamorphic rocks of Silurian Age. *See* G.S.Q. Pub. No. 159 for notes.

Hamlet Downs Bores. *See under* Artesian Bores. No. 285.

Hamly's Well Sub-artesian Bore. *See under* Artesian Bores. No. 288.

Hammond Island, Torres Straits. *Min.Ref.* Gold, *see* 3803; Iron Pyrites, 5087A.

Hammond's Opal Mine, Keeroongooloo Run. *Min.Ref.* Opal (precious), *see* 6946A.

Hampden (Friezland), Cloncurry. *See* Pl. 23. *Includes* Hampden and Monitor Group of Copper Mines, *which see.* Smelting Works: *See under* Smelting Works in Queensland.

Hampden Group of Copper Leases, Cloncurry. *Min.Ref.* Calcite, *see* 457; Chlorite, 1424; Chrysocolla, 1502; Copper Ore, 2018; Copper Pyrites, 2084; Cuprite, 2399-2401; Graphite, 4572; Hematite, 4685; Iron Pyrites, 4924A; Kaolin, 5671; Limonite, 5766-5769; Malachite, 6123-6125; Redruthite, 7229-7231; Tenorite, 7711.

—— M.Ls. (244, 245, etc.), Cloncurry. *Min.Ref.* Chrysocolla, *see* 1502; Copper Ore, 2018; Copper Pyrites, 2084; Cuprite, 2400, 2401; Graphite, 4572; Iron Pyrites, 4924A; Kaolin, 5671; Malachite, 6124; Redruthite, 7229, 7230; Tenorite, 7711.

—— Mines Sub-artesian Bore. *See under* Artesian Bores. No. 286.

—— S. M.L. (502), Hampden Group, Cloncurry. *Min.Ref.* Limonite, *see* 5768; Malachite, 6125.

Hampden, 20 miles N.W. of Mackay. *Min.Ref.* Coal, *see* 1646; Zircon, 8223.

GEOLOGICAL NOTE: The coal measures in this locality belong to the Lower Bowen Formation (Permo-Carboniferous) and contain seams of an inferior anthracite, but they have been much disturbed by intrusions of volcanic rocks and by granite. *See* G.S.Q. Pub. No. 164 for details.

Hann Co. Cook Dist. *See map,* Pl. 8.

Hannah's Silver-Lead Lode, Chowey Cr. *Min.Ref.* Galena, *see* 2717; Gold, 3568; Iron Pyrites, 4971A; Lead, 5723; Magnetite, 5975; Silver, 7435.

4692. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Graphite, in quartz. *Loc.* King of Croydon Reef, 6 miles S.E.byE. of Croydon Rail Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 7 (1887).

4693. —— (yellow). *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Sovereign No. 1 Mine (Post Hole Reef), ¾-mile N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

4694. ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Redruthite, Malachite, Iron Pyrites, Magnetite, and Limonite, in schist and quartz. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, E. of Coppermine Cr., 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), 215, pp. 334, 335 (1908).

4695. ——. *Assoc.with* Copper Ores, in lode in clay shales. *Loc.* Mt. Oxide, nr. Gunpowder Cr., 109 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Assay:* Copper = 28 per cent.; Silver = 1½ oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 153, p. 9 (1900).

4696. ——. *Assoc.with* Gold, Iron Pyrites, Magnetite. Mispickel, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote. *Loc.* Biggeenden Bismuth Mine, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pubs. 60 (1890), 173 (1902), and 194 (1904).

4697. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Tenorite, Malachite, Iron Pyrites, Pyrrhotite, Mispickel, Hematite, Bismuthinite, Zinc Blende, and Calcite, in quartz reef. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

4698. —— (micaceous). *Assoc.with* Native Bismuth, Bismuthinite, Calcite, and Limestone. *Loc.* Don Jon Mine, nr. Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* B.D.

4699. —— (earthy). *Assoc.with* Gold and Bismite. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 25, p. 1 (1886), P.R.S.Q., vol. 4, p. 39 (1887), and G.S.M.

4700. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* ½-mile E 30 degrees N. of Black Watch Reef, Scrub Paddock Diggings, 13 miles N.N.E. of Nanango, 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 29, p. 4 (1886).

4701. ——. *Assoc.with* Limonite. *Loc.* Cabbage-tree Cr., br. of Splinter Cr., Dawes Range, about 40 miles N.N.W. of Mt. Perry Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 194, p. 31 (1904).

4702. ——. *Assoc.with* Gold, Cuprite, and Stibnite, in quartz reef. *Loc.* Lady Augusta Lease (45), Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pubs. 102, p. 4 (1895), 160, pp. 6-11 (1901).

4702A.——. *Assoc.with* Limonite, in quartz. *Loc.* 6 miles from Eidsvold Township, about 41 miles N.W. of Gayndah Rail Stn. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 43, p. 1 (1887).

4703. —— (micaceous). Rosslyn Stn., 14 miles W. of Mt. Perry Rail. Stn. *Co.* Yarrol (*ante*) *Ref.* G.S.M.

4704. Hematite. *Assoc.with* Gold, in quartz reef. *Loc.* Anglo-Saxon 1 W., Limestone, 60 miles S. of Laura Rail. Stn. (Cooktown line). *Co.* Chelmsford; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 46, p. 1 (1889).

4705. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. All Nations' Reef, Ebagoolah, Hamilton Goldfield, 33 miles W. of Port Stewart. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 5 (1901).

4706. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* B.B. Reef, McLeodsville, 25 miles N. of Dimbullah Rail. Stn. (Cairns line), Hodgkinson Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 26 (1884).

4707. ——. In lode. Einasleigh R., 10 miles from Einasleigh Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. *Ref.* O.R.

4708. ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in quartz. *Loc.* Caledonia Reef, Caledonia Cr., trib. of Goldsmith's Cr., 9 miles S.E. of Charleston Rail. Stn. Etheridge line). *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

4709. ——. Potosi Mine, Irvinebank, 10 miles S.W. of Stannary Hills Rail. Stn. (br. Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Analysis*: Moisture = 1·82 per cent.; Water in Combination = 10·24 per cent.; Peroxide of Iron = 71·01 per cent.; Silica = 15·80 per cent.; Alumina = 3·00 per cent.

4710. ——. *Assoc.with* Cuprite, Tile Ore, Tenorite, Malachite, Azurite, Chrysocolla, and Magnetite. *Loc.* Boomerang Copper Mine, Marble Cr., 1 mile W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), 119, p. 36 (1897), and G.S.M.

4711. —— (pure). *Assoc.with* Copper carbonate. Boomerang Mine (west of), Marble Cr. (*ante*). *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

4712. ——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, and Minium. *Loc.* Mollie Lease, Marble Cr. (*ante*). *Assays*: *See* No. 2435. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

4713. ——. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Bornite, Tetrahedrite, Tenorite, Malachite, Atacamite, and Iron Pyrites, in quartz and felspar lode. *Loc.* Ruddygore Mine, 2 miles N.E. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 7 (1891), and 134, p. 10 (1898).

4714. ——. *Assoc.with* Minium, Cerussite, and Anglesite. *Loc.* Excelsior Mine, Dargalong, 7 miles S. of Zillmanton Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

4714A. ——. *Assoc.with* Cassiterite and Wolfram. *Loc.* Gurrumba, Reid's Cr., br. of Emu Cr., 2 miles S. of Emuford, 12 miles S. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 47 (1906).

4715. ——. *Assoc.with* Magnetite, Limestone, Chert, Garnet, Wollastonite, and Epidote. *Loc.* Mt. Lucy, 4 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 134, p. 16 (1898), and 196, pp. 6-8 (1905).

4716. ——. *Assoc.with* Limonite and Cerussite. *Loc.* Girofla Mine, Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 12 (1898).

4717. ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Malachite, Azurite, Manganese-dioxide, and Selenite, in lode. *Loc.* Griffith Lease, Julia Cr., 2 miles S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), and 134, p. 11 (1898).

4718. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Galena, Cerussite, Minium, Zinc Blende, and Garnet, in quartz. *Loc.* Penzance Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

4719. ——. *Loc.* Red Hills, Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 56 (1900).

4720. ——. *Assoc.with* Tenorite and Copper carbonate. *Loc.* Oruba Mine, 2 miles E. of Zillmanton Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 9 (1898).

4720A. ——. *Assoc.with* Copper Pyrites, Bornite, Redruthite, Malachite, Azurite, Limonite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mossman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

4721. ——. *Assoc.with* Gold, in quartz. *Loc.* Meyer's Leader, Mareeba Goldfield, 5 miles S.E. of Mareeba Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 97, p. 6 (1894).

4722. ——. Russell Goldfield, 15 to 20 miles W.N.W. of Geraldton. *Co.* Nares (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 56 (1900).

4723. —— (massive). Gilberton, 48 miles S.byE. of Charleston Rail. Stn. (Etheridge Goldfield). *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

4724. ——. *Assoc.with* Limestone, in sedimentary rocks. *Loc.* 5 miles up Percy R., br. of Gilbert R., 41 miles S. of Charleston Rail. Stn. (Etheridge line). *Co.* Victor (*ante*). *Ref.* G.S.Q. Pub. 151, p. 2 (1900).

——. *See further* Walsh and Tinaroo references, No. 4728, etc.

4724A. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, and Manganese-dioxide, in quartz. *Loc.* Glenelg Reef, nr. Oakey Cr., 9 miles E. of Glenelg Head Stn., 55 miles (by road) W.S.W. of Warwick. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 40, pp. 1, 2 (1887).

4725. ——. *Assoc.with* Magnetite. *Loc.* Pike's Cr., nr. Stanthorpe Township. *Co.* Bentinck (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

4726. ——. Slade Vale, nr. Warwick, 169 miles (by rail) S.W. of Brisbane (main line). *Co.* Merivale; *Dist.* Darling Downs.

4727. ——. In large quantities. Thane's Cr., 24 miles W. of Warwick. *Co.* Merivale (*ante*). *Ref.* B.D.

4728. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Grand Junction Tin Mine, Coolgarra, 11 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

4729. ——. *Assoc.with* Cassiterite and Limonite, in quartz. *Loc.* Magdala Tin Mine, Magdala Hill, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

4730. ——. *Assoc.with* Cassiterite and Penninite, in quartz lode. *Loc.* Tasmania Tin Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

4731. ——. *Assoc.with* Cassiterite, Wolfram, Iron Pyrites, Göthite, Limonite, Mispickel, Penninite, Azurite, Malachite, Websterite, Chlorite, Topaz, and Fluorspar, in quartz. *Loc.* In the Tin Mines, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

4732. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Magnetite, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Mispickel, Zinc Blende, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Mt. Garnet, Return Cr., Wild R., 136 miles (by rail) S.W. of Cairns. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

——. *See further* Walsh and Tinaroo references, No. 4709, etc.

4733. ——. *Assoc.with* Limonite, Malachite, Azurite, Tetrahedrite, Galena, and Mimetite, in lode. *Loc.* Mt. Garnet (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

4734. ——. *Assoc.with* Gold, Iron Pyrites, Magnetite, Limonite, Chalcanthite, Manganese-dioxide, and Talc, in porphyritic rock. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pubs. 18, pp. 1, 2 (1885), and 73, p. 13 (1891).

4735. ——. *Assoc.with* Gold, Iron Pyrites, and Pyrrhotite (?), in lode. *Loc.* Greasy Bill's Reef, Pyramids or Seventy-mile Diggings, 3½ miles N.N.E. of Mt. Leyshon, 19½ miles (by road) S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pub. 1, p. 19 (1879).

4736. ——. *Assoc.with* Gold, Iron Pyrites, Malachite, and Garnet, in calcite. *Loc.* Hein's Lode, Limestone Range, W. of Double Barrel Cr., 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 77, p. 7 (1891).

4737. ——. Pandanus Cr., nr. Pentland Cr., Cape R. Goldfield, 66 miles (by rail) S.W.byS. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* B.D.

4738. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Union Reef, between Mt. Davenport and Davenport Cr., 4 miles N.W. of Cape R. Rail. Stn. (Gt. Northern line), Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 2 (1891), and G.S.M.

4739. ——. In quartz. Tableland, nr. Lake Lucy, Upper Burdekin, 54 miles S.W.byW. of Cardwell. *Co.* Gunawarra; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 4 (1891).

4740. Hematite. *Assoc.with* Gold, Cuprite, and Malachite. *Loc.* Copper King Mine, $1\frac{1}{2}$ mile from Lamington Mine, Happy Valley, $41\frac{1}{2}$ miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay:* Gold = 1 dwt. 13 gr. per ton, Copper = 2 per cent. *Ref.* A.R., p. 62 (1906).

4741. —— (micaceous). *Assoc.with* Iron Pyrites and Copper Pyrites. *Loc.* Lamington Mine, head of Lah-di-dah Cr., Happy Valley (*ante*). *Ref.* O.R.

4742. ——. *Assoc.with* Gold, Silver, Cuprite, and Malachite. *Loc.* Mt. Cavanagh, Mare's Nest Cr., Normanby Road, 44 miles S.S.E. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay: See* 2459. *Ref.* A.R., p. 60 (1906).

4743. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Ellen Boss Reef, Dreghorn Diggings, $4\frac{1}{2}$ miles from Burdekin River, 15 miles S. of Ravenswood. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

4744. ——. In quartz lode. *Loc.* Biscuit Cr., Upper Burdekin, below Kangaroo Hills Stn., 40 miles S.W. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 10 (1891).

4745. ——. *Assoc.with* Native Silver, Galena, Cerussite, Malachite, Chrysocolla, Mispickel, Zinc Blende, and Manganese-dioxide, in lode. *Loc.* Hidden Treasure Lease (165), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna (*ante*). *Assays: See* No. 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), and 82, p. 7 (1892).

4746. ——. *Assoc.with* Limonite, Azurite, and Malachite, in lode. *Loc.* Iron Mountain, N. of Donnybrook, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 10 (1891).

4747. ——. *Assoc.with* Iron Pyrites, Limonite, Cassiterite, Malachite, and Azurite, in quartz. *Loc.* M.L. (40 acre), in gully, Douglas Cr., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

4748. ——. *Assoc.with* Galena, Cerussite, and Copper carbonate, in gossan. *Loc.* Mt. Brown Lease (183), Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Lead = 10·5 per cent., Silver = 8 dwt. 4 gr. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

4749. ——. *Assoc.with* Minium, Cerussite, Chrysocolla, Copper carbonate, and Zinc Blende, in gossan lode. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assays:* Silver (1) = 16 oz., (2) = 2 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

4750. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

4751. ——. *Assoc.with* Zinc Blende, in copper-stained quartz. *Loc.* Victory Lease (185), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

4752. ——. *Assoc.with* Galena, Cerussite, Copper Pyrites, Bornite, Tile Ore, and Mispickel, in lode. *Loc.* Wallaroo Lease (162), nr. Running Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 3 oz. 13 dwt. 12 gr. per ton, Copper = 1·7 per cent. *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

4753. ——. *Assoc.with* Malachite. *Loc.* Lady Annie Silver Mine, Argentine (Star River) Silver Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assay:* Silver = 186 oz. per ton., Lead = 69 per cent. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

4754. ——. *Assoc.with* Minium, Anglesite, and Galena, in quartz. *Loc.* Struck Oil Lode, Argentine (Star River) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

4755. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Thermopylae Reef, Argentine (Star R.) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

4756. ——. *Assoc.with* Wolfram, Stilbite, Mica, and Garnet, in lode. *Loc.* Eungella Stn., Broken R., 30 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

4757. ——. In quartz leaders. *Loc.* Kelvin Grove Silver Mines, Kelvin Grove, 32 miles S.S.E. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

4758. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bismutite, and Mispickel, in quartz veins. *Loc.* Gold Workings, Mine Cr., nr. Black Waterhole Cr., 24 miles S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

4759. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 5, p. 10 (1879).

4759A.—— (earthy). *Assoc.with* Azurite and Malachite, in quartz. *Loc.* O'Brien's Mine, Pine Vale Cr., 34 miles (by rail and road) S.W.byS. of Mackay, Mt. Spencer Gold and Mineral Field. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), and 229, pp. 18, 19 (1910).

4760. —— Seaforth Estate, about 20 miles N.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* L.C.B.

4761. ——. Miclere Diggings, 20 miles N.byW. of Clermont. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 27, p. 1 (1886).

4762. ——. *Assoc.with* Gold, Copper Pyrites, Cuprite, Malachite, Azurite, Native Bismuth, Bismuthinite, Bismutite, Bismite, Galena, Manganese-dioxide, and Ironstone, in lode. *Loc.* Daisy Bismuth Mine, 3 miles E. of Eukalunda, 92 miles S.W.byS. of Bowen, Sellheim Mineral Field. *Co.* Sellheim; *Dist.* Kennedy South. *Assay:* Bismuth = 33·76 per cent. *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

4763. ——. *Assoc.with* Copper Pyrites, Manganese-dioxide, Bismite, and other Bismuth Ores, in lode. *Loc.* Eukalunda Bismuth Mine, 3 miles E. of Eukalanda (*ante*). *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

4764. ——. Containing Gold in a large siliceous body, in slate country. *Loc.* Leviathan Mine, Clermont Goldfield, 229 miles (by rail) W.byN. of Rockhampton (Central line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* B.D.

4765. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Pumpkin's Claim, Deep Ground, Black Ridge, 12¾ miles N.byW. of Clermont (*ante*). *Ref.* G.S.Q. Pub. 201, p. 126 (1906).

4766. ——. *Assoc.with* Gold, Copper Oxide, Copper carbonate, and Manganese-dioxide, in gossan lode. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 27, p. 7 (1886).

4767. ——. *Assoc.with* Gold and Limonite, in gossan. *Loc.* Stewart and Spier's Mine, Mt. Clifford, between Retreat and Ruby Creeks, 9½ miles N.W. of Anakie Rail. Stn. (Central line). *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 127, p. 3 (1898).

4768. ——. Peak Vale Stn., 18 miles S.S.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* B.D.

4769. ——. *Assoc.with* Gold and Limonite, in slates. *Loc.* N. of Policeman Cr., 9 miles N. of Anakie Rail. Stn. (Central line). *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 172, p. 4 (1902).

4769A.——. *Assoc.with* Malachite and Chrysocolla, in granite. *Loc.* Brown's M.F. (1807), Native Youth P.P.A. (129), and Paddock Workings, Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, pp. 21, 39 (1910).

4769A1.——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in quartz. *Loc.* Ballyhooley Claim, 5 miles from Mt. Flora Freehold, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* A.R., p. 243 (1910).

4769B. ——. *Assoc.with* Malachite, Azurite, and Manganese-dioxide, in granite. *Loc.* Emperor P.P.A. (320), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 25 (1910).

4769C.——. *Assoc.with* Malachite, Azurite, and Mispickel (?), in slate. *Loc.* Fitzgerald's M.F. (1408), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 26 (1910).

4769D.——. *Assoc.with* Iron Pyrites, Copper Pyrites, Malachite, and Azurite, in granite. *Loc.* Iron Duke M.C. (42), and Painted Peak M.F. (1807), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27, 39 (1910).

4769E.——. *Assoc.with* Iron Pyrites, Copper Pyrites, Malachite, and Azurite, in gossan, in slate. *Loc.* Laird of the Hills M.L. (32), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 30, 31 (1910).

4769F.——. *Assoc.with* Iron Pyrites, Limonite, Redruthite, Malachite, and Azurite, in granite. *Loc.* Monarch P.P.A. (116, etc.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

4769G.——. *Assoc.with* Iron Pyrites, Pyrrhotite, Limonite, Magnetite, Copper Pyrites, Malachite, and Azurite, in granite and slate. *Loc.* Roger's Back Sel. M.F. (1430), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

4769H.——. *Assoc.with* Mispickel and Malachite, in gossan in granite. *Loc.* True Blue M.L. (29), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 43, 44 (1910).

4770. ——. As pseudomorphs, after Iron Pyrites. *Loc.* Yatton Goldfield, 21 miles S.W.byW. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* P.R.S.Q., vol. 4, p. 57 (1887).

4771. Hematite. *Assoc.with* Copper Pyrites, Tenorite, Malachite, and Azurite. *Loc.* Mt. Orange Copper Mines, 75 miles S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* P.R.S.Q., vol. 4, pp. 52, 77 (1887).

4772. ——. Caboolture, 31 miles (by rail) N. of Brisbane (North Coast line). *Co.* Canning; *Dist.* **Moreton.** *Ref.* O.R.

4773. ——. Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* O.R.

4774. ——. *Assoc.with* Chlorite and Calcite. *Loc.* Caboonbah, Brisbane R., 12 miles N.N.E. of Esk Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* G.S.M.

4775. —— (massive, impure). *Loc.* Wivenhoe, Brisbane R., about 6 miles N.E.byN. of Fernvale Rail. Stn. (Brisbane-Valley line), 45 miles (by rail and road) W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.M.

4776. ——. Pine Mountain, 7 miles (by rail) N.N.W. of Ipswich (Brisbane-Valley line), 31 miles (by rail) W.S.W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 194, p. 53 (1904).

4777. —— (pure). Por. 140, Par. of Dixon, 13 miles E. of Esk Rail. Stn. (Brisbane-Valley Br. line), 80 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 194, p. 57 (1904).

4777A.——. *Assoc.with* Gold and Silver. *Loc.* Dundas, 16 miles N.N.W. of Ipswich. *Co.* Stanley (*ante*). *Ref.* A.R., p. 316 (1911).

4778. ——. Beenleigh, 24 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 57 (1887).

4779. ——(specular). Crow's Cr., Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.**

4780. ——. *Assoc.with* Magnetite. *Loc.* Por. 22v, Pemberton, Boyne R., 19 miles S. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Iron = 64·9 per cent., silica = 6·74 per cent.; Phosphorous = nil; Sulphur = trace. *Ref.* G.S.Q.P. 94, p. 26 (1904).

4781. ——. *Assoc.with* Magnetite. Por. 10v, Pemberton, 3½ miles S. of Marblestone Crossing, 24 miles S. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Iron, 67·4 per cent. *Ref.* G.S.Q. Pub. 194, p. 26 (1904).

4782. ——. *Assoc.with* Gold, Silver, Galena, Minium, Massicot, Anglesite, Cerussite, and Limonite, in gossan. *Loc.* Bompa Silver-Lead Mine, Glassford Cr., 2 miles W.byS. of Littlemere Rail. Stn. (Boyne-Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 159, pp. 7, 8 (1901).

4783. ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Galena, Zinc Blende, Garnet, Chlorite, and Calcite, in lode. *Loc.* Glassford Cr. Copper Mines, Glassford Cr. (*ante*). *Ref.* G.S.Q. Pubs. 150, p. 5 (1900), and 194, p. 28 (1904).

4784. ——. Blue Bag Shaft, in Glassford Cr. Mine, Glassford Cr. (*ante*). *Ref.* G.S.Q. Pub. 194, p. 30 (1904).

4785. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, Malachite, Azurite, Iron Pyrites, Magnetite, Limonite, and Calcite. *Loc.* Many Peaks Copper Mine, Deception Cr., nr. Glassford Cr., 50 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, pp. 7, 8 (1900), and 194, p. 28 (1904).

4786. ——. Por. 406, Riverston, New Zealand Gully, 17 miles S. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Iron = 59·3 per cent. *Ref.* G.S.Q. Pub. 194, p. 25 (1904).

4787. ——. In dykes. New Zealand Gully (*ante*). *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

4787A.——. *Assoc.with* Gold and Silver, in quartz. *Loc.* Found-at-Last Mine, One Tree Hill, 1 mile S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J., vol. 3, pp. 606, 607 (1902).

4788. ——. *Assoc.with* Magnetite, Epidote, and Garnet. *Loc.* ½-mile S.S.E. of Targinie Head Stn., 9 miles W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Analysis:* Iron = 64·9 per cent., Silica = 5·2 per cent., Phosphorus = nil, Sulphur = trace.

4789. —— (micaceous). *Assoc.with* traces of Malachite, in quartz. *Loc.* Miriam Vale, 68 miles (by rail) N.W.byW. of Bundaberg (North Coast line). *Co.* Flinders; *Dist.* Port Curtis. *Ref.* L.C.B.

4790. ——. Nr. Kabra Rail. Stn. (Mt. Morgan line), 11 miles (by rail) S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

4791. ——. *Assoc.with* Magnetite. Por. 95v, Fitzroy, 15 miles N.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Analyses:* Iron (1) = 67 per cent., (2) = 73 per cent. *Ref.* G.S.Q. Pub. 194, p. 13 (1904).

4792. ——. Stanwell Quarry, 1½ mile S.E. of Stanwell Rail. Stn. (Central line). *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

4793. ——. Stewart's Cr., 3 miles W.N.W. of Stanwell Rail. Stn., 20 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

4794. ——. *Assoc.with* Magnetite. Iron Is., Duke Group, near Broadsound, 40 miles N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.M. and G.S.Q. Pub. 194, p. 10 (1904). Analysis, *see* No. 6048.

4795. ——. *Assoc.with* Magnetite and Copper Pyrites. *Loc.* Iron Knob, Stanage Point, 37½ miles E.N.E. of St. Lawrence. *Co.* Palmerston (*ante*). *Analysis:* Iron = 60 per cent., Phosphorus = nil. *Ref.* G.S.Q. Pub. 194, p. 12 (1904).

4796. ——. *Assoc.with* Garnet Rock. *Loc.* Spring Cr. Diggings, 20 miles W.byS. of Many Peaks Rail. Stn. (Boyne Valley line), 78 miles (by rail and road) S.byW. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 31 (1904).

4797. ——. Constitution Hill, nr. Dee R., 3 miles N.E. of Mt. Morgan Rail. Stn., 27 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Analysis:* Iron = 62·40 per cent. *Ref.* G.S.Q. Pub. 194, p. 15 (1904).

4798. ——. *Assoc.with* Magnetite and Limonite. *Loc.* Iron Gully, br. of Boulder Cr., 6 miles W.S.W. of Mt. Morgan Rail. Stn., 30 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Analysis:* Iron = 62·65 per cent. *Ref.* G.S.Q. Pub. 194, p. 16 (1904).

4798A.—— (titaniferous). Oakey and Pleasant Lodes, Alma Creek, 15 miles S.S.E. of Mt. Morgan Rail. Stn. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 194, p. 18 (1904).

4799. ——. *Assoc.with* Iron Pyrites, Magnetite, Copper Pyrites, Copper carbonate, and Manganese-dioxide. *Loc.* Callide or 5-Mile Copper Mines, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 194, p. 27 (1904), and G.S.M.

4799A.——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Iron Pyrites, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit H. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

4800. ——. *Assoc.with* Gold and Limonite, in lodes. *Loc.* Mt. Alexander Mines, 8 miles E.S.E. of Mt. Morgan Rail. Stn., 32 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 17 (1898).

4800A.——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Magnetite, Limonite, Göthite, and Pyrolusite, and Satin Spar, in vesicular quartz, quartzite, and kaolin. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), and 132 (1898).

4801. ——. *Assoc.with* Gold, in quartz. *Loc.* Manukau Mine, Mt. Victoria, 3 miles W.S.W. of Mt. Morgan Rail. Stn., 27 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 87, p. 11 (1892).

4802. ——. *Assoc.with* Copper carbonate, in gossan. *Loc.* Mt. Coora S. Lode, 8 miles S.S.E. of Kilkivan Rail. Stn., Black Snake Goldfield. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

4803. ——. *Assoc.with* Gold, Magnetite, and Copper carbonate, in quartz. *Loc.* Rose, Shamrock, and Thistle Mine, 10 miles S. of Kilkivan Rail. Stn., Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

4804. ——. Gigoomgan Run, 35 miles W.S.W. of Maryborough. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* L.C.B.

4804A.——. *Assoc.with* Cuprite, Tetrahedrite, Azurite, and Malachite. *Loc.* White Rocks Copper Lease, Marodian Goldfield, 8 miles N. of Kilkivan Rail. Stn., 56 miles (by rail and road) N.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 11 (1902).

4805. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, and Limonite, in lodes in syenitic granite. *Loc.* Calgoa Copper Mines, Thunder Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

4806. ——. *Assoc.with* Gold, Iron Pyrites, Graphite, and Calcite, in diorite. *Loc.* Campbell's Reef, Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 179, p. 8 (1902).

4807. Hematite. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Ortt's Mine, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902), and G.S.M.

4808. ——. *Assoc.with* Actinolite, Garnet, Epidote, etc. *Loc.* Yorkey's Surprise Gold M.L., Yorkey's Goldfield (*ante*).

4809. ——. As pseudomorphs after Iron Pyrites. *Loc.* Near Noosa, 15 miles N.N.E. of Yandina Rail. Stn. (North Coast line), 84 miles (by rail and road) N. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

4810. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, and Psilomelane, in quartz. *Loc.* Caledonia Claim, Sudest Is., 448 miles E.S.E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 29 (1892).

4811. ——. *Var.* **Red Ochre.**. *Assoc.with* Tile Ore, Azurite, Malachite, and Cassiterite, in shale and greywacke. *Loc.* Ironclad Tin and Copper Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 13, p. 21 (1883).

4812. —— ——. *Assoc.with* Cuprite, Tile Ore, Malachite, and Azurite, in quartzites, greywackes, and mica shales. *Loc.* Shaughran Copper Mine, Watsonville (*ante*). *Est. Contents:* Copper = 7 and 10 per cent. *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

4813. —— ——. *Assoc.with* Iron Pyrites, Marcasite, Mispickel, Limonite, Copper Pyrites, Copper carbonate, Chalcanthite, Cassiterite, and Wolfram. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

——. *Var.* **Reddle** (Red Ochre with more or less clay).

4814. —— ——. Glenormiston, Georgina R., 340 miles W. of Longreach (Central line). *Co.* Georgina; *Dist.* **Gregory North.** *Ref.* Q.M.

Hensey Mine, 3½ miles S.S.E. of Chillagoe Rail. Stn. *Min.Ref.* Copper Ore, *see* 2030.

Herbert Cr. Diggings, Gogango Ranges, Central Rail. line. *Min.Ref.* Gold (alluvial), *see* 3396.

GEOLOGICAL NOTE: The rocks consist of highly fissile clay slates of undetermined age. The reefs were abandoned and the alluvial deposits worked out many years ago.

Herbert River. Heads in the Herberton country, flows S., then S.E. to Rockingham Channel, N. of Halifax Bay. Length, about 200 miles. Tributaries: Wild R., Dry R., Return Cr., Smith's Cr., Nettle Cr., Nigger Cr. NOTE: Highly mineralised country occurs at the heads of the Herbert R., the principal centres being Mt. Garnet, Coolgarra, Newellton, and Herberton. *Min.Ref.* Barytes, *see* 271; Cairngorm, 7179; Gold, 3877; Halite, 4654; Magnetite, 6006; Wolfram, 8012; Zinc Blende, 8115.

Herberton—

SITUATION: *See maps,* Pls. 16, 17, 22. The town is 82 miles (by rail) S.W. byS. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Lat.*, 17° 14′ S.; *Long.*, 145° 23′ E.

DISCOVERIES: Tin discovered by J. Atherton in Herbert R. in 1879, by John Newell at Herberton in the same year, and by Messrs. Newell, Jack, and party in Prospectors' Gully in 1880. Great Northern tin deposit discovered on 19th April, 1880, work commencing on 8th May. Dry R., first mentioned on 16th October, 1880. Nettle Cr. Tin Mines opened 19th February, 1881.

POPULATION: 991 (estimated 1910). *See under* Herberton G. and M. Field for population of field up to 1911.

Herberton—*continued:*

Climate: Rainfall, yearly average between 1902-1907 = 44·40 inches. Wet days, 57.

Herberton Gold and Mineral Field—(Once Walsh and Tinaroo, in part.)

Situation: *See maps,* Pls. 8, 9, 16, 17, 22. *See under* Herberton. *Cos.* Dagmar, Hodgkinson, Lynd, Nares; *Dist.* Cook. *Cos.* Cardwell, Clarke, Gunnawarra, Wairuna; *Dist.* Kennedy North. Centre about *Lat.* 17° 14′ S., *Long.* 145° 23′ E.

Population: 10,121 (Census 1911).

Proclamation: First and only one, 13th October, 1909, as follows:—Commencing on the Great Dividing Range where it is crossed by the Chillagoe Railway, near the 11-mile peg, from Mareeba Junction, and bounded thence by the Chillagoe Railway south-westerly to Lappa Junction; thence by the Mount Garnet Railway south-easterly to where it crosses the Great Dividing Range; thence by that range southerly to the west boundary of Ellanboro Block near its south-west corner, by part of the west boundary of that block, the west boundaries of Lawn Spring and Wyandotte Blocks, part of the north and west boundaries of Ringwood Park No. 2 Block, the north-west, north-east, and south-east boundaries of Balcoomba Gold Field, the south-west boundary of Lucky Downs Block, the south-east boundaries of Lucky Downs and Jervoise Downs Blocks to the Burdekin River, by that river upwards to the junction of the Dry River; thence by the south, east, again by the south, and by the north-east boundaries of St. John's Rood Block to the Burdekin River, by that river upwards to the north-west corner of Arthur's Plains No. 3 Block, by the north boundary of that block, part of the south-west, the north-west, and north-east boundaries of Hopewell Creek Block, part of the south-west boundary of Lake Lucy No. 1 Block, the south-east boundaries of Lake Lucy No. 1, Lake Lucy No. 2, and Lake Lucy No. 3 Blocks, part of the north-east boundary of Lake Lucy No. 3

Herberton Gold and Mineral Field—*continued:*

Block, the south boundary of Wairuna No. 3 Block, part of the west, the south, and east boundaries of Cromwell Block, part of the east boundary of Wairuna No. 2 Block, and by part of the north boundary of Forest Park to Herkes Creek, by that creek downwards to the Herbert River; thence by a line north-easterly to the Cardwell Range, near the head of Dallachy Creek; thence by that range northerly to the south boundary of Waroora No. 1 Block, by the south and part of the west boundaries of that block to Blunder Creek at the north-east corner of Waroora No. 2 Block; thence by Blunder Creek downwards to Blunder No. 1 Block; thence by that block west and north and the east boundary of Millstream Block north to Millstream Creek, by that creek and the Herbert River downwards to the Wild River, by that river upwards to its confluence with the Dry River; thence by a line north-east to the Coast Range; thence by a line northerly to the south-west corner of portion 67v, parish of Barron, by the west boundaries of portions 67v, 66v, 63v, 62v, 59v, a line north, and the west boundary of portion 130v, by the west, north, and west boundaries of portion 16, the west boundaries of portions 116v, 26, 24, 44, 10, 25, 123, and 34, the Atherton Town sections, the south boundaries of portions 9, 3A, and 57v, and by part of the west boundary of the last-named portion to Middle Creek, by that creek upwards to its head in the Great Dividing Range, by that range northerly about two miles to the head of a small creek westerly from the north-west corner of portion 179, by the small creek and Rocky Creek downwards to the north-west corner of portion 72v, by the north boundary of that portion, the east boundaries of portions 72v and 71v, the north and part of the east boundary of portion 13, the north-west boundaries of portions 51v and 52v, the west and north boundaries of portion 176 to the west side of the Atherton-Mareeba road, by that road northerly to the south boundary of a camping and water reserve, proclaimed in the *Government Gazette*, 1882, part 2, page 487, by the south and west boundaries of that reserve to the west side of the Atherton road, by that road north-westerly to the north-west corner of portion 185; thence easterly by the south boundaries of portions 141, 38v, 39v, 58, 42v, and 43v, parish of Tinaroo, and by the east boundary of portion 43v to the Barron River; thence by a line easterly crossing the Barron River to the southern watershed of Tinaroo Creek and Emerald Creek, by that watershed north-easterly to the eastern watershed of the Barron River, by that watershed and a line northerly to the south-east corner of portion 61v, parish of Cairns, by the south boundary of that portion west and by the left bank of the Clohesy River downwards to the Barron River; thence by a line northerly to Harris Peak; thence by the Great Dividing Range north-westerly (taking in Mount Demi Peak and Mount Spurgeon) to the north-western watershed of the McLeod River, by that watershed south-westerly to a point north from the north-east corner of Talgijah Block, by a line and the east boundary of that block south to the McLeod River, by that river downwards to the Mitchell River, by that river upwards to the north-west corner of Cudgee Cudgee No. 1 Block, by the western, southern, and part of the eastern boundaries of that block to the watershed between the Mitchell and Hodgkinson Rivers; thence by that watershed south-easterly to the Great Dividing Range; and thence by that range southerly to the point of commencement.

AREA: 4,187,800 acres (6,545 sq. miles).

LEASES: Goldmining leases and applications in force, 5; area, 51 acres. Mineral leases and applications, 252; area, 2,865. Miners' Homesteads and applications, 706; area, 3,421 acres (1912).

MINING CENTRES: Boonmoo, California Creek, Coolgarra, Dry River, Emuford, Glen Linedale, Gurrumba, Herberton, Irvinebank, Mareeba Goldfield, Montalbion, Mt. Carbine, Mt. Fraser, Mt. Garnet, Mt. Lewis, Mt. Molloy, Mt. Spurgeon, Nettle's Creek, Newellton (Silver Valley), Nymbool, Stannary Hills, Watsonville, *which see.*

MINERAL STATISTICS: *See under* Herberton.

GEOLOGICAL PUBLICATIONS: *See under* Herberton.

WARDEN AND INSPECTOR OF MINES: Both stationed at Herberton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

GENERAL INFORMATION: *See under* Herberton.

Herberton and Bradlaugh Gully (between), S.S.W. of Atherton Rail. Stn. *Min.Ref.* Opal (wood), *see* 7008.

—— Deep Lead. *See* Deep (Tin) Lead, Herberton.

Hercules Reef, Golden Valley, Croydon Goldfield. *Min.Ref.* Gold, *see* 3523; Iron Pyrites, 4954.

Hercynite. *Syn.* Iron spinel. *Compo.*, Aluminate of iron. *Colour*, black. *Streak*, dark green. *H.* = 7·5-8. *Sp.gr.* = 3·9.

4815. ——. Truxillo, Cairns-Georgetown Road, 15 miles S.byW. of Fossilbrook, 53 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line). *Co.* Tate; *Dist.* **Cook**. *Analysis:* Show Uranium absent. *Ref.* A.R., p. 113 (1907).

Hero Reef, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3753.

—— Silver Mine, Argentine Silver Field. *Min.Ref.* Anglesite, *see* 49; Galena, 2985; Ironstone, 5574; Minium, 6613; Native Silver, 7558.

Hessonite. *Syn.* Essonite. *See under* Garnet.

Hessite. *Syn.* Telluric Silver. *Compo.*, Telluride of silver. *Colour*, lead-grey, steel-grey. Sectile, metallic. *H.* = 2-3·5. *Sp.gr.* = 8·3-8·6. *Contents (max.)*, Silver 63 per cent. Gold often present.

4816. ——. *Assoc.with* Altaite and Gold, in quartz and calcite. *Loc.* Gt. Eastern No. 2 S. Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Assay:* Silver = 0·70 per cent. = 228 oz. 13 dwt. per ton; Gold = 0·09 per cent. = 29 oz. 7 dwt. 20 gr. per ton. *Ref.* G.S.Q. Pub. 196, p. 25 (1905).

4817. ——. *Assoc.with* Altaite, in quartz reef. *Loc.* Gt. Eastern No. 2 S. Mine, Gympie Goldfield (*ante*). *Assay:* Silver = 50·339 per cent. = 16,443 oz. 4 dwt. 16 gr. per ton; Gold = 5·049 per cent. = 1,649 oz. 5 dwt. 2 gr. per ton. *Ref.* G.S.Q. Pub. 196, p. 25 (1905).

4818. ——. *Assoc.with* Gold, in quartz. St. Patrick's Reef, Gympie Goldfield (*ante*). *Assay:* Silver = 57·5 per cent. = 18,782 oz. 7 dwt. 12 gr. per ton; Gold = 0·093 per cent. = 30 oz. 7 dwt. 13 gr. per ton; Tellurium, 25 per cent. *Ref.* A.R., p. 154 (1908).

Heulandite. *Compo.*, Hyd. silicate of alumina and lime. *Colour*, white, brick-red, etc. *Lustre*, Vitreous, inclining to pearly. A zeolite. *H.* = 3·5-4. *Sp.gr.* = 2·2.

4819. ——. *Assoc.with* Calcite and Quartz. *Loc.* Plant's Shaft, Golden Gate Gold Mines, Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

4820. ——. As a lining in goedes in granite. *Loc.* Enoggera, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.M.

Hobson Mine, ½-mile N.W. of Calcifer Rail. Stn. (Chillagoe line). *Min.Ref.* Copper Ore, *see* 2027B.

Hodgkinson Co. Cook Dist. *See map*, Pl. 8.

Hodgkinson Goldfield (now included in the Chillagoe Gold and Mineral Field). *See maps*, Pls. 8, 9, and 22.

Situation: The township of Thornborough is 19 miles (by road) N.N.W. of Dimbullah Rail. Stn. (Chillagoe line), 92 miles (by rail and road) W. of Cairns. *Cos.* Dagmar, Hodgkinson, Lynd, and Nares; *Dist.* Cook. *Lat.*, 16° 55′ S.; *Long.*, 145°.

Discovery: Gold was found in 1875, but the "rush" set in at the beginning of April, 1876.

Population (included in Chillagoe G. and M. Field).

Rainfall: Yearly average, 1902-1907, 37·62 inches. Wet Days, 54.

Leases: *See* Chillagoe G. and M. Field.

Area: 1,184,000 acres (1,850 sq. miles).

Proclamation of Field: First gazetted, 15th June, 1876; last alteration, 25th May, 1881. Superseded by Proclamation of 13th October, 1909, notifying this field to be included in the Chillagoe Gold and Mineral Field, *which see.*

Principal Mining Centres: Kingsborough, Northcote, Thornborough, Wolfram Camp, Woodville, and Mt. Mulligan Coalfield, *which see.*

Mineral Statistics:

Gold,	*see tables and diagram,*	Pls. 36, 46, 46a, 47.
Molybdenite,	*see tables,*	Pls. 42, 46, 46a.
Scheelite,	,,	Pls. 42, 46, 46a.
Wolfram,	,,	Pls. 42, 46, 46a.
Bismuth,	,,	Pls. 40, 46, 46a.
Antimony,	,,	Pls. 40, 46, 46a.
Silver,	,,	Pls. 37, 46, 46a.
Tin,	,,	Pls. 38, 46, 46a.

Statistical Notes: Greatest recorded annual gold yield (1878), 35,567 fine oz.; value, £151,079. Smallest recorded annual gold yield (1891), 540 fine oz.; value, £2,294. The first recorded gold yield of the Hodgkinson Goldfield (1878) was returned at 35,567 oz.; from that to the year 1892 the yield gradually declined till in 1891 it reached 540 oz. From 1893 to 1904, however, the yield increased from 1,560 to 4,500 oz.; but in subsequent years it fell again. Total yield of gold to end of 1912, 234,298 fine oz.; value £995,234. This is equal to 1·33 per cent. of the whole gold production of the State. The total yield of Antimony to the end of 1912 was 2,697 tons; Bismuth, 47 tons; Molybdenite, 563$\frac{1}{2}$ tons; Scheelite, 10$\frac{3}{4}$ tons; Wolfram, 2,912 tons. This is equal to 64·50 per cent. of the State's total production of Antimony, 6.75 per cent. of Bismuth, 53.35 per cent. of Scheelite, and 34.88 per cent. of Wolfram.

Mineral References: **Gold** (alluvial), *see* 3215, (reef) 3746-3765; Lead (Galena), 2742, 2760-2765; Copper (Copper carbonate), 1888, (Copper Pyrites) 2142, 2152; Bismuth (native), 330; Antimony (Cervantite), 1304a, 1305, (Stibnite) 7618-7626; Scheelite, 7342a; Zinc Blende, 8080; Iron (Hematite), 4706, (Iron Pyrites) 5034, 5035, 5056a-5059, (Mispickel) 6684-6686. Other Minerals: Calcite, 483; Epsomite, 2613.

Geological Note: The stratified rocks of the Hodgkinson Goldfield consist of clay shales, greywackes, grits, and conglomerates. These are intersected by immense dykes of rock whose original constituents have been replaced by silica. A large number of quartz reefs traverse the strata, and are divided into two systems—those parallel with the strike of the rocks and those at right angles.

Geological Publications: Reports—Nos. 16, 117. *See under* Geol. Surv. Pub. List for titles. *See also under* Gov. Ming. Jour. Special Reports, No. 116.

Warden: Stationed at Chillagoe. Inspector of Mines: Stationed at Herberton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M. under Chillagoe Mineral Field.

Crushing Mills: Twelve batteries (122 stamps). Several mills idle. Charges, 12s. to 20s. per ton.

General Information: Consult *Pugh's Almanac; Queensland Post Office Directory; Queensland Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Hodgkinson Extended Goldfield. Situation, *see* Hodgkinson Goldfield. Proclamation, First (and only) gazetted, 26th August, 1886. Now included in Chillagoe Gold and Mineral Field.

—— River. Heads in the country to the N.W. of Northcote, flows N.W. to join the Mitchell R. Length, about 70 miles. *Min.Ref.* Gold (alluvial), *see* 3215. NOTE: Hodgkinson Goldfield is situated near the head of this river, the old Wolfram Camp being on one of its branches.

Horn Island Goldfield—

SITUATION: *See maps,* Pls. 8, 9. Three miles S.E. of Thursday Is., Torres Strait. *Co.* Torres; *Dist.* Cook. Centre, about *Lat.*, 10° 35′ S., *Long.*, 142° 18′ E.

DISCOVERY: In 1894, by Smyth and party.

POPULATION: Less than 20.

PROCLAMATION OF FIELD: First gazetted, 31st August, 1894; Last, 8th November, 1897, as follows:—Adjacent to Cape York, on the north-west coast of Queensland.

AREA: 12,800 acres (20 sq. miles).

LEASES: Goldmining leases in force, nil; Miners' homesteads in force, 2; area, 22 acres (1912).

MINERAL STATISTICS: Included in "Other Goldfields."

MINERAL REFERENCES: Gold (alluvial) 3239, (reef) 3804-3823; Copper (Copper Pyrites) 2179, 2180; Lead (Galena), 2815-2824; Zinc Blende, 8091-8094; Iron (Iron Pyrites) 5088-5101, (Mispickel) 6707, (Scorodite) 7368, 7369.

GEOLOGICAL NOTE: The prevailing rock is an aplite granite, in which there are numerous gold-bearing quartz reefs. Quartzites of indefinite age occur to the north-east of the field, but evidently do not contain reefs. Between the outcrops of granite and quartzite an area of alluvium obscures the junction of the two rocks. *See* G.S.Q. Pub. No. 112 and 180 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 112 (1896), 180 (1902). *See under* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Thursday Island. INSPECTOR OF MINES: Stationed at Croydon.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

—— —— Mine, Horn Is. Goldfield. *Min.Ref.* Gold, *see* 3821.

Horn Silver. *Syn.* Cerargyrite, *which see.*

Hornblende. *Compo.*, Silicate of alumina, iron, lime, and magnesia. *Colour*, black or greenish black. *Lustre*, vitreous. *Varieties*, Actinolite, Asbestos, Basaltic Hornblende, Tremolite. *H.* = 5-6. *Sp.gr.* = 2·9-3·4.

4821. —— (greenish black). Strathfield Stn., *viâ* Mackinlay, 55 miles S.E. of Cloncurry. *Co.* Allison; *Dist.* **Burke.** *Ref.* B.D.

4822. ——. *Assoc.with* Actinolite, in syenite. *Loc.* Broken Hill Mine, Cloncurry, about 480 miles (by rail) W.byS. of Townsville. *Co.* Beaconsfield; *Dist.* Burke.

4823. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Great Freehold Mine, Rocky Cr., Mt. Drain Diggings, 7 miles W. of Mt. Perry. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M. and Q.M.

4824. Hornblende. *Assoc.with* Felspar, Olivine, and Quartz, in altered sed. rock. *Loc.* Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., 38 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 1 (1890).

4825. ——. *Assoc.with* Biotite and Orthoclase, in syenitic granite. *Loc.* Edisvold Goldfield, Burnett R., 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, p. 1 (1887).

4826. —— (crystals). *Assoc.with* Olivine, in basalt. *Loc.* Endeavour R., Cooktown, 1,050 miles N.W. of Brisbane. *Co.* Banks; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

4826A.——. *Assoc.with* Orthoclase, in syenitic rock. *Loc.* Mt. Browning, nr. Mt. Amos, 20 miles S. of Cooktown. *Co.* Banks (*ante*). *Ref.* G.S.Q. Pub. 66, p. 8 (1891).

4827. ——. Oaky Cr., Bakerville, 4 miles W. of Watsonville, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 62 (1900).

4828. —— (hypidiomorphic crystals), in granite. *Loc.* Harper's Siding, 7 miles (by rail) S.E. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

4829. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Luxton's Mine, Wet Cr., trib. of California Cr., 3 miles N.E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd (*ante*). *Assay:* Gold = 150 oz. per ton. *Ref.* G.S.Q. Pub. 119, p. 42 (1897).

4830. ——. Klondyke Battery, 12 miles W. of Coen, 57 miles (by road) N.N.W. of Port Stewart. *Co.* Sidmouth; *Dist.* Cook. *Ref.* L.C.B.

4830A.——. Spring Creek, Main Range, 6 miles E. of Evergreen, 20 miles N.N.E. of Jondaryan Rail. Stn. (Western line). *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* O.R. (1910).

4831. ——. *Assoc.with* Iron Pyrites, Mispickel, Scorodite, Cassiterite, and Zinc Blende, in slate. *Loc.* Beacroft's Workings, Sundown Cr., 12 miles S.W.byW. of Ballandean Rail. Stn., 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

4832. ——. *Assoc.with* Mispickel, Steatite, Chlorite, Biotite, and Orthoclase, in lode. *Loc.* Gt. Northern Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns-Herberton line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 3 (1883).

4833. ——. Monarch Tin Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 5, p. 62 (1900).

4834. ——. St. Patrick's Tin Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 5, p. 62 (1900).

4835. ——. Happy Valley, about 40 miles (by road) S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* O.R.

4836. ——. As greenish-black cleavage masses, in diorite. *Loc.* Marengo Cr., 19 miles S. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D

4837. —— (crystals), in porphyry. Parrot Cr., Bowen R., 60 miles S.S.W. of Bowen. *Co.* Drake; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 4, p. 19 (1879).

4838. ——. *Assoc.with* Gold, Diamond, Sapphire, Spinel, Garnet, Zircon, Topaz, Amethyst, Cairngorm, Chalcedony, Jasper, Tourmaline, Rutile, Ilmenite, Magnetite, and Magnesite, in alluvial deposits. *Loc.* Retreat, Sheep Station, Policeman, Tomahawk, and Central Crs., Anakie Sapphire Field, 193 miles (by rail) W. of Rockhampton. *Cos.* Clermont and Platagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), 172 (1902).

4839. ——. In gabbro. Peak Vale, 18 miles S.S.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* B.D.

4840. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Camboon Mine, Upper Dawson River, 85 miles W.N.W. of Mt. Perry Rail. Stn. *Co.* Dawson; *Dist.* Leichhardt. *Ref.* Q.M.

4841 ——. *Assoc.with* Garnet and Ilmenite, as inclusions in basaltic dyke. *Loc.* Lowood, 45 miles (by rail) W. of Brisbane (Brisbane-Valley Br. line). *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 175, p. 12 (1902).

4842. ——. In quartz. Waterworks Road, Enoggera, 6 miles (by rail) W. of Brisbane. *Co.* Stanley; *Dist.* Moreton.

4843. ——. *Assoc.with* Orthoclase and Biotite, in granite. *Loc.* Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

4844. ——. *Assoc.with* Felspar, in quartz. *Loc.* Miriam Vale, 43 miles (by rail) S.E.byS. of Gladstone (North Coast line). *Co.* Flinders; *Dist.* Port Curtis. *Ref.* L.C.B.

4845. ——. *Loc.* Native Cat Cr., 6 miles W. of Stanwell Rail. Stn (Central line), 22 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis.

4846. ——. Stewart's Cr., 1 to 3 miles W.N.W. of Stanwell Rail. Stn., 16 to 20 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

4847. ——. As rock inclusion in syenite. *Loc.* Railway Cutting, nr. Moonmera Rail. Stn. (Mount Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 195 (1904).

4848. —— (crystals). Grey Ranges, S. Western Queensland, nr. border of N.S.W. Warrego and Gregory South Dists. *Ref.* G.S.M.

4849. ——. *Assoc.with* Iron Pyrites and Felspar. *Loc.* Alma Reef, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 52, p. 8 (1889).

—— **Actinolite** (*var.*). Occurs as long, slender, glassy prisms of greenish colour.

4849A. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Limonite, in gossan and schist. *Loc.* Melba M.L. (319), Melba Group, Corella R., 39 miles W.S.W. of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, p. 210 (1908).

4850. —— ——. *Assoc.with* massive Hornblende. *Loc.* Broken Hill Mine, Cloncurry, 480 miles (by rail) W.byS. of Townsville. *Co.* Beaconsfield; *Dist.* Burke.

4851. —— ——. *Assoc.with* Redruthite, Tile Ore, and Malachite, in ironstone. *Loc.* Wanderer M.L. (622), Eclipse Group, N.W. of Donaldson, 68 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke *Ref.* G.S.Q. Pub. 215, p. 357 (1908).

4852. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, Limonite, Calcite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group, 1½ mile N.N.W. of Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

4853. —— ——. *Assoc.with* Malachite and Limonite, in quartz and chloritic schist. *Loc.* Tulip No. 1 E.M.C. (180), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 106 (1908).

4854. —— ——. Lower Flinders. *Dist.* Burke. *Ref.* G.S.M.

4855. —— ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Magnetite, Mispickel, Bismuth (native), Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Calcite, Chalcedony, and Epidote, in slate and hornblende rock. *Loc.* Biggenden Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 60 (1890), 173, p. 2 (1902), and 194 (1904), and G.S.M.

4856. —— ——. *Assoc.with* Andradite Garnet. *Loc.* Mt. Hastings Mine, 2 miles S.E. of Mt. Biggenden, 5 miles S.byW. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.M.

4857. —— ——. Cabbage-tree, S. Flanks of Dawes Range, 40 miles N.N.W. of Mt. Perry Rail. Stn., 54 miles S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* L.C.B.

4858. —— —— (crystals), in schist. *Loc.* Mungai Copper Lodes, 12 miles (by road) W. byN. of Mt. Perry, 79 miles (by rail and road) W.S.W. of Bundaberg (Mt. Perry line). *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 21, p. 10 (1885).

4859. —— ——. Calcifer Rail. Stn (Chillagoe line), 132 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 62 (1900).

4860. —— ——. *Assoc.with* Galena, Cerussite, Massicot, Anglesite, and Manganese-dioxide. *Loc.* Macrossan Mine, between Cathedral Range and Arbinjoe Cr., 2 miles E. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Assays: See* No. 28. *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

4861. —— ——. Eclipse Mine, Muldiva Silver Mines, 6 miles S.W.byS. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 63 (1900).

4862. —— —— (asbestiform). Outcrops 2 ft. wide. *Loc.* 1 mile N. of Limestone Extd. Copper Mine, 80 miles S. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* B.D.

4863. Hornblende (Actinolite). In diorite. *Loc.* Sunburst 2 E. Mine, Charters Towers, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* **Kennedy North.** *Ref.* G.S.M.

4864. —— ——. *Assoc.with* Epidote, in garnet rock. *Loc.* Crow's Nest (Ravensbourne), 34 miles (by rail) N. of Toowoomba. *Co.* Cavendish; *Dist.* **Moreton.**

4865. —— ——. *Assoc.with* Copper Pyrites, Epidote, and Magnetite, in garnet rock. *Loc.* Blue Bag Shaft, Glassford Cr. Copper Mine, 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), and 194, pp. 28-30 (1904).

4866. —— ——. *Assoc.with* Malachite. *Loc.* Mt. Alma Stn., Calliope R., 30 miles W.S.W. of Gladstone. *Co.* Clinton (*ante*).

4867 —— ——. Serpentine Hill, nr. Johannsen's Caves, 16 miles N.byW. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.M.

4868. —— ——. Old Workings, 5-Mile or Callide Cr. Copper Mine, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 27 (1904).

4869. —— ——. *Assoc.with* Magnetite. *Loc.* Mt. Nelson, nr. Mt. Morgan, 24 miles (by rail) S.S.W. of Rockhampton. *Co* Raglan (*ante*).

4870. —— ——. *Assoc.with* Garnet, Epidote, and Hematite. *Loc.* Yorkey's Surprise G.M. Lease, Yorkey's Goldfield, Running Cr., 9 miles N. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.**

4871. —— ——. Smithfield United Gold Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

4872. —— **Asbestos** (*var.*) (superior). Kandanga (?) Cr., trib. of Mary R., 10 miles S. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Analysis:* Moisture and loss on ignition, 1·8 per cent.; Silica (SiO_2), 57·4 per cent.; Alumina (Al_2O_3), 1·6 per cent.; Iron Oxide (as Fe_2O_3), 3·4 per cent.; Lime (CaO), 13·1 per cent.; Magnesia (MgO), 22·8 per cent.—100·1 per cent. *Ref.* A.R. p. 128 (1907).

4872A. —— ——. In small quantities, mixed with quartz. *Loc.* 316-ft. level, Block 1292 Mine, Gympie Goldfield. *Co.* March; *Dist.* Wide Bay. *Part Analysis:* Moisture, 0·5 per cent.; loss on ignition, 8·2 per cent.; Silica, 50·2 per cent.; Iron oxide, 9·1 per cent.; Magnesia, 11·0 per cent. *Ref.* A.R., p. 308 (1911).

See also Asbestos, separate heading. *Min.Ref.* 105, &c.

4873. —— **Basaltic Hornblende** (*var.*). Occurs as black cleavable masses (inclusions) in basalt. *Loc.* Peak Vale Stn., 18 miles S.S.W. of Clermont, 247 miles (by rail and road) W.byN. of Rockhampton. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* B.D.

4874. —— **Tremolite** (*var.*). Paisley Silver Mine, Muldiva, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M. and P.R.S.Q., vol. 15, p. 62 (1900).

4875. —— ——. Coolgarra Tin Mines, 12 miles (by coach) N.E.byN. of Mt. Garnet, Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 62 (1900).

4876. —— ——. Will's Shaft, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

Hornstone. *Var. of* Chalcedony, *which see.*

Horse Cr. Group of Copper Mines, Horse Cr., Cloncurry. *Includes* Horse Cr. M.L., 1 and 2 N., and 1 and 2 S. M. Leases. *Min.Ref.* Azurite, *see* 208; Cuprite, 2452; Malachite, 6272.

—— —— M.L. (220, etc.), Cloncurry. *Min.Ref.* Azurite, *see* 208; Cuprite, 2452; Malachite, 6272.

—— ——, Cape York Peninsula. *Min.Ref.* Gold, *see* 3660A.

—— ——, trib. of Cloncurry R., Cloncurry. *Includes* Horse Cr. Group of Copper Mines. *Min.Ref.* Azurite, *see* 208; Cuprite, 2452; Malachite, 6272; Manganese-dioxide, 6428; Psilomelane, 7089; Wad, 7110.

—— —— Bore. *See under* Artesian Bores. No. 432.

Horse Creek Opal Field. *See maps*, Pls. 20, 21. 87 miles S. of Winton, Opalton Mineral Field. *Includes* Craig's, Poison, and Carlyle's Mines.

DISCOVERY: Opal discovered in 1888.

MINERAL REFERENCES: Opal (precious), *see* 6940A.

GEOLOGICAL NOTE: *See under* Opalton Mineral Field.

GEOLOGICAL PUBLICATION: Report No. 177 (1902). *See* Geol. Sur. Pub. List for title.

WARDENS: Stationed at Longreach and Winton; INSPECTOR OF MINES: Stationed at Rockhampton.

—— Paddock Bore. *See under* Artesian Bores. No. 402.

—— Pocket Spur, 9 miles S.W. of Nerang. *Min.Ref.* Tripolite, *see* 7033A.

Horseshoe M.L. (451), Cloncurry. *Min.Ref.* Hematite, *see* 4683; Limonite, 5758; Malachite, 6109.

—— Bend Mine, Paradise Goldfield. *Min.Ref.* Gold, *see* 3611.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 124.

Horton Vale (Phillott's) Bore. *See under* Artesian Bores. No. 235.

Hospital Hill (gully S. of), Hamilton Goldfield. *Min.Ref.* Sillimanite, *see* 7423.

Hot Springs. *See* Innot Springs, Einasleigh Springs, Musgrave Springs.

Howard (on North Coast line), 14 miles (by rail) N.W.byN. of Maryborough. *Co.* Cook; *Dist.* Wide Bay. *See* Pls. 4, 5, 24. *Lat.*, 25° 18′ S.; *Long.*, 152° 36′ E.

RAILWAY BASE for some of the Collieries of the Burrum Coalfield.

MINERAL REFERENCES: Clay Ironstone, *see* 1593; Coal, 1807. *See also under* Gov. Ming. Jour., Report No. 57.

GEOLOGICAL NOTE: The rocks consist of sandstones, shaly sandstones, and shales belonging to the Burrum Series (Cretaceous). Several seams of coal exist in the locality, and are now being worked. The coal is of first-class quality for steaming purposes, and also makes a hard, dense coke. Coal was discovered at Howard by A. Steley in 1867. *See* G.S.Q. Pub. No. 170 for details.

—— (Burrum) Bores. *See under* Coal Bores.

—— Colliery, Burrum Coalfield. *Min.Ref.* Coal, *see* 1807. *See also under* Govt. Ming. Jour., Report No. 57.

Howard's Gold Mine, Thane's Cr. Goldfield. *Min.Ref.* Gold, *see* 3871.

Howes's P.P.A. (267), Mungin Cr., Palmer Goldfield. *Min.Ref.* Gold, *see* 3691.

Howitt Co. Burke Dist. *See map*, Pl. 20.

Hueloa Bore. *See under* Artesian Bores. No. 255.

Hugden Sub-artesian Bore. *See under* Artesian Bores. No. 388.

Hughenden, 236 miles (by rail) S.W.byW. of Townsville. *Lat.*, 20° 50′ S.; *Long.*, 144° 11′ E. *Min.Ref.* Cimolite, *see* 1538; Coal, 1595; Muscovite, 6886; Selenite, 4638. *See also under* Govt. Ming. Jour., Reports Nos 91, 92, and Supplementary Report List, No. 34.

GEOLOGICAL NOTE: The rocks in the vicinity of the town belong to the Rolling Downs Formation (Lower Cretaceous), those to the north and east being Desert Sandstone (Upper Cretaceous), and basalt (Tertiary). Hughenden is situated near the eastern edge of the great Artesian Water Basin.

MINERAL NOTE: *See under* Prairie, Warreah, Flinders River, Coalbrook, and Galah Gorge for references to coal, and Mount Emu Plains for references to gold.

—— Bores. *See under* Artesian Bores. Nos. 26, 122, 271, 293.

Humpy Bong, Moreton Bay. *Min.Ref.* Magnetite, *see* 6032.

Hungerford, 100 miles S.W. of Cunnamulla Rail. Stn. *Min.Ref.* Opal (black, precious), *see* 6936B. The only locality in Queensland where black opal occurs.

Hungerford Town Sub-artesian Bores. *See under* Artesian Bores. No. 27.

Hungry Hill, 16 miles S.W. of Eidsvold. *Min.Ref.* Stibnite, *see* 7608.

Hunter (Robert), Inspector of Mines. Reports—On West Moreton Collieries, Ipswich District, Q.G.M.J., vol. 5, p. 466 (1904). On Present Condition of Queensland Coal Trade, Q.G.M.J., vol. 8, p. 372 (1907).

Hunter Island, 45 miles N.E.byE. of St. Lawrence. *Min.Ref.* Galena, *see* 3066; Limestone, 687, (Fossiliferous) 735, (marble) 597, 598.

Geological Note: The rocks on the island comprise diorite, limestone, slate, and highly altered schists. The diorite is a dyke formation in the slate, the limestones are fossiliferous, containing *Favosites* and *Stromatopora*, and the slates are traversed by quartz veins which do not pass into the limestones. *See* G.S.Q. Pub. No. 194 for details.

Hunter's Gully, Morinish Goldfield. *Min.Ref.* Pyrrhotite, *see* 7163.

Hunt's Gully, Stanthorpe. *Min.Ref.* Amethyst, *see* 7168; Beryl, 293; Cairngorm, 7176; Cassiterite, 985; Diamond, 2575; Garnet, 3117; Hyacinth, 8233; Rock Crystal, 7189; Sapphire, 2348; Spinel, 7578; Topaz, 7793; Tourmaline, 7858; Zircon, 8233.

Hurley's Deep Lead, Clermont. *Includes* Hurley's Diggings, Hurley's Deep Lead. *Min.Ref.* Coal, *see* 1672A; Gold (alluvial), 3333.

Hutton's Creek, Mt. Hutton Station, N. of Roma. *Min.Ref.* Coal, *see* 1699.

Hyacinth. *Var. of* Zircon, *which see.*

Hyalite. *Syn.* Müller's Glass. *Var. of* Opal, *which see.*

Hyalosiderite. *Var. of* Olivine, *which see.*

Hyde Park Bore. *See under* Artesian Bores. No. 388.

Hydrate of Aluminium. *See* Beauxite.

Hydro-Mica. *See* Muscovite.

Hydrous Silica. *See* Opal.

Import duty on Metals and Minerals. *See under* Customs Duties.

Import Duties on Gems. All natural gemstones are admitted into the Commonwealth free of duty. The manufactured gems, "reconstructed" or "synthetical," are admitted without duty, provided their composition, crystallization, and colour agree with the natural stones which they are made to imitate. Doublets, which are made up of a face of a natural stone and a back of coloured glass, and are very easily recognised imitations, have a duty of from 35 to 40 per cent. imposed upon them. Why some manufactured stones are admitted free of duty and others not, is inexplicable. Synthetical rubies are admitted free, but synthetical pink tourmalines, which are really pale rubies and, therefore, not of the composition of tourmalines, would be classed as imitation stones and would be dutiable, but if imported as manufactured pale rubies would come in free. The sapphire doublet, which until recent years was the only sapphire imitation on the market, has to a great extent been replaced by the manufactured (*i.e.*, synthetical) sapphire, but the doublet is dutiable, while the synthetical stone is not. A cheap representation of the emerald is made up as a doublet, but a better imitation is manufactured by placing a green glass film between two pieces of white manufactured sapphire. When this doublet, or "triplet," is faceted, an imitation of the emerald is produced which is difficult to detect, but being an imitation, is not admitted without a duty. If, however, the emerald could be manufactured, the present tariff would allow of it coming in duty free. As all synthetical stones are admitted free, attempts are made to import "paste" under the guise of synthetical gems, and thus we get "synthetical olivines," which, however, are only glass imitations. These imitations, again, are a variation from the synthetical types, as they have actually the composition and colour of the natural gemstone and are difficult to detect, but as they are glass and have no crystalline structure they are liable to have the 35 to 40 per cent. duty imposed. Beyond question, an import duty should be placed on all gems which are not natural productions, whether they be paste, doublet, triplet, reconstructed, or synthetical. This duty would also remove the existing irregularities at the Commonwealth Customs ports, whereby different interpretations are placed on the wording of the tariff as to what constitutes precious stones. Precious stones are beautifully coloured natural minerals, precious because of their rarity, and it matters not how closely the manufactured stones resemble the natural ones in colour, crystallization, composition, and hardness, they still remain only imitations of precious stones, and as such, whether reconstructed or otherwise, an import duty should be placed upon them.

Inspection of Lease Plans. *See* Lease Plans.

Inspection of Machinery and Scaffolding Acts of 1908-1912.

These Acts deal with the precaution against accidents, inspection of boilers, inspection of winding and other engines, and the granting of certificates to engine-drivers. No application to workings below the surface of mines.

The Board of Examiners have power to grant certificates of competency as follows:—

1. Extra First-class Engine-driver's Certificate.
2. Winding Engine-driver's Certificate.
3. First-class Engine-driver's Certificate.
4. Second-class Engine-driver's Certificate.
5. Third-class Engine-driver's Certificate.

Copies of the Acts and Amendments, with Regulations, are obtained from the Government Printer, Brisbane.

All drivers of winding or other engines, employed on or about a mine, are required to be certificated, according to the provisions of the Inspection of Machinery and Scaffolding Acts of 1908-1912 (Gov. Printer, Brisb.), and must either pass an examination set by the Board of Examiners, or must produce certificates of equivalent value, or furnish evidence of ability and long service.

The general conditions are laid down in the above Acts, and in the Regulations particulars are given of the subjects necessary for a candidate to pass before a winding or other engine-driver's certificate is granted to him. In the Regulations information is also given concerning the fees to be paid and curriculum for each class of certificate, and also about the documentary evidence of experience and character which has to be submitted to the Board.

Officers are stationed at Brisbane, Gympie, Maryborough, Toowoomba, Warwick, Roma, Charleville, Bundaberg, Rockhampton, Barcaldine, Mackay, Townsville, Charters Towers, Hughenden, Cloncurry, Cairns, and Croydon. Their duties consist of the inspection of boilers and all power-driven machinery.

The Board of Examiners comprises the Chief Iuspector of Machinery (Chairman), the Chief Inspector of Mines, and the Engineer Surveyor of the Marine Board. The administration of the Acts is under the control of the Chief Inspector of Machinery, Brisbane.

Inspectors of Mines—

Chief Inspector and State Mining Engineer: C. F. V. Jackson, Dept. of Mines, Brisbane.

Inspectors' Districts—

Southern Division, Gympie Centre—Canal Cr., Enoggera, Glastonbury, Gympie, Kilkivan, Leyburn, Lucky Valley, Marodian, Nanango, Pikedale, Talgai, Thane's Cr., and Yabba Gold and Mineral Fields; Stanthorpe Mineral Field; and Ipswich and Darling Downs Coalfields, etc.

Central Division, Rockhampton Centre—Barmundoo, Bompa, Boolboonda, Calliope, Cania, and Kroombit, Canoona, Cawarral, Clermont, Eidsvold, Eungella, Gaeta, Grass-tree, Langmorn, Maxwelton, Milton (Norton), Monal, Morinish, Mt. Flora, Mt Morgan, Mt. Rainbow, Mt. Shamrock, Mt. Spencer, Nebo, Paradise, Reid's Cr., Ridgelands, Rosewood, Stanton-Harcourt, Stanwell, St. John's Cr., Ulam, and Yatton Gold and Mineral Fields; Anakie, Glassford Cr., Mt. Cannindah, Rosedale, and Tenningering Mineral Fields.

First Northern Division, Charters Towers Centre—Balcooma, Cape R., Carrington Prov., Charters Towers, Mt. Wyatt, Normanby, Piccadilly, Ravenswood, Strathalbyn, and Windsor Extended Gold and Mineral Fields; Kangaroo Hills, Sellheim, and Star R. Mineral Fields.

Second Northern Division, Herberton Centre—Chillagoe and Herberton Gold and Mineral Fields, including the following fields and mining centres, viz.:—Hodgkinson, Jordan, Mulgrave, Russell Extended Gold and Mineral Fields; Chillagoe, Herberton, Irvinebank, Koorboora, Mareeba, Newellton, Stannary Hills, Wolfram Camp, Bamford, and other Mining Centres.

Third Northern Division, Croydon Centre—Alice R. (Philp), Coen, Croydon, Etheridge, Green Hills, Hamilton, Horn Island, Oaks, Palmer, Rocky R., Starcke, and Woolgar Gold and Mineral Fields; Bowden Mineral Field, Cooktown Mineral Field (includes Annan R. and Bloomfield R. Tin Mining Centres), and Stanhills Tin Mining Centre (Croydon).

Western Division, Cloncurry Centre—Agate Downs, Bower Bird, and Cloncurry Gold and Mineral Fields; Burketown Mineral Field.

Ipswich—

Situation: *See maps,* Pls. 6, 7, 25. Twenty-four miles (by rail) W.S.W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Lat.*, 27° 37′ S.; *Long.*, 152° 47′ E.

Discoveries: Coal first found by Logan at Limestone, 1827. First output, 1860. Coal at Redbank discovered in 1843. Moggil coal discovered before 1854.

Population: 14,028 (Census, 1911).

Rainfall: Yearly average inches between 1902 and 1907, 31·42, and 73 wet days.

Leases: Mineral leases and applications in force number 10; area, 221½ acres (1910).

Principal Mining Centres: Bundamba, North Ipswich, and Walloon. Plan of Collieries is given in Ann. Rep. Dept. Mines for 1904.

Collieries: *See under* Collieries, *under* Coal.

MINERAL STATISTICS: Coal, *see tables*, Pls. 43, 46, 46A.

MINERAL REFERENCES: Chalcedony, 1356; Chert, 1413; Coal, 1725-1759; Ironstone, 5609; Limestone, 664, 665; Magnesite, 5954, 5955.

GEOLOGICAL NOTE: The Ipswich Coal Measures consist of sandstones, shales, conglomerates, and coal seams belonging to the Trias-Jura System. There are three distinct areas in the district—*i.e.*, Bundamba, North Ipswich, and Walloon, each of which has its own peculiar class of coal, the two former producing steam coal, the latter a gas coal. The Bundamba and North Ipswich Coal Seams are in the Ipswich Series, above which are the barren Bundamba Series, and above these the Walloon Series carrying other coal seams. *See* G.S.Q. Pubs., No. 147 and 204 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 147 (1899), 204 (1907), and 235 (1911). Plans and Sections No. 140. *See under* Geol. Surv. Pub. List for title, Govt. Ming. Jour. Special Reports, Nos. 32, 44, 112, and A.R.D.M., pp. 154, 155 (1904). *See also* List of Maps *under* Department of Mines Publications; and also Supplementary Report List, Nos. 59, 150.

WARDEN: Stationed at Ipswich. INSPECTOR OF MINES (assistant): Stationed at Ipswich.

CHAMBER OF COMMERCE: Sec., G. W. Allen.

TECHNICAL COLLEGE: *See* separate heading "Technical Colleges."

Irish National League Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1094; Chlorite, 1451.

Iron (Fe). *Atom.Wt.* = 55·84. *Sp.gr.* = 7·84 to 8·139.

MINERAL SPECIES: Include Iron Pyrites, Marcasite, Pyrrhotite, Mispickel, Hematite, Magnetite, Limonite, Göthite, Ilmenite, "Ochres," "Oxides," Scorodite, Clay Ironstone, Siderite, Turgite, Vivianite.

ASSOCIATED MINERALS: Include Native Bismuth, Gold, Silver, Copper, Bismuthinite, Copper Pyrites, Chromite, Cassiterite, Pyrolusite, Stibnite, Wolfram, Galena, Zinc Blende, and many secondary metallic minerals; Calcite, Quartz, Felspar, Fluorspar, Barytes, Chlorite, Scheelite, Gypsum, Topaz, Muscovite, Biotite, Hornblende, Garnet, Jasper, Chalcedony, etc., etc.

MINERALOGICAL NOTE: The oxidized iron-bearing surface rocks commonly merge at water level into sulphide ores containing iron, copper, or arsenic. They also form the top portion of masses of copper-bearing garnet rock, and occasionally are known to form the outcrop of large wolfram lodes. In the first example the sulphur, arsenic, and copper are nearly always leached out or are oxidized to form secondary minerals, leaving a more or less porous ironstone behind. In the second case the iron-bearing outcrops are either magnetite or hematite, both of which frequently form large pseudomorphic crystals after the garnet. In the last case tungstic acid and manganese are removed in solution, leaving most of the iron behind in the form of a gossan made up of hematite. The tungstic acid disappears altogether, but the manganese, with some of the iron, is often reprecipitated in the vicinity as manganiferous bog iron ore.

Iron—*continued:*

Associated Rocks: Gangues include Calcite, Quartz, Chlorite, Garnet rock, Quartzite, etc.; Country rocks include Limestone, Slate, Sandstone, Quartzite, Shale, Tuff, Greywacke, Mica, Schist, Chlorite Schist, Serpentine, Diorite, Gabbro, Aplite, Greisen, etc.

Geological Note: The occurrences of iron ores are very numerous throughout the State. They are conspicuously absent from the Coal Measures, but prevalent in the Gympie Formation (Permo-Carboniferous), and in older rocks. A general description of the more important iron deposits are given in G.S.Q. Pubs. Nos. 194 and 196, the latter report contains the evidence given before the Federal Iron Bonus Commission on the establishment of ironworks in the Commonwealth.

Statistial Note: Up to the year 1912 all of the 196,743 tons of ironstone shown to be produced in the Rockhampton District came from Iron Island. It has been used as flux by the Mount Morgan Company. Herberton and Chillagoe Mineral Fields are credited with 41,665 tons up to same date, the mineral being used as a flux by the Chillagoe Railway and Mines Company. The total quantity of ironstone produced by the State to 1912 is computed at 259,801 tons, of a value of £202,780.

Iron arsenate. *See* Scorodite.

—— arseno-sulphide. *See* Mispickel.

——-bearing minerals—Chromite, Columbite, Copper Pyrites, Copperas, Göthite, Hematite, Ilmenite, Iron Pyrites, Ironstone, Limonite, Magnetite, Marcasite, Mispickel, Pyrrhotite, Siderite, Turgite, Vivianite, Wolfram.

Iron Glance. *Syn.* Hematite, *which see.*

Iron Island (Duke Group). *Lat.*, 21° 58′ S.; *Long.*, 150° 9′ E. N.E. of St. Lawrence. *Min.Ref.* Hematite, *see* 4794; Ironstone, 5625; Magnetite, 6048, Marble, 599.

Geological Note: The main mass of the island consists of magnetite and hematite. To the south there are outcrops of fine marble, while the whole of the western side is made up of trachyte. The ironstone is an alteration product of slate, and is of a very pure quality. *See* G.S.Q. Pub. No. 194 for details.

—— Gully, br. of Boulder Cr., W.S.W. of Mt. Morgan. *Min.Ref.* Hematite, *see* 4798; Limonite, 5917; Magnetite, 6057.

4954A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Lady Isabella Reef, Golden Valley (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 40, 41 (1896), and G.S.M.

4955. —— ——. *Assoc.with* Gold, Graphite, and Felspar, in quartz. *Loc.* Caledonia Reef, Highland Mary Centre, 1 mile S.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 35, pp. 8, 9 (1887), and 118, p. 21 (1896).

4956. —— ——. *Assoc.with* Argentine, in quartz vein traversing granite. *Loc.* Highland Mary Block Shaft, Highland Mary Centre (*ante*). *Ref.* B.D.

4957. —— ——. *Assoc.with* Gold, Galena, Hematite, and Graphite, in quartz. *Loc.* King of Croydon Reef, 5½ miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 35, p. 7 (1887), and 118, p. 24 (1896).

4958. —— ——. *Assoc.with* Gold, Galena, Cerussite, Chalcotrichite, and Redruthite, in quartz. *Loc.* Mountain Maid Reef, 2¾ miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 10 (1887), and 118, p. 28 (1896).

4959. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Richmond Reef, 1½ mile E.N.E. of Croydon King, and 6 miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 25 (1896).

4960. —— ——. *Assoc.with* Gold, Galena, and Pyromorphite, in quartz. *Loc.* Billy Brown Reef, Mark Twain Centre, 5 miles E.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 46 (1896).

4961. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Mark Twain Reef, Mark Twain Centre (*ante*). *Ref.* G.S.Q. Pub. 118, p. 45 (1896).

4961A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* City of London Reef, Moonlight Cr., 8 miles S.E.byE. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 26 (1896), and G.S.M.

4962. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Happy Jack Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

4963. —— ——. *Assoc.with* Gold, Galena, Pyromorphite, Cerussite, and Massicot. *Loc.* In Reefs at Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, pp. 34-36 (1896).

4964. —— ——. *Assoc.with* Gold and Galena, in quartz, serpentine, and graphite. *Loc.* Oriental and Gem Reefs, Lower Twelve-Mile, 2½ miles W. of Twelve-Mile, 8 miles N. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 33 (1896).

4965. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Rising Sun Reef, Twelve-Mile, 6 miles N. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.M.

4966. —— ——. *Assoc.with* Gold, in quartz. *Loc.* True Blue Reef, in the True Blue P.C., True Blue Mg. Centre, 1¾ mile N.W.byN. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 15 (1896).

4966A. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Lady Isabelle (2 and 3) S. United Lease (566), True Blue Mg. Centre (*ante*). *Ref.* G.S.Q. Pub. 118, p. 14 (1896).

4967. —— ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Redruthite, Malachite, Hematite, Magnetite, and Limonite, in schist and quartz. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Assay:* Copper = 5·3 per cent. *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), and 215, p. 334 (1908).

4968. —— ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, Limonite, Ironstone, and Magnesite, in kaolinised schist. *Loc.* Mt. Cuthbert (1 and 2) S.M.Ls. (257 and 294), Mt. Cuthbert Group, 19 miles S.W. of Coolullah, 63 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321, 322 (1908).

4969. Iron Pyrites. *Assoc.with* Limonite, Jasper, and Chalcedony. *Loc.* Dreadnought M.L. (452), Mt. Metallic Group, Prospector Cr., Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 299 (1908).

4970. —— ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Tenorite, Malachite, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 295 (1908).

4970A. —— ——. *Assoc.with* Gold, in granite. *Loc.* Diecan Claim, Upper Flinders R., Por. 2, Par. of Cracknell, Mt. Emu Plains Stn., 62 miles N.N.E. of Hughenden, and 55 N.W.byW. of Pentland. *Co.* Wongalee; *Dist.* Burke. *Ref.* Q.G.M.J., vol. 11, p. 136 (1910), and A.R., pp. 257, (1910), and 307 (1911).

4971. —— ——. *Assoc.with* Galena, Mispickel, Zinc Blende, in lode. *Loc.* Allendale Silver Mine, Chowey Cr., 6 miles N.W. of Chowey Rail. Stn. (Gayndah line), 68 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* **Burnett.** *Assay: See* No. 3567. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

4971A. —— ——. *Assoc.with* Gold, Silver, Lead, and Magnetite, in quartzite. *Loc.* Hannan's Silver-Lead Lode, N.E. of Allendale Silver Lode, Chowey Cr. (*ante*). *Contents: See* No. 3568. *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

4972. —— ——. *Assoc.with* Gold, Copper Pyrites, and Mispickel. *Loc.* Mt. Ophir Mine, Mt. Ophir, Chowey Cr. (*ante*). *Ref.* A.R., p. 158 (1908).

4973. —— ——. *Assoc.with* Gold, Molybdenite, and Ironstone, in quartz. *Loc.* White's Reef, Mt. Ophir, Chowey Cr. (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

4974. —— ——. *Assoc.with* Barytes, in silicified slate. *Loc.* Gaeta Goldfield, 30 miles N. of Mt. Perry Rail. Stn. (Bundaberg-Mt. Perry line). *Co.* Bowen; *Dist.* Burnett. *Ref.* O.R.

4975. —— ——. *Assoc.with* Gold and Silver. *Loc.* Gaeta Goldfield (*ante*). *Assay: See* No. 3574. *Ref.* A.R., p. 86 (1907).

4975A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Pioneer, East, and Yorkshire Reefs, Gaeta Goldfield (*ante*). *Average Yield:* Gold = 15 to 18 dwt. *Ref.* Q.G.M.J., vol. 4, p. 298 (1903).

4976. —— ——. *Assoc.with* Felspar, in porphyry. *Loc.* Gebangle Goldfield, 3 miles up Yarrabil Cr., 12 miles N.W. of Degilbo Rail. Stn., 70 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

4977. —— ——. *Assoc.with* Gold, Copper Pyrites, and Mispickel, in felsite. *Loc.* Achillea Mine, Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890), and G.S.M.

4978. —— ——. *Assoc.with* Gold and Mispickel, in porphyry. *Loc.* Gebangle P.C., Yarrabil Cr., Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

4979. —— ——. *Assoc.with* Gold and Copper carbonate, in quartz reef. *Loc.* Lady Francis Mine, Gebangle Goldfield (*ante*). *Yield:* Gold = 2 oz. per ton. *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

4980. —— ——. *Assoc.with* Gold, in volcanic agglomerate. *Loc.* Lord Nelson Claim, Yarrabil Cr., Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

4981. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Mt. Allen Mine, Gebangle Goldfield (*ante*). *Average Assay* of Stone: Gold = 2 oz. 14 dwt. 11 gr., and Silver = 2 oz. 2 dwt. per ton. *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

4982. —— ——. *Assoc.with* Gold and Copper carbonate, in small quartz leader. *Loc.* Victoria Mine, Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

4983. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Molangul Reef, about 5 miles S.S.W. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.M.

4984. —— ——. *Assoc.with* Gold, Iron Pyrites, Hornblende, and Magnetite. *Loc.* Great Freehold Mine, Rocky Cr., Mt. Drain Diggings, 7 miles W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.M. and Q.M.

4985. —— ——. *Assoc.with* Gold and Copper Pyrites, in lode. *Loc.* Canterbury Copper Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 21, p. 12 (1885).

4986. —— —— (cubical). Kennedy's Shaft, Mt. Perry (*ante*). *Ref.* G.S.M.

4987. —— ——. *Assoc.with* Gold, Copper Pyrites, Cuprite, Chalcotrichite, Tile Ore, Zinc Blende, and Calcite. *Loc.* Mt. Perry Copper Mine, Mt. Perry (*ante*). *Ref.* G.S.M.

4988. —— ——. *Assoc.with* Gold and Magnetite, in quartz reef. *Loc.* Mt. Webster, Mt. Perry (*ante*). *Ref.* G.S.M.

4989. —— ——. *Assoc.with* Copper Pyrites and Tenorite. *Loc.* Normanby Copper Mine, Mt. Perry (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

4990. —— ——. *Assoc.with* Galena, Copper Pyrites, Zinc Blende, and Barytes, in quartz. *Loc.* Potosi Copper Lode, 3 miles E. of Mungai, 6 miles W.N.W. of Mt. Perry Rail. Stn., 73 miles (by rail and road) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

4990A. —— ——. *Assoc.with* Gold and Mispickel, in quartz and calcite. *Loc.* Caledonia Reef, Reid's Cr. Goldfield, 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 21, p. 11 (1885), and 125, p. 28 (1899).

4991. —— ——. *Assoc.with* Gold, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* California Reef, Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and G.S.M.

4992. —— ——. *Assoc.with* Gold, Galena, Mispickel, and Stibnite. *Loc.* Lady Norman and Reid's Cr. Mines, Reid's Cr. Goldfield (*ante*). *Yield:* Gold = 2 oz. to 5 oz. per ton. *Ref.* A.R.D.M., p. 34 (1894).

4993. —— ——. *Assoc.with* Gold, Mispickel, Galena, Zinc Blende, and Stibnite, in quartz reef. *Loc.* Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and A.R.D.M., p. 34 (1894).

4993A. —— ——. *Assoc.with* Copper Pyrites. *Loc.* Wolca Copper Lodes, 6 miles N.N.W. of Mt. Perry, 73 miles (by rail and road) W.S.W. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 22 (1885).

4994. —— ——. *Assoc.with* Gold and Molybdenite, in quartz. *Loc.* P. Area (28), Perry Scrub, St. Agnes Cr., 15 miles S. of Gingin Rail. Stn. (Mt. Perry line), 44 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 184, p. 9 (1903).

4995. —— ——. *Assoc.with* Siderite and Common Opal, replacing Coal. *Loc.* Riverbank Colliery, 1¼ mile S.E. of Howard Rail. Stn., Burrum Coalfield. *Co.* Bowen (*ante*). *Ref.* L.C.B.

4996. —— ——. *Assoc.with* Galena and Zinc Blende, with traces of Gold and Silver. *Loc.* Gt. Southern Mine, 4½ miles W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* O.R.

4997. —— ——. *Assoc.with* Gold, Hematite, Magnetite, Mispickel, Bismuth (native), Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote. *Loc.* Biggenden **Mine**, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Contents:* Gold = from 1 oz. to 4 oz. per ton, Metallic Bismuth = 10 per cent. *Ref.* G.S.Q. Pubs. 125, p. 53 (1897), 173 (1902), 194 (1904), and G.S.M.

4998. —— ——. *Assoc.with* Gold, Magnetite, and Calcite, in quartz reef. *Loc.* Mt. Hastings Mine, Biggenden Cr., 5 miles S.byW. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 60, p. 4 (1890).

4999. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Cuprite, Tenorite, Malachite, Mispickel, Hematite, Zinc Blende, Bismuthinite, Pyrrhotite, and Calcite, in quartz reef. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo (Gayndah Br. line). *Co.* Cook (*ante*). *Assay:* Copper = 3·5 per cent., Bismuth = 1·1 per cent., Zinc = 0·3 per cent., Silver = 6 oz. 13 dwt. 8 gr. per ton, Gold = 16 gr. per ton. *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

5000. —— ——. *Assoc.with* Gold, Silver, Mispickel, Copper Pyrites, Native Bismuth, Bismuthinite, Magnetite, and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, ¼-mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907).

5001. —— ——. *Assoc.with* Gold, Bismuthinite, Bismutite, and Mispickel. *Loc.* Kent's Knob Mine, ¼-mile N.W. of Mt. Shamrock, 5½ miles W.N.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 25, p. 2 (1886), and B.D.

5002. —— ——. *Assoc.with* Gold, Mispickel, Bismuth (native), and Joseite. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Analysis:* S_1O_2 = 44·90, Al_2O_3 = 8·82, Fe = 18·98, partly combined with S and As, and partly oxidized, S = 11·71, As = 2·07, CaO = 2·80, MgO = 1·05, Te = 0·56, Bi = 1·26, $Co_2 \times O$ and H_2 and $O \times Au$ = 7·85. *Ref.* A.R.D.M., p. 187 (1894).

5003. —— ——. *Assoc.with* Gold, in quartz reefs. *Loc.* Berrie Paterson, Bushnell's Advance P.A., Leishman's William Tell, Nil Desperandum, Norris's P.A. (261), and Philadelphia Mines, Paradise Goldfield, 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 68, pp. 1-3 (1891).

5004. Iron Pyrites. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz reef. *Loc.* Paradise P.C., Paradise Goldfield (*ante*). *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

5005. —— ——. *Assoc.with* Gold, Silver, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Stanton-Harcourt Diggings, Stony Cr., 11 miles N. of Degilbo Rail. Stn. (Gayndah line), 17 miles S.S.W. of Childers Rail. Stn. (North Coast line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 25, p. 4 (1886).

5006. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Young Australian Gold Mine, Por. 53v, Woowoonga, 5 miles (by road) N.W. of Biggenden Rail. Stn. (Gayndah line), 59 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 185, pp. 3, 4 (1903).

5007. —— ——. *Assoc.with* Copper Pyrites, Azurite, Marcasite, and Galena, in quartz. *Loc.* Black Watch Reef, Scrub Paddock Diggings, 23 miles N.N.E. of Nanango, and 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Returns:* Gold = 1 oz. 9 dwt. 4 gr., Silver = 1 oz. 16 dwt. 4 gr. per ton. *Assay:* Gold = 4 oz. 3 dwt. 1 gr., Silver = 9 oz. 17 dwt. 21 gr per ton. *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

5008. —— ——. *Assoc.with* Gold and Hematite, in quartz reef. *Loc.* ½-mile N.E. of Black Watch Reef, Scrub Paddock Diggings (*ante*). *Assay of Mundic:* Gold = 2½ oz. per ton. *Assay of Hematite:* Gold = 15 dwt. and 9 dwt. 19 gr. per ton. *Ref.* G.S.Q. Pub. 29, p. 4 (1886).

5009. —— ——. *Assoc.with* Copper Pyrites and Magnetite, in diorite. *Loc.* M.L. (25), Gympie Copper Mines, Ltd., head of Gooroomjam Cr., Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pub. 169, pp. 7-9 (1901).

5010. —— ——. *Assoc.with* Galena. *Loc.* M.L. (26), Gympie Copper Mines, Ltd., Gooroomgan Cr., Scrub Paddock Diggings (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 169, p. 9 (1901).

5011. —— ——. *Assoc.with* Gold, Silver, Mispickel, Copper Pyrites, Tenorite, and Galena. *Loc.* P.A. (2), Gympie Copper Mines, Ltd., Gooroomjam Cr., Scrub Paddock Diggings (*ante*). *Assay: See* No. 2139. *Ref.* G.S.Q. Pub. 169, pp. 9, 10 (1901).

5012. —— ——. *Assoc.with* Gold and Copper, in quartz. *Loc.* Wild Horse Reef, Scrub Paddock Diggings (*ante*). *Ref.* G.S.Q. Pub. 29, p. 3 (1886).

5012A. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, Zinc Blende, and Calcite, in chlorite and ironstone lode. *Loc.* Ban Ban Station, 12 miles S.E.byE. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Ref.* A.R., p. 179 (1909).

5013. —— ——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in chloritic rock. *Loc.* Robina or Mt. Hawick Copper Mine, 12 miles W.S.W. of Degilbo Rail. Stn. *Co.* Mackenzie (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 150, p. 4 (1900).

5014. —— ——. *Assoc.with* Gold, Silver, and Mispickel, in quartz reef. *Loc.* Auburn Falls Gold Mine, 32 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 207, p. 11 (1907), and A.R., p. 56 (1906).

5014A. —— ——. *Assoc.with* Gold, Mispickel, Limonite, and Manganese-dioxide, in quartz. *Loc.* Cadarga Cr. Gold Mines, between Cadarga Cr. and Auburn R., 33 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

5015. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* All Nations Reef, Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, p. 4 (1887).

5016. —— ——. *Assoc.with* Gold, Galena, and Mispickel, in quartz reef. *Loc.* Cosmopolitan Lease (42), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 3 (1895).

5017. —— ——. *Assoc.with* Gold, Mispickel, and Zinc Blende, in quartz. *Loc.* Mt. Rose P.C. (Mt. Rose Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

5018. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz and calcite. *Loc.* Mt. Rose No. 1 W. Lease (41), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 2 (1895).

5019. —— —— *Assoc.with* Gold, Ironstone, and Galena, in quartz reef. *Loc.* Mt. Rose United Mine (Mt. Rose Reef), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 2 (1887).

5020. —— ——. *Assoc.with* Gold, Anglesite, Redruthite, and Zinc Blende, in quartz reef. *Loc.* Victory United Lease (33), Eidsvold Goldfield (*ante*).

5021. —— ——. *Assoc.with* Gold, Silver, and Limonite, in quartz. *Loc.* Apple-tree Lease, Cabbage-tree Creek, Mt. Cannindah Mineral Field, 13 miles S.W. byS. of Many Peaks Rail. Stn. (Boyne-Valley line), 71 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Assay:* Gold = 1 oz. 4 dwt. 19 gr., and Silver = 24 oz. 6 dwt. 2 gr. per ton. *Ref.* G.S.Q. Pubs. 113, p. 9 (1896), 143, p. 4 (1899).

5022. —— ——. *Assoc.with* Copper Pyrites and Magnetite. *Loc.* Mt. Cannindah Stn., head of Cabbage-tree Cr., br. of Splinter Cr., Mt. Cannindah Mineral Field (*ante*). *Ref.* A.R., p. 99 (1907).

5023. —— ——. *Assoc.with* Cassiterite and Tourmaline, in quartz. *Loc.* Keating, Madden, and Co.'s Tin Lease, Mt. Amos, 20 miles S.S.E. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

5023A. —— ——. *Assoc.with* Mispickel, and Cobalt, in quartz lode. *Loc.* Asmus Claim, Mt. Hartley, head of Wallaby Cr., 4 miles E. of Rossville, 26 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* A.R., p. 199 (1909).

5024. —— ——. *Assoc.with* Cassiterite, Tourmaline, and Mispickel, in talc. *Loc.* Collingwood Tin Lease (81), Mt. Leswell, 1½ mile S.S.W. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 4 (1891).

5025. —— ——. *Assoc.with* Cassiterite and Tourmaline, in quartzite. *Loc.* Lease (96), Mulligan's Gully, Mt. Leswell (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

5026. —— ——. *Assoc.with* Gold and Silver, in quartz. *Loc.* Last Hit Reef, Munburra, Starcke Goldfield, 40 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 209, p. 9 (1907), and 223, pp. 31, 32 (1909).

5026A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Monte Carlo (Sea View) Mine, Munburra (*ante*). *Ref.* G.S.Q. Pub. 223, p. 37 (1909).

5027. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Anglo-Saxon Reef, Limestone Cr., 60 miles S. of Laura Rail. Stn. (Cooktown line), 127 miles (by rail and road) S.W. of Cooktown. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 46, p. 1 (1889).

5028. —— ——. *Assoc.with* Gold, Fluorspar, Pinite, and Calcite, in quartz reef. *Loc.* Daisy Mine, Coen Goldfield, 45 miles (by road) N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 20 (1901), and G.S.M.

5029. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Llankelly Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 22 (1901).

5030. —— ——. *Assoc.with* Gold and Hematite, in quartz. *Loc.* All Nations Reef, Ebagoolah, Hamilton Goldfield, 33 miles W. of Port Stewart, 173 miles N.W.byW. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 5 (1901).

5031. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Johannesburg (Lord Roberts) Reef, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 7 (1901).

5032. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Gold Mount Reef, 6 miles S.E. of Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 163, pp. 8, 9 (1901), and 209, p. 15 (1907).

5033. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Hidden Treasure Reef, Ebagoolah, Hamilton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 10 (1901).

5034. —— ——. *Assoc.with* Gold and Hematite, in quartz. *Loc.* B.B. Reef, McLeodsville, 6 miles N.N.W. of Thornborough, 25 miles N. of Dimbullah Rail. Stn., Hodgkinson Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16 (116), p. 26 (1884).

5035. —— ——. *Assoc.with* Gold, Copper Pyrites, and Galena, in quartz. *Loc.* Victory Reef, McLeodsville (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 27 (1884).

5036. —— ——. *Assoc.with* Copper Pyrites. *Loc.* Mt. Molloy Copper Mine, 17 miles S.S.W. of Port Douglas, 20 miles (by rail) N.N.W. of Biboohra Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Dagmar; *Dist.* Cook. *Assays: See.* No. 2143. *Ref.* A.R., p. 115 (1907).

5037. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Aurora Reef, Aurora Cr., 8 miles S.W. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

5038. —— ——..*Assoc.with* Gold and Galena, in quartz. *Loc.* Redan Reef, Aurora Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900).

5039. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, and Galena, in quartz and calcite. *Loc.* Balmoral Reef, 1½ mile W. of Castleton, 6½ miles S.S.E. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* Q.S.Q. Pubs. 35, p. 6 (1887), and 151, p. 12 (1900).

5040. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* The Big Reef, Castleton, 5 miles S.S.E. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

5041. Iron Pyrites. *Assoc.with* Copper Pyrites and Galena, in quartz. *Loc.* Sir Henry Havelock Reef, 27½ miles S.S.E. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 12 (1900).

5042. —— ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Mispickel, Galena, and Zinc Blende, in quartz. *Loc.* Nil Desperandum Reef, Charleston, 140 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 151, p. 11 (1900), and 219, p. 14 (1909).

5043. —— ——. *Assoc.with* Gold, Pyrrhotite, Galena, and Zinc Blende, in quartz reef. *Loc.* Queenslander Mine, Charleston (*ante*). *Ref.* G.S.Q. Pubs. 151, p. 11 (1900), 219, p. 13 (1909).

5043A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Battista Menine's Claim, Delaney R., Charleston (*ante*). *Ref.* A.R., p. 261 (1910).

5044. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Cumberland Reef, Cumberland, 12 miles W.byS. of Georgetown, Etherdige Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

5044A. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Durham Consols Mine, Durham, 4 miles W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* A.R., p. 323 (1911).

5045. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Durham Reef, Durham (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 4 (1887), and 219, pp. 10, 11 (1909).

5046. —— ——. *Assoc.with* Copper Pyrites and Pyrrhotite, in quartz. *Loc.* Havelock Mine, 5 miles S. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, p. 11 (1909), and O.R.

5047. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Lady Maria Reef, Georgetown, 20 miles N. of Charleston Rail. Stn., 160 miles (by rail and road) S.W. of Almaden Rail. Stn. (Chillagoe line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 7 (1900).

5048. —— ——. *Assoc.with* Gold, Galena, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Papa Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

5049. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz. *Loc.* Spero Meliora Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 35, p. 4 (1887).

5050. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz reef. *Loc.* St. George Mine, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 5 (1900).

5051. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Wexford Reef, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 6 (1900).

5052. —— ——. *Assoc.with* Gold, Galena, and Tenorite, in quartz reef. *Loc.* Young Wexford Mine, Georgetown (*ante*). *Ref.* G.S.Q. Pub. 151, p. 6 (1900), and G.S.M.

5053. —— ——. *Assoc.with* Gold, Hematite, and Limonite, in quartz. *Loc.* Caledonia Reef, Caledonia Cr., br. of Goldsmith's Cr., 24 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

5054. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* International Reef, Rocky, Sandy Cr., 7 miles S.W.byS. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 151, p. 10 (1900), and 219, p. 9 (1909).

5055. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Stonewall Jackson Reef, Rocky, Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 151, p. 10 (1900).

5055A. —— ——. *Assoc.with* Copper Pyrites and Galena, in granite. *Loc.* Stockman's Cr., 6 miles N.W. of Teesdale Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 27 (1911).

5056. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Butcher Bird, Deceitful Susan, Merry Monarch, and Stockman Reefs, between Talbot and Machine Creeks, 10 miles S.E.byS. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 151, p. 11 (1900).

5056A. —— ——. *Assoc.with* Gold, Cervantite, and Stibnite, in quartz. *Loc.* Craig's Antimony Lease, Emily Reef, Northcote, 15 miles W. of Mareeba Rail. Stn., **Hodgkinson Goldfield.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16 (1885), and 125, p. 48 (1897).

5057. —— ——. *Assoc.with* Gold and Stibnite, in quartz. *Loc.* Emily Antimony Mine, Northcote (*ante*). *Ref.* G.S.Q. Pubs. 16 (116), p. 31 (1884), and 125, p. 48 (1897).

5058. —— ——. *Assoc.with* Gold, Mispickel, and Galena, in quartz reef. *Loc.* Just-in-Time Mine, Northcote (*ante*). *Ref.* G.S.Q. Pub. 16 (116), p. 28 (1884).

5059. —— ——. *Assoc.with* Gold, Galena, Mispickel, and Zinc Blende, in quartz reef. *Loc.* Union Gold Mine, Woodville, 13 miles W. of Thornborough, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16 (116), p. 28 (1884), and P.R.S.Q., vol. 4, p. 47 (1887).

5060. —— ——. *Assoc.with* Silver, Galena, Copper Pyrites, Mispickel, and Zinc Blende. *Loc.* Tornado Mine, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn., **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Analyses: See* No. 2155. *Ref.* P.R.S.Q., vol. 4, pp. 48, 52 (1887).

5061. —— ——. *Assoc.with* Galena and Zinc Blende, in lode. *Loc.* Victoria Amalgamated Silver Mine, Silverfield (*ante*). *Ref.* G.S.Q. Pub. 119, p. 32 (1897).

5062. —— ——. *Assoc.with* Cassiterite, Wolfram, Scheelite, Mispickel, and Copper carbonate, in diorite dyke. *Loc.* Chance Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 119, p. 18 (1897), and 125, p. 40 (1897).

5063. —— ——. *Assoc.with* Cassiterite, Wolfram, Chalcanthite, Fluorspar, and Chlorite. *Loc.* Glencairn Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883), and 125, p. 40 (1897).

5064. —— ——. *Assoc.with* Cassiterite and Galena. *Loc.* Great Wheal Busy Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 125, p. 46 (1897).

5065. —— ——. *Assoc.with* Cassiterite, in brecciated diorite. King of the North Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

5066. —— ——. *Assoc.with* Cassiterite and trace of Galena, in diorite dyke, in porphyry country. *Loc.* Mountaineer Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 28 (1883).

5067. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Mispickel, Ironstone, Cassiterite, Stannite, Wolfram, Fluorspar, and Chlorite, **in quartz** reef in elvan dyke. *Loc.* Stewart's "T" Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), and 119, p. 15 (1897).

5068. —— ——. *Assoc.with* Copper Pyrites, Copper carbonate, Chalcanthite, Mispickel, Marcasite, Cassiterite, Wolfram, Limonite, and Red and Yellow Ochre, in chlorite. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883), and P.R.S.Q., vol. 4, p. 52 (1887).

5069. —— ——. Rose of Denmark Mine, Bamford, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* O.R.

5070. —— ——. *Assoc.with* Copper Pyrites and Galena, in quartz. *Loc.* Bamford (*ante*). *Ref.* A.R., p. 46 (1906).

5071. —— ——. *Assoc.with* Copper Pyrites, Zinc Blende, Galena, and Molybdenite. *Loc.* Bamford (*ante*). *Assay: See* No. 2167. *Ref.* A.R., p. 101 (1907).

5072. —— ——. *Assoc.with* Gold, Galena, and Hornblende, in quartz. *Loc.* Luxton's Mine, Mt. Luxton, Wet Cr., trib. of California Cr., 3 miles N.E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay:* Gold = 150 oz. per ton. *Ref.* G.S.Q. Pub. 119 (1897).

5073. —— ——. *Assoc.with* Limonite, Galena, and Anglesite, in quartz reef. *Loc.* Near Mt. Luxton, Wet Cr., trib. of California Cr. (*ante*). *Assay:* Silver = 39 oz. per ton. *Ref.* G.S.Q. Pub. 119, p. 42 (1897).

5073A. —— ——. *Assoc.with* Monazite, Wolfram, Molybdenite, Cassiterite, and Mispickel, in quartz and mica, in greisen country. *Loc.* California Cr. Mines, nr. Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

5074. —— ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Tetrahedrite, Tile Ore, Malachite, Atacamite, and Hematite, in quartz-felspar lode. *Loc.* Ruddygore Mine, Arbinjoe Cr., 2 miles N.E. of Chillagoe, 141 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 10, 11 (1898).

5075. —— ——. *Assoc.with* Copper Pyrites, Mispickel, Galena, and Cassiterite, in lode. *Loc.* Iolanthe Tin Mine, Koorboora, 108 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

5076. Iron Pyrites. *Assoc.with* Copper Pyrites, Mispickel, Galena, Cassiterite, and Mica, in felspathic rock. *Loc.* Shakespeare Tin Mine, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1894).

5077. —— —— (massive). Penzance Mine, Mt. Redcap, 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), 152 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

5078. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Jordan Gold Mine, Jordan Cr. Goldfield, 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 157, p. 1 (1901).

5079. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Queen Constance P.C., Mareeba Goldfield, 5 miles S.E. of Mareeba Rail. Stn. (Cairns line), 51 miles (by rail and road) W.S.N. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 97, p. 5 (1894).

5080. —— ——. *Assoc.with* Gold, Stibnite, and Zinc Blende, in quartz lode. *Loc.* Queen Constance 5 N. Mine, Mareeba Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 6 (1894).

5081. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Walter Hodgson Reef, Butcher's Cr., Mulgrave Goldfield, 9 miles S.S.W. of Mulgrave Rail. Stn. *Co.* Nares; *Dist.* Cook.

5082. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Coral Queen Reef, Russell Extd. (Towalla) Goldfield, 18 miles W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

5083. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Rose and Shamrock Claim, French's Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Assay:* Gold = 3 oz. 10 dwt. per ton. *Ref.* G.S.Q. Pub. 97, p. 4 (1894).

5084. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Towalla King Claim, Cooliman Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 97, p. 4 (1894).

5085. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Victory Mine, Combo Cr., Russell Extd. (Towalla) Goldfield (*ante*). *Assay:* Gold = 2 oz. 10 dwt. per ton. *Ref.* G.S.Q. Pub. 97, p. 2 (1894).

5086. —— ——. *Assoc.with* Gold, Silver, and Copper Pyrites, in quartz reef. *Loc.* Wise's Shaft, Wise's Knob, Oaks Goldfield, 22 miles S.byE. of Einasleigh Rail. Stn. *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 164 (1908).

5086A. —— ——. *Assoc.with* Galena, Massicot, Cerussite, Mispickel, and Zinc Blende, in lode. *Loc.* Chillagoe Mine, off Wise's Knob, Oaks Goldfield (*ante*). *Ref.* A.R., p. 187 (1909).

5086B. —— ——. *Assoc.with* Copper Ore and Galena, in porphyry. *Loc.* Mt. Jardine, 12 miles N. of Einasleigh Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 27 (1911).

5087. —— ——. *Assoc.with* Gold and Galena, in quartz veins in granite country. *Loc.* Possession Is., 15 miles S.E. of Thursday Is., **Torres Strait.** *Co.* Somerset; *Dist.* Cook. *Assay:* Gold = 1 oz. 17 dwt. 5 gr., and Silver = 1 oz. 1 dwt. 19 gr. *Ref.* G.S.Q. Pub. 180, p. 22 (1902).

5087A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Hammond Is., Torres Strait., 1½ mile N. of Thursday Is. *Co.* Torres; *Dist.* Cook. *Assays:* (1) Gold = 23 oz. per ton. (2) Gold = 8 oz. per ton. *Ref.* A.R., p. 191 (1909).

5088. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant Mine (Brilliant and Parallel Reefs), Horn Is. Goldfield, 3 miles S.E. of Thursday Is., Torres Strait. *Co.* Torres (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

5089. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz reef. *Loc.* Cornucopia Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

5090. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Dead Cat Mine, Good Luck Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

5091. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Eclipse Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 6 (1896), and G.S.M.

5092. —— ——. *Assoc.with* Gold, in quartz and felspar. *Loc.* Golden Gate Mine, Mystery (Dead Cat) Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

5093. —— ——. *Assoc.with* Scorodite and Mispickel, in quartz reef. *Loc.* Gummo's Reefing Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 150, p. 13 (1900).

5094. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Gympie Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

5095. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Italian Mine (Good Luck and Italian Reefs), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112 (1896).

5096. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Mystery P.C. (Dead Cat Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 2 (1896).

5097. —— ——. *Assoc.with* Gold, in quartz. *Loc.* New Chum Mine (Dead Cat Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 3 (1896).

5098. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Pioneer Mine (Pioneer Reef), Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

5099. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Rosetta Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

5100. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Smith's Reef, Horn Is. Goldfield (*ante*). *Ref.* G.S.M.

5101. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Triumph Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

5102. —— ——. *Assoc.with* Copperas. *Loc.* Gilberton, 48 miles S.byE. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 72 (1887).

5103. —— ——. *Assoc.with* Copper Pyrites, Azurite, Mispickel, Cassiterite, and Zinc Blende. *Loc.* Ballandean Tin Mine, Severn R., 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.M., B.D., and L.C.B.

5104. —— ——. *Assoc.with* Galena, Mispickel, and Zinc Blende. *Loc.* Ballandean Tin Mine, Severn R. (*ante*). *Ref.* G.S.Q. Pub. 125, pp. 29, 30 (1897).

5105. —— ——. *Assoc.with* Silver. *Loc.* Border Chief Silver Mine, Jibbinbar, 20½ miles S.byW. of Stanthorpe Rail. Stn. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

5106. —— ——. *Assoc.with* Silver, Galena, Mispickel, and Zinc Blende. *Loc.* Jibbinbar Silver Mine, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

5107. —— ——. *Assoc.with* Mispickel, with traces of Copper and Mica, in quartz and felspar. *Loc.* Mogg's Mine, Sel. (26), Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

5108. —— ——. *Assoc.with* Gold, Limonite, Hematite, and Manganese-dioxide, in quartz. *Loc.* Glenelg Reef, nr. Oakey Cr., 9 miles E. of Glenbar Hd. Stn., 55 miles (by road) W.S.W. of Warwick. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 40, pp. 1, 2 (1887).

5109. —— ——. *Assoc.with* Cassiterite and Wolfram, in quartz. *Loc.* Brere's Claim, Pikedale Cr., 9 miles W.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 47 (1898).

5110. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Cameronian Reef, Pikedale Goldfield, 20 miles N.W.byN. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 10 (1892), and 105, p. 9 (1895).

5111. —— ——. *Assoc.with* Gold and Mispickel, in quartz and calcite. *Loc.* Kaffir Chief Mine, Pikedale Goldfield (*ante*). *Ref.* (and *Assays*) G.S.Q. Pubs. 105, pp. 7, 8 (1895), and 120, pp. 73-77 (1898).

5112. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Royal Standard Mine, Pikedale Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 78 (1898).

5113. —— ——. *Assoc.with* Mispickel, Scorodite, Cassiterite, Wolfram, and Molybdenite, in quartz. *Loc.* P.A. 48 (Sluicing Claim), Severn R., 6 miles W. of Ballandean, 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

5114. —— ——. *Assoc.with* Galena, Copper Pyrites, Mispickel, and Zinc Blende, in lode. *Loc.* Silver Queen Mine, Severn R. (*ante*). *Assays: See* No. 2834. *Ref.* G.S.Q. Pub. 191, pp. 24, 39 (1904).

5115. —— ——. *Assoc.with* Gold, Silver, and Copper carbonate, in quartz reef. *Loc.* Sel. (24), nr. Sundown Cr., Severn R., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

5116. —— ——. *Assoc.with* Galena and Copper Pyrites, in chlorite and quartz. *Loc.* Mrs. Allison's Mine, Sugarloaf, 7 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 120, p. 87 (1898).

5117. Iron Pyrites. *Assoc.with* Gold, Pyrargyrite, Copper Pyrites, Cuprite, Tile Ore, Azurite, Malachite, Galena, Cerussite, Zinc Blende, Smithsonite, Ironstone, and Calcite. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 120 (1898), 191, pp. 25-36 (1904).

5118. —— ——. *Assoc.with* Selenite, in shale. *Loc.* Silver Spur Mine (*ante*). *Ref.* G.S.Q. Pub. 150, p. 14 (1900).

5119. —— ——. *Assoc.with* Mispickel, Scorodite, Cassiterite, Zinc Blende, and Hornblende, in slate. *Loc.* Beacroft's Workings, in Sundown Mine, Sundown Cr., Severn R., 12 miles S.W.byW. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

5120. —— ——. *Assoc.with* Gold, Copper Pyrites, and Talc, in quartz reef. *Loc.* Von Moltke Mine, Leyburn Goldfield, 28 miles W.byN. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* (and *Assays*) G.S.Q. Pub. 120, p. 7 (1898).

5121. —— ——. *Assoc.with* Gold and Limonite, in quartz. *Loc.* Clare's Reef, Talgai Goldfield, 21 miles W.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 205, p. 28 (1906).

5122. —— ——. *Assoc.with* Galena, Copper Pyrites, and Ferro-Calcite, in quartz reef. *Loc.* Louisa Mine, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 55 (1898), 159, p. 1 (1900), and 186, pp. 17, 18 (1903).

5123. —— ——. *Assoc.with* Gold. *Loc.* Queenslander Mine, Big Hill, 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 87, p. 7 (1895), 120, p. 61 (1898).

5124. —— ——. *Assoc.with* Gold, in quartz. *Loc.* St. Patrick P.C., Saw Gully, 1 mile S.W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 186, p. 15 (1903), 205, p. 31 (1906).

5125. —— ——. *Assoc.with* Gold and Mispickel, in quartz reef. *Loc.* 2½ miles S.W. of Talgai Stn., 23½ miles W.N.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Assays:* (1) Gold = 3 oz. per ton. (2) Gold = 2 oz. 15 dwt., and Silver = 3 oz. per ton. *Ref.* G.S.Q. Pub. 120 (1898).

5126. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Cullan's Twins P.A. (Middle, Northern, and Southern Reefs), Thane's Cr. Goldfield, 24 miles W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 205, pp. 34-36 (1906).

5127. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Eldorado Mine, Thane's Cr., Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 68 (1898).

5128. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Guiding Star Reef, 6½ miles N. of Pratten, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 120, p. 70 (1898), and 205, pp. 32, 33 (1906).

5129. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Mountain Maid Reef, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 87, pp. 8, 9 (1892).

5130. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Try Again Reef, Thane's Cr., Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 120, p. 69 (1898).

5131. —— ——. *Assoc.with* Copper Pyrites, Covelline, Malachite, and Chrysocolla, in quartz, quartzite, and schist. *Loc.* Ardath Copper M.L. (705), (Mt. Hope Group), Green's Cr., 4 miles S.W. of Mt. Hope, 53 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, p. 47 (1908).

5132. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Covelline (?), Tile Ore, Malachite, Limonite, and Calcite, in chloritic schist. *Loc.* Monarch Senior M.C. (352), (Mt. Hope Group), 3 miles E. of Mt. Hope, 56 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42, 43 (1908).

5133. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Limonite, Malachite, and Chrysocolla, in hornblendic schist. *Loc.* Mt. Birnie M.L. (686, etc.), (Mt. Birnie Group), Burke R., 74½ miles S.S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

5134. —— ——. *Assoc.with* Limonite, Redruthite, Tile Ore, Tenorite, and Malachite, in slate and gossan. *Loc.* Labour Victory R.C. (29), Agate Downs Group, 53 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 12 (1908).

5135. —— ——. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Malachite, Atacamite, Chalcanthite, Limonite, Calcite, and Chalcedony, in slate and gossan. *Loc.* Mt. Elliott R.C. (3, etc.), (Mt. Elliott Group), Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin (*ante*). *Assays:* (1) Copper = 18 per cent., Gold = 3 dwt. per ton. (2) Copper = 16·5 per cent., Gold = 2 dwt. per ton. (3) Copper = 15·2 per cent., Gold = 2 dwt. per ton. *Ref.* G.S.Q. Pub. 215, p. 2 (1908).

5136. —— ——. *Assoc.with* Galena and Cassiterite, in quartzite. *Loc.* Victoria Tin Mine, Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

5137. —— ——. *Assoc.with* Göthite, Mispickel, Hematite, Limonite, Azurite, Malachite, Cassiterite, Wolfram, Websterite, Chlorite, Penninite, and Topaz, in quartz lode. *Loc.* Tin Mines, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

5138. —— ——. *Assoc.with* Zinc Blende and Galena. *Loc.* P.C., Dry R., br. of Wild R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

5139. —— ——. *Assoc.with* Cassiterite and Fluorspar, in quartz and quartzite. *Loc.* Levant Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns-Herberton line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

5140. —— ——. *Assoc.with* Cassiterite, Wolfram, and Fluorspar, in quartz and calcite. *Loc.* Leviathian Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 14 (1883).

5141. —— ——. *Assoc.with* Cassiterite, in alluvial deposits, and in lode. *Loc.* Phœnix Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

5142. —— ——. *Assoc.with* Cassiterite, in steatite veins in diorite dyke. *Loc.* St. Mungo Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

5143. —— ——. *Assoc.with* Gold, Silver, Hematite, Magnetite, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Mispickel, Zinc Blende, Cerussite, and Minium, in quartz lodes. *Loc.* Mt. Garnet Mine, Return Cr., Wild R., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

5143A. —— ——. *Assoc.with* Copper Pyrites and Rhodochrosite. *Loc.* In br. of Return Cr., between Mt. Garnet and Coolgarra, 6 miles N.byE. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

5144. —— ——. *Assoc.with* Galena, Cerussite, Copper Pyrites, Zinc Blende, etc., in slate and volcanic tuffs. *Loc.* Lancelot Mines, Newellton (Silver Valley), 10 miles S.W. of Herberton, 10 miles S.E.byS. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* L.B. 1, p. 479 (1883).

5145. —— ——. *Assoc.with* Gold, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Alexandra Hill Mine, **Charters Towers Goldfield,** 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

5146. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Band of Hope Lease, Victoria Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5147. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Blue Peter Lease, and No. 1 E. (Blue Peter Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5148. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Bonnie Doon Lease (Bonnie Doon Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5149. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Bonnie Dundee Lease (Queen, Victory, and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

5150. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant Block Lease, Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5151. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant Central G.M. Co.'s Lease (Brilliant, Victory, and Queen Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5152. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant Extended Lease (Brilliant Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

5153. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant P.C., Brilliant Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5154. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Brilliant and St. George Untd. G.M. Co.'s Lease (St. George, Brilliant, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5155. —— ——. *Assoc.with* Gold, Galena, Zinc Blende, and Chlorite, in quartz. *Loc.* Bryan O'Lynn Mine, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, pp 36, 51 (1887).

5156. Iron Pyrites. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Carrington Lion 1 and 2 E. Lease (Lion Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5157. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, Zinc Blende, and Barytes, in quartz and calcite. *Loc.* Carrington's United Mines, Ltd., Lease (Lion Reef), Charters Towers Goldfield. *Ref.* W.C.T.

5158. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Clark's Brilliant Worcester and Victory Lease (Victory Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5159. —— ——. *Assoc.with* Gold, Galena, Zinc Blende, Copper Pyrites, and Copper carbonate. *Loc.* Comstock or Stockholm Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

5160. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Craven's Caledonia Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5161. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Dan O'Connell Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5162. —— ——. *Assoc.with* Gold, Galena, in quartz. *Loc.* Day Dawn Block and Wyndham Lease (Day Dawn and Wyndham Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

5163. —— ——. *Assoc.with* Gold, Galena, in quartz. *Loc.* Day Dawn Gold Mines, Ltd., Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5164. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Day Dawn P.C. (Day Dawn, Talisman, Peabody, and North Australian Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and A.R.D.M., p. 33 (1894).

5165. —— ——. *Assoc.with* Gold, Zinc Blende, and Galena, in quartz. *Loc.* Day Dawn 3A West, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5166. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Day Dawn 5 W. Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5167. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Deep Levels Mines of Charters Towers (Brilliant Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5168. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* East Mexican G.M. Lease (Day Dawn and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5169. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Golden Alexandra Lease, Golden Alexandra Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5170. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Golden Gate Mine (2 W. Level), Charters Towers (*ante*). *Ref.* G.S.M.

5171. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Hit or Miss Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5172. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz. *Loc.* Hope Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5173. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Hope Reef, 2 miles E.S.E. of Millchester, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5174. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Imperial G.M. Lease (Imperial Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5175. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Kelly's Queen Block Lease (Brilliant and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5176. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Lady Maria Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5177. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Mafeking P.C. G.M. Lease (Mafeking Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5178. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Marshall's Queen G.M. Lease (Queen, Brilliant, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5179. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Mary and Rainbow Reefs, Charters Towers (*ante*). *Ref.* G.S.M.

5180. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Mexican Reef, Charters Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

5181. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Millchester G.M. Lease (Old Identity Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5182 —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Millett's Wellington Mine, Charters Towers Golfideld (*ante*). *Ref.* G.S.M.

5183. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Mills's Day Dawn United G.M. Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5184. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* New Brilliant Freeholds G.M. Lease (Day Dawn and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5185. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* New Craven's Caledonia G.M. Lease (Caledonia, Just-in-Time, and Victoria Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5186. —— ——. *Assoc.with* Gold and Mispickel, in quartz reef. *Loc.* New Imperial Mine, Charters Towers Goldfield. *Assay: See* No. 3919. *Ref.* A.R.D.M., p. 185 (1894).

5187. —— ——. *Assoc.with* Gold and Galena, in quartz and calcite. *Loc.* New Queen G.M. Lease (Queen, Brilliant, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5188. —— ——. *Assoc.with* Galena and Zinc Blende, in quartz. *Loc.* New Towers Extd. Mine, Charters Towers Goldfield (*ante*). *Mineral Percentages:* Iron Pyrites = 61·2 per cent.; Zinc Blende = 21·0 per cent.; Galena = 2·2 per cent.; Quartz = 15·6 per cent. *Yield:* Gold = 3·25 oz. per ton. *Ref.* A.R.D.M., p. 33 (1894).

5189. —— ——. *Assoc.with* Gold, Calcite, Gypsum, and Chalcedony, in quartz. *Loc.* North Australian Reef, Charters Towers (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 36 (1887).

5190. —— ——. *Assoc.with* Gold, Zinc Blende, and Barytes, in quartz reef. *Loc.* Old Identity Mine, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 36 (1887).

5191. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz. *Loc.* Old Imperial Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5192. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Papuan Block Mine (Victory Reef), Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5193. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Papuan, Brilliant, and Victoria G.M. Lease (Brilliant, Victoria, and Victory Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5194. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Pfeiffer's Day Dawn Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5195. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Phœbe G.M. Lease (Victory and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5196. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Queen Central G.M. Lease (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5197. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Queen Central Block G.M. Lease (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5198. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Queen Deep Mines Lease (Queen Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5199. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Queen's Cross G.M. Co.'s Lease (Victoria and Just-in-Time Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5200. —— ——. *Assoc.with* Gold, Galena, Zinc Blende, Calcite, Gypsum, and Chlorite, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879), P.R.S.Q., vol. 4, pp. 36, 47 (1887), G.S.M., and W.C.T.

5201. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Queenslander Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5202. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Quinn's Block G.M. Lease, Millchester Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5203. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Rainbow Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5204. —— ——. *Assoc.with* Gold and Galena, in quartz and calcite. *Loc.* Rogers's Millchester Block, Millchester Reef, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5205. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Ruby G.M. Lease (Ruby and Rose of England Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5206. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Ruby United G.M. Lease (Ruby Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5207. Iron Pyrites. *Assoc.with* Gold and Galena, in quartz. *Loc.* Stockholm (Brilliant G.M. Co.) Lease (Stockholm Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5208. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz reef. *Loc.* St. Patrick Block Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

5209. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Sunburst P.C., Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

5210. —— ——. *Assoc.with* Gold and Galena, in serpentine and quartz. *Loc.* Sunlight Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5211. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Talisman and New Dawn G.M. Lease (Peabody and North Australian Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5212. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Union Jack Consld. Mines (Victoria Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5213. —— ——. *Assoc.with* Gold, Mispickel, and Galena, in quartz. *Loc.* Victoria Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5214. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Victoria and Caledonia Block Lease (Just-in-Time and Victoria Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5215. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Victoria and Queen G.M. Lease (Victoria and Caledonia Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

5216. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Victory, Charters Towers G.M. Lease (Victory and Brilliant Reefs), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5217. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Victory G.M. Lease, Victory Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

5218. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Wallis's Day Dawn Lease (Day Dawn Reef), Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

5219. —— ——. *Assoc.with* Copper Pyrites and Galena, in quartz. *Loc.* Livingstone Reef, 1 mile S.S.E. of Bluff Stn., near Mt. Leyshon, 19 miles S.E.byS. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

5220. —— ——. *Assoc.with* Gold, Magnetite, Limonite, Hematite, Chalcanthite, Manganese-dioxide, and Talc, in quartz and porphyry. *Loc.* Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pubs. 18, p. 2 (1885), and 73, p. 13 (1891).

5221. —— ——. *Assoc.with* Gold, Copper Pyrites, and Copper carbonate, in quartz. *Loc.* Mt. Leyshon Mine (*ante*). *Ref.* W.C.T.

5222. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Mt. Mawe, close to Mt. Leyshon (*ante*). *Ref.* G.S.Q. Pub. 18, p. 2 (1885).

5223. —— ——. *Assoc.with* Gold, Hematite, and Pyrrhotite, in quartz. *Loc.* Greasy Bill's Reef, Pyramids or Seventy-mile Diggings, 3½ miles N.N.E. of Mt. Leyshon. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 1, p. 19 (1879).

5224. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Swain's Reef, Pyramid or Seventy-mile Diggings (*ante*). *Ref.* G.S.Q. Pub. 73 (1891).

5224A. —— ——. *Assoc.with* Gold. *Loc.* Top of Range, between the Charters Towers and Ravenswood Roads. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 2, p. 2 (1879).

5525. —— ——. *Assoc.with* Malachite, Magnetite, Ironstone, Graphite, and Calcite. *Loc.* Double-Barrel Cr. (Manton) (Gt. Northern line), 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, p 729 (1892).

5226. —— ——*Assoc.with* Gold, Hematite, Malachite, and Garnet, in calcite lode. *Loc.* Hein's Lode, Limestone Range, W. of Double-Barrel Cr. (*ante*). *Ref.* G.S.Q. Pub. 77, p. 7 (1891).

5227. —— ——. *Assoc.with* Gold, Copper Pyrites, and Mispickel, in quartz reef. *Loc.* Good Luck United (Lancashire Lass 1 W.) Mine, Far Fanning, 28 miles N.W. of Ravenswood Junction. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

5228. —— ——. *Assoc.with* Gold and Limonite, in quartz reef. *Loc.* Lancashire Lass Claim, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 6 (1898).

5229. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Spotted Calf Claim, Far Fanning (*ante*). *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

5230. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* On beach, E. of Hawking's Point, Magnetic Is., Cleveland Bay, 5½ miles N. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 75, p. 7 (1892).

5231. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* On side of Mt. Cook, between Retreat Cr. and Five-Beach Bay, Magnetic Is. (*ante*). *Ref.* G.S.Q. Pub. 75, p. 6 (1892).

5232. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz reef. *Loc.* Mt. Elliott, 20 miles S.E.byS. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

5233. —— ——. *Assoc.with* Gold, Limonite, and Zinc Blende, in quartz and calcite. *Loc.* Golden Valley Reef, Mt. Success, 15 miles W.N.W. of **Ravenswood** Junction. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 133, p. 10 (1898).

5234. —— ——. *Assoc.with* Gold and Zinc Blende, in quartz. *Loc.* Mt. Success Reef, Mt. Success (*ante*). *Ref.* G.S.Q. Pub. 133, p. 9 (1898), and G.S.M.

5235. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Nil Desperandum Reef, in New Consols Mine, Donnybrook, 6½ miles S. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

5236. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Erin's Hope Reef, Donnybrook (*ante*). *Ref.* G.S.Q. Pub. 162, p. 10 (1900).

5236A. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* J.R.D. and Premier Reefs, Hillsborough (8-Mile), 3¾ miles N.N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

5237. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz. *Loc.* Wey Reef, Hillsborough (8-Mile) (*ante*). *Ref.* G.S.M.

5238. —— ——. *Assoc.with* Gold. *Loc.* Beaconsfield Mine, Ravenswood Goldfield, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

5239. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Black Jack Mine, ¼-mile N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5240. —— ——. *Assoc.with* Gold, Mispickel, Copper Pyrites, Tenorite, Malachite, and Zinc Blende, in quartz. *Loc.* Buck Reef, ½-mile S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Assay: See* No. 4019. *Ref.* P.R.S.Q., vol. 4, pp. 53, 76 (1887).

5241. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Crescent G.M. Lease, New Moon Reef, Ravenswood Goldfield (*ante*). *Ref.* W.C.T.

5242. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* General Grant Reef, 30 chains S.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5243. —— ——. *Assoc.with* Gold. *Loc.* Saratoga Mine, ¼-mile S.E.byS. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5244. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Sunset and General Grant Reefs, ½-mile S. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 183, pp. 2-6 (1903).

5245. —— ——. *Assoc.with* Gold, in quartz. *Loc.* London Reef, Elphinstone Cr., 10 chains S.E.byS. of Ravenswood, Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

5246. —— ——. *Assoc.with* Gold, Copper Pyrites, and Zinc Blende, in quartz reef. *Loc.* New England Reef, Elphinstone Cr., ¼-mile N.W. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Mineral Percentages:* Iron Pyrites = 34·3, Copper Pyrites = 4·8, Zinc Blende = 19·1, Alumina = 4·3, Silica = 37·5.

5247. —— ——. *Assoc.with* Gold, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* New England Reef, Elphinstone Cr., ¼-mile N.W. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 134 (1900).

5248. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Shellmalier Reef, Elphinstone Cr., 30 chains N.N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 8 (1900).

5249. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Union Jack Mine, Elphinstone Cr., ¾-mile N.E.byN. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5250. Iron Pyrites. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Australia Felix Mine, 3 miles E.S.E. of Ravenswood Rail. Stn., Sandy Cr., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Assay: See* No .4035. *Ref.* P.R.S.Q., vol. 4, p. 35 (1887).

5251. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Cousin Jack Reef, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

5252. —— ——. *Assoc.with* Gold and Galena. *Loc.* Fanny Fern Mine, 2½ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 35 (1897).

5253. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* John Bull Block, 2¾ miles E.S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* G.S.M.

5254. —— ——. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz and steatite. *Loc.* Politician Mine, 2¾ miles S.E. of Ravenswood Rail. Stn., Sandy Cr. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

5255. —— ——. *Assoc.with* Gold, Galena, and Cerussite, in quartz. *Loc.* Star of the South Reef, 12 miles S.W.byS. of Ravenswood Rail. Stn., Connolly Cr., Trieste Camp, Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 10 (1900).

5256. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Trieste Reef, 10 miles S. of Ravenswood Rail. Stn., Trieste Camp, Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 10 (1900).

5257. —— ——. *Assoc.with* Gold. *Loc.* Mt. Wright, 6 miles (by rail) N. of Ravenswood, Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5258. —— ——. *Assoc.with* Galena. *Loc.* Big Ben Silver Mine, 1¾ mile N.N.W. of Ravenswood Rail. Stn., One Mine, Ravenswood Goldfield (*ante*). *Ref.* G.S.M.

5259. —— ——. *Assoc.with* Silver, Copper Pyrites, Stibnite, and Zinc Blende. *Loc.* King's Silver Lode, 1 mile N.byW. of Ravenswood Rail. Stn., One Mile (*ante*). *Analysis:* Copper = 16·25 per cent., Antimony = 26·30 per cent., Silver = 15·35 per cent., Iron = 8·49 per cent., Zinc = 8·75 per cent., Sulphur = 17·02 per cent., Silica = 7·51 per cent., Silver = 5,014 oz. per ton. *Ref.* G.S.Q. Pub. 152, p. 11 (1900).

5260. —— ——. *Assoc.with* Gold, in quartz. *Loc.* General Grant Reef, Mt. Davenport, 4 miles N.W. of Cape R. Rail. Stn., Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 2 (1891), and G.S.M.

5261. —— ——. *Assoc.with* Gold and Hematite, in quartz. *Loc.* Union Reef, between Mt. Davenport and Davenport Cr., 4 miles N.W. of Cape R. Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 2 (1891), and G.S.M.

5262. —— ——. *Assoc.with* Gold, Copper Pyrites, and Galena, in quartz. *Loc.* Bell-Gay Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., 72 miles (by rail and road) S.W.byW. of Charters Towers, Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

5263. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Governor Blackall and Victoria Reefs, Mt. Remarkable (*ante*). *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

5264. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Hughes's Leader, Pentland, 66 miles (by rail) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

5265. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Mystery Reef, Pentland (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

5266. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Sarah Howson Reef, Pentland (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

5267. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Golden Hill Reef, The Springs, 2 miles W.S.W. of Pentland Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 4 (1891).

5268. —— ——. *Assoc.with* Gold, Ironstone, and Galena, in quartz. *Loc.* Harp of Erin Reef, Upper Cape, 17 miles W.byN. of Cape R. Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

5269. —— ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Wheel of Fortune Mine, Upper Cape (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

5270. —— ——. *Assoc.with* Gold and Manganese-dioxide, in quartz. *Loc.* Lissner Reef, 7 miles W.N.W. of Lamond Rail. Stn., 41 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 13 (1891).

5271. —— ——. *Assoc.with* Gold, Copper Pyrites, and Galena, in quartz. *Loc.* Agnes Howson Reef, New Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

5272. —— ——. *Assoc.with* Gold. *Loc.* Higham Reef, Old Homestead Diggings (*ante*). *Ref.* G.S.M.

5273. —— ——. *Assoc.with* Gold, Silver, Redruthite, Copper carbonate, and Galena, in quartz. *Loc.* Main's Reef, Old Homestead Diggings (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 73, p. 11 (1891), and G.S.M.

5274. —— ——. *Assoc.with* Copper Pyrites and Hematite, in quartz. Lamington Mine, head of Lah-di-dah Cr., trib. of Kelsey Cr., Happy Valley, 40 miles (by road) S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* O.R.

5275. —— ——. *Assoc.with* Gold, Copper Pyrites, Copper carbonate, and Yellow Ochre, in quartz. *Loc.* Seymour's Reef, Marengo Goldfield, 24 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

5276 —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Malachite, and Azurite, in quartz. *Loc.* Venture Reef, Marengo Goldfield (*ante*). *Assay: See* No. 7490. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

5276A. —— ——. *Assoc.with* Gold, Copper Pyrites, and Limonite, in quartz. *Loc.* Lady Augusta P.A. (129), Moss Vale Stn., nr. Euri Cr., about 7 miles S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., p. 269 (1910).

5277. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Currency Reef, Dreghorn Diggings, Burdekin R., 15 miles S. of Ravenswood Rail. Stn., 93 miles (by rail and road) S. of Townsville. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

5278. —— ——. *Assoc.with.* Gold and Hematite, in quartz. *Loc.* Ellen Boss Reef, Dreghorn Diggings (*ante*). *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

5279. —— ——. *Assoc.with* Copper Pyrites and Zinc Blende, in leader. *Loc.* Comstock Lease (187), Kangaroo Hills Mineral Field, 40 miles S.W. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* (and *Assays*) G.S.Q. Pub. 82, p. 8 (1892).

5280. —— ——. *Assoc.with* Cassiterite, Hematite, Limonite, Malachite, and Azurite, in quartz and chlorite. *Loc.* Mineral Lease, in Gully, off Douglas Cr., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

5281. —— ——. *Assoc.with* Ironstone, Copper Pyrites, Bornite, Cuprite, Tenorite, Copper carbonate, Galena, and Zinc Blende, in lode. *Loc.* Mt. Theckla Copper Mine, 4 miles N. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 2972. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

5282. —— ——. *Assoc.with* Gold and Silver, in quartz reef. *Loc.* Bowden's Lease (147), Star R. (Argentine) Silver Field, 56 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

5283. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Gt. Kennedy Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.M.

5284. —— ——. *Assoc.with* Galena, Zinc Blende, and Stibnite, in lode. *Loc.* Murphy and Godson's M.L. (73), Star R. (Argentine) Mineral Field (*ante*). *Assay: See* No. 2987. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

5285. —— ——. *Assoc.with* Galena and Zinc Blende, in quartz lode. *Loc.* Northbrook (A. Beazley's) Lease (179), Star R. (Argentine) Silver Field (*ante*). *Assay: See* No. 2990. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

5286. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Struck Oil Reef, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.M.

5287. —— ——. *Assoc.with* Gold, Galena, Minium, Anglesite, Cerussite, Siderite, and Zinc Blende, in quartz lode. *Loc.* Union Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), G.S.M.

5288. —— ——. *Assoc.with* Mispickel and Galena, in vein. *Loc.* Venture Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

5289. —— ——. *Assoc.with* Ironstone, Limonite, Turgite, Copper Pyrites, and Galena, in quartz reef. *Loc.* Broken R. Gold and Silver Claims, Bee Cr. Diggings, Broken R., **Eungella Goldfield,** 10 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Assay:* Gold = 1 oz., and Silver = 60 to 70 per ton. *Ref.* G.S.Q. Pub. 54, pp. 2, 3 (1889).

5289A. —— ——. *Assoc.with* Gold and Wulfenite, in quartz. *Loc.* Buttercup Reef, Bee Cr., Eungella Goldfield (*ante*). *Ref.* G.S.Q. Pub. 229, p. 28 (1910).

5290. Iron Pyrites. *Assoc.with* Gold, Siderite, Galena, and Zinc Blende, in quartz reef. *Loc.* Coral Tree P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 29 (1910).

5291. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Golden Crown Mine, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

5292. —— ——. *Assoc.with* Gold, Copper Pyrites, Malachite, Limonite, Siderite, Galena, and Zinc Blende, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

5292A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Landslip Reef, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 229, p. 30 (1910).

5293. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Phœnix Mine, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

5294. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Queen Reef, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

5295. —— ——. In quartz. *Loc.* Silver Lease No. 2, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

5296. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Lady Norman Reef, Broken R., 10 miles S. of Bee Cr. Diggings, 70 miles W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

5297. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz reef. *Loc.* 1 mile E. of Eungella Stn., Broken R., 30 miles W. of Miriam Vale Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

5298. —— ——. *Assoc.with* Malachite, Azurite, and Galena, in quartz reef. *Loc.* Duffey's Claim, Blue Mts., 9 miles S.byE. of Eton Rail. Stn., 32 miles (by rail and road) S.byW. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), 229, pp. 18, 19 (1910).

5299. —— ——. *Assoc.with* Felspar and Quartz. *Loc.* Cherry Tree Cr., 24 miles S.E. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 53, p. 4 (1889).

5300. —— ——. *Assoc.with* Copper Pyrites, Mispickel, Galena, Cerussite, Malachite, Azurite, and Zinc Blende, in quartz lode. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Miriam Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), 181, pp. 12-17 (1903), and 229, pp. 34, 35 (1911).

5301. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz. *Loc.* Enterprise Reef, **Normanby Goldfield,** 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1899).

5302. —— ——. *Assoc.with* Gold and Copper carbonate, in quartz. *Loc.* Eureka Reef, Normanby Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pubs. 5, p. 10 (1879), and 88, p. 4 (1893).

5303. —— ——. *Assoc.with* Gold and Copper carbonate, in quartz. *Loc.* Faith (Just-in-Time) Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

5304. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Glengarry Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), and 88, p. 3 (1893).

5305. —— ——. *Assoc.with* Gold, Copper Pyrites, Tetrahedrite, Siderite, Mispickel, Ironstone, and Yellow Ochre, in quartz. *Loc.* Grace Darling Lease (11), Normanby Goldfield (*ante*). *Assay:* Gold = 16 oz. 6 dwt. 16 gr. per ton. *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), 88, p. 3 (1893).

5306. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Lady O'Reilly Mine, Normanby Goldfield (*ante*). *Assay: See* No. 4128A. *Ref.* A.R., p. 153 (1908).

5307. —— —— (decomposed). *Assoc.with* Gold, in quartz reef. *Loc.* Mt. Flat-top Reefs, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 9 (1879).

5308. —— ——. *Assoc.with* Gold and Silver in quartz. *Loc.* Perseverance Mine, Normanby Goldfield (*ante*). *Ref.* A.R., p. 161 (1908).

5309. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz. *Loc.* Star of Hope Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 4 (1879), and G.S.M.

5310. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Venture Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 8 (1879).

5311. —— ——. *Assoc.with* Gold, Marcasite, Mispickel, and Copper Pyrites, in quartz, in vein of steatite. *Loc.* Victor Tunnel, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 5 (1893), and G.S.M.

5312. —— ——. *Assoc.with* Gold, Mispickel, Copper Pyrites, and Copper carobnate, in quartz. Welcome Reef, Normanby Goldfield (*ante*). *Assay: See* No. 4137. *Ref.* G.S.Q. Pubs. 5, p. 5 (1879), and 88, p. 2 (1893).

5313. —— ——. In quartz. Andromache R., Normanby Goldfield (*ante*). *Ref.* A.R., p. 72 (1906).

5314. —— ——. *Assoc.with* Tourmaline, in porphyry. *Loc.* Normanby Range, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 1 (1879).

5315. —— ——. *Assoc.with* Gold, Ironstone, Malachite, and Chlorite, in quartz reef. *Loc.* Head of Spring Cr., Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

5316. —— ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Otto's Claim, McMaster's (Top Camp), 14 miles N.W.byW. of Clermont Rail. Stn., Clermont Goldfield. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 64 (1906).

5317. —— ——. *Assoc.with* Galena, Cerussite, and Zinc Blende, in lode. *Loc.* Bonnie Dundee Mine, **Sellheim Mineral Field,** 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* (and *Assays*) G.S.Q. Pub. 57, p. 6 (1889).

5318. —— ——. *Assoc.with* Copper Pyrites, Galena, Minium, Cerussite, Zinc Blende, and Clay, in lode. *Loc.* General Gordon Mine, Sellheim Mineral Field (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 57, p. 6 (1889).

5319. —— ——. *Assoc.with* Ironstone, Galena, Anglesite, Minium, Cerussite, and Zinc Blende. *Loc.* Pyramid Silver Lode, Sellheim Mineral Field (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 57, p. 3 (1889).

5320. —— ——. *Assoc.with* Silver, Ironstone, Galena, Minium, Cerussite, and Zinc Blende, in lode. *Loc.* Rob Roy Mine, Sellheim Mineral Field (*ante*). *Assay: See* No. 3017. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

5321. —— ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Smith's Claim, Hillside, Black Ridge, 12¾ miles N.N.W. of Clermont, Clermont Goldfield. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 201, p. 48 (1906).

5322. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Crown Reef, Copperfield, 5 miles S.S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

5323. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Palm-tree Reef, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 6 (1886).

5324. —— ——. *Assoc.with* Copper Pyrites, in quartzite, in serpentine and slate. *Loc.* Peak Downs Copper Mine, Copperfield (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 150, pp. 2-4 (1900).

5325. —— ——. *Assoc.with* Gold and Mispickel, in quartz and chlorite. *Loc.* Star of Hope Reef, near Peak Downs Copper Mine, Copperfield (*ante*). *Ref.* G.S.Q. Pub. 27, p. 5 (1886).

5326. —— ——. *Assoc.with* Gold, Siderite, Magnesite, and Dolomite, in quartz. *Loc.* Biddy Walsh Reef, McDonald Flat, Clermont Road, 3 miles S.S.E. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 176, p. 18 (1902).

5327. —— ——. *Assoc.with* Gold and Hornblende, in quartz. *Loc.* Camboon Mine, Camboon, Upper Dawson R., 85 miles N.W.byW. of Mt. Perry, 114 miles S. of Rockhampton. *Co.* Dawson; *Dist.* Leichhardt. *Ref.* G.S.M.

5327A. —— ——. *Assoc.with* Copper Pyrites and Tenorite, in granite. *Loc.* Flora Copper Lode, MacFadzen's M.L. (1749), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 181, p. 11 (1903), and 228, p. 34 (1910).

5327B. —— ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Ironstone, in slate. *Loc.* Isen's M.F. (2642), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27-29 (1910).

5327C. —— ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Hematite, in granite. *Loc.* Iron Duke M.C. 42 and Painted Peak M.F. (1807), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27, 39 (1910).

5327D. —— ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite, in gossan in slate. *Loc.* Keeley's M.F. (2382), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 29, 30 (1910).

5327E. —— ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Hematite, in gossan in slate. *Loc.* Laird of the Hills M.L. (32), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 30, 31 (1910).

5327F. —— ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Azurite, Chlorite, and Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749), Douchang, Flora, Essie, Dozzler, and Green Outcrops Lodes, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

5327G. Iron Pyrites. *Assoc.with* Hematite, Limonite, Redruthite, Malachite, and Azurite, in granite. *Loc.* Monarch P.P.A. (116, etc.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

5327H.—— ——. *Assoc.with* Pyrrhotite, Hematite, Limonite, Magnetite, Copper Pyrites, Malachite, and Azurite, in granite and slate. *Loc.* Rodger's Back Sel., M.F. 1430, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

5328. —— ——. *Assoc.with* Gold, Siderite, Calcite, Steatite, and Felspar, in quartz. *Loc.* Gt. Catherine Reef, Yatton Goldfield, 21 miles S.W.byW. of St. Laurence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

5329. —— ——. *Assoc.with* Gold, in quartz and calcite. *Loc.* Keeley and Valentine's Mine, Nuggety Gully, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* (and *Assays*) G.S.Q. Pub. 39, p. 4 (1887).

5329A.—— ——. *Assoc.with* Gold, Silver, and Copper Pyrites, in quartz. *Loc.* Tally Ho Claim, Mt. Spencer Run, about 8 miles S.S.W. of Eton Rail. Stn. (Mackay line). *Co.* Wodehouse (*ante*). *Ref.* A.R., p. 284 (1910), and p. 317 (1911).

5329B.—— ——. *Assoc.with* Gold, Silver, Mispickel, Galena, and Zinc Blende, in lode. *Loc.* Monsildare Silver-Lead Lode, Por. 46, Par. of Monsildale, 35 miles N. of Esk, 102 miles (by rail and road) N.N.W. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Ref.* (and *Assays*) G.S.Q. Pub. 169, pp. 1-4 (1901).

5330. —— ——. *Assoc.with* Galena, Massicot, Bismite, Mispickel, and Chlorite, in quartzite. *Loc.* Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* O.R.

5331. —— ——. *Assoc.with* Galena, in quartz reef. *Loc.* Sandy Mt., Crow's Nest Rail. Stn., 34 miles (by rail) N.N.E. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* A.R., p. 148 (1908).

5332. —— ——. *Assoc.with* Mispickel, Scorodite, Wolfram, Cerussite, and Massicot, *Loc.* Plant's Leasehold, 4 miles E. of Crow's Nest Rail. Stn., 38 miles (by rail and road) N.N.E. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* A.R., pp. 148, 149 (1908).

5333. —— ——. *Assoc.with* Copper Pyrites, Tenorite, Galena, and Zinc Blende, in altered sedimentary rocks. *Loc.* Gt. Pyramid Copper and Silver Mine, 10 miles N. of Esk Rail. Stn. (Brisbane-Valley Br. line), 77 miles (by rail and road) N.byW. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

5334. —— ——. *Assoc.with* Galena and Zinc Blende, in lode. *Loc.* Kipper Cr., 8 miles W. of Esk Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* A.R., p. 245 (1910).

5335. —— ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in sedimentary rocks. *Loc.* Rising Star Copper Mine, on Cressbrook Cr., 12 miles N. of Esk Rail. line (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 169, p. 4 (1901).

5336. —— ——. *Assoc.with* Gold, Copper Pyrites, Massicot, Anglesite, Galena, Mispickel, and Limonite, in gossan and slate. *Loc.* Silver Knob P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannungar Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Assay: See* No. 3033. *Ref.* Q.G.M.J., vol. 7, pp. 46, 47 (1906).

5337. —— ——. *Assoc.with* Gold, Massicot, Cerussite, Cassiterite, Bismuth, and Calcite, in kaolinised greisen. *Loc.* Snowdrop P.A., Mt. Langan, Emu Cr. (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 467 (1906).

5338. —— ——. As octahedral and cubical crystals, in a metamorphosed sedimentary rock. *Loc.* Yarraman Cr., Seven-mile Diggings, 7 miles S.E. of Nanango, 123 miles N.W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 525 (1906).

5339. —— ——. *Assoc.with* Gold, Mispickel, and Tourmaline, in quartz reefs. *Loc.* Seven-mile Diggings (*ante*). *Ref.* G.S.Q. Pub. 29, p. 2 (1886), and Q.G.M.J., vol. 7, p. 525 (1906).

5340. —— ——. In diorite. Taromeo Cr., Taromeo, 20 miles N.N.W. of Kannangur Rail. Stn. (Brisbane-Valley line), 103 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* L.C.B.

5341. —— ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Pors. 236, 241A, and 289, Gold Cr., Brookfield, 10 miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 108, p. 25 (1896).

5342. —— ——. *Assoc.with* Gold and Galena, in quartz and jasper. *Loc.* Sel. 194 (northern part), Brookfield Cr., nr. Gold Cr. Reservoir, Brookfield, 10 miles W.S.W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 63, p. 2 (1890).

5343. —— ——. *Assoc.with* Zinc Blende, in quartz reef. *Loc.* McPhee's Sel., Mountain Camp, Enoggera Range, 6½ miles W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.R.

5344. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz. *Loc.* Perseverance Reef, Mountain Camp, Enoggera Range (*ante*). *Ref.* G.S.Q. Pub. 143, p. 9 (1889).

5345. —— ——. *Assoc.with* Copper Pyrites, Azurite, and Malachite. *Loc.* Por. 140, Par. of Dixon, 13 miles E. of Esk Rail. Stn., 70 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* A.R., pp. 156, 157 (1908).

5346. —— ——. *Assoc.with* Gold and Silver, in quartz and slate. *Loc.* Samson Cr., Samford, 8 miles W.N.W. of Enoggera Rail. Stn., 14 miles (by rail and road) N.W.byW. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.R.

5347. —— ——. In quartzite. *Loc.* Samsonvale, 18 miles N.W.byN. of Enoggera Rail. Stn., 24 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Stanley (*ante*). *Ref.* A.R., p. 104 (1907).

5348. —— ——. *Assoc.with* Turgite. *Loc.* School Reserve, Upper Kholo, 3 miles N. of Ipswich. *Co.* Stanley (*ante*).

5349. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Beaton's Sel. (68), 6 miles S.E. of Beenleigh, 30 miles (by rail) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 51, p. 6 (1889).

5350. —— ——. In quartz. Davenport's Sel. (69), 6 miles S.E. of Beenleigh Rail. Stn., 30 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 36, p. 1 (1887).

5350A. —— ——. *Assoc.with* Gold, in quartzite reef. *Loc.* Por. 239, Witty's Freehold, 1 mile W. of Ormeau, 32 miles (by rail and road) S.W. of Brisbane (South Coast line). *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 235, p. 38 (1911).

5351. —— ——. *Assoc.with* Gold and Silver, in quartz. *Loc.* Bethania Junction (South Coast line), 21 miles (by rail) S.S.E. of Brisbane. *Co.* Ward (*ante*). *Assay: See* No. 4216. *Ref.* A.R., p. 51 (1906).

5351A. —— ——. *Assoc.with* Zinc Blende, in lode. *Loc.* Geike's Sel., Upper Coomera, 38 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward (*ante*). *Ref.* G.S.M.

5352. —— ——. *Assoc.with* Gold and Silver, in quartz reef. *Loc.* Tunnel, nr. Southport, 50 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 150 (1908).

5352A. —— ——. *Assoc.with* Pyrrhotite, in graphitic schist and quartz. *Loc.* Tambourine Mt., 10 miles S.S.E. of Logan Village Rail. Stn. (Beaudesert Br. line). *Co* Ward (*ante*). *Ref.* O.R. (1910).

5352B. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Banner Reef, Barmundoo (Tableland) Goldfield, 28 to 40 miles S.W.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* A.R., p. 214 (1910).

5353. —— ——. *Assoc.with* Gold and Felspar, in quartz reef. *Loc.* Bunker's Mine, Barmundoo (Tableland) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

5354. —— ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Friend's Claim, Barmundoo (Tableland) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

5355. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende. *Loc.* Georgina Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

5356. —— ——. *Assoc.with* Gold, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* Griffith's Reef, Diggers' Cr., Barmundoo Goldfield (*ante*). *Yield: See* 4235. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

5357. —— ——. *Assoc.with* Gold. *Loc.* Mountain Rise Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

5358. —— ——. *Assoc.with* Gold, Mispickel, and Zinc Blende, in quartz reef. *Loc.* Good Hope Mine, Crow's Cr., Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Assays: See* No. 4242. *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

5359. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Mt. Jacob Mine (Garden and Mt. Fairbrother Reefs), Bompa Goldfield, 44½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

5360. Iron Pyrites. *Assoc.with* Gold, Copper Pyrites, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Mt. Jacob Mine (Stand-by Reef), Bompa Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

5361. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Roger's Mine, Bompa Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

5362. —— ——. *Assoc.with* Gold, in chloritic quartz. *Loc.* Connemarra Reef, Calliope Goldfield, 12 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

5363. —— ——. *Assoc.with* Gold, in chloritic quartz. *Loc.* John Bull Reef, Calliope Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

5364. —— ——. *Assoc.with* Copper Pyrites, Native Copper, Cuprite, Tile Ore, Malachite, Azurite, Magnetite, Hematite, Limonite, and Calcite. *Loc.* Many Peaks Copper Mine, Deception Cr., about 54 miles (by rail) S. of Gladstone (Boyne Valley line). *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

5364A. —— ——. *Assoc.with* Gold, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, and Ironstone, in crystalline limestone, etc. *Loc.* Mt. Hector Copper Mine, E. side of Dawes Range, 60 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp 174-177 (1903).

5365. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, Galena, Zinc Blende, and Calcite, in quartz. *Loc.* Advance Reef, **Norton Goldfield,** 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), 208, p. 11 (1907), and G.S.M.

5366. —— ——. *Assoc.with* Gold, Silver, Zinc Blende, and Galena, in quartz and calcite. *Loc.* All Nations Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 13 (1907).

5367. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, and Scorodite, in quartz. *Loc.* Bald Hills Reef, Norton Goldfield (*ante*). *Assays: See* No. 4266 *Ref.* (and *Assays*) G.S.Q. Pub. 208, p. 14 (1907).

5368. —— ——. *Assoc.with* Gold, Silver, Galena, Malachite, and Zinc Blende, in quartz. *Loc.* Brigham Young (Todman's Tapautohaungo), Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, pp. 15, 16 (1907).

5369. —— ——. *Assoc.with* Gold, Silver, Mispickel, Copper Pyrites, Redruthite, Azurite, Malachite, Zinc Blende, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assay: See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

5370. —— ——. *Assoc.with* Gold, Silver, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* Conran's Reef, Norton Goldfield (*ante*). *Assay:* Gold = 7 oz., and Silver 8 oz. 16 dwt. per ton. *Ref.* G.S.Q. Pub. 58, p. 8 (1890), and G.S.M.

5371. —— ——. *Assoc.with* Bornite. *Loc.* Frampton Lease, Norton Goldfield (*ante*).

5372. —— ——. *Assoc.with* Gold, Galena, Zinc Blende, in quartz and calcite. *Loc.* Frampton United Mine, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

5373. —— ——. *Assoc.with* Gold, Galena, Mispickel, and Zinc Blende, in quartz and calcite. *Loc.* Frampton Reef, Norton Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 208, p. 21 (1907).

5374. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Friend's Mine, Norton Goldfield (*ante*). *Ref.* G.S.M.

5375. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay: See* No. 3048. *Ref.* G.S.Q. Pub. 208, pp. 22-24 (1907).

5376. —— ——. *Assoc.with* Gold, Silver, Mispickel, Galena, Zinc Blende, and Redruthite, in quartz. *Loc.* Goody's (Carmichael Reef), Norton Goldfield (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 208, p. 26 (1907).

5377. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Han's Big Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 27 (1907).

5378. —— ——. *Assoc.with* Gold, Galena, Zinc Blende, and Calcite, in quartz. *Loc.* Hickey's Reef, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

5379. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay: See* No. 4280. *Ref.* G.S.Q. Pub. 208, p. 29 (1907).

5380. —— ——. *Assoc.with* Copper Pyrites. *Loc.* Long Tunnel, Norton Goldfield (*ante*). *Ref.* L.C.B.

5381. —— ——. *Assoc.with* Gold, Silver, and Zinc Blende, in quartz and calcite. *Loc.* Marodian Reef, Norton Goldfield (*ante*). *Assay:* Gold = 1 oz. 6 dwt. 4 gr. per ton; Silver = 1 oz. 8 dwt. 19 gr. per ton. *Ref.* G.S.Q. Pub. 208, p. 32 (1907).

5382. —— ——. *Assoc.with* Gold, etc., in quartz. *Loc.* Mundic Lode, Norton Goldfield (*ante*). *Ref.* G.S.M.

5383. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Never Never Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

5384. —— ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* New Constitution Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 33 (1907).

5385. —— ——. *Assoc.with* Gold, Mispickel, Zinc Blende, Limonite, in quartz. *Loc.* Paddock Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 34 (1907).

5386. —— ——. *Assoc.with* Gold and Mispickel, in calcite. *Loc.* Sailor Boy Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 35 (1907).

5387. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Smart's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 36 (1907).

5388. —— ——. *Assoc.with* Gold, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Sulphide Reef, Norton Goldfield (*ante*). *Assay: See* No. 4292. *Ref.* G.S.Q. Pub. 208, p. 38 (1907).

5389. —— ——. *Assoc.with* Gold, Silver, Mispickel, Zinc Blende, and Galena, in quartz and calcite. *Loc.* Who-Ha'-Thouht-It Reef, Norton Goldfield (*ante*). *Assay: See* No. 4294. *Ref.* G.S.Q. Pub. 21, p. 6 (1885), 208, p. 39 (1907).

5390. —— ——. *Assoc.with* Gold and Mispickel, in quartz reefs. *Loc.* Granite Ridges, Wattle and Cattle Crs., Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

5391. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Capricornian Mine, Ulam Goldfield, 3 miles S. of Toonda Rail. Stn. (North Coast line), 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 99, p. 6 (1894).

5392 —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Central Queensland 1 N. Mine, Busby's Gully, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 9 (1894).

5393. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Just-in-Time Mine, Ulam Goldfield (*ante*). *Assay:* Gold = 1 oz. 9 dwt. 9 gr. per ton. *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

5394. —— ——. *Assoc.with* Galena and Copper carbonate, in quartz reef. *Loc.* Lamona Mine, Busby's Gully, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 9 (1894).

5395. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Last Chance, Mystery, and Nil Desperandum Mines, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, pp. 5-8 (1894).

5396. —— ——. *Assoc.with* Gold and Limonite, in quartz reef. *Loc.* New Silkworth Mine, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

5397. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Seaview, Queenslander, and Victory Mines, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, pp. 6-10 (1894).

5398. —— ——. *Assoc.with* Gold and Ironstone, in quartz reef. *Loc.* St. Joseph United and True Blue Mines, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, pp. 3, 10 (1894).

5398A. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Halliday's, King's No. 8, and May's Reef, in Britannia Mine, Canoona Goldfield, 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* O.R. (1910).

5398B. —— ——. *Assoc.with* Gold, in quartz. *Loc.* King's Reefs (1, 2), in Young Britannia Gold Mine, Canoona Goldfield (*ante*). *Ref.* A.R., p. 269 (1910).

5399. —— ——. *Assoc.with* Gold, in serpentine. *Loc.* Endeavour Mine, Cawarral, 23 miles (by rail) N.N.E. of Rockhampton (Yeppoon line), Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.M.

5400. —— ——. *Assoc.with* Gold, in quartz and chlorite. *Loc.* Helena Reef, Cawarral (*ante*). *Ref.* Q.M.

5401. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, with traces of earthy Hematite, Galena, Azurite, Malachite, Witherite, Barytes, and Red Jasper, in massive lodes of quartzite, ironstone, and shale. *Loc.* Gt. Fitzroy Copper and Gold Mine, Mt. Chalmers, 19 miles (by rail) N.E. of Rockhampton, Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* (and *Assays*) G.S.Q. Pub. 216 (1907).

5402. Iron Pyrites. *Assoc.with* Gold, in quartz. *Loc.* North Star Mine, New Zealand Gully, 15 miles (by rail) N.E. of Rockhampton, Cawarral Goldfield (*ante*). *Ref.* G.S.M.

5403. —— ——. *Assoc.with* Gold, Calcite, and Tourmaline. *Loc.* Union Gold Mine, Cawarral, 23 miles (by rail) N.N.E. of Rockhampton, Cawarral Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

5404. —— ——. *Assoc.with* Silver, Cuprite, Tenorite, Malachite, Cerussite, Zinc Blende, and Barytes, in serpentinous shales, etc. Mt. Warminster Copper-Lead Mine, nr. Mt. Chalmers, 20 miles (by rail) N.E. of Rockhampton, Cawarral Goldfield (*ante*). *Ref.* B.D.

5405. —— ——. *Assoc.with* Gold, Copper Pyrites, and Pyrrhotite, in quartz reef. *Loc.* Hector Mine, on Crocodile Cr. Rd., 6 miles S. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 27 (1897), and G.S.M.

5406. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Mt. Usher Mine, Gavial Cr., 6 miles N.E. of Mt. Morgan Rail. Stn., 30 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 132, p. 15 (1898), and G.S.M.

5406A. —— ——. *Assoc.with* Gold, Telluride of Gold and Silver, and Zinc Blende, in calcite and quartz. *Loc.* Anglo-Saxon Mine, Mt. Usher, Gavial Cr. (*ante*). *Ref.* O.R.

5407. —— ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz reef. *Loc.* Mary Florence Mine, Blackfellow's Gully, Morinish Goldfield, 25 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* A.R.D.M., p. 60 (1885), and G.S.M.

5407A. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Welcome Mine, Morinish Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 7 (1887).

5407B. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Nil Desperandum Mine, Ridgelands Goldfield, 20 miles N.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.M.

5408. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Native Cat Extd., Stanwell Goldfield, 16 miles (by rail) S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*).

5409. —— ——. *Assoc.with* Mispickel. *Loc.* Mt. Gordon, 3 miles W. of Wycarbah Rail. Stn. (Central line), 27 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

5410. —— ——. *Assoc.with* Galena, in quartz reef. *Loc.* The Pointer's, nr. Yaamba, 13 miles N.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

5411. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Langdale Hill, nr. Tooloombah Stn., 25 miles S. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 84, p. 9 (1892).

5412. —— ——. *Assoc.with* Gold, in quartz and chlorite. *Loc.* Caledonian Reef, Rosewood Goldfield, 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 49, p. 7 (1889).

5413. —— ——. *Assoc.with* Copper Pyrites, Cuprite, and Azurite. Stevens's Copper Lode, 2½ miles W. of Cania Township, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 58 (1890).

5414. —— ——. *Assoc.with* Copper Pyrites, Copper carbonate, Magnetite, and Manganese-dioxide. *Loc.* Callide or 5-Mile Copper Mine, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 27 (1904), and G.S.M.

5414A. —— ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Hematite, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Hd. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

5415. —— ——. *Assoc.with* Gold, Silver, Native Copper, Copper Pyrites, Redruthite, Cuprite, Azurite, Malachite, Ironstone, Molybdenite, and Galena, in granitic rock, breccia, and sandtsone. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn. (**Mt. Morgan** line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 22 (1904).

5416. —— ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Clanricarde Mine, 4 miles S.S.W. of Mt. Morgan Rail. Stn., 28 miles (by rail and road) S.S.W. of Rockhampton, Mt. Morgan (Crocodile Cr.) Goldfield. *Co.* Raglan (*ante*). *Assays:* Average Gold = 5 oz. 11 dwt. 18 gr. per ton. *Ref.* G.S.Q. Pub. 103, p. 30 (1895).

5417. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz reef. *Loc.* Champion Lease, head of Champion Gully, 1 mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 12 (1898).

5418. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Peut's Reef, S. of Champion Gully, 1 mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 12 (1898).

5419. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz reef. *Loc.* Welcome Mine, Champion Gully, 1¼ mile N.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

5420. —— ——. *Assoc.with* Gold, in quartzite. *Loc.* Gt. North Lode, 3½ miles N.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 103, p. 29 (1895).

5421. —— ——. *Assoc.with* Gold, Limonite, and Calcite, in quartzite lode. *Loc.* Hidden Treasure Mine, S. of Mundic Cr., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 132, p. 11 (1898), 161, pp. 9-12 (1901).

5422. —— ——. *Assoc.with* Gold, in quartz reef. Hit or Miss Mine, Mt. Morgan (Crocodile) Goldfield (*ante*). *Ref.* G.S.M.

5423. —— ——. *Assoc.with* Gold, in gossan, quartzite, and conglomerate. *Loc.* Light of Day Mine, Mt. Gilmore, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 161, pp. 5-8 (1901).

5424. —— ——. *Assoc.with* Gold, in quartzite lode. *Loc.* Morganite Mine, nr. Mt. Morgan Rail. line, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 161, p. 12 (1901).

5425. —— ——. *Assoc.with* Copper Pyrites, in slate. *Loc.* Mt. Alexander Mine, 8 miles S.S.E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 143, p. 26 (1899).

5426. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Magnetite, Hematite, Limonite, Göthite, Pyrolusite, and Satin Spar, in vesicular quartz, quartzite, kaolin, and ironstone. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton, Mt. Morgan Goldfield (*ante*). *Ref.* (and *Assays*) G.S.Q. Pubs. 17, p. 1 (1884), 47 (1888), 83 (1892), 132 (1898).

5427. —— ——. *Assoc.with* Calaverite, in quartz. *Loc.* Mt. Morgan Gold Mine (at the 32 ft. level) (*ante*). *Ref.* E.S.S.

5428. —— ——. *Assoc.with* Copper Pyrites and Selenite, in veins. *Loc.* Mt. Morgan Gold Mine (*ante*). *Ref.* B.D.

5429. —— ——. *Assoc.with* Gold, Ironstone, and Copper carbonate, in serpentine and quartzite. *Loc.* Mt. Morgan N. Mine, adjoining Mt. Morgan Mine, Mt. Morgan Goldfield (*ante*). *Ref.* G.S Q. Pub. 132, p. 8 (1898).

5430. —— ——. *Assoc.with* Gold, in quartz.. *Loc.* Mundic Reef, Mt. Morgan, Mt. Morgan Goldfield (*ante*). *Ref.* G.S.M.

5431. —— ——. *Assoc.with* Gold, Mispickel, Copper Pyrites, and Zinc Blende, in quartz reef. *Loc.* Queen of the Valley Mine, between Dee R. and Crocodile Cr., 4 miles N.E. of Mt. Morgan Rail. Stn., Mt. Morgan (Crocodile Cr.) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

5432. —— ——. *Assoc.with* Gold, in quartzite. *Loc.* Rockhampton P. Co.'s Area, 1¼ mile W.N.W. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 10 (1898).

5433. —— ——. *Assoc.with* Gold, Copper Pyrites, and Zinc Blende, in quartz and calcite. *Loc.* Roxburgh Mine, between Dee R. and Gavial Cr., 6 miles N.E.byE. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 14 (1898).

5434. —— ——. *Assoc.with* Gold, in quartz. *Loc.* St. Gothard Mine, 12 miles N.E. of Mt. Morgan Rail. Stn., Mt. Morgan (Crocodile) Goldfield (*ante*). *Ref.* G.S.Q. Pub. 132, p. 16 (1898).

5435. —— ——. *Assoc.with* Gold and Copper Pyrites, in quartz and calcite. *Loc.* Struck Oil Lease (186), 5 miles E. of Mt. Morgan Rail. Stn., Mt. Morgan Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 103, p. 28 (1895), 132, p. 14 (1898).

5436. —— ——. *Assoc.with* Gold, Tourmaline, and Calcite. *Loc.* Union Gold Lease, Mt. Morgan Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 51 (1887).

5437. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Windsor Mine, Mt. Morgan (Crocodile Cr.) Goldfield (*ante*). *Ref.* Q.M.

5438. —— ——. In limestone. Por. 1230, Walla, Gin Gin, 29 miles (by rail) W.byS. of Bundaberg (Bundaberg-Mt. Perry line). *Co.* Bowen; *Dist.* **Wide Bay.** *Ref.* L.C.B.

5439. Iron Pyrites. *Assoc.with* Copper Pyrites, Tetrahedrite, Azurite, Malachite, Galena, Zinc Blende, and Calcite, in slate, diorite, andesite, etc. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* Q.G.M.J., vol. 8, pp. 524-526 (1907).

5440. —— ——. *Assoc.with* Gold and Silver, in quartz. *Loc.* Black Snake Reef, Black Snake Goldfield, 10 miles S. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

5441. —— ——. *Assoc.with* Gold, in quartz reef. *Loc.* Queensland Freeholds Co.'s Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 53 (1897).

5442. —— ——. *Assoc.with* Gold, Mispickel, and Copper Pyrites, in quartz reef. *Loc.* Rose, Shamrock, and Thistle Mine, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

5443. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Mispickel, Galena, Zinc Blende, and Schorl, in quartz. *Loc.* Victoria Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

5444. —— ——. *Assoc.with* Gold, Silver, and Tenorite, in quartz reef. *Loc.* Stoney Ridge, Black Snake Goldfield (*ante*). *Ref.* G.S.M.

5445. —— ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Azurite, Malachite, Hematite, and Limonite, in lodes, in syenitic granite. *Loc.* Calgoa Copper Mines, Thunder Cr., Calgoa Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

5446. —— ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende. *Loc.* Mellor and Elworthy's Stn., Imbil, 8 miles from Kadanga, 15 miles S. of Gympie. *Co.* Lennox (*ante*). *Ref.* A.R., p. 9 (1907).

5447. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Empress Reef, Yabba (Jimna) Goldfield, 35 miles S. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 169, p. 15 (1901).

5448. —— ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Cuprite, Malachite, Bismuthinite, Magnetite, and Limonite. *Loc.* Kabonga Mine, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897), and G.S.M.

5448A. —— ——. *Assoc.with* Gold, in quartz and gossan. *Loc.* New Year's Extd. Claim, Kilkivan Goldfield (*ante*). *Ref.* A.R., p. 202 (1909).

5449. —— ——. *Assoc.with* Gold, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Rise and Shine Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 2 (1886).

5449A. —— ——. *Assoc.with* Gold and Ironstone, in quartz lode. *Loc.* P.A. (815), 7 miles (by road) W. of Kilkivan. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* A.R., p. 235 (1910).

5450. —— ——. *Assoc.with* Gold, Copper carbonate, Mispickel, Limonite, and Zinc Blende, in quartz, calcite, and gossan veins. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

5451. —— ——. *Assoc.with* Galena. *Loc.* Chinaman's Cr., Mt. Ubi, W. of Blackall Range, 20 miles W.byS. of Palmwoods Rail. Stn., 85 miles (by rail and road) N. of Brisbane. *Co.* Lennox (should be March) (*ante*). *Ref.* G.S.M.

5452. —— ——. *Assoc.with* Tenorite, Copperas, Galena, Zinc Blende, and Calamine, in quartz reef. *Loc.* Beer and Dawson's Lease, Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

5453. —— ——. *Assoc.with* Gold, Specular Hematite, Calcite, Graphite, with traces of Copper, in diorite. *Loc.* Campbell's Reef, Yorkey's Goldfield (*ante*). *Refs.* G.S.M. and G.S.Q. Pub. 197, p. 8 (1902).

5454. —— ——. *Assoc.with* Gold, Copper Pyrites, Hematite, and Zinc Blende, in quartz reef. *Loc.* Ortt's Mine, Yorkey's Goldfield (*ante*). *Ref.* G.S.M., and G.S.Q. Pub. 179, p. 8 (1902).

5455. —— ——. *Assoc.with* Gold, Stibnite, and Galena, in quartz reef. *Loc.* Triad Lease, Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 7 (1902).

5456. —— ——. *Assoc.with* Gold, Stibnite, and Cervantite. *Loc.* Yorkey's Surprise G.M. Lease, and Zealandia Lease (Surprise and Zealandia Reefs), Yorkey's Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 5 (1902).

5457. —— ——. *Assoc.with* Felspar and Hornblende, in quartz. *Loc.* Alma Reef, **Gympie Goldfield**, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 8 (1889).

5458. —— ——. *Assoc.with* Anthracite, in cross-cut at 1,300 ft.-level, in 6-in. seam. *Loc.* Australasian Shaft, Australian G.M. Co.'s Mine, Gympie Goldfield (*ante*). *Ref.* B.D.

5459. —— ——. *Assoc.with* Gold, in black shale. *Loc.* Ellen Harkin's Lease (568), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

5460. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Glanmire Reef, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 6 (1889).

5461. —— ——. *Assoc.with* Gold, in carbonaceous shale. *Loc.* Golden Crown Lease (613), in western shaft, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 31 (1889).

5462. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Gt. Eastern 2 Lease (Inglewood Reef), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 76, p. 2 (1891).

5463. —— ——. *Assoc.with* Galena, in quartz reef. *Loc.* New Dawn Mine, Gympie Goldfield (*ante*). *Ref.* G.S.M.

5464. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Phœnix P.C. (Western Reef), Gympie Goldfield (*ante*). *Ref.* G.S.M.

5465. —— ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* Phœnix 3 N. Lease (799), Gympie Goldfield (*ante*). *Ref.* G.S.M.

5466. —— ——. *Assoc.with* Gold and Galena, in quartz and calcite. *Loc.* Phœnix 2 S. Lease, Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52, p. 25 (1889).

5467. —— ——. *Assoc.with* Gold, in calcareous shale. *Loc.* Wilmot Extd. Lease (628), Gympie Goldfield (*ante*). *Ref.* G.S.Q. Pub. 52. p. 24 (1889).

5468. —— ——. *Assoc.with* Gold, Galena, Siderite, and Zinc Blende, in quartz, between walls of slate and diorite (?). *Loc.* Enterprise Reef, on br. of Cochrane Cr., 5½ miles N.E. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

5469. —— ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Veteran Reef, 7 miles N.N.W. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

5470. —— ——. *Assoc.with* Gold, in gossany quartz. *Loc.* Devil's Mountain, 17 miles N.W. of Gympie. *Co.* March (*ante*). *Ref.* A.R., p. 157 (1908).

5471. —— ——. *Assoc.with* Pyrrhotite, in quartz. *Loc.* Motha Mt., Gympie (*ante*). *Ref.* A.R., p. 152 (1908).

5472. —— ——. *Assoc.with* Hematite. *Loc.* Nr. Noosa, 15 miles N.N.E. of Yandina Rail Stn. (North Coast line), 84 miles (by rail and road) N. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

5473. —— ——. In schist. *Loc.* Selenseburu Cr., Duan (Normanby) Is., D'Entrecasteaux Group, 262 miles E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 23 (1892).

5474. —— ——. In quartz. Schistose Cliff, Port Moresby, 380 miles N.byE. of Cooktown, Brit. New Guinea. *Ref.* G.S.Q. Pub. 55, p. 2 (1889).

5475. —— ——. In alluvial deposits. *Loc.* Ana (St. Patrick's) Cr., St. Aignan (Misima), 379 miles E.byS. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 31 (1892).

5476. —— ——. *Assoc.with* Gold, Hematite, Limonite, and Psilomelane, in quartz. *Loc.* Caledonia Claim, Sudest Is., 448 miles E.S.E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 29 (1892).

5477. —— ——. *Assoc.with* Gold, in quartz. *Loc.* Busai, Woodlark Is., 384 miles E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

Iron Sand. Along the Queensland coast many of the beaches yield iron sand, but not in quantities sufficient to be considered worthy of attention for their iron contents. Sometimes they have been found to contain gold, tin, monazite, and platinum in small quantities, and several attempts have been made to work the deposits where these valuable minerals have been proved to exist.

5478. —— ——. Containing Magnetite. *Loc.* Mt. MacGregor, 2½ miles S.E. of Mt. Toby, 2½ miles N.N.E. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* L.B. 1, p. 94 (1887).

5479. —— ——. Containing Magnetite, as beach deposit. *Loc.* Percy Is. No. 2, Northumberland Group, 60 miles N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* G.S.M.

—— silicates. *See under* Silicates.

Iron Spinel. *See* Hercynite.

—— sulphate. *See* Copperas.

—— sulphides. *See* Bornite, Copper Pyrites, Iron Pyrites, Marcasite, Pyrrhotite.

Ironbark Mine, Collaroy, 25 miles N.W. of St. Lawrence. *Min.Ref.* Gold, *see* 4181; Malachite, 6338; Mispickel, 6771; Silver, 7504.

Ironbarks Sub-artesian Bores. *See under* Artesian Bores. No. 361.

Iron-clad Mine, Herberton. *Min.Ref.* Cassiterite, *see* 1095; Chalcanthite, 1329; Copper Pyrites, 2211; Mispickel, 6738.

—— Reef, Croydon Goldfield. *Min.Ref.* Gold, *see* 3530; Zinc Blende, 8055.

—— Tin and Copper Mine, Watsonville. *Min.Ref.* Azurite, *see* 190; Cassiterite, 904; Malachite, 6221; Ochre, 4811; Tile Ore, 2546.

Ironpot Cr., trib. of Boyne R., 35 miles N. of Dalby. *Min.Ref.* Coal, *see* 1599; Olivine, 6919.

—— Mt., 12 miles N.N.E. of Rockhampton. *Min.Ref.* Magnesite, *see* 5958.

Ironstone. The following are unclassified Iron Oxides. *See also under* Hematite, Limonite, Magnetite, and Clay Ironstone.

5480. ——. *Assoc.with* Redruthite, Azurite, Malachite, Ilmenite, Calcite, Chlorite, Biotite, in granite quartz, felspar, schist. *Loc.* Mavis's M.L. (315), (Longamundi Group), Dugald R., between 34 and 39 miles N.W. of **Cloncurry.** *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 283, 284 (1908).

5481. ——. *Assoc.with* Almandine, Garnet, Cuprite, Malachite, and Asbolane, with traces of Copper. *Loc.* W. of Mt. Eurie, nr. head of Dugald R., 40 miles N.byW. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 10, p. 7 (1885).

5482. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, and Malachite. *Loc.* Contra Copper Lode, ¼-mile S.W. of Gt. Australia Copper Mine, Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

5482A. ——. *Assoc.with* Silver and Gold, in quartz. *Loc.* King Edward VII. Claim, Bishop's Cr., 11 miles E.S.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* A.R., p. 282 (1910).

5483. ——. *Assoc.with* Gold, in quartz leader. *Loc.* Surprise Leader, E. of Gilded Rose Mine, 11 miles E.S.E. of Cloncurry. *Co.* Beaconsfield (*ante*) *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

5484. ——. *Assoc.with* Bornite, Redruthite, Cuprite, Copper carbonate, and Chrysocolla, in quartz and calcite. *Loc.* Pumpkin Gully Leases, Mt. Douglas, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 153, pp. 6, 7 (1900).

5485. ——. *Assoc.with* Gold, in quartz. *Loc.* Bertha P.C., Bower Bird Goldfield, 70 miles S.W. of Cloncurry. *Co.* Brahe or Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 3 (1895).

5486. ——. *Assoc.with* Gold, in quartz. *Loc.* Lily of the Valley P.C., Bower Bird Goldfield (*ante*). *Ref.* G.S.Q. Pub. 104, p. 2 (1895).

5487. ——. In quartz lode. *Loc.* Police Cr., 90 miles S.S.W. of Burketown. *Co.* Gregory; *Dist.* Burke.

5488. —— (1,000,000 (?) tons in sight). Mt. Oxide, between Torpedo Cr., trib. of Gunpowder Cr., and Myally Cr., trib. of Leichhardt R., 109 miles N.W. of Cloncurry. *Cos.* Kamileroi and Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 359-362 (1908).

5489. ——. Forms thin-bedded Cretaceous deposits. *Loc.* Normanton, W. Coast of Cape York Peninsula. *Co.* Norman; *Dist.* Burke. *Ref.* B.D.

5490. ——. *Assoc.with* Copper Pyrites, and Cuprite. *Loc.* Mascotte M.L. (319), 20 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* A.R., p. 118 (1907).

5490A. ——. *Assoc.with* Gold, Copper (native), Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Gothite, Turgite, Calcite, Chlorite, and Selenite, in quartz, quartzite, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

5491. —— (siliceous). *Assoc.with* Gold, Chalcedony, in quartz. *Loc.* Saracinesca Reef, between Rose and Thistle Reef, and Soldier's Cap, 24 miles S.E.byS. of Cloncurry. *Co.* Selwyn (*ante*) *Ref.* G.S.Q. Pub. 104, p. 4 (1893).

5491A. ——. *Assoc.with* Gold, in quartz. *Loc.* Black Fort Mt., nr. Top Camp, 24 miles S.byW. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* A.R., p. 268 (1910).

5491B. ——. *Loc.* Mt. Philp, 40 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* Q.G.M.J., vol. 7, pp. 232, 236 (1906).

5492. ——. *Assoc.with* Manganese-dioxide, in quartz. *Loc.* Two-mile Creek Diggings, 23 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 104, p. 5 (1895).

5493. ——. *Assoc.with* Gold, Iron Pyrites, and Graphite (impure). *Loc.* Come-at-Last Reef, 1¼ mile N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

5494. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Golden Gate 7 N. Lease (346), Golden Gate Mining Centre, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 11 (1896).

5495. ——. *Assoc.with* Gold, in quartz. *Loc.* Iron Duke and Nancy Lee Reefs, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 118, p. 12 (1896).

5496. ——. *Assoc.with* Gold, in quartz. *Loc.* Nancy Lee Reef, Golden Gate (*ante*). *Ref.* G.S.Q. Pub. 35, p. 9 (1887).

5496A.——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* King of Wallabadah Lease (410), Golden Valley, 12 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, pp. 40, 41 (1896), and G.S.M.

5497. ——. *Assoc.with* impure Graphite, in quartz. *Loc.* Norah Reef, ¾-mile N.W. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

5498.——. *Assoc.with* Gold, impure Graphite, and Chlorite, in quartz. *Loc.* Sir Walter Reef, ½-mile E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

5499. ——. *Assoc.with* Gold and Manganese-dioxide, in quartz. *Loc.* Homeward Bound Reef, 4½ miles N.E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

5500. ——. *Assoc.with* Gold, in quartz. *Loc.* Mulligan's P.A., Corktree Cr., 5 miles E.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1887).

5501. ——. *Assoc.with* Gold, Galena, Anglesite, and Massicot, in quartz. *Loc.* Ace of Hearts Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

5502. ——. *Assoc.with* Gold and Massicot, in quartz. *Loc.* Comet Reef, Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

5503. ——. *Assoc.with* Gold, Cerussite, and Pyromorphite, in quartz. *Loc.* Federation Reef, Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

5504. ——. *Assoc.with* Native Silver. *Loc.* True Blue Reef, 1¾ mile N.W.byN. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Burke. *Assay:* Gold = 4 oz. per ton, Silver = 200 oz. per ton. *Ref.* B.D.

5504A.——. *Assoc.with* Malachite, in ferruginous quartz. *Loc.* Dobbyn 1 N. M.L. (679), (Dobbyn Group), Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

5505. ——. *Assoc.with* Cuprite, Copper carbonate, and Quartz, in schist. *Loc.* Mount Cuthbert, 19 miles S.W. of Coolullah, 63 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 153, p. 9 (1900).

5506. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, Iron Pyrites, Limonite, and Magnesite, in kaolinised schist. *Loc.* Mt. Cuthbert 1 and 2 S. M.L.'s (257 and 294), (Mt. Cuthbert Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321, 322, (1908).

5507. ——. *Assoc.with* Malachite. *Loc.* Mt. Cuthbert S. Lease, Mt. Cuthbert Group (*ante*). *Assay:* Copper = 32·1 per cent., Gold = 13 grs. per ton, Silver = 16 dwt. per ton. *Ref.* A.R., p. 46 (1906).

5508. ——. *Assoc.with* Limestone. *Loc.* Flinders R., 18 miles N.W. of Warreah Rail. Stn. (Hughenden line). *Co.* Wongalee; *Dist.* Burke. *Ref.* G.S.Q. Pub. 44, p. 1 (1888).

5509. ——. *Assoc.with* Gold, in sandstone. *Loc.* Pride of Gibangle, Gibangle, 12 miles N.W. of Degilbo Rail. Stn. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

5510. ——. *Assoc.with* Minium. *Loc.* Rose and Thistle Silver Lode, Didcot Cr., Mt. Melville, 2½ miles N. of Chowey Rail. Stn. (Gayndah line), 65 miles (by rail and road)) W. of Maryborough. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

5511. ——. *Assoc.with* Manganese-dioxide, in quartz reef. *Loc.* At foot of Mt. Melville, nr. Didcot and Chowey Creeks, 2½ miles N.byW. of Chowey Rail. Stn. (*ante*). *Assay: See* No. 3570. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

5512. ——. *Assoc.with* Gold, Iron Pyrites, and Molybdenite. *Loc.* White's Reef, Mt. Ophir, Chowey Cr. (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

5513. ——. Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 173, p. 4 (1902).

5514. Ironstone. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Copper Pyrites, Native Bismuth, Bismuthinite, and Magnetite, in lode. *Loc.* Don Jon Bismuth Mine, Mt. Havilah, 1 mile N. of Biggenden Rail. Stn., and 2¾ miles S.S.W. of Degilbo Rail. Stn. (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907).

5515. ——. *Assoc.with* Gold, in quartz. *Loc.* Neill's Paradise G.M. Co.'s P. Area, Paradise Goldfield, 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 68, p. 3 (1891).

5515A. ——. *Assoc.with* Redruthite, Malachite, Azurite, Barytes, and Calcite. *Loc.* Burnett Range, nr. Gaeta, about 23 miles N.byW. of Mt. Perry Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* A.R., p. 263 (1910).

5516. ——. *Assoc.with* Gold, Galena, and Iron Pyrites, in quartz. *Loc.* Mt. Rose United Mine, Mt. Rose Reef, Eidsvold Goldfield, Burnett R., 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. p. 43, p. 2 (1887).

5517. ——. *Assoc.with* Gold, Tetrahedrite, Cuprite, Azurite, Malachite, and Chalcanthite, in lodes in gneiss and schist. *Loc.* Arbouin Mines, between Nondah Cr. and Walsh R., 18 miles W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 134, pp. 13, 14 (1898).

5518. ——. *Assoc.with* Gold, in quartz. *Loc.* Mt. Buchanan, Oaky Cr., 12 miles S.E.byS. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 123, p. 8 (1897).

5519. ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Mt. Madden, Oaky Cr., 13 miles S.E.byS. of Maytown, Palmer Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 108, p. 11 (1896), and 123, p. 8 (1897).

5520. ——. In bed of Batavia River, nr. Moreton Telegraph Stn., Cape York Peninsula. *Co.* Dalhunty; *Dist.* Cook. *Ref.* G.S.Q. Pub. 180, p. 9 (1902).

5521. ——. *Assoc.with* Gold and Manganese-dioxide, in quartz. *Loc.* Lady Franklin Reef, Caledonia Cr., trib. of Goldsmith Cr., 28 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

5522. ——. *Assoc.with* Cassiterite and Manganese-dioxide, in altered sandstone and quartzite. *Loc.* Tourmaline United Mine, on Baker's Cr., Bakerville, 4 miles W. of Watsonville, Walsh and Tinaroo Mineral Fields *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 27 (1897).

5523. ——. *Assoc.with* Cassiterite and Siderite, in quartzite *Loc.* Federation Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 24 (1897).

5524. ——. *Assoc.with* Cassiterite, in porphyry. *Loc.* Leinster Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 22 (1883).

5525. ——. *Assoc.with* Cassiterite and Wolfram, in chlorite. *Loc.* Parnell Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

5526. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Iron Pyrites, Mispickel, Cassiterite, Stannite, Wolfram, Fluorspar, and Chlorite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), 119, p. 15 (1897).

5527. —— (pisolitic). *Assoc.with* Clay. *Loc.* Vrilya Point, West Coast, Cape York Peninsula. *Co.* Jardine; *Dist.* Cook. *Analysis:* Moisture = 2·89 per cent.; Silica = 32·64 per cent.; Iron = 16·0 per cent.; Alumina = 28·18 per cent. *Ref.* G.S.Q. Pub. 180, pp. 7, 9 (1902).

5528. ——. *Assoc.with* Cerussite and Anglesite, in gossan. *Loc.* Quetta (Skardon's) Silver Mine, Dargalong, 7 miles S. of Zillmanton Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* (and *Assay*) G.S.Q. Pub. 69, p. 10 (1891).

5529. ——. Mt. Lucy, 4 miles W. of Almaden Rail. Stn. (Chillagoe line), 125 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Analysis:* Silica = 1·10 per cent.; Alumina = 2·33 per cent.; Iron = 67·30 per cent.; Manganese = 0·29 per cent.; Lime = trace; Magnesia = nil; Phosphorous = 0·33 per cent.; Sulphur = 0·01 per cent. *Ref.* A.R., p. 12 (1907).

5530. ——. *Assoc.with* Galena, Cerussite, and Malachite, in quartz and clay. *Loc.* Girofla Mine, Opera Cr., 4 miles W. of Zillmanton Rail. Stn. (Chillagoe line), and 146 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 69, p. 3 (1891), and B.D.

5531. ——. *Assoc.with* Limonite, Siderite, Tetrahedrite, Malachite, and Manganese-dioxide. *Loc.* Queenslander Lease, Red Cap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mneral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

5532. ——. *Assoc.with* Gold and Cassiterite, in gravelly alluvial deposits. *Loc.* Claims on Terraces, Russell Goldfield, 15 to 20 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 89, pp. 80, 81 (1893).

5533. ——. *Assoc.with* Gold, in quartz. *Loc.* Mt. Bartle Frere, Christmas Cr., Mulgrave R., Russell Extd. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

5534. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Lower Crossing, Peach R., Cape York Peninsula, 180 miles N.W. of Cooktown. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.M.

5535. —— (pisolitic). *Assoc.with* Clay. *Loc.* South Shore, Batavia R., West Coast, Cape York Peninsula. *Co.* Weipa; *Dist.* Cook. *Analysis:* Moisture = 2·23 per cent.; Silica = 42·53 per cent.; Iron = 6·72 per cent.; Alumina = 33·35 per cent. *Ref.* G.S.Q. Pub. 180, p. 9 (1902).

5536. —— (pisolitic). Embley R., West Coast, Cape York Peininsula (*ante*). *Ref.* G.S.Q. Pub. 180, p. 7 (1902).

5537. ——. Eight miles inland and 1 mile along the northern tributary of the Pascoe R., Weymouth Bay, Bowden Mineral Field, 240 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* Cook.

5537A.——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, Azurite, in lodes. *Loc.* Tartana Hill, Bowler Cr., Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line). *Co.* Wrotham; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, pp. 15, 16 (1898).

5538. ——. *Loc.* Ellerton Park, Broxburn, 33 miles (by rail) S.W. of Toowoomba (Pittsworth Br. line). *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* O.R.

5539. ——. *Assoc.with* Galena, Copper Pyrites, Redruthite, Copper carbonate, Zinc Blende, and Manganese-dioxide, in lode. *Loc.* Pikedale Silver Mine, Pikedale Head. Stn., Woolshed Gully, 20 miles W.byS. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

5540. ——. Two miles from Silver Queen Silver Mine, 8 miles W. of Ballandean, 22 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*).

5541. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Galena, Cerussite, Cuprite, Tile Ore, Copper Pyrites, Malachite, Azurite, Zinc Blende, Smithsonite, and Calcite, in lode. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 120 (1898), and 191 (1904).

5542. ——. Silver Spur Mine (*ante*). *Analysis:* Ferric oxide = 85·22 per cent., Manganese-dioxide = 1·69 per cent., Alumina = 5·50 per cent., Silica = 4·94 per cent., Water = 2·65 per cent., Undetermined = 1·69 per cent. *Ref* G.S.Q. Pub. 191, p. 37 (1904).

5543. ——. *Assoc.with* Gold, in quartz. *Loc.* Just-in-Time Reef, 1 mile W. of Mt. Gammie, Thane's Cr. Goldfield, 25 miles W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 40, p. 2 (1887).

5544. ——. *Assoc.with* Gold, in lode. *Loc.* Spur from Mt. Gammie, Thane's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 40, p. 3 (1887).

5545. ——. *Assoc.with* Azurite and Malachite. *Loc.* Trikelana M.L. (522), (Trikelana Group), 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Assay:* : Gold = trace, Silver = 3 dwt. 12 gr. per ton; Copper = 38·7 per cent. *Ref.* A.R., p. 116 (1907).

5546. ——. *Assoc.with* Galena, Massicot, Copper carbonate, and Ironstone, in gossan. *Loc.* Silver Streak Mine, Dry R., br. of Wild R. (Upper Herbert), 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

5547. ——. *Assoc.with* Cassiterite, Copper, Bismuth (native), in lode. *Loc.* Lancelot Tin Mines (Winze Shaft), Newellton, 9 miles S.W. of Herberton, 6 miles E.S.E. of Irvinebank, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 27 (1897).

5548. ——. *Assoc.with* Limestone and Garnet Rock. *Loc.* Newellton (Silver Valley), 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*).

5549. ——. *Assoc.with* Gold, in quartz. *Loc.* McColl's Just-in-Time P.C. (Just-in-Time Reef), Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* W C.T.

5550. Ironstone. *Assoc.with* Iron Pyrites, Magnetite, Malachite, Graphite, Garnet, and Calcite. *Loc.* Double Barrel Cr. (Manton), Northern Rail. line, 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, pp. 720, 729 (1892).

5551. ——. *Assoc.with* Gold, in quartz. *Loc.* Barcoo Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., 72 miles (by rail and road) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

5552. ——. *Assoc.with* Gold, in quartz. *Loc.* Hayward Reef, Pentland, 66 miles (by rail) S.W.byW. of Charters Towers, Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

5553. ——. *Assoc.with* Gold, Galena, and Iron Pyrites, in quartz. *Loc.* Harp of Erin Mine, Upper Cape, 17 miles W.byN. of Cape R. Rail. Stn., Cape R. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

5554. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Wheel of Fortune Reef, Upper Cape (*ante*). *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

5555. ——. In quartz. Marengo Goldfield, 30 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., p. 92 (1907).

5556. ——. In decomposed porphyry. *Loc.* Mt. St. Paul, 14 miles S. of Dreghorn Diggings, 29 miles S. of Ravenswood Rail. Stn. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

5557. ——. *Assoc.with* Cassiterite, Bismuth Ore, and Copper carbonate, in quartz crystals. *Loc.* Achilles Lease (252), Butterfly Gully, Mt. Brown, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 9 (1892), and G.S.M.

5558. ——. *Assoc.with* Galena, Cerussite, and Manganese-dioxide, in chloritic lode. *Loc.* Hidden Treasure E. Lease (166), Kangaroo Hills Mineral Fields (*ante*). *Assays: See* No. 2966. *Ref.* G.S.Q. Pub. 82, pp. 6, 7 (1892).

5559. ——. *Assoc.with* Cerussite and Copper carbonate, in gossan and kaolin lode. *Loc.* Junction Lease (181), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

5560. ——. *Assoc.with* Cerussite and Copper carbonate, in garnet, kaolin, and gossan lode. *Loc.* Junction South Lease (180), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

5561. ——. *Assoc.with* Cerussite, in lode. *Loc.* Kairanga Lease (217), 1 mile W. of Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 18 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

5562. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Hematite, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

5563. —— (manganiferous), in western lode. *Loc.* Mt. Moss S. Lease (168), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

5564. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Bornite, Cuprite, Tenorite, Copper carbonate, Galena, and Zinc Blende, in lode. *Loc.* Mt. Theckla Copper and Silver Mine, 4 miles N. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

5565. ——. *Assoc.with* Cerussite and Copper carbonate, in lodes. *Loc.* Running River S. Lease (163), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 82, p. 11 (1892).

5566. ——. *Assoc.with* Manganese-dioxide, in quartz. *Loc.* Vigilant Lease (193), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 7 (1892).

5567. ——. *Assoc.with* Cerussite, Copper carbonate, and Manganese-dioxide, in lode. *Loc.* White Star Lease (160), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

5568. ——. With traces of Minium, in quartz reef. *Loc.* Albion Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

5569 ——. *Assoc.with* Galena and Minium, in lode. *Loc.* Ard Righ Lease (112), Star R. (Argentine) Mineral Field (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 26, p. 6 (1886).

5570. ——. *Assoc.with* Minium, Massicot, Anglesite, and Cerussite, in quartz reef. *Loc.* Bonanza Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

5570A.——. *Assoc.with* Minium. *Loc.* Bonanza North Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

5571. ——. *Assoc.with* Galena, Minium, Cerussite, Copper Pyrites, Mispickel, Malachite, Manganese-dioxide, and Iron Ochre. *Loc.* Colorado Silver Mine, Star River (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

5572. ——. *Assoc.with* Minium, Anglesite, and Cerussite, in ferruginous quartz. *Loc.* Eureka Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

5573. ——. *Assoc.with* Cerussite and Lead Ochre, in lode. *Loc.* Excelsior Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

5574. ——. *Assoc.with* Minium, Anglesite, and Galena, in lode. *Loc.* Hero Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, pp. 2, 3 (1886).

5575. ——. *Assoc.with* Galena, Minium, Massicot, and Cerussite, in quartz. *Loc.* John Bull Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay: See* No. 2986. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

5576. ——. *Assoc.with* Minium and Cerussite, in lode. *Loc.* Jones's Sel. (139), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

5577. ——. *Assoc.with* Minium, Cerussite, and Lead Gossan, in lode. *Loc.* Morrison's and Co.'s Sel. (165, 166), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26. pp. 5, 6 (1886).

5578. ——. *Assoc.with* Galena, Minium, and Cerussite, in schistose gangue. *Loc.* Overlander Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Silver = 150 oz. per ton, Lead = 65 per cent. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

5579. ——. *Assoc.with* Galena and Lead Ochre, in gossan. *Loc.* Southern Cross Mine, Star R. (Argentine) Mineral Field. *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

5580. ——. *Assoc.with* Galena, Minium, Anglesite, and Cerussite, in lode. *Loc.* St. John's Silver Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

5581. ——. *Assoc.with* Siderite, Cerussite, and Pyrolusite. *Loc.* Struck Oil Freehold (149), Star R. (Argentine) Mineral Field (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 26, p. 4 (1886), and L.B. 1, p. 888 (1887).

5582. ——. *Assoc.with* Galena, Minium, Massicot, Anglesite, and Cerussite, in ferruginous gossan. *Loc.* Washington 1 and 2 Mines, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

5583. ——. *Assoc.with* Iron Pyrites, Turgite, Limonite, Galena, and Copper Pyrites, in quartz. *Loc.* Broken R. Gold and Silver Pros. Co.'s Claim, Bee Cr. Diggings, 60 miles W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Assay:* Gold = 1 oz. per ton; Silver = 60 to 70 oz. per ton. *Ref.* G.S.Q. Pub. 54, p. 2, 3 (1889).

5584. ——. *Assoc.with* Gold, in quartz reefs. *Loc.* Bell's Sel. (615), S. of Mt. Chelona, 6 miles S.E.byS. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 39, p. 3 (1887).

5585. ——. *Assoc.with* Gold, in felspar and quartz lode. *Loc.* Golden Cross Lease, Grass-tree Goldfield, 17 miles S.byE. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 93, p. 4 (1893).

5586. ——. *Assoc.with* Gold, Iron Pyrites, Siderite, Yellow Ochre, Copper Pyrites, Mispickel, and Tetrahedrite, in quartz. *Loc.* Grace Darling Lease (11), Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Assay: See* No. 4128. *Ref.* G.S.Q. Pub. 5, p. 6 (1879), and 88, p. 3 (1893).

5587. ——. *Assoc.with* Gold, Iron Pyrites, Malachite, and Chlorite, in quartz reef. *Loc.* Head of Spring Cr., Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

5588. ——. *Assoc.with* Gold, Copper Pyrites, Tetrahedrite, Tenorite, Malachite, Azurite, and Galena. *Loc.* Pine Vale Cr. Copper Mine, 9 miles S.byE. of Eton Rail. Stn., 32 miles (by rail and road) S.byW. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 53, p. 10 (1889); Pub. 229, pp. 12-17 (1910).

5589. ——. *Assoc.with* Gold, Marcasite, Psilomelane, and Epsomite, in alluvial deposits. *Loc.* Paterson's Claim, McMaster's (Top Camp), 14 miles N.W.byN. of Clermont Rail. Stn. *Co.* Dickson; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 201, p. 63 (1906).

5590. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* between 7-Mile and 2-Mile Diggings, 15 miles N.W.byW. of Clermont. *Co.* Rutledge (*ante*). *Ref.* G.S.Q. Pub. 27, p. 2 (1886).

5591. Ironstone. *Assoc.with* Gold, Hematite, Copper Pyrites, Cuprite, Malachite, Azurite, Galena, Native Bismuth, Bismuthinite, Bismutite, Bismite, and Manganese-dioxide, in lode. *Loc.* Daisy Bismuth Mine, N. side of Mt. Wyatt and Bowen Road, 3 miles E. of Eukalunda, 95 miles S.W.byS. of Bowen, Sellheim Mineral Field. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

5592. ——. *Assoc.with* Iron Pyrites, Galena, Minium, Anglesite, Cerussite, and Zinc Blende, in lode. *Loc.* Pyramid Silver Lode, ½-mile S. of Daisy Bismuth Mine (*ante*). *Ref.* G.S.Q. Pub. 57, pp. 2, 3 (1889).

5593. ——. *Assoc.with* Silver, Iron Pyrites, Galena, Minium, Cerussite, and Zinc Blende, in lode. *Loc.* Rob Roy Mine, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Assays: See* No. 3017. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

5594. ——. *Assoc.with* Gold. *Loc.* Cumberland Reef, 1 mile N. of Clermont Rail. Stn., Clermont Goldfield. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 27, p. 4 (1886).

5595. ——. *Assoc.with* Gold, in quartz and limestone. *Loc.* Lincoln Leaders, 2½ miles S.W. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 22 (1902).

5596. ——. *Assoc.with* Gold, in quartz. *Loc.* Bedsford's Reef, McDonald's Flat, 4 miles S.S.E. of Clermont, Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 176, p. 19 (1902).

5597. ——. *Assoc.with* Limestone. *Loc.* Nr. Mt. Clifford, between Retreat and Ruby Crs., 9½ miles N.W. of Anakie Rail. Stn. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 127, p. 2 (1892).

5598. ——. *Assoc.with* Azurite and Malachite, in pipe vein. *Loc.* Freedom of Contract Mine, Ruby Cr., 6½ miles N.E.byN. of Withersfield Rail. Stn. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

5598A. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Malachite, and Azurite, in slate. *Loc.* Isen's M.F. (2642), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, pp. 27-29 (1910).

5599. ——. *Assoc.with* Gold and Calcite. *Loc.* Southern Cross Reef, Yatton Goldfield, 21 miles S.W. of St. Lawrence. *Co.* Killarney (*ante*). *Ref.* G.S.Q. Pub. 39, p. 8 (1887).

5599A. ——. *Assoc.with* Gold, in serpentine. *Loc.* Mt. Blowhard (Mt. Hope), 52 miles S.S.W. of Rockhampton. *Co.* Pakington; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

5600. ——. *Assoc.with* Azurite and Malachite, in pipe of ore. *Loc.* Ruby Cr., 8 miles N.N.W. of Anakie Rail. Stn., 201 miles (by rail) W. of Rockhampton (Central (line). *Co.* Plantaganet; *Dist.* Leichhardt.

5601. ——. In vicinity of Coal and Limestone. *Loc.* Girrah Lease, 20 miles N. of Tolmie's Rail. Stn. (Central line), 149 miles (by rail and road) W. of Rockhampton. *Co.* Talbot; *Dist.* Leichhardt. *Ref.* B.D.

5602. ——. *Assoc.with* Chlorite and Steatite, in shale and diorite. *Loc.* Keeley and Valentine's Claim, Nuggety Gully, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 4 (1887).

5603. ——. Corona Stn. (Central line), 60 miles N.W. of Longreach Rail. Stn., 488 miles (by rail and road) W. of Rockhampton. *Co.* Musgrave; *Dist.* **Mitchell.**

5604. ——. Achelow Cr., 24 miles W.byN. of Longreach Rail. Stn. (Central line), 452 miles (by rail) W. of Rockhampton. *Co.* Pentland (*ante*).

5605. ——. Ten miles N.E. of Cameron R., 18 miles N.E. of Muttaburra. *Co.* Towerhill; *Dist.* Mitchell.

5606. ——. *Assoc.with* Gold and Malachite, in quartzite. *Loc.* Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.**

5607. ——. In felspathic sandstone. Mt. Stanley, nr. Nanango, about 17 miles N. of Benarkin Rail. Stn. (Brisbane-Valley line), 128 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 29, p. 1 (1886).

5608. ——. *Assoc.with* Gold, Copper Oxide, and Malachite, in quartz. *Loc.* Black Diamond Mine, nr. Taromeo, 6 miles W.N.W. of Benarkin Rail. Stn. (Boyne-Valley line). *Co.* Cavendish (*ante*). *Assay: See* No. 4203. *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

5609. ——. In quartzite. *Loc.* Pine Mt., 17 miles N.W.byN. of Ipswich (Brisbane-Valley Br. line). *Co.* Churchill (*ante*). *Ref.* G.S.Q. Pub. 103, p. 27 (1895).

5610. ——. Moggill Cr., Brookfield, 10 miles W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* L.C.B.

5611. ——. S.E. Por. of Sel. 194, Brookfield (*ante*). *Ref.* G.S.Q. Pub. 63, p. 2 (1890).

5612. ——. Eight-mile Plains, 8 miles S.E. of Brisbane. *Co.* Stanley; *Dist.* Moreton.

5613. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Gold Mines, on Pors. 236, 241A, and 289, Gold Cr., Par. of Indooroopilly, 10 miles W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 108, p. 25 (1896).

5614. ——. *Assoc.with* Manganese-dioxide, in vein. *Loc.* Dennis's Sel. 381, 5 miles N. of Beenleigh (S. Coast line), 29 miles (by rail and road) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

5614A.——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* 5 miles S. of Beenleigh Rail. Stn. (South Coast line), 29 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 217 (1910).

5615. ——. *Assoc.with* Manganese-dioxide, in quartz reef. *Loc.* Jamieson's Sel. 36, Wonga Wallen Cr., Coomera R., 38 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward (*ante*).

5616. ——. With traces of Gold and Silver. *Loc.* Por. (5), Par. of Nerang, 49 miles (by rail) S.E.byS. of Brisbane (South Coast line). *Co.* Ward (*ante*). *Ref.* A.R., p. 48 (1888).

5516A.——. *Assoc.with* Pyrolusite, in quartz. *Loc.* Auckland Point, 1 mile N.W.byN. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 21, p. 1 (1885).

5617. ——. *Assoc.with* Gold (traces), Silver, Wollastonite, Epidote, and traces of Copper carbonate, in limestone, garnet rock, and granite. *Loc.* P.A. 49, Diglum Cr., 28 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, pp. 6, 9 (1901).

5617A.——. *Assoc.with* Manganese-dioxide. *Loc.* Gardner's Workings, Por. 364, East Stowe, 10 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* (and *Analysis*) G.S.Q. Pub. 194, p. 46 (1904).

5617B.——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, and Malachite, in crystalline limestone. *Loc.* Mt. Hector Copper Mine, E. side of Dawe's Range, 60 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

5618. ——. *Assoc.with* Gold, in felsitic dyke. *Loc.* Jack Mine, Ulam Goldfield, 36½ miles W.N.W. of Gladstone. *Co.* Deas Thompson (*ante*). *Ref.* G.S.Q. Pub. 99, p. 7 (1894).

5619. ——. *Assoc.with* Gold and Iron Pyrites, in ferruginous quartz. *Loc.* St. Joseph United Mine, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 10 (1894).

5620. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* True Blue Reef, Ulam Goldfield (*ante*). *Ref.* G.S.Q. Pub. 99, p. 5 (1894).

5621. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Miner's Dream Mine, Bob's Cr., Crocodile Goldfield, 13 miles S. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 132, p. 16 (1898).

5622. ——. Olsen's Caves, 15 miles N.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

5623. ——. *Assoc.with* Gold, in quartz. *Loc.* Mouth of Inlet nr. Green Hill, 40 miles S. of Mackay. *Co.* Murchison; *Dist.* Port Curtis. *Assay:* Gold = 4 oz. 18 dwt. per ton.

5624. ——. *Assoc.with* Gold, in quartz. *Loc.* Westwood Reef, Ridge between Slack's and Sandy Crs., 5½ miles S.E. of Westwood Rail. Stn., 36½ miles (by rail and road) S.W. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* (and *Assays*) G.S.Q. Pub. 103, p. 30 (1895).

5625. ——. Iron Island, nr. Broadsound, Duke Group, 40 miles N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Analysis:* Silica = 2·78 per cent., Alumina = 4·16 per cent., Iron = 64·80 per cent., Manganese = 0·18 per cent., Lime = trace, Magnesia = nil, Phosphorus = 0·03 per cent., Sulphur = trace, Titania = slight trace. *Ref.* A.R., p. 122 (1907).

5625A.——. *Assoc.with* Native Copper, Cuprite, and Telluride Ore, in schist. *Loc.* Stanage Point, nr. Broadsound, 37 miles E.N.E. of St. Lawrence. *Co.* Palmerston (*ante*). *Ref.* B.D.

5626. ——. *Assoc.with* Gold, in quartz. *Loc.* Mt. Hope (Homeward Bound) Reef, Cania Goldfied, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 9 (1885).

5627. Ironstone. *Assoc.with* Copper Pyrites, Copper Carbonate, Mispickel, Biotite, and Mica, in quartz lode. *Loc.* Dee R. Copper Mines, above Dundee, 20 miles S.S.W. of Mt. Morgan Rail. Stn. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

5628. ——. In garnet rock. Glen Dee, Dee R., 5 miles E.N.E. of Mt. Morgan Rail. Stn. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 161, p. 15 (1901).

5629. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Native Copper, Copper Pyrites, Redruthite, Cuprite, Malachite, Azurite, Galena, and Molybdenite, in granitic rock, breccia, and sandstone. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195, p. 22 (1904).

5630. ——. In lodes. Mt. Alexander, 8 miles E.S.E. of Mt. Morgan, 32 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 17 (1898).

5631. ——. *Assoc.with* Gold, Iron Pyrites, and Copper carbonate, in serpentine and quartzite. *Loc.* Mt. Morgan N. Mine, Crocodile Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 8 (1898).

5632. ——. *Assoc.with* Gold, in quartz and calcite. *Loc.* Tableland Reef, Black Snake Goldfield, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

5633. ——. In beds of sandstone. *Loc.* Miva Crossing, Mary River, 26 miles N.W. of Gympie, 43 miles (by rail) S.S.W. of Maryborough (Kilkivan Br. line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 1 (1886).

5633A.——. *Assoc.with* Gold and Iron Pyrites, in quartz lode. *Loc.* P.A. 815, 7 miles (by road) W. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* A.R., p. 235 (1910).

5634. ——. *Assoc.with* Native Copper, in chloritic rock. *Loc.* Lady Flora Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 5 (1889).

—— Statistics :—*See tables and diagrams*, Pls. 41, 45, 46, 46A, 53, 57.

Irvinebank.

SITUATION: *See maps*, Pls. 8, 9, 22. The town is about 12 miles (by rail) S.W. of Stannary Hills Rail. Stn. (Chillagoe Br. line), 12 miles W.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Lat.*, 17° 25′; *Long.*, 145° 13′.

POPULATION: 1,256 (estimated 1910). Now included in Herberton.

MINERAL STATISTICS: Tin, included in Herberton Min. Field Returns. *See* Pls. 38, 46, 46A.

MINERAL REFERENCES: Silver (Cerargyrite), 1178; Lead (Anglesite) 17, (Cerussite) 1191, 1192, (Galena) 2766; **Tin** (Cassiterite) 858-874; Bismuth (Native) 332, 333; (Bismuthinite) 365, 366; Iron (Hematite) 4709, (Turgite) 7892; Limestone, 634. Other Minerals—Chlorite, 1432, 1433; Fluorspar, 2659; Kaolin, 5676, 5676A; Tourmaline, 7852.

GEOLOGICAL NOTE: The Geological Formations consist of a series of folded greywackes, quartzites, and slates, broken by faults. Along the faults, and in the rocks on either side, deposits of tin ore in irregular bunches occur. *See* G.S.Q. Pubs. Nos. 119 and 192 for details and maps.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 119, 192. Map No. 220. *See* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour. Special Reports, No. 90.

SMELTING WORKS: *See under* Smelting Works in Queensland.

WARDEN and INSPECTOR OF MINES: Both stationed at Herberton.

—— Company's Treatment Works. *See under* Govt. Ming. Jour. Special Reports, No. 90.

Irvingdale Sub-artesian Bores. *See under* Artesian Bores. Nos. 240, 295.

Isaacs River. Rises in Denham Range, 65 miles W.byS. of Mackay. Flows S.byE. into Mackenzie R., 41 miles S.byW. of Mackay. Length about 180 miles. *Min.Ref.* Coal, *see* 1683; Opal (common and wood), 6985.

GEOLOGICAL NOTE: The country drained by the Isaacs River is made up of strata belonging to the Bowen River Formation, the equivalent of the Dawson-Mackenzie Coal measures (Permo-carboniferous).

Isabella Cr., Sellheim R., S.W.byS. of Bowen. *Min.Ref.* Gold (alluvial), *see* 3292.

—— M.C. (360), Cloncurry. *Min.Ref.* Copper Pyrites, *see* 2120; Limonite, 5826; Malachite, 6188; Redruthite, 7275; Tile Ore, 2542.

—— Mine, Mt. Wyatt. *Min.Ref.* Gold, *see* 3683.

—— Reef, Normanby Reefs, S.S.W. of Cooktown. *Min.Ref.* Gold, *see* 3683.

Isen's M.F. (2642), Mt. Flora Gold and Mineral Field. *Min.Ref.* Azurite, *see* 235G; Copper Pyrites, 2269B; Iron Pyrites, 5327B; Ironstone, 5598A; Malachite, 6339J.

Iserine. *See* Ilmenite.

Isis Downs Bore. *See under* Artesian Bores. No. 298.

Isis River. Heads at Main Coast Range, 40 miles N.N.W. of Maryborough, flows N.E. into the Burrum R., 24 miles N.N.W. of Maryborough. Length about 35 miles. *Min.Ref.* Coal, *see* 1813; Opal (common), 6998A.

GEOLOGICAL NOTE: The principal rocks are sandstones and shales of Burrum Formation (Cretaceous), containing workable seams of coal. Marine beds also occur, and appear to be the basement beds of the Burrum Series. *See* G.S.Q. Pub. No. 170 for notes.

—— Scrub, nr. Childers Rail. Stn. *Min.Ref.* Coal, *see* 1814.

Isisford Sub-artesian Bores. *See under* Artesian Bores. Nos. 299, 300.

Island Sub-artesian Bore. *See under* Artesian Bores. No. 278.

Italian Gully, trib. of White Mountain Cr., W.byN. of Pentland. *Min.Ref.* Gold (alluvial), *see* 3190, (nugget) 3437.

—— M.L. (689), Cloncurry. *Min.Ref.* Copper (native), *see* 1996; Copper Pyrites, 2201; Limonite, 5862; Malachite, 6259; Redruthite, 7286; Tile Ore, 2553.

—— Mine, Horn Is. Goldfield. *Min.Ref.* Galena, *see* 2819; Gold, 3811; Iron Pyrites, 5095.

Ithaca Creek. Heads nr. Mt. Cootha, 4½ miles W.byS. of Brisbane, and flows N.E. to join Breakfast Cr., 2¼ miles N.W. of Brisbane. *Min.Ref.* Copper Pyrites, *see* 2279; Garnet, 3138; Gold, 4217; Mispickel, 6778.

Ivanhoe Copper Lease, Cloncurry. *Min.Ref.* Azurite, *see* 205; Cuprite, 2448; Limonite, 5861; Malachite, 6258.

—— Gold Mine, Towalla Goldfield. *Min.Ref.* Gold, *see* 3783.

—— Tin Mine, Eureka Cr., nr. Stannary Hills. *Min.Ref.* Stannite, *see* 7594.

—— —— ——, Stanhills Tinfield. *Min.Ref.* Cassiterite, *see* 760; Galena, 2691.

Inveragh Copper Lode, Iveragh Cr., S. of Gladstone. *Min.Ref.* Azurite, *see* 250; Cuprite, 2475; Malachite, 6362.

Jabiru Bore. *See under* Artesian Bores. No. 178.

GEOLOGICAL SURVEY PUBLICATIONS—

(1.) On the Geology and Mineral Resources of the District between Charters Towers Goldfield and the Coast, 1878 (1879).

(2.) Geological Features of Part of the Coast Range between the Dalrymple and Charters Towers Roads, 1878 (1879).

(3.) Preliminary Report on the Bowen River Coalfield, 1878 (1879).

(4.) On the Bowen River Coalfield, 1878 (1879).

(5.) On the Normanby and Marengo Goldfields, 1879.

(6.) On the Progress of the Search for Coal in the Cook District, 1879.

(7.) Second Report on the Progress of the Search for Coal in the Cook District, 1879.

(8.) On Explorations in Cape York Peninsula, 1879-80 (1881).

(9.) Further Reports on the Progress of the Gold Prospecting Expedition in Cape York Peninsula, 1880; and Report on the Wild River Tin Mines, 1880 (1881).

(10.) Six Reports on the Geological Features of Part of the District to be traversed by the Proposed Transcontinental Railway, 1881, 1882 (1885).

Geological Survey Publications—*continued:*

(11.) On the Little River Coalfield, near Cooktown, 1882.

(12.) On the Stanthorpe Tin Mining District, 1882.

(13.) On the Tin Mines of Herberton, Western, and Thompson's Creek Districts, and the Silver Mines of the Dry River, 1883.

(14.) First Sketch of a Geological Map of the Hodgkinson Goldfield, 1883.

(15). Progress Report of the Government Geologist for the Year 1883; in Annual Report of the Department of Mines for 1883 (1884).

(16.) On the Hodgkinson Goldfield, 1884.

(17.) On the Mount Morgan Gold Deposits, 1884.

(18.) On the Gold Deposits of Mount Leyshon, 1885.

(19.) Progress Report of the Government Geologist for the Year 1884; in Annual Report of the Department of Mines for 1884 (1885).

(19*a*.) On the Proposed Deep Bore for Artesian Water in the Western Interior, 1885.

(22.) Progress Report of the Government Geologist for the Year 1885; in Annual Report of the Department of Mines for 1885 (1886).

(26.) On the Argentine (Star) Silver Mines, Kennedy District, 1886.

(30.) Geological Map of Queensland on the scale of 32 miles to an inch, 1886.

(31.) Handbook of Queensland Geology, 1886.

(32.) Annual Report of the Government Geologist for the Year 1886; in Annual Report of the Department of Mines for 1886 (1887).

(35.) Geological Observations in the North of Queensland, 1886-7.

(37.) On Mineral Lease 276, Watsonville, 1887.

(39.) On the Geological Features of the Mackay District, 1887.

(41.) Annual Progress Report of the Government Geologist for the Year 1887, in Annual Report of the Department of Mines for 1887 (1888).

(44.) Coal Discoveries on the Flinders, 1888.

(45.) On the Geology of the Russel River, 1888.

(46.) On the Limestone District, part of the Palmer Goldfield, 1888 (1889).

(47.) Second Report on the Mount Morgan Gold Deposits, 1888 (1889).

(48.) The Mineral Wealth of Queensland, 1888.

(49.) Annual Progress Report of the Geological Survey for the Year 1888 (1889).

(50). On the Taranganba Gold Mine, 1889.

(55.) On Geological Specimens from New Guinea. R.L.J. and A. W. Clarke, 1889.

(57.) On the Sellheim River Mines and surrounding District, 1889.

(58.) Annual Progress Report of the Geological Survey, 1889 (1890).

(61.) On the Proposed Boring for Artesian Water on the Etheridge and Croydon Goldfields, 1890.

(62.) On the Proposal to Bore for Artesian Water at Normanton, 1890.

(65.) On the Proposed Boring for Water at Brisbane, 1890.

(66.) On the Tin Mines near Cooktown, 1891.

(69.) On the Chillagoe and Koorboora Mining Districts, 1890 (1891).

(74.) Notes on Broken Hill (N.S.W.), 1891.

(77.) Annual Progress Report of the Geological Survey for the Year 1890.

(78.) On the Moondilla Goldfield, 1891.

(81.) On the Sapphire Deposits and Gold and Silver Mines near Withersfield, 1892.

(82.) On the Kangaroo Hills Silver and Tin Mines, 1892.

(83.) Third Report on the Mount Morgan Gold Deposits, 1892.

(87.) Annual Progress Report of the Geological Survey for the Year 1891 (1892).

(88.) Second Report on the Normanby Goldfield, 1893.

(89.) On the Russell River Goldfield, 1893.

(90.) Geological Map of Queensland on the scale of 16 miles to an inch, 1892.

(92.) Geology and Palaeontology of Queensland and New Guinea, 1892.

(93.) On the Grass-tree Goldfield, 1893.

Geological Survey Publications—*continued:*

(94.) Annual Progress Report of the Geological Survey for the Year 1892 (1893).

(95.) Geological Map of Charters Towers Goldfield on the scale of 4 chains to an inch.

(98.) Annual Progress Report of the Geological Survey for the Year 1893 (1894).

(101.) Bulletin No. 1. Artesian Water in the Western Interior of Queensland, 1895.

(103.) Annual Progress Report of the Geological Survey for the Year 1894 (1895).

(106.) Coal near Cooktown, 1895.

(108.) Annual Progress Report of the Geological Survey for the Year 1895 (1896).

(109.) Geological Sketch Map of the Desert Sandstone Tableland between the Palmer and Mossman Waters, 1896.

(110.) Map of the Palmer Districts, in two Sheets, 1896.

(111.) Map showing Reefs in the neighbourhood of Maytown, Palmer Goldfield, 1896.

(114.) Notes on Two Traverses to the Bunya Bunya Range, and a visit to the Brovinia Goldfield, 1896.

(116.) On the Hodgkinson Goldfield (Reprint of No. 16).

(117.) Bulletin No. 4. Notes on the Present Condition of the Hodgkinson Goldfield, 1896.

(123.) Bulletin No. 5. Notes on the Palmer as a Reefing District, 1897.

(125.) Bulletin No. 6. Catalogue of the Exhibits in the Queensland Mining Court, Queensland International Exhibition, 1897.

(132.) On Mount Morgan and other Mines in the Crocodile Goldfield, 1898.

(134.) Bulletin No. 9. On the Chillagoe District and Projected Railway, 1898.

(136.) Bulletin No. 10. Six Reports on the Geological Features of part of the Districts to be traversed by the Transcontinental Railway. Reprint of No. 10.

(142.) Geological Map of Charters Towers Goldfield showing underground workings. On a scale of 4 chains to an inch (1898).

(143.) Annual Progress Report of the Geological Survey for the Years 1896-8 (1899).

(144.) On a visit to the Palmer Goldfield, 1899.

(145.) Geological Map of Queensland on the scale of 16 miles to an inch, 1899. Second Edition.

Jordan Cr. Goldfield—

SITUATION: *See maps,* Pls. 8, 9, 22. Twenty-two miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. Centre about *Lat.* 17° 42′ S.; *Long.* 146° E. Discovered in 1898.

POPULATION: 12 (estimated, 1912).

PROCLAMATION: First gazetted, 22nd July, 1898; last, 28th August, 1900, as follows:—Commencing on the left bank of the north branch of the Johnstone River at a point bearing north from the intersection of Wadda Cr. with the Geraldton to Herberton road, and bounded thence on the east by a line bearing south to that intersection; thence by Wadda Cr. upwards southerly to the ridge forming its watershed from the south branch of the Johnstone River, by that ridge westerly to that south branch, by the south branch of the Johnstone River upwards westerly to its head in the Coast Range, by that range northerly to a point west from the confluence of Beatrice River with the north branch of the Johnstone River, by a line east to that confluence; and thence by the north branch of the Johnstone River downwards easterly to the point of commencement.

AREA: 40,960 acres (64 sq. miles).

LEASES: Two goldmining leases in forces; area, 50 acres (1912).

PRINCIPAL MINING CENTRES: Bora Ground, Moochoopa, Wingananie. *Include* Beatrice and Little Beatrice Rivers, Douglas, Jordan, Lemon's, and Spring Creeks; Bola, Fairbank, Golden, Henrietta, Joyce's, Macintosh, Nuggety, Poverty, and Spring Gullies.

MINERAL STATISTICS: *Included in* "Other Goldfields." *See tables and diagrams,* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold (alluvial), 3219, 3220, (reef) 3768-3772; Iron (Mispickel) 6705, (Ilmenite) 4893, (Iron Pyrites) 5078; Rutile, 7329. Other Minerals—Corundum, 2367; Garnet, 3113, 3114, 3160, 3163; Hyacinth, 8229; Pleonaste, 7586, 7587; Ruby, 2360; Sapphire, 2341-2343; Spinel, 7576; Topaz, 7789; Tourmaline, 7856; Zircon, 8220.

GEOLOGICAL NOTE: The rocks of the Jordan Goldfield are principally granite and basalt, the former being the old land surface weathered into hills and valleys, the latter a volcanic flow partly covering the granite. Reefs exist in the granite, but are generally small, although associated with a gold-bearing formation in which the gold occurs in shoots. About six lines of reef have been opened up, but other unprospected reefs are known.

GEOLOGICAL PUBLICATIONS: Report—No. 157 (1901). *See* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Geraldton. INSPECTOR OF MINES: Stationed at Herberton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Kangaroo Hills Mineral Field—

SITUATION: *See maps,* Pls. 16, 17. The township of Ewan is 40 miles S.W. byS. of Ingham. *Cos.* Wairuna and Wilkie Gray; *Dist.* Kennedy North. Centre about *Lat.* 18° 58′ S.; *Long.* 146° 7′ E.

DISCOVERY: Tin was discovered at Running River about 1875.

POPULATION: 207 (estimated 1912). AREA: 423,050 acres (661 sq. miles).

PROCLAMATION: First (and only one) gazetted, 31st May, 1893, as follows:—Commencing at the confluence of the Running River with the Burdekin River, and bounded thence by the Burdekin upwards northerly to the confluence of Douglas Creek, by that creek upwards to its head; thence by a line east to the range forming the southern watershed of the Herbert River, by that range easterly to the eastern boundary of the Waterview Lease, by that boundary north to the road from Ingham to Kangaroo Hills, by that road easterly to a point due west from the north-west corner of portion 244, parish of Waterview, by a line east to that corner, by the west and south boundary of that portion, and by part of the south boundary of portion 400 east to the trial survey of railway line from Townsville to Ingham, by that survey easterly to portion 474, by the west boundary of that portion and a line southerly to the range, by that range to its junction with the Coane Range or southern watershed of the Running River and its tributaries, and by the Coane Range westerly to the Burdekin River, to the point of commencement.

LEASES: Mineral leases in force, 10; area, 100 acres. Miners' homesteads in force, 11; area, 168 acres (1912).

PRINCIPAL MINING CENTRES: Ewan, Kallanda (Waverley), Mt. Brown, Macaulay Cr., Hidden Valley, Mt. Benham, *which see.*

MINERAL STATISTICS:

Tin,	*see tables,*	Pls. 38, 46, 46A.
Silver,	,,	Pls. 37, 46, 46A.
Copper,	,,	Pls. 39, 46, 46A.
Lead,	,,	Pls. 38, 46, 46A.
Wolfram,	,,	Pls. 42, 46, 46A.

MINERAL REFERENCES: Silver (native), 7556, 7557; Lead (Cerussite) 1232-1258, (Galena) 2958-2980, (Linarite) 5939, (Minium) 6599-6602, (Pyromorphite) 7147; Copper (Atacamite) 134, 135, (Azurite) 217-223, (Bornite) 422-429, (Chrysocolla) 1526-1532, (Copper carbonate) 1923-1939, (Copper, native) 2002, (Copper Pyrites) 2243-2249, (Cuprite) 2460-2464, (Malachite) 6298-6310, (Redruthite) 7298, 7299, (Tenorite) 7731, (Tile Ore) 2565, **Tin** (Cassiterite), 1152-1163A; Bismuth (native) 349, (Ore) 354, (Bismutite) 404; Wolfram, 8032, 8032A; Scheelite, 7354; Zinc (Aurichalcite) 149, (Blende) 8156-8162, (Smithsonite) 7570, 7571; Manganese (dioxide) 6434-6444, (Pyrolusite) 7124; Rutile, 7333, 7334; Iron (Hematite) 4745-4752, (Ilmenite) 4899A, (Iron Pyrites) 5279-5281, (Ironstone) 5557-5567, (Lievrite) 5736-5738, (Limonite) 5880-5883, (Magnetite) 6015-6021, (Mispickel) 6751-6755; Limestone, 654. Other Minerals—Beryl, 294; Calcite, 505, 506; Chlorite, 1460; Fluorspar, 2683, 2684A; Garnet, 3126-3130; Gypsum, 4624; Kaolin, 5690; Lithomarge, 5712; Marble, 589; Sapphire, 2354; Steatite, 7692; Topaz, 7804; Tremolite, 4876.

GEOLOGICAL NOTE: The rocks of this field comprise granite, mica schists, talc schists, grits, conglomerates, quartzites, and limestones. The granite surrounds and intrudes the other rocks, while porphyry and felsite also occur as dyke masses in the altered sedimentary strata. Tin lodes exist in the granite, and silver-lead-copper lodes in the altered rocks. *See* G.S.Q. Pubs. Nos. 82 and 167 for details.

Elphinstone Co., Boolangalla, Broughton, Cunningham, Fanning R., Grass Hut. Ravenswood Goldfield (*in part. See also* Davenport Co.). Star R. Mineral Field (*in part. See also* Wilkie Gray Co.).

Gladstone Co., Ayr, Clare, Noondoo. Ravenswood Goldfield (*principal part. See also* Davenport Co.) (Ravenswood Township), Strathalbyn Goldfield, Totley.

Griffith Co., Cape R. Goldfield (Capeville, Pentland, Upper Cape), Homestead Prov. Goldfield, Norwood.

Gunnawarra Co., Walsh and Tinaroo Mineral Fields (*in part. See also* Cardwell Co.). *See also under* Cook Dist.

Herbert Co., Bowen, Marengo Goldfield, Normanby Goldfield (*in part. See also under* Kennedy South Dist.).

Murray Co., Brookville, Canton Gold Diggings. Charters Towers Goldfield (*in part. See also* Dalrymple Co.). Ravenswood Goldfield (*in part. See also* Davenport Co.).

O'Connell Co.

Philp Co.

Salisbury Co., Wangaratta, Guthalungra, Red Hill.

Wairuna Co., Kangaroo Hills Mineral Field (*in part. See also* Cardwell Co.) (Ewan).

Wilkie Gray Co., Dalrymple. Kangaroo Hills Mineral Field (*in part. See also* Cardwell Co.). Piccadilly Goldfield. Ravenswood Goldfield (*in part. See also* Davenport Co.). Star R. Mineral Field (*in part. See also* Elphinstone Co.) (Argentine).

MINERAL REFERENCES AND STATISTICS: *See under* names of Principal Mining Centres.

Kennedy South District—

Situation, Etc. : *See maps*, Pls. 14, 15. *Lats.*, 20° and 25°; *Longs.*, 145° and 150°. Bounded on the N. by North Kennedy, on the W. by Mitchell, on the S.E. by Leichhardt and Port Curtis Districts, and on the E. by the Pacific Ocean. It is drained by the rivers, with their tribs., Burdekin (also running into North Kennedy) tribs. Sellheim, Rolleston, Cape, Campaspe, Souttar, Belyando, Bowen, and Broken, O'Connell and Pioneer.

Area : 30,514 sq. miles. With islands included, 30,549 sq. miles.

Principal Mining Centres : Gold and Mineral Fields—Normanby (*part*), Mt. Wyatt, Sellheim, Eungella (*partly*), Nebo (*partly*), Grasstree, Mt. Spencer, and Clermont (*partly*), *which see.*

Counties :

Albany Co. Beaufort Co. Bell Co.

Belyando Co., Alpha, Pinehill. Clermont Goldfield (*in part—See also* Dickson Co., Rutledge Co. *See also under* Leichhardt Dist.).

Carlisle Co., Alligator Cr. Gold Mines, Eton (Coal), Eungella Goldfield, Grass-tree Goldfield, Mackay, Mt. Spencer Gold and Mineral Field, Mirani (Coal). Nebo (Mt. Britton) Goldfield (*in part—See also under* Leichhardt Dist.). Normanby Goldfield (*in part—See also under* Kennedy North Dist.).

Chataway Co.

Dickson Co., Clermont Goldfield (*in part—See also* Belyando Co.).

Drake Co. Drummond Co. Drury Co. Foxton Co. (Hillalong).

Rutledge Co., Clermont Goldfield (*in part—See also* Belyando Co.).

Sellheim Co., Mt. Wyatt Goldfield, Sellheim Mineral Field (Silver, Bismuth) (Ukalunda).

Mineral References and Statistics : *See under* names of Principal Mining Centres.

Kennedy Seam, Pelican Cr., Bowen R. Coalfield. *Min.Ref.* Coal, *see* 1654, 1655.

Kennedy's Shaft, Mt. Perry. *Min.Ref.* Iron Pyrites, *see* 4986.

—— Yard Bore. *See under* Artesian Bores. No. 269.

Kensington Downs Sub-artesian Bores. *See under* Artesian Bores. No. 304.

Kent's Knob, 5½ miles W.N.W. of Degilbo. *Min.Ref.* Bismuthinite, *see* 362; Bismutite, 381; Gold, 3603; Iron Pyrites, 5001; Mispickel, 6659.

Keppel Bay View Mine, New Zealand Gully, Cawarral Goldfield. *Min.Ref.* Gold, *see* 4327.

Keppel Bay Islands, east of Rockhampton. About *Lat.* 23° 30′ S.; *Long.*, 151° 0′ E. *Min.Ref.* Apatite, *see* 81; Copper, 1857; Rhodochrome, 7065; Turquoise, 7905-7908; Vanadium, 7916.

Geological Note : Curtis Island is made up of quartzites and shales of Deronian Formation. Keppel Rocks, Arch Rock, Peak Island, Divided Island, Great Keppel Island, North Keppel Island, Middle Island, and Myall Island are all composed of thin-bedded quartzites and shales of similar formation to that of Curtis Island. Double Island, near Yeppoon, is a trachytic volcanic neck. *See* G.S.Q. Pub. No. 143 for notes.

Keppel Rocks, Keppel Bay. *Min.Ref.* Apatite, *see* 81; Copper, 1857; Turquoise, 7905-7908; Vanadium, 7916.

Geological Note : The rocks are made up of thin-bedded quartzite and slate, traversed in all directions by numerous quartz veins. Green turquoise is found in the veins, and is also distributed irregularly in the quartzites.

Kerargyrite. *Syn.* Cerargyrite, *which see.*

Kerlong Range, 30 miles S.W. of Mackay. *Min.Ref.* Coal, *see* 1705.

Kerosene Shale. No authentic occurrences of kerosene shale *in situ* are known in the State, although discoveries are reported from time to time. The "kerosene shale" mentioned as occurring in some of the Artesian Bores of Western Queensland is probably a dense carbon-bearing shale. A substance very much like kerosene shale has been found near Toowoomba, on a branch of The Narrows close to Gladstone, on Casuarina Island, and in other localities, references to which are given under the heading of Oil-bearing Shales. *See* Artesian Bore Notes. *See* note under Oil.

5712a.—— ——. Reported occurrence in well about 70 miles southerly of Springsure on Collie Blue Station, Carnarvon Range. *Co.* Consuelo; *Dist.* Leichhardt. *Ref.* near Burke, Springsure.

Kilkivan—

SITUATION: *See maps,* Pls. 4, 5. The town is 65 miles (by rail) S.S.W. of Maryborough, 45 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Lat.*, 26° 5′ S.; *Long.*, 152° 14′ E.

POPULATION: (Included in Gympie Returns).

RAILWAY BASE for Kilkivan, Black Snake, Marodian, and Yorkey's Goldfields; Colo Gold Mines, Mudloo, Teebar, Munna, and Calgoa Copper Mines; Mt. Cobalt and Mt. Coora Cobalt Lodes, Mt. Clara and Mt. Coora Copper Mines, and Cinnabar Lodes at the head of Wide Bay Creek, Black Snake District.

RAINFALL: Yearly aver. between 1902 and 1907, 24·10 inches, and 49 wet days.

PROCLAMATION OF GOLDFIELD: First, and only one, gazetted July 27, 1868, as follows:—Commencing at the junction of Fat Hen Creek with Wide Bay Creek, and bounded by a line bearing south six miles; thence west five miles; thence north about four miles to the Wide Bay Creek; thence by that creek downwards to the point of commencement.

PROCLAMATION OF MINERAL FIELD: First, and only one, gazetted March 30, 1899, as follows:—Commencing on the left bank of Wide Bay Creek where it is intersected by the S. boundary of por 860, par. of Brooyar, and bounded thence by the S., the W., and the N. boundary of that por. bearing W., N., and E.; thence by the E., the N., and part of the W. boundary of por. 1487, par. of Kilkivan, bearing N.W. and S., by the northern boundaries of pors. iv., 1053, and Occupation License 16, bearing Wly. to the range forming the western watershed of the Mary River, by that range Sly. and Ely. to the watershed dividing Kalunga Creek and its tributaries from Widgee Creek and its tributaries, by that watershed N.Wly. about three miles to the S.E. corner of forfeited Mineral Selection 1127; thence by the E. boundary of that por., the E. and the N. boundary of forfeited Mineral Selection No. 1126, the E. boundary of por. 120, the E. and part of the N. boundary of freehold Mineral Selection No. 989, the E. and part of the N. boundary of forfeited Mineral Selection 2611; thence by the S. boundary of por. 2v and a line bearing E. about a mile and forty chains; thence by the W. boundary of the leased part of Widgee Run bearing N. to Wide Bay Creek, and by that Creek upwards to the point of commencement; exclusive of the Kilkivan Goldfield, and all alienated lands.

Kilkivan—*continued:*

AREA OF GOLDFIELD: 19,200 acres (30 sq. miles).

AREA OF MINERAL FIELD: 128,000 acres (200 sq. miles).

LEASES: Goldmining leases in force, *nil;* miners' homesteads in force, 232; area, 2,473 acres (1912).

PRINCIPAL MINING CENTRES: Black Snake (including Mt. Cobalt and Mt. Coora Cobalt Lodes), Marodian and Yorkey's Goldfields, and Kilkivan Cinnabar Lodes, *which see.*

MINERAL STATISTICS:

Silver,	*see tables,*	Pls. 37, 46, 46A.
Copper,	,,	Pls. 39, 46, 46A.
Antimony,	,,	Pls. 40, 46, 46A.

STATISTICAL NOTES: *See under* other Goldfields.

MINERAL REFERENCES: Gold, 4401-4406; Silver, 7533-7539; Mercury (Cinnabar), 1549-1563; Lead (Galena), 3077; Copper (Azurite), 256, 257; Copper (carbonate), 1964-1968; Copper (native), 2014; (Copper Pyrites), 2326, 2327; (Cuprite), 2483, 2484; (Malachite), 6379-6381; (Redruthite), 7308-7310; Bismuth (Bismuthinite), 376; Arsenic (native), 100; Zinc Blende, 8210A; Manganese-dioxide, 6490; Cobalt (Asbolane), 121; Chromite, 1489; Iron (Iron Pyrites), 5448-5449A, 5449A; (Limonite, 5924, 5925; (Magnetite, 6063; Ironstone, 5633A; Limestone, 696. Other Minerals: Asbestos, 115; Calcite, 551-558; Jasper, 5653; Lydianstone, 5659; Magnesite, 5963A; Tourmaline, 7873.

GEOLOGICAL NOTE: The rocks are greenish serpentine, foliated serpentinous schists, and occasional beds of clay slate, with intrusions of quartz porphyry, hornblende porphyry, and diorite. Cobalt occurs in the serpentine in zones of alteration, and in association with manganese. Gold and copper is present in the neighbourhood in pyritous ore in quartz reefs, while cinnabar lodes occur (1) in granite, (2) in mica and chlorite schists, and (3) in beds of sandstone, shale, and conglomerate. The lodes are in the form of stockwerks and small veins, the ore being associated with calcite and quartz. *See* G.S.Q. Pubs. Nos. 28 and 79 for details and maps.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 28 (1886), 79 (1892), 169 (1901). *See* Geol. Surv. Pub. List for title.

Kingston. *Min.Ref.* Coal, *see* 1772; Gold, 4217A; Silver, 7509A; Kaolin, 5698; Tin, 1173.

Kingsthorpe, Rail. Stn., 12 miles from Toowoomba. *Collieries.*—Sugarloaf, Kingsthorpe, Sunrise, and Enterprise. *See* Coal, 1625C. There are no published reports on recent developments in the coal mines of the Darling Downs.

DISCOVERY: Coal was found in the first shaft sunk on Gowrie Colliery at Kingsthorpe in 1887, but it was only at the beginning of 1889 that operations became permanent, and the mine started to be a paying concern.

GEOLOGICAL NOTE: The coal measures belong to the Walloon Series (Trias-Jura), and are a continuation of the same series near Ipswich.

—— Bores. *See* Scrubby Creek Bores, *under* Coal Bores.

Koffman Diggings (Rannes Goldfield). *See under* Kauffman.

Koh-i-nor Mine, Coolgarra. *Min.Ref.* Anglesite, *see* 40; Galena, 2845; Malachite, 6277; Minium, 6594; Mispickel, 6739; Silver, 7478; Zinc Blende, 8108.

—— Tin Mine, Stanhills Tinfield. *Min.Ref.* Cassiterite, *see* 761.

Kooingal, 72 miles S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis.

GEOLOGICAL NOTE: In this locality there are extensive deposits of fossiliferous limestones belonging to the Gympie Formation (Permo-Carboniferous). *See* G.S.Q. Pub. No. 92, p. 89, for notes.

Koolatah Co. Cook Dist. *See map,* Pl. 8.

Koorboora—

SITUATION: *See maps,* Pls. 8, 9, 22. The town of Koorboora is 108 miles (by rail) S.W.byW. of Cairns (Chillagoe line). *Co.* Lynd; *Dist.* Cook. *Lat.*, 170° 24′ S.; *Long.*, 144° 50′ E.

DISCOVERY: The Koorboora Tin Lodes were discovered by Mr. Anthony Linedale, in August, 1888.

RAILWAY BASE and Centre for group of tin mines, including the Shakespeare, Iolanthe, Rosalind, etc., Mines.

POPULATION: *Included in* Chillagoe Mineral Field (Census, 1911).

MINERAL STATISTICS: Tin—*Included under* Herberton. *See* Pls. 38, 46, 46A.

MINERAL REFERENCES: Silver 7461, (native) 7551; Lead (Galena), 2797-2800; Copper (Azurite) 196, (Copper Pyrites) 2170, (Malachite) 6232; **Tin** (Cassiterite), 942-948; Wolfram, 7968, 7968A; Iron (Iron Pyrites) 5075, 5076, (Magnetite) 5991, (Mispickel) 6702, 6703. Other Minerals: Chlorite, 1443; Garnet, 3108; Gypsum, 4615; Mica, 6558; Serpentine, 7384.

GEOLOGICAL NOTE: The rocks at Koorboora are shales, sandstones, mudstones, grits, and conglomerates, which, near the head of Koorboora Creek, are intersected by felsitic dykes. The ore deposits, containing tin, occur in a series of hardened sandstones and mudstones. Coal Measures ("Desert Sandstone") exist about 3 miles N.E. of Koorboora Rail. Stn., but no workable seam has yet been discovered. *See* G.S.Q. Pubs. 69 and 192 for details and map.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 69 (1891) and 192 (1904). Map No. 220 (1909). *See under* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Chillagoe; INSPECTOR OF MINES: Stationed at Herberton.

—— (5 and 8 miles S. of), Chillagoe line. *Min.Ref.* Azurite, *see* 196; Garnet, 3108; Magnetite, 5991; Malachite, 6232.

Landsborough, 51 miles (by rail) N. of Brisbane (North Coast line). *Co.* Canning; Dist. Moreton. *Min.Ref.* Coal, *see* 1711A.

GEOLOGICAL NOTE: The rocks in the district comprise coal-measures belonging to the Ipswich Series, basalt, and granite. The Ipswich Series extend towards the east, with basalt and granite to the west on the Blackall Range. Coal exists in the district, but the seams so far discovered are too small to work.

Langmorn Gold and Mineral Field—

SITUATION: *See maps,* Pls. 2, 3, and 34. The field extends from 8 to 32 miles W., W.S.W., and W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. The centre is about *Lat.* 23° 50′ S., *Long.* 150° 55′ E.

DISCOVERY: Raglan Goldfield (included in Langmorn Goldfield), discovered 1867. In this year a 56-oz. nugget was found by Edward Longstaff.

POPULATION: Under 10.

PROCLAMATION: First gazetted 18th March, 1880; last, 6th March, 1913, as follows—Commencing at the confluence of the Horrigan and Raglan Creeks, and bounded thence by the Raglan Creek upwards easterly to the south-west corner of a reserve, R. 50, by the west and north boundaries of that reserve and a line east to the south-western boundary of a reserve for harbour purposes, R. 36, proclaimed in *Government Gazette,* 1894, volume 2, page 232, by the western boundary of that reserve northerly, the northern and eastern boundaries of Targinie Run easterly and south-easterly to the north-west corner of portion 1v, parish of Calliope, by the west boundary of that portion southerly to the railway line; thence by a line south to the southern watershed of Targinie Creek, by that watershed westerly, northerly, and south-westerly to the north-east corner of portion 487, parish of Targinie, by the east and south-east boundaries of that portion, the south-east boundaries of portions 466 and 1v, same parish, portions 22v and 20v, parish of Langmorn, a line south-westerly crossing the railway line to the north-east corner of portion 110, same parish, by the northern and western boundaries of that portion to the south-west corner of same; thence by a line westerly to the north-east corner of portion 33, parish of Mount Larcombe, by the northern boundary of that portion, the northern and western boundaries of portion 38, the western boundaries of portions 39, 40, and 41 westerly and southerly to the northernmost corner of M.H. 340, same parish, by the north-eastern boundary of that homestead south-easterly to the north boundary of a timber reserve, R. 63, proclaimed in *Government Gazette,* 1883, volume 2, page 1659, by part of the north, the east, and south-east boundaries of that reserve easterly, southerly, and south-westerly to the north-west corner of portion 36, Langmorn Gold and Mineral Field—*continued:*

same parish, by the west and south-western boundaries of that portion, the western boundary of portion 1v, same parish, south-easterly and south-westerly to portion 6v, parish of Alma, by part of the northern boundary of that portion and a range north-westerly, south-westerly, and again north-westerly to the south-east corner of portion 2, parish of Nolan, by the south and part of the west boundaries of that portion west and north-westerly to the northern watershed of the Calliope River, by that watershed and the northern watershed of the Don River, Manton and Centre Creeks west and north-westerly to the north-western watershed of the Langmorn Creek, by that watershed north-easterly to the southern boundary of Ulam Goldfield, by part of the south and part of the east boundaries of that goldfield northerly to Horrigan Creek; thence by that creek downwards to the south-west corner of portion 2v, parish of San Jose, by the south boundary of that portion easterly to the south-west corner of Raglan Town Reserve, R. 43, by the west boundary of that reserve northerly to Horrigan Creek; thence again by that creek downwards to the point of commencement;—exclusive of freeholds and agricultural farms.

Area: 192,000 acres (300 sq. miles).

Principal Mining Centres: Raglan and Targinie Goldfields, *which see.*

Mineral Statistics: Gold—*Included in* "Other Goldfields." *See maps and diagrams,* Pls. 36, 46, 46a, 47.

Mineral References: Gold (alluvial) 3386-3389, (nugget) 3445, (reef) 4296, 4297, 4311; Copper (Azurite) 247a, 248, 249; Bornite 435a, (Copper Pyrites) 2295, (Cuprite) 2474, (Malachite) 6359-6361; Iron (Limonite), 5908a; Limestone, 678, 724. Other Minerals—Kaolin, 5699.

Geological Note: The country rock consists chiefly of slates and quartzites. At Mt. Holly a thick bed of conglomerate forms a conspicuous feature, and at Raglan Creek large outcrops of limestone occur. Numerous quartz reefs are found in the shales, with diorite sometimes forming one of the walls. *See* G.S.Q. Pubs. 21 and 194 for details.

Geological Publications: Reports—Nos. 21 (1885), 194 (1904). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Gladstone; Inspector of Mines: Stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Mineral References: Cinnabar, *see* 1542; Garnet, 3097; Pleonaste, 7584; Psilomelane, 7083; Pyrolusite, 7116; Stibnite, 7616.

Geological Note: The rocks in this area belong to the Ipswich Series (Trias-Jura), and contain several important coal seams. *See* G.S.Q. Pub. No. 70 for details.

Laura Vale Sub-artesian Bore. *See under* Artesian Bores. No. 272.

Lawn Hills Silver Lead Mines, Mended Hill, S.W. of Burketown. Centre about *Lat.* 18° 28′ S.; *Long.* 135° 12′ E.

Mineral References: Calcite, *see* 451; Cerussite, 1885a and 1186; Galena, 2692-2697; Hematite, 4676; Lead Gossan, 5728; Silver, 7424b; Zinc Blende, 8052 and 8053. *See also under* Gov. Ming. Jour., Special Reports, No. 6.

Geological Note: The rocks in this locality comprise sandstones, shales, and mudstones of Silurian Age. They have been disturbed by enormous faults, along which quartz reefs have formed, and in which large masses of galena have been deposited. *See* G.S.Q. Pub. 138 for details.

Geological Publications: Reports Nos. 138 (1900) and 232 (1911). *See under* Geo. Sur. Pub. List for title.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 283.

Lazulite. *Compo.*, Phosphate of Alumina, iron, and magnesia. *Colour*, azure blue. *Streak*, white. Brittle. *H.* = 5·6. *Sp.gr.* = 3·1.

5722. —— (?). As small masses in grey rock in red granite. *Loc.* Left bank, near source of Chillagoe Creek, near Timbered Hill, 6 miles S.byW. of Calcifer Rail. Stn., 138 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* G.S.M.

"L" Creek Bore. *See under* Artesian Bores. No. 297.

Le Breun Lakes. *See* Coalstoun Lakes.

Lead (Pb.). *Atom.Wt.*, 207·10. *Sp.gr.*, 11·3.

MINERALS: *See* Altaite, Anglesite, Bournonite, Cerussite, Galena, "Lead Gossan," "Lead Ochre," "Lead Oxide," Linarite, Massicot, Matlockite, Mimetite, Minium, Pyromorphite, Wulfenite.

ASSOCIATED MINERALS: *Include* Actinolite, Barytes, Calcite, Chlorite, Ferrocalcite, Fluorspar, Garnet, Graphite, Gypsum, Hornblende, Kaolin, Mica, Steatite, etc.; Galena and other lead-bearing minerals, Bismuthinite, Bornite, Cassiterite, Cerargyrite, Copper Pyrites, Gold, Iron Pyrites, Marcasite, Mispickel, Molybdenite, Proustite, Pyrargyrite, Pyrolusite, Silver, Stibnite, Tetrahedrite, Wolfram, Zinc Blende. Most of the above minerals occur in association with galena or with minerals resulting from its oxidation.

ASSOCIATED ROCKS: *Gangues: Include* calcite, felspar, fluorspar, garnet, mica, ironstone, kaolin, quartz, quartzite, steatite. *Country rocks: Include* chlorite, diorite, garnet rock, gneiss, granite, greisen, greywacke, limestone, porphyry, sandstone, schist, serpentine, shale, slate, syenite, tuff.

GEOLOGICAL NOTE: Lead-bearing deposits occur as defined lodes and irregular masses in limestone, slate, and other sedimentary rocks, also in granite, diorite, etc., all belonging to Permo-Carboniferous or older formations. A large lode, of some importance, occurs at Lawn Hills, Burketown Mineral Field, in Silurian rocks, whilst important mines are situated in the Chillagoe District, Texas, and Ballandean, and smaller ones at Sellheim Mineral Field, Star R. Mineral Field, and Bompa. *See* G.S.Q. Pubs. Nos. 26, 57, 134, 191, and 232 for details.

STATISTICAL NOTE: *See under* Silver, sub-heading Silver-lead.

FIELDS: *See under* Silver, sub-heading Silver-lead Fields.

VALUES: *See* Table *under* Metal Values in London for maximum and minimum prices for all years since 1892.

SMELTING WORKS: *See under* separate heading "Smelting Works in Queensland."

MAPS: Pls. 3, 7, 9, 13, 17, 21.

BIBLIOGRAPHY: *See under* Silver-lead.

Leichhardt District—

Situation: *See maps,* Pls. 10, 11. (*Lat.* 21°-27°; *Long.* 146°-151°). Bounded by the districts of South Kennedy on the N. and N.W., Port Curtis and Burnett on the E., and Darling Downs, Maranoa, Warrego, and Mitchell on the S. and S.W. The whole of the district is drained by the Fitzroy R. and its tribs., the Dawson, Mackenzie, Isaacs, Comet, Nogoa, and Connor Rivers.

Area: 48,354 sq. miles.

Principal Mining Centres: Gold and Mineral Fields—Clermont (*in part*), Anakie (gems), Nebo (*in part*), Mt. Flora, Mt. Orange, and Yatton, *which see.* Coalfield—Clermont, *which see.*

Counties:

Aberdeen Co. Bauhinia Co. Buckland Co. Cairns Co. Claude Co.

Clermont Co. Clermont Goldfield (*principal part—see also under* Kennedy North Dist.). Clermont Coalfield (Collieries—Baslet's, Blair Athol, Blair Athol Ext., Blair Athol North, Eldorada, Hope, Imbell, Mercer's, and Newcastle); Anakie Sapphire Field (*in part—see also* Plantaganet Co.).

Consuelo Co.

Dawson Co. Camboon.

Denison Co. Emerald, Springsure, Woolthorpe, Woolton.

Leichhardt District—*continued:*

Ferguson Co. Banana.

Fortescue Co. Grosvenor Co.

Humboldt Co. Blackwater (Coal), Cometville, Dingo, Springton, Tolmies (Coal).

Killarney Co. Collaroy (Silver), Yatton Goldfield, Mt. Flora (Copper), Mt. Orange (Copper).

Kimberley Co. Duaringa, Walleroo (Coal).

Leyburn Goldfield—

SITUATION: *See maps,* Pls. 12, 13. 28 miles W.byN. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. Centre about *Lat.* 28° 0′ S.; *Long.* 151° 40′ E.

DISCOVERY: In 1882, by T. Prusson.

PROCLAMATION OF FIELD: First (and only one) gazetted, 21st June, 1875, as follows:—Commencing on the main road from Warwick to Leyburn at its intersection with the east boundary of the Leyburn Town Reserve, and bounded thence on the west by that boundary and a line bearing south about 2 miles 70 chains to the north boundary of Selection 118; on the south by part of that boundary, the north boundary of Selection 416, and a line bearing east about 3 miles 5 chains to a point bearing south from the south-west corner of Selection 1090; on the east by a line and part of the west boundary of Selection 1096, and bearing north about 2 miles 55 chains to the above-mentioned road from Warwick to Leyburn, and on the north by the south side of that road westerly to the point of commencement.

AREA: 4,780 acres (7$\frac{15}{32}$ sq. miles).

MINERAL STATISTICS: Gold, *included in* "Other Goldfields," Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold, 3844-3846; Copper (Pyrites), 2197; Manganese (Pyrolusite), 7121; Iron (Pyrites), 5120. Other Minerals—Clay, 1571; Talc, 7676.

GEOLOGICAL NOTE: The rocks consist of slates, grits, quartzites, greywackes, tuffs, and limestones belonging to the Gympie Formation, of Permo-Carboniferous Age. A few quartz reefs have been exposed on the field, all well-defined and carrying gold.

GEOLOGICAL PUBLICATIONS: Report—No. 120 (1898). *See under* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Warwick; INSPECTOR OF MINES: Stationed at Gympie.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Lime-Iron Garnet. *Syn.* Andradite, *var. of* Garnet, *which see.*

Lime Kilns and Quarries. (Principal)—

Raglan. On railway line, half-way between Gladstone and Rockhampton.
Silverwood. Four miles from railway, and about twelve miles from Warwick.
Glenmore. Near Fitzroy River, a few miles above Rockhampton.
Tamaree. At Tamaree Station, 5 miles from Gympie.
Gore. Four miles from Gore Rail. Stn., and 48 miles from Warwick.

Lime Manufacture. Most of the lime is utilised as a neutralising re-agent in the manufacture of sugar from cane juice; a small quantity also being used in building construction. Limestone deposits do not occur close to Brisbane, but at the places mentioned above, and also in many other localities, there are large areas of good limestone from which lime of first-class quality could be made. Limestone does not occur near Mackay, so far as official records show, but the islands to the south-east—Iron, Mortar, Marble, and Hunter—contain inexhaustible supplies. Townsville and Cairns, on the coast, are without limestone deposits, but limestone areas at Chillagoe are about 140 miles from the latter port.

See notes under Limestone and under Cement-making Materials.

Lime Mesotype. *Syn.* Scolecite, *which see.*

—— Carbonates. *See under* Calcite and Limestone.

—— Phosphates. *See* Apatite, Guano.

—— Silicates. *See under* Silicates.

—— Sulphate. *See* Gypsum.

—— Tungstate. *See* Scheelite.

Limekiln Beach, Hunter Is. *Min.Ref.* Galena, *see* 3066.

Limestone. *Var.* Calcite, *which see.*

MINERAL NOTE: In many localities massive limestone is found associated with deposits of iron, copper, bismuth, and zinc, and where near granite gives rise to a series of alteration products, of which garnet is the principal. The immense iron deposits of Iron and Marble Islands near the coast north of Rockhampton, and the iron-bismuth lode of Mount Biggenden, are in limestone country, and numerous copper and zinc lodes commonly have limestone as the gangue or country rock. Many limestone deposits occur in Central and Northern Queensland near the coast, and they have been proved to contain, in many cases, limestone of very pure quality, quite suitable for making lime or cement, or for fluxing purposes in metallurgical operations. Coloured and white marble of fine quality exists on Marble and Iron Islands between Rockhampton and Mackay, and a dark limestone with large white encrinites is being quarried at the limestone deposits near Marmor Railway Station. At Calliope, near Gladstone, a brecciated limestone has been worked to some extent, and, judging from what has been produced, the quarry should yield a remarkably fine brecciated red and pink marble suitable for cutting into slabs.

GEOLOGICAL NOTE: Nearly all the Limestones in the State are Palæozoic, belonging generally to the Permo-Carboniferous, Devonian, or Silurian Systems. Some deposits are irregularly lens-shaped coral formations, and unconformable with adjacent formations, but usually the limestones are evenly bedded, and interstratified with slates, shales, sandstones, and other sedimentary rocks. A large belt of limestone country exists on the N.W. boundary of the State, which was once considered to be all Palæozoic, but which now appears to be partly Devonian and partly Tertiary. *See maps,* Pls. 3, 5, 9, 17; *also* G.S.Q. Pub. No. 194.

ANALYSES: *See under* Calcite. *Sub-head,* Limestone.

USES: *See* note under Calcium.

STATISTICS: *See tables and diagram,* Pls. 41, 45, 46-46A, 53.

Limestone in Artesian Bores. *See* Artesian Bore Tables, Nos. 157, 204, 224, 232, 342 (2, 3), 289 (4), 432.

—— Mining Centre, Palmer Goldfield. *Min.Ref.* Gold (alluvial), *see* 3205, (reef) 3673-3677.

—— Range, W. of Double Barrel Cr., S. of Townsville. *Min.Ref.* Garnet, *see* 3124; Gold, 3996; Hematite, 4736; Iron Pyrites, 5226; Malachite, 6287.

—— ——, nr. Palmerville, Palmer Goldfield. *Min.Ref.* Scheelite, *see* 7340.

Limonite. *Syn.* Brown Hematite, Brown Iron Ore. *Compo.*, Hyd. sesquioxide of iron. *Colour and Streak*, brownish, yellowish. *H.* = 5-5·5. *Sp.gr.* = 3·6-4. *Contents* (*max.*), Iron 59 per cent.

5739. ——. *Assoc.with* Copper Pyrites and Redruthite. *Loc.* 4 miles N.W. of Blackeye Spring, McKinlay, 68 miles S.E.byE. of **Cloncurry.** *Co.* Allison; *Dist.* **Burke.** *Ref.* A.R., p. 107 (1907).

5740. ——. *Assoc.with* Iron Pyrites. *Loc.* 4 miles N.W. of Blackeye Spring, McKinlay (*ante*). *Ref.* A.R., p. 107 (1907).

5740A.——. *Assoc.with* Copper Pyrites, Chrysocolla, and Malachite, in quartz and slate. *Loc.* Cameronian M.C. (196) (Euston Group), Cameron R., 27 miles W.N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 267 (1908).

5740B.——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in quartz and quartzite. *Loc.* Federal R.C. (52) (Federal Group), Cameron R., 20 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 267, 268 (1908).

5741. Limonite. *Assoc.with* Malachite, in gossan and slate. *Loc.* Dispute M.L. (696) (Lady Clayre Group), Dugald R., 36½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 282 (1908).

5742. ——. *Assoc.with* Tile Ore and Malachite, in slate, gossan, and quartz. *Loc.* Lady Clayre M.L. (279) (Lady Clayre Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 279, 280 (1908).

5743. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, and Malachite, in mica-schist, quartzite, and gossan. *Loc.* Magnet M.L. (450) (Longamundi Group), Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 285 (1908).

5744. ——. *Assoc.with* Native Copper, Cuprite, and Malachite, in schist and gossan. *Loc.* Two Sports M.F. (2874) (Longamundi Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 288 (1908).

5744A. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Actinolite, in gossan and schist. *Loc.* Melba M.L. (319), Melba Group, Corella R., 39 miles W.S.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 210 (1908).

5745. ——. *Assoc.with* Redruthite and Malachite, in quartzite, schist, and gossan. *Loc.* Ruth M.L. (335), Mt. Remarkable Group, Glenroy, Prospector Cr., Leichhardt R., 51 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 291 (1908).

5746. ——. *Assoc.with* Cuprite and Malachite, in gossan and kaolin. *Loc.* Una M.L. (280) (Una Group), 8 miles W. of Quamby, Dugald R., 33 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* A.R., p. 116 (1907), and G.S.Q. Pub. 215, p. 277 (1908).

5747. ——. *Assoc.with* Gold, Iron Pyrites, and Hematite. *Loc.* Gilded Rose Mine, Bishop's Cr., 11 miles E.S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 10, p. 15 (1885), 104, p. 3 (1895).

5748. ——. *Assoc.with* Native Copper, Cuprite, and Malachite, in quartzite, schist, and gossan. *Loc.* M.F. (14) (Great Australia Group), 1½ mile N.N.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 251 (1908).

5748A. ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, Chrysocolla, and Malachite, in quartz and quartzite. *Loc.* Rocklands Group of Copper Mines, between Butcher and Morris Crs., 9 miles W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

5748B. ——. *Assoc.with* Cuprite, Tile Ore, Redruthite, and Malachite, in gossan and quartzite. *Loc.* Chum M.C. (329) (Serpent Hill Group), Morris Cr., 4½ to 5½ miles W.S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 256 (1908).

5748C. ——. *Assoc.with* Cuprite, Tile Ore, and Malachite, in lode. *Loc.* Carlton Hills Run, 78 miles N.W.byW. of Cloncurry. *Co.* Brahe; *Dist.* Burke. *Ref.* A.R., p. 269 (1910).

5749. ——. *Assoc.with* Copper Pyrites, Redruthite, and Tile Ore, in slate (?). *Loc.* Eclipse M.L. (571) (Eclipse Group), E. of Dromedary Range, N.W. of Donaldson, 68 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 355, 356 (1908).

5750. ——. *Assoc.with* Copper Pyrites, Malachite, and Calcite, in gossan and quartz. *Loc.* Iron Duke M.L. (Alice Group), Duck Cr., 4 miles S.E. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 165, 166 (1908).

5751. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, Hematite, and Turgite, in quartz, calcite, and gossan. *Loc.* Belfast M.L. (303) (Belfast Group), 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

5752. ——. *Assoc.with* Redruthite, Malachite, and Azurite, in quartz and schist. *Loc.* Boomerang M.C. (162) (Boomerang Group), W. side of Cone Cr., Duck Cr., 2 miles N.N.W. of Mt. Start, 23 miles W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 99, 100 (1908).

5753. ——. *Assoc.with* Copper Pyrites, Tile Ore, Redruthite, Chrysocolla, and Hematite, in quartz and ferro-calcite. *Loc.* Policeman M.C. (2061) (Boomerang Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 100, 101 (1908).

5754. ——. *Assoc.with* Malachite, in schist, quartzite, and quartz. *Loc.* Chinaman M.F. (2453) (Chinaman Group), Duck Cr., 1 mile S.byE. of Mt. Start, 23½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 144-147 (1908).

5755. ——. *Assoc.with* Redruthite, Malachite, and Göthite, with traces of gold and silver, in schist and quartz. *Loc.* Mountain Maid M.L. (526) (Columbiad Group), Duck Cr., 1¼ mile S.W. of Mt. Start, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 140, 141 (1908).

5756. ——. *Assoc.with* Redruthite, Tile Ore, Cuprite, and Malachite, in quartz and schist. *Loc.* Butterfly M.L. (496) (Daisy Group), Duck Cr., nr. Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 109, 110 (1908).

5757. ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Tile Ore, Cuprite, Malachite, Iron Pyrites, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155) (Daisy Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

5758. ——. *Assoc.with* Malachite and Hematite, in quartz and schist. *Loc.* Horseshoe M.L. (451), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 104, 105 (1908).

5759. ——. *Assoc.with* Malachite and Actinolite, in quartz and chloritic schist. *Loc.* Tulip No. 1 E. M.C. (180), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 106 (1908).

5760. ——. *Assoc.with* Redruthite, Tile Ore, and Malachite, in chloritic schist and quartz. *Loc.* Balfour Extd. M.C. (257) (Diagonal Group), Duck Cr., nr. Mt. Start, 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 138, 139 (1908).

5761. ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Tile Ore, Azurite, and Malachite, in chloritic schist. *Loc.* Pioneer Copper M.L. (229) (Diagonal Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 132-135 (1908).

5762. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in schist and quartz. *Loc.* Prospector M.C. (182) (Diagonal Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 136-138 (1908).

5763. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, Iron Pyrites, and Calcite, in schist, slate, and quartz. *Loc.* Eva M.L. (250) (Eva Group), 1¼ mile S.E. of Mt. Start, 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 152-154 (1908).

5764. ——. *Assoc.with* Malachite and Hematite, in quartz. *Loc.* Jessie M.L. (238), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 156, 157 (1908).

5765. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Turgite, Calcite, and Ferro-calcite, in quartzite, schist, and limestone. *Loc.* Florence R. Copper Mines, ½-mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

5766. ——. *Assoc.with* Redruthite, Cuprite, and Malachite, in slate and gossan. *Loc.* Block (15), M.Ls. (246 and 409) (Hampden Group), 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 60, 61 (1908).

5767. ——. *Assoc.with* Calcite and Chlorite, in quartz. *Loc.* Block (25), M.L. (421) (Hampden Group) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 62 (1908).

5768. ——. *Assoc.with* Malachite, in gossan. *Loc.* Hampden South M.L. (502) (Hampden Group) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 63 (1908).

5769. ——. *Assoc.with* Hematite. *Loc.* Mt. Sylvia Copper M.L. (422), 1½ mile S.E. of Hampden Workings, 42 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay:* Iron Oxide = 87·87 per cent. *Ref.* G.S.Q. Pub. 215, p. 62 (1908).

5770. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, and Malachite, in schist and quartz. *Loc.* Comet M.L. (243) (Hilda Group), ½-mile W. of Boulia Road, nr. Gorge Hotel, 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 182, 183 (1908).

5771. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Manganese-dioxide, and Calcite, in limestone, quartz, and schist. *Loc.* Hilda M.L. (242), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 183, 184 (1908).

5772. ——. *Assoc.with* Tile Ore, Cuprite, and Malachite, in quartz. *Loc.* Adelaide M.C. (549) (Just-in-Time Group), 1¼ mile S. of Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 85, 86 (1908).

5773. ——. *Assoc.with* Redruthite, Tile Ore, and Malachite, in ferruginous quartzite and schist. *Loc.* Just-in-Time M.L. (237) (Just-in-Time Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 82, 83 (1908).

5774. ——. *Assoc.with* Copper Pyrites, Redruthite, and Malachite, in quartzose schist. *Loc.* Just-in-Time M.L. 1 E. (473), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 84 (1908).

5775. Limonite. *Assoc.with* Redruthite, Tile Ore, Cuprite, and Malachite, in slate, quartzite, and quartz. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 79-81 (1908).

5775A.——. *Assoc.with* Redruthite, Malachite, and Chrysocolla, in quartzite and schist. *Loc.* Lady Jenny M.L. (234) (Lady Group), Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 195 (1908).

5775B.——. *Assoc.with* Redruthite, Tile Ore, Azurite, and Malachite, in quartz and schist. *Loc.* Morning Star M.L. (306), Lady Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 199 (1908).

5776. ——. *Assoc.with* Native Copper, Cuprite, Redruthite, Malachite, Chrysocolla (*var.* Cyanochalcite), Calcite, and Ferro-Calcite, in granular limestone. *Loc.* Dandy P.A. (297) (McPhail Group), 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 76, 77 (1908).

5777. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Azurite, in silvery glance. *Loc.* Erin-go-Bragh Extd. M.C. (372), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 77, 78 (1908).

5778. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Chrysocolla, in gossan, quartzite, and schist. *Loc.* McPhail M.L. (474) (McPhail Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 70-72 (1908).

5779. ——. *Assoc.with* Redruthite, Malachite, Chrysocolla, Iron Pyrites, and Dioptase, in turgite, schist, and gossan. *Loc.* Trump Extd. M.C. (368) (McPhail Group) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 73-76 (1908).

5780. ——. *Assoc.with* Tile Ore, Redruthite, Malachite, and Azurite, in schist, quartzite, and slate. *Loc.* Monitor M.L. (419) (Monitor Group), 44 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 65 (1908).

5780A.——. *Assoc.with* Gold, Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.) (Mt. Wheeler Group), Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

5780B.——. *Assoc.with* Redruthite, Malachite, and Iron Pyrites, in schist. *Loc.* Pearl M.C. (106), Pearl Group, Corella R., 30 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 188 (1908).

5781. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Azurite, Chrysocolla, and Hematite, in slate. *Loc.* Easter Gift M.L. (290) (Pioneer Chief Group), 1 mile E. of Mt. Start, W. of Marabah, 24 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 127-129 (1908).

5782. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Malachite, and Iron Pyrites, in slate. *Loc.* Pioneer Chief M.L. (231) (Pioneer Chief Group), E. bank of Cone Cr., ½-mile N. of Mt. Start, 24 miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123-125 (1908).

5783. ——, *Assoc.with* Copper Pyrites and Malachite, in schist and quartz. *Loc.* Primrose Extd. M.C. (267), W.N.W. flanks of Mt. Finish, 24 miles S.W.byS. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 126, 127 (1908).

5784. ——. *Assoc.with* Tile Ore and Malachite, in chloritic schist and quartz. *Loc.* Coronet M.C. (241) (Ready Rhino Group), Cone Cr. and Duck Cr., 23½ miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 96 (1908).

5785. ——. *Assoc.with* Copper Pyrites, Redruthite. Malachite, Chrysocolla, and Turgite, in slate and quartz. *Loc.* Highland Mary M.L. (531), 2¾ miles N.W.byN. of Mt. Start, Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

5786. ——. *Assoc.with* Cuprite, Redruthite, and Malachite, in schist and quartz. *Loc.* Ready Rhino M.L. (320), 2½ miles N.N.W. of Mt. Start, Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 93-95 (1908).

5787. ——. *Assoc.with* Tile Ore and Malachite, in ferruginous quartz and schist. *Loc.* White Rose M.L. (330), Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 97, 98 (1908).

5788. ——. *Assoc.with* Gold, in quartz and calcite. *Loc.* Rose and Thistle Reef, Weatherly Cr., Soldier's Cap Diggings, 24 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 4 (1895).

5789. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, and Iron Pyrites, in schist, slate, and quartzite. *Loc.* Banjo M.L. (590), head. br. of Duck Cr., 26 miles N.W. of Cloncurry, Tambourine Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

5790. ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, Malachite, Chrysocolla, Iron Pyrites, and Tourmaline, in schist, slate, and quartz. *Loc.* Tambourine R.C. (286) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 166, 167 (1908).

5791. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Chrysocolla, and Turgite, in schist and quartz. *Loc.* Brilliant M.L. (588), 1½ mile N.W. of Mt. Start, 18 miles S.W. of Cloncurry, Tharsis Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 114, 115 (1908).

5792. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Göthite, in chloritic schist. *Loc.* Brilliant M.C. (159) (Timberoo Group), Slaty Cr., 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 179, 180 (1908).

5793. ——. *Assoc.with* Copper Pyrites, Ferro-Calcite, and Calcite, in clay schist. *Loc.* Ida M.C. (179), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 178, 179 (1908).

5794. ——. *Assoc.with* Malachite, Calcite, Ferro-Calcite, and Tourmaline, in cellular gossan and chloritic schist. *Loc.* Marguerite M.C. (151), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 177, 178 (1908).

5795. ——. *Assoc.with* Copper Pyrites, Cuprite, and Malachite, in chloritic schist. *Loc.* Mt. Minde M.F. (2658), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 170-172 (1908).

5796. ——. *Assoc.with* Copper Pyrites and Redruthite, in chloritic slate and sinter. *Loc.* Resurgam M.L. (399), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 175-177 (1908).

5797. ——. *Assoc.with* Copper Pyrites, Redruthite, Bornite, Tile Ore, Iron Pyrites, Hematite, Muscovite, and Calcite, in schist, slate, and quartz. *Loc.* Timberoo M.L. (716), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 172-175 (1908).

5798. ——. *Assoc.with* Redruthite, Tile Ore, Azurite, and Malachite, in gossany quartz and schist. *Loc.* Wallaroo M.L. (392) (Wee MacGregor Group), Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 202-205 (1908).

5798A.——. *Assoc.with* Gold, Tile Ore, and Malachite, in lode. *Loc.* Soldier's Cap Diggings, 24 miles S.E.byS. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* A.R., p. 278 (1910).

5799. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* Post Hole Reef, Croydon Township, Croydon Goldfield, 94 miles (by rail) S.E. of Normanton. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 35, p. 8 (1887), and 118, p. 21 (1896).

5800. ——. *Assoc.with* Gold, in quartz. *Loc.* Queen of Croydon Reef, 1 mile N. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 8 (1887).

5800A.——. *Assoc.with* Gold and Native Silver, in quartz. *Loc.* Miner's Right Lease (Queen of Croydon Reef), 1 mile E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*).

5801. ——. *Assoc.with* Gold, in quartz. *Loc.* Banner of Freedom Reef, Golden Gate, 4 miles (by rail) N.W. of Croydon Rail. Stn., 90 miles (by rail) S.E. of Normanton. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 9 (1887).

5802. ——. *Assoc.with* Gold, Iron Pyrites, Minium, and Hematite, in quartz. *Loc.* Eureka Reef, 1 mile from Flanagan's, 13 miles E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 1 (1887).

5803. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Malachite, and Chrysocolla, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582) (Bull Cr. Group), Coolulah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345-347 (1908).

5804. ——. *Assoc.with* Redruthite and Malachite, in schist. *Loc.* Iguana M.C. (268), Bull Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 349, 350 (1908).

5805. ——. *Assoc.with* Copper Pyrites, Bornite, and Malachite, in limestone. *Loc.* Centipede M.L. (375) (Centipede Group), Prospector Cr., 53 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 301, 302 (1908).

5806. ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Redruthite, Malachite, Iron Pyrites, Hematite, and Magnetite. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), 215, p. 334 (1908).

5807. ——. *Assoc.with* Copper Pyrites, Redruthite, and Malachite, in quartz. *Loc.* Bauhinia M.C. (347) (Dobbyn Group), Coolullah, 3½ miles W.N.W. of Crusader Fs., 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 341, 342 (1908).

5807A. Limonite. *Assoc.with* Malachite, in gossany quartz. *Loc.* Dobbyn M.F. (2551), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 340 (1908).

5808. ——. *Assoc.with* Copper Pyrites, Redruthite, and Malachite, in schist. *Loc.* Dobbyn No. 1 S. M.L. (662), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

5809. ——. *Assoc.with* Malachite and Chrysocolla, in quartz. *Loc.* Elsie M.C. (?), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 342, 343 (1908).

5810. ——. *Assoc.with* Redruthite, Tile Ore, and Malachite, in gossany quartz. *Loc.* Flaneur M.L. (655), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 344, 345 (1908).

5811. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Calcite, and Ferro-Calcite, in quartz. *Loc.* Glenferrie P.A., nr. Old Man Cr., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

5812. ——. *Assoc.with* Native Copper, Cuprite, and Chrysocolla, in schist and quartzite. *Loc.* Little Wonder M.L. (258), (Mighty Atom Group), 6-Mile Cr., Leichhardt R., 60 to 63 miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub, 215, pp. 310, 311 (1908).

5813. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, Malachite, and Chrysocolla, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

5814. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in gossan and quartz. *Loc.* Mt. Bornite M.L. (376), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 309, 310 (1908).

5815. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, and Malachite, in slate, schist, and gossan. *Loc.* Mt. Millicent M.L. (663), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 307, 308 (1908).

5816. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in slate and kaolin. *Loc.* Mt. Millicent S. M.L. (664), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 308, 309 (1908).

5817. ——. In gossan. *Loc.* Rover M.L. (678), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 306, 307 (1908).

5818. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, and Malachite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group, 6-Mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H. Stn., 63 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 315, 318 (1908).

5819. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, Malachite, and Chrysocolla, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert No. 1 M.L. (381), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

5820. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, Iron Pyrites, Ironstone, and Magnesite, in kaolinised schist. *Loc.* Mt. Cuthbert 1 and 2 S. M.Ls. (257 and 294), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321, 322 (1908).

5821. ——. *Assoc.with* Iron Pyrites, Jasper, and Chalcedony, in quartz. *Loc.* Dreadnought M.L. (452), Mt. Metallic Group, Prospector Cr., Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 299 (1908).

5822. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Tenorite, Malachite, and Iron Pyrites, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 295, 296 (1908).

5823. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in schist, gossan, and quartz. *Loc.* Chance P.A. (283), St. Paul's Cr. Group, Leichhardt R., Coolullah, 78 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 352-354 (1908).

5824. ——. *Assoc.with* Copper Pyrites and Redruthite, in kaolin. *Loc.* Queen Bee M.C. (278), St. Paul's Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 354 (1908).

5825. ——. *Assoc.with* Copper Pyrites, Redruthite, and Calcite, in schist and quartz. *Loc.* Hare's Excelsior M.L. (?), Von Bremen's Group, St. Paul's Cr., Coolullah, Leichhardt R., 70 miles N.W.byW. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 327, 328 (1908).

5826. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite, in schist, gossan, and quartz. *Loc.* Isabella M.C. (360), Von Bremen's Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 325, 326 (1908).

5827. ——. In silicified slate. *Loc.* Gaeta Goldfield, 30 miles N. of Mt. Perry Rail. Stn. *Co.* Yarrol; *Dist.* **Burnett.** *Ref.* O.R.

5828. ——. *Assoc.with* Copper, in lode. *Loc.* Canterbury Copper Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen. *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

5828A. ——. *Assoc.with* Gold, Copper Pyrites, and Malachite, in lode. *Loc.* Nr. Wonbah Hill Mine, 2 miles from Wonbah Siding (Mt. Perry line), 60 miles (by rail and road) W.S.W. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* A.R., p. 264 (1910).

5829. ——. *Assoc.with* Göthite, Malachite, and Azurite. *Loc.* Lakeside, nr. Degilbo, 58 miles (by rail) W. of Maryborough (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* A.R., p. 134 (1908).

5830. —— (earthy). *Assoc.with* Bismite. *Loc.* Mt. Shamrock Gold Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 25, p. 1 (1886).

5831. ——. *Assoc.with* Galena and Redruthite, in lode. *Loc.* Girl-I-Left-Behind-Me Claim, Stanton-Harcourt Diggings, 11 miles N. of Degilbo Rail. Stn. (Gayndah line), 69 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Assay:* Silver = 8 oz. per ton. *Ref.* G.S.Q. Pub. 168, p. 3 (1901).

5832. ——. *Assoc.with* Turgite. *Loc.* Scotland Hills, 5 miles S. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Analysis:* Iron = 33·4 per cent. *Ref.* G.S.Q. Pub. 194, p. 50 (1904), and Q.G.M.J., vol. 5, p. 123 (1904).

5832A. ——. *Assoc.with* Galena, Cerussite, Anglesite, Massicot, Malachite, and Azurite, in lode. *Loc.* About 5 miles S. of Coalstoun Lakes, 16 miles S.W. of Biggenden Rail. Stn. (Gayndah line). *Co.* Mackenzie (*ante*). *Ref.* A.R., pp. 287, 288, 291 (1910).

5833. ——. *Assoc.with* Manganese dioxide. *Loc.* Gt. Eastern Mine (Stewart's), Cadarga Cr., 32 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* L.C.B.

5833A. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Manganese-dioxide, in quartz. *Loc.* Cadarga Cr. Gold Mines, between Cadarga Cr. and Auburn R., 33 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

5834. ——. *Assoc.with* Hematite. *Loc.* Cabbage Tree Cr., br. of Splinter Cr., Dawe's Range, 40 miles S.W. of Miriam Vale Rail. Stn. (North Coast line). *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 194, p. 31 (1904).

5835. ——. *Assoc.with* Gold, in quartz. *Loc.* Golden Spur P.A. Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 43, p. 3 (1887).

5836. ——. *Assoc.with* Hematite, in quartz. *Loc.* 6 miles from Eidsvold Goldfield, 41 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 43, p. 1 (1887).

5837. ——. *Assoc.with* Gold, Silver, and Iron Pyrites, in quartz. *Loc.* Apple-tree Lease, Cabbage Tree Cr., Mt. Cannindah, 13 miles S.W.byS. of Many Peaks Rail. Stn., 71 miles (by rail and road), S. of Gladstone. *Co.* Yarrol (*ante*). *Assay: See* No. 3657. *Ref.* G.S.Q. Pub. 113, p. 9 (1896).

5837A. ——. *Assoc.with* Copper Pyrites, Malachite, and Azurite, in quartz. *Loc.* Malpas's Claim, Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* A.R., p. 223 (1910).

5838. ——. As pseudomorphs after Iron Pyrites. *Loc.* Cannibal Cr. Tin Mines, nr. Mt. Hurford, 15 miles S.E. of Maytown, Palmer. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.M.

5839. ——. *Assoc.with* Gold and Copper carbonate, in quartz. *Loc.* Trafalgar Reef, 3½ miles S.E. of Ebagoolah, Hamilton Goldfield. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, pp. 13, 14 (1901).

5840. ——. *Assoc.with* Gold (traces) and Manganese-dioxide, in quartz. *Loc.* On hill, below mouth of St. George R., 6 miles S.E.byS. of Limestone. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

5840A. ——. *Assoc.with* Silver, Galena, Copper Pyrites, and Cerussite, in lode. *Loc.* Mt. Dee Vall. Claim, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* O.R. (1910).

5840B. ——. *Assoc.with* Silver, Galena, and Massicot, in quartz. *Loc.* M.L. 64, Mosquito Cr., about 10 miles S.W.byS. of Charleston Rail. Stn. (Etheridge line). *Co.* Gilbert (*ante*). *Assays: See* No. 2756B. *Ref.* A.R., p. 268 (1910).

5841. Limonite. *Assoc.with* Gold, Iron Pyrites, and Hematite, in quartz. *Loc.* Caledonia Reef, Caledonia Cr., trib. of Goldsmith's Cr., 24 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

5841A. ——. *Assoc.with* Copper Pyrites, Copper carbonate, Chalcanthite, Iron Pyrites, Mispickel, Marcassite, Cassiterite, Wolfram, Red and Yellow Ochre, in chlorite. *Loc.* Try Again and Chance Mine, Watsonville, 7 miles E.S.E. of Stannary Hills Rail. Stn. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 13, p. 24 (1883), and P.R.S.Q., vol. 4, p. 52 (1887).

5842. ——. *Assoc.with* Iron Pyrites, Galena, and Anglesite, in quartz reef. *Loc.* near Mt. Luxton, California Cr., 3 miles N.E. of Ord Rail. Stn. (Chillagoe-Mt. Garnet line), 120 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 12 (1899).

5843. ——. *Assoc.with* Hematite and Cerussite. *Loc.* Girofla Mine, Mungana, 149 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe lines), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 12 (1898).

5844. ——. Red Hills, nr. Mungana Rail. Stn. (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

5845. ——. *Assoc.with* Ironstone, Siderite, Tetrahedrite, Malachite, and Manganese-dioxide. *Loc.* Queenslander Lease, Redcap Cr., 3 miles S.E. of Mungana Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

5846. ——. *Assoc.with* Copper Pyrites, Bornite, Redruthite, Malachite, Azurite, Hematite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mossman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

5847. ——. *Assoc.with* Gold, in gravelly alluvial deposits. *Loc.* Burns and Party Claim, Terraces, Russell Goldfield, 22 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 45, p. 3 (1888).

5848. ——. *Assoc.with* Gold, Bismutite, Magnetite, Manganese-dioxide, Ruby, and Garnet, in alluvial deposits. *Loc.* Agate Cr., br. of Robertson R., 38 miles S. of Georgetown, 21 miles S.S.W. of Charleston, Etheridge. *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

5849. ——. *Assoc.with* Minium, Cerussite, and Copper carbonate, in lode traversing slate, greywacke, and quartzite. *Loc.* Monte Video Mine, between Ashton and Bowler Crs., Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 15 (1898).

5850. ——. *Assoc.with* Göthite and Turgite, in basalt. *Loc.* Por. 1847, Rolleston, 3 miles N.E. of Pittsworth Rail. Stn., 39 miles (by rail and road) S.W.byS. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Analysis:* Iron = 49·9 per cent. *Ref.* G.S.Q. Pub. 194, pp. 62, 63 (1904).

5851. ——. *Assoc.with* Turgite, in basalt. *Loc.* Por. 2110, Rolleston, few chains W. of Green Hills Rail. Stn. (Pittsworth Br. line), 32 miles (by rail) S.W.byS. of Toowoomba. *Co.* Aubigny (*ante*). *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

5852. ——. *Assoc.with* Göthite and Turgite, in basalt. *Loc.* Por. 2188, Rolleston, 1 mile S.S.E. of Green Hills Rail. Stn. (Pittsworth line), 33 miles (by rail and road) S.W.byS. of Toowoomba (*ante*). *Analysis:* Iron = 52·3 per cent., Titanium = nil, Silica and insoluble = 8·9 per cent., Phosphorus = 0·2 per cent., Sulphur = trace. *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

5853. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Manganese-dioxide, in quartz. *Loc.* Glenelg Reef, nr. Oaky Cr., 9 miles E. of Glenelg Head Stn., 55 miles (by road) W.S.W. of Warwick. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* (and *Assays*) G.S.Q. Pub. 40, p. 1, 2 (1887).

5854. ——. *Assoc.with* Manganese-dioxide in the form of Wad, Pyrolusite, and Psilomelane. *Loc.* S. of Pikedale Hotel, 11 miles W. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

5855. —— (silky, golden). In laterite. *Loc.* Mt. Sturt, 2 miles N.N.W. of Yangan Rail. Stn. (Killarney line), 15 miles (by rail and road) E.byN. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 186, p. 20 (1903).

5856. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Clare's Reef, 3 miles W. of Pratten, 22 miles, W.N.W. of Warwick, Talgai Goldfield. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 205, p. 28 (1906).

5857. ——. *Assoc.with* Gold and Manganese-dioxide, in quartz leaders. *Loc.* Golden Gate Lease, 3 miles W. of Pratten (*ante*). *Ref.* G.S.Q. Pub. 205, p. 29 (1906).

5858. ——. *Assoc.with* Gold, in quartz. *Loc.* Victoria Reef, 3 miles W. of Pratten (*ante*). *Ref.* G.S.Q. Pubs. 186, p. 16 (1903), 205, p. 30 (1906).

5859. ——. *Assoc.with* Gold, in quartz. *Loc.* Welcome Stranger Lease, nr. Big Hill Mine, 3 miles W. of Pratten (*ante*). *Ref.* G.S.Q. Pubs. 186, p. 4 (1903), and 205, pp. 27, 28 (1906).

5860. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Calcite, and Epsomite, in quartz lode in schist and quartzite. *Loc.* Duchess M.L. (275), (Duchess Group), Burke R., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 18-23 (1908).

5861. ——. *Assoc.with* Cuprite, Malachite, and Azurite, in quartz. *Loc.* Ivanhoe M.L. (277), Duchess Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 23, 24 (1908).

5862. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, and Malachite, in kaolinised rock, schist, and quartz. *Loc.* Italian M.L. (689), (Lady Fanny Group), Wills R., 60 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 34, 35 (1908).

5863. ——. *Assoc.with* Tile Ore and Malachite, in porphyry, quartzite, and quartz. *Loc.* Prodigal M.L. (490), Lady Fanny Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 36 (1908).

5864. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Redruthite, Cuprite, Malachite, and Chrysocolla, in hornblende schist. *Loc.* Mt. Birnie M.L. (686, etc.), Mt. Birnie Group), Burke R., 74½ miles S.S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

5865. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Cuprite, Native Copper, Malachite, Atacamite, and Calcite, in chloritic schist and quartz. *Loc.* Blue Jacket M.L. (632), 3 miles E. of Mt. Hope, Wills R., 53½ miles S.W. of Cloncurry, Mt. Hope Group. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

5866. ——. *Assoc.with* Copper Pyrites, Redruthite, and Malachite, in gossan, quartz, and slate. *Loc.* Little Beauty M.L. (568), 2½ miles E.N.E. of Mt. Hope, Wills R., 55 miles S.W. of Cloncurry, Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp 44-47 (1908).

5867. ——. *Assoc.with* Copper Pyrites, Redruthite, Covelline (?), Tile Ore, Malachite, Iron Pyrites, and Calcite, in chloritic schist. *Loc.* Monarch Senior M.C. (352), 3 miles E. of Mt. Hope, 56 miles S.W. of Cloncurry, Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42, 43 (1908).

5868. ——. *Assoc.with* Cuprite and Malachite, in quartz and quartzite. *Loc.* Mt. Hope M.L. (366), Green's Cr., trib. of Burke R., 53½ miles S.W. of Cloncurry, Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 38, 39 (1908).

5869. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Chrysocolla, in quartz and kaolin. *Loc.* Trikelana M.L. (522), (Trikelana Group), Pilgrim Cr., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 26 (1908).

5870. ——. *Assoc.with* Tile Ore, Tenorite, Redruthite, Malachite, and Iron Pyrites, in slate and gossan. *Loc.* Labour Victory R.C. (29) Agate Downs Group), 53 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 12-14 (1908).

5871. ——. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Malachite, Atacamite, Chalcanthite, Iron Pyrites, Calcite, and Chalcedony, in slate and gossan. *Loc.* Mt. Elliott R.C. (3, etc.), (Mt. Elliott Group), Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin (*ante*). *Ref.* G.S.Q. Pub. 215, pp.3-12 (1908).

5872. ——. *Assoc.with* Cassiterite and Hematite, in quartz. *Loc.* Magdala Tin Mine, Magdala Hill, Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

5873. ——. *Assoc.with* Iron Pyrites, Mispickel, Göthite, Hematite, Azurite, Malachite, Cassiterite, Wolfram, Websterite, Chlorite, Fluorspar, Penninite, and Topaz, in quartz lode. *Loc.* Tin Mines, Coolgarra (*ante*). *Ref* G.S.Q. Pub. 72, p. 2 (1891).

5874. ——. *Assoc.with* Hematite, Tetrahedrite, Malachite, Azurite, Galena, Mimetite, in lode. *Loc.* Mt. Garnet Mine, Return Cr., 136 miles (by rail) S.W. of Cairns (Cairns, Chillagoe, and Mt. Garnet lines), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

5875. ——. *Assoc.with* Gold, Iron Pyrites, Magnetite, Hematite, Chalcanthite, Manganese-dioxide, and Talc, in porphyry rock. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pubs. 18, p. 1 (1885), and 73, p. 13 (1891).

5875A. Limonite. *Assoc.with* Gold, Silver, Galena, and Cerussite, in lode. *Loc.* ¾-mile E. of Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

5876. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Lancashire Lass Mine, Far Fanning, 28 miles (by road) N.W. of Ravenswood Junction. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 133, p. 6 (1898), and G.S.M.

5877. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz and calcite. *Loc.* Golden Valley Reef, Mt. Success, 15 miles N.N.W. of Ravenswood Junction. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 133, p. 10 (1898).

5878. ——. *Assoc.with* Gold, in quartz. *Loc.* "The Springs" Reef, 2 miles W.S.W. of Pentland Rail. Stn., 68 miles (by rail and road) S.W.byW. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 3 (1891).

5879. ——. In quartz. *Loc.* Lake Lucy, Upper Burdekin, 112 miles N.W. of Townsville. *Co.* Gunnawarra; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 5 (1891).

5879A. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Malachite. *Loc.* Mare's Nest Cr., Andromache R., 44 miles S.S.E. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* O.R. (1909).

5879B. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Lady Augusta P.A. (129), Moss Vale Stn., nr. Euri Cr., about 7 miles S.W. of Bowen. *Co.* Herbert (*ante*). *Ref.* A.R., p. 269 (1910).

5880. ——. *Assoc.with* Iron Pyrites, Hematite, Azurite, Malachite, and Cassiterite, in quartz and chlorite. *Loc.* M.L., in gully off Douglas Cr., Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

5881. ——. *Assoc.with* Cuprite, Azurite, and Malachite. *Loc.* Kallanda, Kangaroo Hills Mineral Field (*ante*). *Ref.* A.R., p. 106 (1907).

5882. ——. *Assoc.with* Hematite, Galena, Cerussite, Copper carbonate, in gossany lode. *Loc.* Mt. Brown Lease (183), Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 82, p. 10 (1892).

5883. ——. *Assoc.with* Hematite, in quartzose gangue. *Loc.* Iron Mountain, N. of Donnybrook, Upper Burdekin, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 10 (1891).

5883A. ——. *Assoc.with* Gold, Iron Pyrites, Turgite, Ironstone, Galena, and Copper Pyrites, in quartz. *Loc.* Broken R. Gold and Silver Co.'s Mine, Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch-Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* (and *Assays*) G.S.Q. Pubs. 54, pp. 2, 3 (1889), and 229, pp. 31, 32 (1910).

5883B. ——. *Assoc.with* Gold and Malachite, in quartz. *Loc.* Highland Chief Reef, Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 229, p. 30 (1910).

5883C. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Malachite, Siderite, Galena, and Zinc Blende, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch-Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

5884. ——. In quartz reef. Nr. Denison's Cr., 24 miles S.byW. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

5885. ——. *Assoc.with* Gold, in quartz. *Loc.* Captain Brown's Lease, Grass-tree Goldfield, 17 miles S.byE. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 93, p. 8 (1893).

5885A. ——. *Assoc.with* Silver, Malachite, and Azurite, in lode. *Loc.* nr. Finch-Hatton Rail. Stn. (Mackay line), 38 miles W.S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* A.R., p. 280 (1910).

5886. ——. Mt. McGregor, 2½ miles S.E. of Mt. Toby, 2½ miles N.N.E. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* L.B., 1, p. 941 (1887).

5887. ——. *Assoc.with* Gold, in quartz. *Loc.* Sel. 661, Mackay. *Co.* Carlisle (*ante*). *Assays: See* No. 4119. *Ref.* G.S.Q. Pub. 39, p. 3 (1887).

5888. ——. *Assoc.with* Malachite and Azurite. *Loc.* Lady Jane Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* O.R.

5889. ——. As pseudomorph after Iron Pyrites in schist. *Loc.* McDonald's Flat, 3 to 4 miles S.S.E. of Clermont Rail. Stn., Clermont Goldfield. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* B.D.

5890. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Christmas Hill, "The Springs," 11 miles N.N.W. of Clermont Rail. Stn., Clermont Goldfield (*ante*). *Ref.* G.S.Q. Pub. 201, p. 24 (1906).

5891. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Well and Hill's Claim, Pewt's Hill, The Springs (*ante*). *Ref.* G.S.Q. Pub. 201, p. 20 (1906).

5892. ——. *Assoc.with* Gold and Hematite, in gossan. *Loc.* Stewart and Spier's Mine, Mt. Clifford, between Retreat and Ruby Creeks, 9½ miles (by road) N.W. of Anakie. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 129, p. 3 (1898).

5893. ——. *Assoc.with* Gold and Hematite, in slate. *Loc.* N. of Policeman Cr., 9 miles N. of Anakie, 202 miles (by rail and road) W. of Rockhampton (Central line). *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 172, p. 4 (1902).

5894. ——. *Assoc.with* Bornite and Malachite. *Loc.* Freedom of Contract No. 2 Mine, between Retreat and Ruby Creeks, 6½ miles N.E. of Withersfield Rail. Stn. (Central line). *Co.* Clermont (*ante*). *Assay: See* No. 6335. *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

5895. ——. *Assoc.with* Magnetite, in quartz and lydianstone. *Loc.* Oswald Mine, between Ruby and Retreat Creeks, 8 miles N.N.W. of Anakie Rail. Stn. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 127, p. 3 (1898).

5895A.——. *Assoc.with* Malachite, Azurite, and Jasper, in gossan in granite and slate. *Loc* Eastern Sel. M.F. (2755), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 288, p 23 (1910).

5895B.——. *Assoc.with* Iron Pyrites, Hematite, Redruthite, Malachite, and Azurite, in granite. *Loc.* Monarch P.P.A. (116, etc.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

5895C.——. *Assoc.with* Iron Pyrites, Pyrrhotite, Hematite, Magnetite, Copper Pyrites, Malachite, and Azurite, in granite and slate. *Loc.* Rodger's Back Sel. M.F. (1430), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

5896. ——. *Assoc.with* Calcite. *Loc.* Main Range, 25 miles N.E. of Yeulba Rail. Stn. (Roma line). *Dist.* **Maranoa.** *Ref.* P.R.S.Q., vol. 4, p. 61 (1887).

5897. ——. In red and yellow clays. *Loc.* Blackbutt Range, nr. Taromeo, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 159, p. 24 (1901).

5898. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Massicot, Anglesite, Galena, and Mispickel, in gossan and slate. *Loc.* Silver Knob P.A., Emu Cr., Mt. Langan, 14½ miles W.N.W. of Kannungar Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Assay: See* No. 3033. *Ref.* Q.G.M.J., vol. 7, p. 467 (1906).

5899. ——. As pseudomorph, after Iron Pyrites. *Loc.* Mt. Wilson, nr. Boonah, 59 miles (by rail) S.S.W. of Brisbane. *Co.* Churchill; *Dist.* Moreton.

5900. ——. Por. 292, Brassall, Pine Mt., 7 miles (by rail) N.N.W. of Ipswich. *Co.* Churchill (*ante*). *Ref.* L.C.B.

5900A.——. Outcrop 50 feet high, 100 feet below the top of mountain, and resting on granite. *Loc.* Agric. Sel. 6178, 14 miles from Grantham Rail. Stn., *Par.* Whitestone; *Co.* Churchill; *Dist.* Moreton. *Composition:* Large quantities said to contain 60 per cent. of peroxide of iron.

5901. ——. Quarter mile east of Spresses, Karrabin Rd., nr. Pine Mt. (*ante*). *Ref.* L.C.B.

5902. ——. Upper Kholo Bridge, Brisbane R., 3 miles N. of Ipswich. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 194, p. 56 (1904).

5903. ——. *Assoc.with* Cacoxenite. *Loc.* On hill on Watt's Sel. 55, nr. Buckley's Shaft, 8 miles S. of Beenleigh, 28 miles (by rail and road) S.E. of Brisbane (South Coast line). *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

5904. ——. *Assoc.with* Gold, in quartz. *Loc.* Jamieson's Sel. (36), Wonga Wallen Cr., Coomera R., 38 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

5905. ——. Degalgil Cr., 40 miles S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 194, p. 27 (1904).

5906. ——. *Assoc.with* Gold, Silver, Galena, Anglesite, Minium, Cerussite, Massicot, and Hematite. *Loc.* Bompa Silver-Lead Mines, Glassford Cr., 2 miles W. of S. of Littlemore Rail. Stn. (Boyne Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 159, pp. 7, 8 (1901).

5907. Limonite. *Assoc.with* Copper Pyrites, Native Copper, Cuprite, Tile Ore, Malachite, Azurite, Iron Pyrites, Magnetite, Hematite, and Calcite. *Loc.* Many Peaks Copper Mine, Deception Cr., about 58 miles (by rail) S. of Gladstone (Boyne Valley line). *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), and 194, p. 28 (1904).

5908. ——, *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Paddock Reef, Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 208, p. 34 (1907).

5908A.——. *Assoc.with* Bornite, Malachite, and Azurite, in quartz lode. *Loc.* 4 miles from Mt. Bennett, about 30 miles W.S.W. of Gladstone, Langmorn Goldfield. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* A.R., p. 218 (1910).

5909. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* New Silkworth Mine, Ulam Goldfield, 36½ miles W.N.W. of Gladstone. *Co.* Deas Thompson (*ante*). *Ref.* G.S.Q. Pub. 99, p. 11 (1894).

5910. ——. *Assoc.with* Green Chrome Silicate, and Gold, in quartz. *Loc.* Federated Amalgamated Mine, Oaks View, 4 miles N. of Oaks Stn., 45 miles (by road) N.N.W. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 205, p. 18 (1906).

5911.——. *Loc.* Mt. Hay, 1½ miles S. of Wycarbah Rail. Stn. (Central line), about 25½ miles (by rail and road) S.W.byS. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis.

5912. ——. As pseudomorph, after Iron Pyrites, in clay slate. *Loc.* Honest Bob's Mine, New Zealand Gully, 15 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* B.D.

5912A.——. *Assoc.with* Gold. *Loc.* Dawn of Hope Mine, Ridgelands Goldfield, 20 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.M.

5913. ——. *Loc.* Stewart's Cr., 1 to 3 miles W.N.W. of Stanwell, 16 to 20 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

5914. ——. *Assoc.with* Gold and Manganese-dioxide, in quartz lode. *Loc.* Taranganba Gold Mine, 1 mile S. of Yeppoon, 10 miles S. of Emu Park Rail. Stn., 42 miles (by rail and road) N.E.byN. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 50, p. 5 (1889).

5915. ——. E. of Green Hill, 40 miles S. of Mackay. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 39, p. 10 (1887).

5916. ——. Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 31 (1904).

5917. ——. *Assoc.with* Magnetite and Hematite. *Loc.* Iron Gully, br. of Boulder Cr., 6 miles W.S.W. of Mt. Morgan Rail. Stn. *Co.* Raglan; *Dist.* Port Curtis. *Analysis:* Iron = 62·65 per cent. *Ref.* G.S.Q. Pub. 194, p. 16 (1904).

5918. ——. *Assoc.with* Gold, in quartz reef, in granite. *Loc.* E. of Glen Dee, Dee R., 5 miles E. of Mt. Morgan Rail. Stn., 29 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 161, p. 15 (1901).

5919. ——. As pseudomorph, after Iron Pyrites, in diorite. *Loc.* Railway Cutting, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 195 (1904).

5919A.——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Iron Pyrites, Hematite, and Magnetite, in gossan lode. *Loc.* M.L. (262), Kroombit Copper Mine, 4¼ miles E.S.E. of Kroombit Hd. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

5920. ——. *Assoc.with* Gold and Hematite, in lode. *Loc.* Mt. Alexander Mines, 8 miles E.S.E. of Mt. Morgan Rail. Stn., 32 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 17 (1898).

5921. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Magnetite, Hematite, Göthite, Pyrolusite, and Satin Spar, in vesicular quartz, quartzite, and kaolin. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), 132 (1898).

5922. ——. *Assoc.with* Gold, Iron Pyrites, and Calcite, in quartzite lode. *Loc.* Hidden Treasure Mine, S. of Mundic Cr., 1 mile W S.W. of Mt. Morgan Rail. Stn., 25 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 161, pp. 9-12 (1901).

5923. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, and Hematite, in lodes in syenitic granite. *Loc.* Calgoa Copper Mines, Thunder Cr., Calgoa Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

5924. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Redruthite, Malachite, Bismuthinite, and Magnetite. *Loc.* Kabonga Mine, Kilkivan Mineral Field, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

5925. ——. As pseudomorph, after Iron Pyrites. *Loc.* Kilkivan Gold and Mineral Field (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 61 (1887).

5926. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Zinc Blende, and Copper carbonate, in quartz and calcite. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (Gympie-Maryborough line). *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

5927. ——. Pannietta Is., 360 miles E byS. of Port Moresby, **Brit. New Guinea.** *Ref.* A.R. B.N.G., p. 125 (1891).

5928. ——. As pseudomorphs after Iron Pyrites. *Loc.* Port Moresby, 380 miles N.byE. of Cooktown, Brit. New Guinea. *Ref.* O.R.

5929. ——. As pseudomorphs after Marcasite. *Loc.* Port Moresby (*ante*). *Ref.* G.S.M.

5930. ——. Damora, Rossel Is., 480 miles E.S.E. of Port Moresby, Brit. New Guinea. *Ref.* A.R. B.N.G., 124, p. 91.

5931. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Psilomelane, in quartz. *Loc.* Caledonia Claim, Sudest Is., 448 miles E.S.E. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 85, p. 29 (1892).

5932. ——. *Assoc.with* Gold, in quartz. *Loc.* Sudest (Tagula) Is. (*ante*). *Ref.* G.S.Q. Pub. 85, p. 31 (1892).

5933. ——. **Yellow Ochre** (*Var.*) *Assoc.with* Hematite, in large quartz lodes. *Loc.* Gully, nr. Police Cr., trib. of Gregory R., 90 miles S.S.W. of Burketown. *Co.* Gregory; *Dist.* Burke. *Ref.* G.S.Q. Pub. 10, p. 10 (1885).

5934. —— ——. *Assoc.with* Red Ochre and Cassiterite. *Loc.* Try Again and Chance Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

5935. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Copper carbonate, in quartz. *Loc.* Seymour's Reef, Marengo Goldfield, 30 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

5936. —— ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Tetrahedrite, Mispickel, Siderite, and Ironstone, in quartz. *Loc.* Grace Darling Lease (11), Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), 88, p. 3 (1893).

Linarite. *Syn.* Cupreous Anglesite. *Compo.*, Sulphate of lead and copper. *Colour*, azure-blue. *H.* = 2·5. *Sp.gr.* = 5·3-5·4.

5937. ——. *Assoc.with* Galena, Cerussite, and Massicot, in lode. *Loc.* Caledonia Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

5938. ——. *Assoc.with* Galena, Chalcanthite, Massicot, Minium, and Anglesite, in slate. *Loc.* John Bull Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

5939. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* (and *Assays*) G.S.Q. Pub. 82, p. 3 (1892).

5940. ——. *Assoc.with* Galena, Anglesite, Minium, Cerussite, and Pyromorphite, in lode. *Loc.* Alpha Silver-Lead Mine, Star R. (Argentine) Silver Field, 30 miles (by coach) N.W. of Ravenswood Junction (Gt. Northern line). *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

Listowell Downs Opal Mines. Head of Blackwater Cr., trib. of Bulloo R., N.E. of Adavale. Centre about *Lat.* 25° 11′ S.; *Long.* 145° 13′ E. Precious opal discovered here in 1872.

MINERAL REFERENCES: Barytes, *see* 281; Opal, 6961A.

GEOLOGICAL NOTE: The rocks comprise "Desert Sandstone" (Upper Cretaceous) and "Rolling Downs" (Lower Cretaceous). The opal deposits to the south are in sandstone belonging to the first series.

Listowel Lease Bore. *See under* Artesian Bores. No. 315.

Lithia Mica. *Syn.* Lepidolite, *which see.*

Lithium. *Atom.wt.* = 6·94. *Sp.gr.* = 0·59. *Colour,* silver-white. Very light, floats on water.

USES: In its metallic form it has no commercial uses, but its compounds are used in medicine. Many mineral waters contain lithium, and its presence in spring water in Queensland has been recorded, although not officially recognised. *See* Lepidolite, *also* Water Analyses Table, No. 493.

5941 —— carbonate, Spa Water Spring, Helidon. *See under* Water Analyses Table. No. 493.

Lithographic Stone. None of the many limestone deposits known on the eastern portion of the State contain stone which could be adapted for lithographic purposes. Palæozoic limestones are either too irregular in structure, too coarse in texture, or too impure in composition to be of any use whatever. Mesozoic coal measures sometimes contain beds of a fine calcareous mudstone, but which, however, is too siliceous. The Cretaceous Beds of Western Queensland offer some prospects, as the strata in this series of rocks are regularly bedded and frequently contain limestones. Some of the numerous wells which have been sunk for artesian water have passed through limestones, but the operations of boring with percussion drills grind the material to sand and mud, and no opinion can be expressed on the character of the beds or the suitability of the stone for lithographic purposes. The Tertiary deposits of limestone to the north-east of the State might also be examined for lithographic stone, as they are of comparatively recent formation and are probably very much more free from alteration and crystallisation than the older limestones, and therefore may be expected to be more finely granular and compact.

Lithomarge. *Var.* Kaolin, *which see.*

Lithophyses, as chalcedonic pseudomorphs. *See* Chalcedony. *Note.*—At Tambourine Mt., South-eastern Queensland, they occur about 9 inches in diameter

Littabella Creek, 20 miles N.W. of Bundaberg. *Min.Ref.* Coal, *see* 1791A.

Little River Coalfield—

SITUATION: *See maps,* Pls. 8, 9. The Field is about 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line), and about 75 miles W.byS. of Cooktown. *Co.* Mossman; *Dist.* Cook. Centre about *Lat.* 15° 40′ S.; *Long.* 144° 10′ E.

DISCOVERY: Coal-bearing beds were observed here by Mr. Norman Taylor in 1872.

MINERAL REFERENCE: Coal, *see* 1613-1617.

GEOLOGICAL NOTE: The oldest rocks in the district are slates and greywackes, altered by intrusions of porphyries, felsites, etc., and containing gold-bearing quartz reefs. The coal measures of Upper Bower Formation (Permo-Carboniferous) rest unconformably on the slates, etc., and contain coal seams of good quality.

Longreach (on Central line)—

Situation: *See maps*, Pls. 18, 19. 428 miles (by rail) W. of Rockhampton. *Co.* Portland; *Dist.* Mitchell. *Lat.*, 23° 26′ S.; *Long.*, 144° 15′ E.

Railway Base for Jundah Opal Mines in the Opalton Mineral Field.

Population: 3,000 (*Pugh's Almanac*, 1913).

Geological Note: Longreach is situated in the Great Western Queensland Artesian Basin. The rocks are sandstones, etc., belonging to the Rolling Downs Formation (Lower Cretaceous), in which there are several artesian water beds. A coal seam 3 feet thick is said to have been found in Spencer's (Rosedale) Bore, 8 miles from the town. *See* G.S.Q. Pubs. Nos. 101, 121 for details.

Warden: Stationed at Longreach. Inspector of Mines: Stationed at Rockhampton.

General Information: Consult *Pugh's Almanac; Queensland Post Office Directory; Post and Telegraph Guide; Longreach News.* Official Monthly News, Consult *Queensland Government Mining Journal* (Brisbane).

Mackay—

Situation: *See maps,* Pls. 14, 15. The township is situated on the Pioneer River, 190 miles N.W.byN. of Rockhampton, 658 miles N.N.W. of Brisbane. *Co.* Carlisle; *Dist.* Kennedy South. *Lat.,* 21° 10′ S.; *Long.,* 149° 15′ E.

Port for Eungella, Nebo, and Mt. Spencer Gold and Mineral Fields (Pine Vale Copper and Silver Lodes); Waterhole Creek Gold Workings; Mt. Flora and Mt. Orange Copper Mines; Mt. Barker Silver Mines; and Cattle Creek Copper Workings.

Harbourage: Flat-top Island, about 2½ miles from Mackay off the Coast, affords an anchorage for vessels of large size. The Pioneer River is navigable for vessels of small draught, but in places is dry at low water. The rise and fall of the tides vary from 10 to 12 ft.

Population: 14,893 (Census 1911).

Mackay—*continued:*

RAINFALL: *See under* separate heading.

MINERAL STATISTICS:

Silver,	*see tables,*	Pls. 37, 46, 46A.
Copper,	,,	Pls. 39, 46, 46A.
Lead,	,,	Pls. 38, 46, 46A.

MINERAL REFRENCES: Coal, *see* 1643-1649; Gold, 4119; Limonite, 5887; Oil Shale, 6913A.

GEOLOGICAL NOTE: The rocks of the district consist of recent superficial deposits formed from detritus brought down the Pioneer River. To the north and west the rocks are coal-bearing, probably the equivalent of Permo-Carboniferous Coal Measures of the Dawson-Mackenzie Rivers (Upper and Lower Bowen), but they are much disturbed and altered by volcanic intrusions.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 39, 53, 164, 181, 228, 229. *See under* Geol. Surv. Pub. List for titles.

WARDEN: Stationed at Mackay; INSPECTOR OF MINES: Stationed at Rockhampton.

CHAMBER OF COMMERCE: Sec. F. Clark.

Mackenzie River. Branch of Fitzroy R., Central Queensland. *See* Pls. 10, 33. *Min.Ref.* Hyalite, *see* 7017; Opal (common), 6985; Coal, 1696; Copper, 1854.

GEOLOGICAL NOTE: The principal rocks of the Mackenzie River are shales, sandstones, tuffs, limestones, and conglomerates. They are divided into—(1) An Upper Freshwater-Marine Series (Clermont); (2) A Freshwater-Marine Series (Upper Bowen); and (3) A Freshwater-Marine-Volcanic Series (Lower Bowen); all belonging to the Permo-Carboniferous System. The area of coal measures here is very great, and one of the coal seams is 20 ft. thick. *See* G.S.Q.P. No. 155 (1901) for details. *See also* List of Maps *under* Department of Mines Publications.

Magnesium. *Atom.Wt.*, 24·32; *Sp.gr.*, 1·75. *Colour*, silver-white.

MINERALS :—

Aluminate. *See* Spinel.

Carbonates. *See* Dolomite, Magnesite.

Sulphate. *See* Epsomite.

Silicates. *See* Augite, Actinolite, Asbestos, Bronzite, Biotite, Chlorite, Clinochlore, Chrysolite, Chrysotile, Diallage, Hornblende, Hypersthene, Muscovite, Noumeaite, Olivine, Penninite, Pyrope, Serpentine, Talc, Tourmaline, Vermiculite, Viridite.

MINERAL NOTE: Serpentine country exists some miles to the south-west of Gympie, to the north of Rockhampton, in the Kilkivan District, and in many other places in the State. Magnesite is found as irregular patches and veins in the serpentine, and also with Dolomite in decomposed basaltic rocks. Epsomite is found commonly as an efflorescence on shales and in old mine workings.

USES: The metal is used in refining steel, in making a remarkably light and strong alloy with zinc, and in producing an intense white light for photographic and other purposes. When mixed with other ingredients, it produces a brilliant fire in pyrotechnical displays. The compounds, natural and artificial, are variously used as firebricks, furnace linings, boiler coverings, etc., and in the manufacture of dyes, soaps, paper, medicine, and paints. The principal source is Magnesite, the carbonate, but other minerals, particularly the sulphate and chloride, are also utilised.

Magnesium silicates. *See under* Silicates.

Magnet M.L. (450), Cloncurry. *Min.Ref.* Azurite, *see* 151; Copper Pyrites, 2061; Limonite, 5743; Malachite, 6072; Tile Ore, 2493.

Magnetic Iron Ore. *See* Magnetite.

Magnetic Island. *See maps*, Pls. 16, 17. Cleveland Bay, N. of Townsville. *Lat.*, 19° 10′ S.; *Long.*, 146° 50′ E. *Min.Ref.* Calcite, *see* 502; Gold (alluvial), 3260, (reef) 3997-4001; Iron Pyrites, 5230, 5231; Magnetite, 6011; Orthoclase, 7048; Rock Crystal, 7192.

GEOLOGICAL NOTE: The island is made up of alluvial deposits, altered volcanic rocks (Permo-Carboniferous), together with granite and felsite. The granite forms the great mass of the island, while the volcanic rocks and felsite occupy small areas on the western side. The alluvial deposits occur mostly on the south-western side, nearest to the mainland, but there is also an area on the north side. Reefs occur in the granite, and a number have been found to be gold-bearing. *See* G.S.Q. Pub. No. 75

Magnetic Pyrites. *See* Pyrrhotite.

Magnetite. *Syn.* Magnetic Iron Ore. *Compo.*, Sesquioxide and protoxide of Iron *Colour* and *Streak*, Iron-black. Magnetic, sometimes polar. *H.* = 5·5-6·5; *Sp.gr.* = 4·9-5·2. *Contents* (*max.*), Iron 72 per cent.

MINERAL NOTE: A very large supply of this mineral occurs at Kangaroo Hills, 60 miles inland from Townsville, and large quantities are to be seen outcropping at Glassford Cr., Biggenden, Mt. Lucy, and near Mt. Morgan. Small quantities are known to occur in several localities close to the coast in the Northern, Central, and Southern Districts, and it is found as a constituent of some beach deposits associated with gold, etc. *See* G.S.Q. Pub. No. 190 for details and tabulated information, also Nos 194 and 196.

5976. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Mispickel, Bismuth (native), Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote. *Loc.* Biggenden Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 60, 1890), 173 (1902), and 194 (1904).

5977. ——. *Assoc.with* Copper carbonate and Calcite, in gossan. *Loc.* W. of Granite Ridge, nr. Mt. Biggenden (*ante*). *Ref.* G.S.Q. Pub. 60, p. 3 (1890).

5978. ——. *Assoc.with* Garnet and Bismuth Ores (octohedrons and dodecahedrons). *Loc.* Mt. Hastings Mine, 2 miles S.E. of Biggenden and 5 miles S.byW. of Degilbo Rail. Stns. (Gayndah Br. line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 173, p. 4 (1902), and G.S.M.

5979. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Copper Pyrites, Native Bismuth, Bismuthinite, and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, ¼-mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), and 207, pp. 13, 14 (1907).

5980. ——. *Assoc.with* Tetradymite and Bismuthinite. *Loc.* Don Jon Bismuth Mine (*ante*). *Ref.* A.R., p. 44 (1906).

5981. ——. *Assoc.with* Turgite, in lode. *Loc.* Seabrook's, Oakey Cr., Degilbo, 58 miles (by rail) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* L.C.B.

5982. ——. *Assoc.with* Ilmenite and Zircon, in alluvial deposits. *Loc.* Creeks head of Boyne and Stuart Rivers, 24 miles S.W. of Kingaroy Rail. Stn. (Kilkivan line). *Co.* Fitzroy; *Dist.* Burnett. *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

5983. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in diorite. *Loc.* M.L. (25), Gympie Copper Mines, Gooroomgam Cr., 23 miles N.N.E. of Nanango, 30 miles S. of Kilkivan. *Co.* Fitzroy (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 169, pp. 7, 9 (1901).

5984. ——. *Assoc.with* Copper Pyrites and Iron Pyrites. *Loc.* Nr. Cannindah Stn., 40 miles S.W. of Miriam Vale Rail. Stn., 83 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. *Ref.* A.R., p. 99 (1907).

5985. ——. *Assoc.with* Copper carbonate and Cerussite, in schist. *Loc.* Lynd Copper Mine, Einasleigh R., 40 miles E.S.E. of Georgetown, 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Chillagoe line). *Co.* Gilbert; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 134, p. 21 (1898).

5986. ——. In lode. Einasleigh R., 10 miles from Einasleigh Rail. Stn., 112 miles (by rail and road) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert (*ante*). *Ref.* O.R.

5986A. Magnetite. *Assoc.with* Copper Pyrites, in quartzite. *Loc.* Teesdale, about 10 miles (by rail) S.W. of Einasleigh (Etheridge line). *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 234, pp. 26, 27 (1911).

5987. ——. *Assoc.with* Cuprite, Tile Ore, Tenorite, Malachite, Azurite, Chrysocolla, and Hematite, in garnet rock. *Loc.* Boomerang Copper Mine, Marble Cr., 1 mile W. of Calcifer (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), and 119, p. 36 (1897).

5988. ——. Nr. Boomerang Mine, Marble Cr. (*ante*). *Dist.* G.S.M.

5989. —— (crystals). Harper's Mine, ½-mile E. of Calcifer (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

5990. —— (massive). *Assoc.with* Garnet. *Loc.* Ti-tree Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

5991. ——. *Assoc.with* Garnet. *Loc.* 8 miles from Koorboora Rail. Stn., 116 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* O.R.

5992. ——. Mt. Cardwell Mine, 5 miles S. of Ord Rail. Stn. (Mt. Garnet line), 117 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

5993. ——. *Assoc.with* Hematite, Limestone, Chert, Garnet, Wollastonite, and Epidote *Loc.* Mt. Lucy, 4 miles W. of Almaden Rail. Stn. (Chillagoe line), 125 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 134, p. 16 (1898), and 196, pp. 6-8 (1905).

5994. ——. Nr. Cathedral Range, 4 miles E.S.E. of Zillmanton Rail. Stn. (Chillagoe line), 143 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*).

5995. ——. As sand. Johnstone R., nr. Geraldton, 130 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 196, p. 12 (1906).

5996. ——. *Assoc.with* Gold, Limonite, Bismutite, Manganese-dioxide, Ruby and Garnet, in alluvial deposits. *Loc.* Agate Cr., br. of Robertson R., 68 miles S. of Georgetown, 21 miles S.S.W. of Charleston, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

5997. ——. Gilberton, 24 miles S.byE. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

5998. ——. Gowrie Little Plain, 10 miles N.W.byN. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* O.R.

5999. ——. Por. 1847, Rolleston, Pittsworth, 36 miles (by rail) S.W.byS. of Toowoomba. *Co.* Aubigny (*ante*). *Ref.* G.S.Q. Pub. 194, p. 62 (1904).

6000. —— (massive). Nundubbermere, 13 miles S.W. of Stanthorpe Rail. Stn. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.M.

6001. ——. *Assoc.with* Hematite. *Loc.* Pike's Cr., nr. Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

6002. ——. In quartz. Thulimbah, 30 miles (by rail) S. of Warwick. *Co.* Bentinck (*ante*). *Ref.* O.R.

6003. ——. Glenlyon, 30 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* O.R.

6004. ——. As octohedral crystals in chlorite schist. *Loc.* Hinchinbrook Is., Halifax Bay, 9 miles W.byN. of Lucinda Point. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

6005. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Hematite, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Mispickel, Zinc Blende, Minium, and Cerussite, in quartz lodes, in quartzite and porphyry. *Loc.* Mines at Mt. Garnet, Return Cr., Wild R., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

6006. ——. *Assoc.with* Garnet. *Loc.* E. of Mt. Garnet, E. of Herbert R., and 11 miles S. of Coolgarra Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6007. ——. Newellton (Silver Valley), 10 miles S.W. of Herberton, 10 miles S.E. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

6008. ——. *Assoc.with* Felspar Crystals and Augite, in basalt. *Loc.* Gt. Basalt Wall, N. of Lolworth Cr., about 45 miles W. of Charters Towers. *Co.* Dalrymple; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 11 (1891).

6009. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Limonite, Chalcanthite, Manganese-dioxide, and Talc, in quartz. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pubs. 18, p. 2 (1885), and 73, p. 13 (1891).

6010. ——. *Assoc.with* Iron Pyrites, Malachite, Ironstone, Graphite, Garnet, and Calcite. *Loc.* Double-Barrel Cr. (Manton), 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, pp. 720, 729 (1891).

6011. ——. *Assoc.with* Felspar and Quartz. *Loc.* Magnetic Is., Cleveland Bay, 5½ miles N. of Townsville. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 75, p. 4 (1892).

6012. ——. In basalt. Mt. Black, 9 miles W. of Upper Cape Diggings, 26 miles W.byN. of Cape River Rail. Stn. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 9 (1891).

6013. ——. *Assoc.with* Augite Crystals. *Loc.* Mt. Razorback, Upper Burdekin, about 45 miles W. of Cardwell. *Co.* Gunnawarra; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 71, p. 6 (1891).

6014. ——. In black sand. On beach, 3 miles from Bowen, 763 miles N.W.byN. of Brisbane. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., p. 165 (1908).

6015. ——. Beattie's Mine, Kangaroo Hills Mineral Field, 40 miles S.W.by S. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

6016. —— (massive). Black Star Lease (116), Kangaroo Hills Mineral Field (*ante*). *Ref.* B.D.

6017. ——. *Assoc.with* Minium and Manganese-dioxide, in lode. *Loc.* Black Star S. Lease (199), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6018. —— (massive). Hidden Treasure Lease (165), Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 1241. *Ref.* G.S.M.

6019. —— (massive, copper-stained). *Loc.* Lillie's Shaft, Eastern Lode, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

6020. ——. In lode. Mt. Regner Lease (242), Mt. Regner, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

6021. ——. *Assoc.with* Cassiterite and Topaz, in alluvial deposits. *Loc.* Sandy and Prospector's Creeks, tribs. of Oaky Cr., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

6022. —— (massive). At the Gorge, Portal Cr., br. of Douglas R., Upper Burdekin R., about 28 miles S.W. of Cardwell. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

6023. ——. As black sand. Black Waterhole Cr., 2 miles N.byE. of Hazledean, 24 miles S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

6024. ——. In sand. Mt. Gregor, 2½ miles S.E. of Mt. Toby, 2½ miles N.N.E. of Mirani Rail. Stn., Mackay line. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* L.B. 1, p. 94 (1878).

6025. ——. *Assoc.with* Ilmenite and Quartz. *Loc.* In watercourses, Neilson's Cr., nr. Mt. Jukes, 18 miles W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 53, p. 9 (1889).

6026. ——. *Assoc.with* Ilmenite, Cassiterite, and Zircon. *Loc.* Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* O.R.

6026A. ——. In diallage rock. Freedom of Contract No. 3 Mine, between Mt. Pleasant and Ruby Creeks, 6½ miles N.E.byN. of Withersford Rail. Stn., and 8 miles W. of Anakie Rail. (Central line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

6027. ——. Peak Vale, 18 miles S.S.W. of Clermont. *Co.* Clermont (*ante*). *Ref.* B.D.

6028. ——. *Assoc.with* Gold and Limonite, in quartz and lydianstone. *Loc.* Oswald Mine, between Retreat and Ruby Creeks, 8 miles N.N.W. of Anakie Rail. Stn. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 127, p. 3 (1898).

6029. ——. *Assoc.with* Gold, Sapphire, Spinal, Tourmaline, Hornblende, Garnet, Zircon, Amethyst, Cairngorm, Chalcedony, Jasper, Topaz, Diamond, Rutile, Ilmenite, and Magnesite, in alluvial deposits. *Loc.* Retreat, Sheep Station, Policeman, Tomahawk, and Central Creeks, Anakie Sapphire Fields, 193 miles (by rail) W. of Rockhampton. *Cos.* Clermont and Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), and 172 (1902).

6029A. Magnetite. *Assoc.with* Iron Pyrites, Pyrrhotite, Hematite, Limonite, Copper Pyrites, Malachite, and Azurite, in granite and slate. *Loc.* Rodger's Back Sel. (1430), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

6030. ——. *Assoc.with* Gold, Garnet, Zircon, and Tourmaline, in alluvial deposits below basalt. *Loc.* Basalt Hill Diggings, 3 miles N. of Borilla Rail. Stn. (Central line), 10 miles (by rail and road) W. of Anakie. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 172, p. 7 (1902).

6031. ——. *Assoc.with* Pleonaste. *Loc.* Moogerah, Main Range, Fassifern, 6 miles W.N.W. of Dugandan Rail. Stn. (Fassifern Br. line). *Co.* Churchill; *Dist.* **Moreton.**

6032. ——. As black sand. Humpybong, Moreton Bay, 9 miles N.E. of North Pine Rail. Stn., 26 miles (by rail and road) N. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.M.

6033. ——. *Assoc.with* Gold, in black sand. *Loc.* Currumbin Cr., 1 mile N. of Point Danger, 70 miles (by rail and road) S.byE. of Brisbane (South Coast line). *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

6034. ——. *Assoc.with* Gold, in black sand. *Loc.* mouth of Nerang Cr., Tweed Heads, 49 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

6035. ——. *Assoc.with* Copper (native), Copper Pyrites, Cuprite, Tile Ore, Malachite, Azurite, Iron Pyrites, Hematite, Limonite and Calcite. *Loc.* Many Peaks Copper Mines, Deception Cr., about 54 miles (by rail) S. of Gladstone, Boyne Valley Br. line. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 150, p. 8 (1900).

6036. ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Malachite, Azurite, Galena, Zinc Blende, Hematite, Garnet, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., about 8 miles S.W.byW. of Many Peaks Rail. Stn. (Boyne-Valley line), about 62 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, p. 5 (1900), and 194, p. 28 (1904).

6037. ——. As nodules, in garnet rock containing Copper Pyrites, Actinolite, and Epidote. *Loc.* Shaft above Blue Bag, Glassford Creek Copper Mine, Glassford Cr. (*ante*). *Ref.* G.S.Q. Pub. 150, p. 6 (1899), and 194, p. 30 (1904).

6038. ——. Mt. Alma Stn., Calliope R., 30 miles S.W.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* L.C.B.

6039. ——. Mt. Grim, 3½ miles W.S.W. of Mt. Alma Stn., 31 miles S.W.byW. of Gladstone (*ante*). *Ref.* G.S.Q. Pub. 194, p. 24 (1904).

6040. ——. *Assoc.with* Hematite. *Loc.* Por. 10v, Pemberton, 3½ miles S. of Marblestone Crossing, 24 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Analysis:* Iron = 67·4 per cent. *Ref.* G.S.Q. Pub. 194, p. 26 (1904).

6041. ——. *Assoc.with* Hematite, in limestone. *Loc.* Por. 22v, Pemberton, Boyne R., 2 miles E.N.E. of Marblestone Crossing, 19 miles S. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Iron = 64·9 per cent. *Ref.* G.S.Q. Pub. 194, pp. 25, 26 (1904).

6042. ——. *Assoc.with* Hematite, Epidote, and Garnet, in slate. *Loc.* ½-mile S.S.E. of Targinie Head Stn., 9 miles W. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Iron = 64·9 per cent. *Ref.* G.S.Q. Pub. 194, p. 23 (1904).

6043. ——. In beach sand. *Loc.* Nr. Flora Point, Rodd Peninsula, 25 miles E.S.E. of Gladstone. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 130, p. 2 (1898).

6044. ——. In basalt. Lion Mt., 6 miles N.N.W. of Stanwell, 22 miles (by rail and road) W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis.

6045. ——. *Assoc.with* Garnet Rock. *Loc.* Olsen's Caves (Por. 22v, Fitzroy), nr. Mt. Etna, 15 miles N.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 194, p. 14 (1904).

6046. ——. *Assoc.with* Hematite. *Loc.* Por. 95v, Par. of Fitzroy, vicinity of Olsen's Caves, nr. Mt. Etna (*ante*). *Analyses:* Iron = 67 and 73 per cent. *Ref.* G.S.Q. Pub. 194, p. 13 (1904), and G.S.M.

6046A. ——. Between Caves Hotel and Olsen's Caves, nr. Mt. Etna (*ante*). *Ref.* G.S.Q. Pub. 86, p. 2 (1892).

6047. ——. In garnetiferous limestone. *Loc.* Por. 973, Par. of Gracemere, about 1 mile N.W. of Kabra Rail. Stn. (Central line), 12 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Analysis:* Iron = 66 per cent. etc. *Ref.* G.S.Q. Pub. 194, p. 14 (1904).

6048. ——. *Assoc.with* Hematite. *Loc.* Iron Island, Duke Group, 40 miles N.E. of St. Lawrence, nr. Broadsound. *Co.* Palmerston; *Dist.* Port Curtis. *Analyses* of Sample and Specimens: Water = 0·13, 0·46 per cent., Silica = 2·51, 1·73 per cent., Alumina = 2·95, 2·71 per cent., Iron = 64·72, 63·94 per cent., Lime = 2·85, 5·53 per cent., Magnesia = 1·07, trace per cent., Phosphorus = 0·065, trace per cent., Titania = nil *Ref.* G.S.Q. Pub. 194, pp. 9, 10 (1904).

6049. —— (massive). *Loc.* Marble Island, Duke Group, 45 miles N.E.byE. of St. Lawrence, near Broadsound (*ante*). *Ref.* G.S.M.

6050. ——. In beach sand. Percy Island (No. 2), Northumberland Group, 60 miles N E of St. Lawrence, near Broadsound (*ante*). *Ref.* G.S.M

6051. ——. *Assoc.with* Hematite and Copper Pyrites, in quartz and limestone. *Loc.* Iron Knob, Stanage Point, 37½ miles E.N.E. of St. Lawrence, nr. Broadsound (*ante*). *Analysis:* Iron = 60 per cent ; Phosphorus = nil. *Ref.* G.S.Q. Pub. 194, p. 12 (1904).

6052. ——. *Assoc.with* Malachite and Azurite. *Loc.* Kroombit Cr., 5 miles above Kroombit Head Stn., 55 miles S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

6053. ——. *Assoc.with* Copper carbonate, in lodes, in serpentinous rock. *Loc.* King's Copper Sel., Rainbow Cr., nr. Callide Cr., 5 miles S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 80, p. 1 (1891).

6054. ——. *Assoc.with* Copper Pyrites, Copper carbonate, Iron Pyrites, Hematite, and Manganese-dioxide. *Loc.* Callide or 5-Mile Copper Mines, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 194, p. 27 (1904).

6054A.——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Iron Pyrites, Hematite, and Limonite, in gossan lode. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Head Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

6055. ——. As large outcrop, and as small lodes. *Loc.* Head of Alma Cr., Don R., 15 miles S.S.E. of Mt. Morgan Rail. Stn., 39 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* B.D.

6056. ——. In slate. *Loc.* Constitution Hill, E. side of Dee R., 3 miles N.E. of Mt. Morgan, 27 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Analysis:* North End, Iron = 55·80 per cent.; Phosphorous = trace. South End, Iron = 62·40 per cent.; Phosphorous = 0·08 per cent. *Ref.* G.S.Q. Pub. 194, p. 15 (1904).

6057. ——. *Assoc.with* Limonite and Hematite. *Loc.* Iron Gully, br. of Boulder Cr., 6 miles W.S.W. of Mt. Morgan Rail. Stn., 30 miles S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Analysis:* Iron = 62·65 per cent.; Phosphorus = 0·167. *Ref.* G.S.Q. Pub. 194, p. 16 (1904).

6058. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Hematite, Limonite, Göthite, Pyrolusite, and Satin Spar, in vesicular quartz, quartzite, kaolin, and ironstone. *Loc.* Mt. Morgan Mine, Mt. Morgan (Crocodile Cr.) Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), 132 (1898).

6059. ——. *Assoc.with* Actinolite. *Loc.* Mt. Nelson, nr. Mt. Morgan (*ante*).

6060. ——. *Assoc.with* Copper Pyrites. *Loc.* Mohawk Co.'s Mine, Mt. Morgan (*ante*). *Ref.* O.R.

6061. ——. Bingera, 3 miles S.S.E. of Birthamba Rail. Stn. (Mt. Perry line), 15 miles (by rail and road) S.W. of Bundaberg. *Co.* Cook; *Dist.* **Wide Bay.**

6062. ——. *Assoc.with* Gold, Copper carbonate, and Hematite, in quartz. *Loc.* Rose, Shamrock, and Thistle Mine, Black Snake, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

6063. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Redruthite, Malachite, Bismuthinite, and Limonite. *Loc.* Kabonga Mine, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). ***Ref.*** **G.S.Q. Pub. 125,** p. 36 (1897).

6064. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* Gleeson Is., 100 miles up Avo, Purari R., 228 miles N.W. of Port Moresby, **Brit. New Guinea.** *Ref.* A.R., B.N.G., p. 95 (1894).

6065. ——. *Assoc.with* Olivine (?) and Felspar, in alluvial deposits. *Loc.* Mekeo (St. Joseph), 64 miles N.N.W. of Port Moresby (*ante*).

6066. ——. *Assoc.with* Olivine and Felspar, in alluvial deposits. *Loc.* No. 4 River, vicinity of Mt. Yule, 85 miles N.N.W. of Port Moresby (*ante*).

6067. ——. *Assoc.with* Gold, in black sand. St. Joseph R., 68 miles N.N.W. of Port Moresby (*ante*). *Ref.* A.R., B.N.G., p. 96 (1894).

6068. ——. *Assoc.with* Gold, Mica, Ilmenite, Zircon, and Topaz, in alluvial deposits. *Loc.* Seventeen miles up Vanapa R., 32 miles N. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 56, p. 2 (1889).

Magoffin's (Melrose) Bores. *See under* Artesian Bores. Nos. 308, 407, 443.

Magpie Leader, Golden Gate, Croydon Goldfield. *Min.Ref.* Gold, *see* 3511.

Maiva Hills, S.E. of Cape Possession, Brit. New Guinea. *Min.Ref.* Limestone (coralline), *see* 729.

Majuba Bore. *See under* Artesian Bores. No. 334.

Malachite. *Compo.*, carbonate of copper. *Colour*, bright green. *H.* = 3·5-4. *Sp.gr.* = 3·7-4·0. *Contents* (*max.*), Copper 59 per cent.

6069. ——. *Assoc.with* Cuprite and Tetrahedrite, in ironstone and quartz. *Loc.* Argylla M.F. (3073), Argylla Cr., 40 miles W. of **Cloncurry.** *Co.* Argylla; *Dist.* **Burke.** *Assay:* Copper = 28·4 per cent.; Silver = 4 dwt.; Gold = trace per ton. *Ref.* G.S.Q. Pubs. 10, p. 7 (1885), 215, pp. 270-272 (1908), and A.R., p. 116 (1907).

6069A.——. *Assoc.with* Copper Pyrites, Chrysocolla, and Limonite, in quartz and slate. *Loc.* Cameronian M.C. (196) (Euston Group), 27 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 267 (1908).

6069B.——. *Assoc.with* Copper Pyrites, Azurite, and Limonite, in quartz and quartzite. *Loc.* Federal R.C. (52) (Federal Group), Cameron R.. 20 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q Pub. 215, pp. 267, 268 (1908).

6070. ——. *Assoc.with* Limonite, in gossan and slate. *Loc.* Dispute M.L. (696) (Lady Clayre Group), Dugald R., 36½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 282 (1908).

6071. ——. *Assoc.with* Tile Ore and Limonite, in slate, gossan, and quartz. *Loc.* Lady Clayre M.L. (279), Lady Clayre Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 279-281 (1908).

6072. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, and Limonite, in mica-schist, quartzite, and gossan. *Loc.* Magnet M.L. (450) (Longamundi Group), Dugald R., between 34 and 39 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 284-286 (1908).

6073. ——. *Assoc.with* Redruthite, Azurite, Ironstone, Ilmenite, Calcite, Chlorite, and Biotite, in felspar, quartz, granite, and schist. *Loc.* Mavis M.L. (315), Longamundi Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 283, 284 (1908).

6074. ——. *Assoc.with* Native Copper, Cuprite, and Limonite, in schist and gossan. *Loc.* Two Sports M.F. (2874), Longamundi Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 288, 289 (1908).

6074A.——. *Assoc.with* Copper Pyrites, Redruthite, Limonite, and Actinolite, in gossan and schist. *Loc.* Melba M.L. (319), Melba Group, Corella R., 39 miles W.S.W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 210 (1908).

6075. ——. *Assoc.with* Cuprite, Ironstone, Asbolane, and Almandine Garnet. *Loc.* Valley, W. of Mt. Eurie, 40 miles N.byW. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

6075A.——. In schist and quartzite. *Loc.* Mt. Lloyd Group of Copper Mines, Cameron R., 31 miles W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 266 (1908).

6076. ——. *Assoc.with* Redruthite and Limonite, in quartzite, schist, and gossan. *Loc.* Ruth M.L. (335), Mt. Remarkable Group, Glenroy, Leichhardt R., 51 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 291-293 (1908).

6077. ——. *Assoc.with* Cuprite and Limonite, in gossan and kaolin. *Loc.* Una M.L. (280), Una Group, nr. Quamby, Dugald R., 33 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* A.R., p. 116 (1907), and G.S.Q. Pub. 215, pp. 277-279 (1908).

6078. ——. *Assoc.with* Cuprite. *Loc.* Broken Hill Mine, Cloncurry, 480 miles (by rail) W.byS. of Townsville. *Co.* Beaconsfield; *Dist.* Burke.

6078A.——. *Assoc.with* Cuprite, in quart. *Loc.* Cammie M.L. (477) (Eaglehawk Group), Pumpkin Gully, 12 miles E.N.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pubs. 153, p. 7 (1900), 215, p. 238 (1908).

6079. ——. *Assoc.with* Copper Pyrites, Cuprite, and Malachite, in ironstone lode. *Loc.* Contra Lode (Gt. Australia Group), ¼-mile S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885).

6080. ——. *Assoc.with* Native Copper, Cuprite, Tenorite, Tetrahedrite, and Iron Pyrites, in quartzite. *Loc.* Gt. Australian M.F. (A1), (Gt. Australian Group), Cloncurry Township. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 14 (1885), and 215, pp. 242-250 (1908).

6081. Malachite. *Assoc.with* Gold, Native Copper, Cuprite, and Azurite. *Loc.* Homeward Bound M.C. (331), Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 4 (1885), and 215, pp. 233, 234 (1908).

6082. ——. In altered slate. Lady Mary Mine, Cloncurry. *Co.* Beaconsfield (*ante*). *Assay:* Gold = 6 dwt. 18 gr. per ton; Silver = 12 dwt. per ton; Copper = 11·3 per cent. *Ref.* A.R., p. 116 (1907).

6083. ——. *Assoc.with* Redruthite, in quartz. *Loc.* Lady Mina M.L. (552), (Gt. Australian Group), 3 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 254 (1908).

6084. ——. *Assoc.with* Cuprite, Tenorite, and Azurite, in ferruginous quartzite. *Loc.* Ma Foi M.L. (508), (Gt. Australia Group), 1½ mile N.E. of Cloncurry Township. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 253 (1908).

6085. ——. *Assoc.with* Native Copper, Cuprite, and Limonite, in quartzite, schist, and gossan. *Loc.* M.F. (14), Gt. Australia Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 251, 252 (1908).

6086. ——. *Assoc.with* Cuprite, Manganese-dioxide, Asbolane, and Almandine Garnet, in lode. *Loc.* Mountain Home Copper Mine, Mt. Norma, Elder Cr., 17 miles S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pubs. 10, p. 15 (1885), and 215, p. 229 (1908).

6087. ——. *Assoc.with* Cuprite, Tetrahedrite, and Chalcostibite, in hematite. *Loc.* Copper Lode, Pumpkin Gully, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 10, p. 4 (1885), and P.R.S.Q., vol. 4, p. 54 (1887).

6087A.——. *Assoc.with* Redruthite, Cuprite, Tile Ore, Chrysocolla, and Limonite, in quartz and quartzite. *Loc.* Rocklands Group of Copper Mines, between Butcher and Morris Crs., 9 miles W. of Cloncurrry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

6087B.——. *Assoc.with* Redruthite, Cuprite, Tile Ore, and Limonite, in gossan and quartz. *Loc.* Chum M.C. (329), (Serpent Hill Group), Morris Cr., 4½ to 5½ miles W.S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 256 (1908).

6088 ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Victoria P.C. (Victoria Reef), Bower Bird Goldfield, 70 miles N.W. of Cloncurry. *Cos.* Brahe and Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 104, p. 2 (1894).

6088A.——. *Assoc.with* Cuprite, Tile Ore, and Limonite, in lode. *Loc.* Carlton Hills Run, 78 miles N.W.byW. of Cloncurry. *Co.* Brahe; *Dist.* Burke. *Ref.* A.R., p. 269 (1910).

For further Cloncurry references *see* Nos. 6091 to 6189.

6089. ——. *Assoc.with* Copper Pyrites, Azurite, Cassiterite, Galena, and Zinc Blende, in chlorite. *Loc.* Comet Tin Mines, N. of Ten-Mile Cr., Stanhills Tinfield, 12 to 24 miles S.E. of Croydon. *Co.* Esmeralda; *Dist.* Burke. *Ref.* G.S.Q. Pub. 211, p. 9 (1907).

6090. ——. *Assoc.with* Azurite, in lode in granite. *Loc.* Left-hand Branch of Ten-Mile Cr., Stanhills (*ante*). *Ref.* B.D.

6091. ——. *Assoc.with* Redruthite, Tile Ore, and Actinolite, in ironstone. *Loc.* Wanderer M.L. (622), (Eclipse Group), N.W. of Donaldson, 68 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 357 (1908).

6092. ——. *Assoc.with* Hematite, in slate *Loc.* Mt. Gordon M.L. (597), (Mt. Gordon Group), S. of Oxide Cr., 2 miles N.N.E. of Mt. Oxide, 111 miles N.W. of Cloncurry. *Co.* Kamileroi; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 365, 366 (1908).

6093. ——. *Assoc.with* Tile Ore and Chrysocolla, in gossan, schist, and quartz. *Loc.* Alice M.L. (717), (Alice Group), 24½ miles N.E. of Duck Cr., 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 162-164 (1908).

6094. ——. *Assoc.with* Tile Ore, in schist and quartz. *Loc.* Deadlock M.L. (542), Alice Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 164, 165 (1908).

6095. ——. *Assoc.with* Copper Pyrites, Limonite, and Calcite, in gossan and quartz. *Loc.* Iron Duke M.L., Alice Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 165, 165 (1908).

6096. ——. *Assoc.with* Copper Pyrites, Tile Ore, Redruthite, Chrysocolla, Hematite, Limonite, and Turgite, in quartz, calcite, and gossan. *Loc.* Belfast M.L. (303), Belfast Group, 10 chains S.E. of Cloncurry Road, 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

6097. ——. *Assoc.with* Redruthite, Azurite, and Limonite, in quartz and schist. *Loc.* Boomerang M.C. (162), (Boomerang Group), W. of Cone Cr., 2 miles N.N.W. of Mt. Start, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 99, 100 (1908).

6098. ——. *Assoc.with* Cuprite, Tetrahedrite, and Stibnite, in quartz. *Loc.* Rainbow M.L. (2454), Boomerang Group (*ante*). *Refs.* G.S.Q. Pub. 10, p. 5 (1885), and Pub. 215, p. 102 (1908).

6099. ——. *Assoc.with* Copper Pyrites, Cuprite, Tetrahedrite, and Antimony. *Loc.* Rainbow Copper Lode, Boomerang Group (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 56 (1887).

6100. ——. *Assoc.with* Copper Pyrites, Tile Ore, and Azurite, in gossan, quartz, and schist. *Loc.* Celestial Extd. M.C. (195) (Chinaman Group), 23½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 148, 149 (1908).

6101. ——. *Assoc.with* Limonite, in quartz, quartzite, and schist. *Loc.* Chinaman M.F (2453), Chinaman Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 144-147 (1908).

6102. ——. *Assoc.with* Tile Ore and Chrysocolla, in quartz and schist. *Loc.* Speculation M.C. (198), Chinaman Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 150-152 (1908).

6103. ——. *Assoc.with* Cuprite. *Loc.* Cloncurry Hills, about 20 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay:* Gold = 1 dwt. 14 gr. per ton; Copper = 39·1 per cent. *Ref.* A.R., p. 100 (1907).

6104. ——. *Assoc.with* Azurite, Chrysocolla, and Chlorite, in schist and quartz. *Loc.* Caine's King M.L. (577) (Columbiad Group), Duck Cr., 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*) . *Ref.* G.S.Q. Pub. 215, pp. 142, 143 (1908).

6105. ——. *Assoc.with* Redruthite and Tile Ore, in ferruginous quartz and quartzite. *Loc.* Columbiad M.L. (500), Columbiad Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 141, 142 (1908).

6106. ——. *Assoc.with* Redruthite, Limonite, and Göthite, with traces of Gold and Silver, in schist and quartz. *Loc.* Mountain Maid M.L. (526), Columbiad Group (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 215, pp. 140, 141 (1908).

6107. ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, and Limonite, in quartz and schist. *Loc.* Butterfly M.L. (496) (Daisy Group), nr. Mt. Start, 22 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 109, 110 (1908).

6108. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritic schist, and calcareous sinter. *Loc.* Daisy United M.C. (155), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

6109. ——. *Assoc.with* Hematite and Limonite, in quartz and schist. *Loc.* Horseshoe M.L. (451), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 104 and 105 (1908).

6110. ——. *Assoc.with* Redruthite, in quartz and chloritic schist. *Loc.* Meteor M.C. (145), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 105, 106 (1908).

6111. ——. *Assoc.with* Limonite and Actinolite, in quartz and chloritic schist. *Loc.* Tulip No. 1 E. M.C. (180), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 106 (1908).

6112. ——. *Assoc.with* Redruthite, Tile Ore, and Limonite, in chloritic schist and quartz. *Loc.* Balfour Extd. M.C. (257) Diagonal Group), Duck Cr., nr. Mt. Start, 22½ miles S.S.W. of Cloncurry (*ante*). *Assay:* Copper = 38·6 per cent.; Gold = 20 gr., and Silver = 5 dwt. 14 gr. per ton. *Ref.* G.S.Q. Pub. 215, pp. 138, 139 (1908).

6113. ——. *Assoc.with* Redruthite and Tile Ore, in chloritic schist, gossan, and quartz. *Loc.* Diagonal M.F. (2487), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 135, 136 (1908).

6114. ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Tile Ore, Azurite, and Limonite, in chloritic schist. *Loc.* Pioneer M.L. (229), Diagonal Group (*ante*). *Assay:* Copper = 18·9 per cent.; Gold = 1 dwt. 4 gr., and Silver = 11 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 132-135 (1908).

6115. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite, in schist and quartz. *Loc.* Prospector M.C. (182), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub.215, pp. 136-138 (1908).

6116. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Azurite, and Chrysocolla, in gossan, quartz, and quartzite. *Loc.* Captain M.L. (Eva Group), 22½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 158, 159 (1908).

6117. Malachite. *Assoc.with* Copper,Pyrites, Redruthite, Tile Ore, and Chrysocolla, in quartz and calcite. *Loc.* Commonwealth M.C. (330), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 158 (1908).

6118. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Calcite, and Chlorite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

6119. ——. *Assoc.with* Hematite and Limonite, in quartz. *Loc.* Jessie M.L. (238), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 156, 157 (1908).

6120. ——. *Assoc.with* Redruthite and Tile Ore, in Chloritic schist. *Loc.* Phœnix M.C. (340), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 157 (1908).

6121. ——. *Assoc.with* Atacamite, Chrysocolla, Dioptase (?), and Tourmaline, in schist. *Loc.* Weka M.C. (?), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 159, 160 (1908).

6122. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Chrysocolla, Iron Pyrites, Limonite, Turgite, Ferro-Calcite, and Calcite, in quartzite, schist, and limestone. *Loc.* Florence R. Copper Mines, ½-mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

6123. ——. *Assoc.with* Redruthite, Cuprite, and Limonite, in slate and gossan. *Loc.* Block (15), M.Ls.) 246 and 409), Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 60, 61 (1908).

6124. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Chrysocolla, Iron Pyrites, and Kaolin, in gossan, slates, and diorite. *Loc.* Hampden M.Ls. 244, 245, etc.), Hampden Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 49-60 (1908).

6125. ——. *Assoc.with* Limonite, in gossan. *Loc.* Hampden South M.L. (502), Hampden Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 63 (1908).

6126. ——. *Assoc.with* Cuprite. *Loc.* Mt. Babunga, Hampden-Cloncurry Copper Mines Co., 5 miles S.W. of Hampden Mine, 45 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* B.D.

6127. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, and Limonite, in schist and quartz. *Loc.* Comet M.L. (243), Hilda Group, Slaty Cr., 20 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 182 (1908).

6128. ——. *Assoc.with* Copper Pyrites, Redruthite, Limonite, Manganese-dioxide, and Calcite, in limestone, quartz, and schist. *Loc.* Hilda M.L. (242), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 183, 184 (1908).

6129. ——. *Assoc.with* Copper Pyrites, Tile Ore, Redruthite, and Calcite, in schist and limestone. *Loc.* Mascott M.C. (319), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 184, 185 (1908).

6130. ——. *Assoc.with* Tile Ore, Cuprite, and Limonite, in quartz. *Loc.* Adelaide M.L. (549), Just-in-Time Group, 1 mile S. of Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 85, 86 (1908).

6131. ——. *Assoc.with* Redruthite, Tile Ore, and Limonite, in ferruginous quartzite and schist. *Loc.* Just-in-Time M.L. (237), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 82, 83 (1908).

6132. ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in quartz and schist. *Loc.* Just-in-Time M.L. 1 E. (473), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 84 (1908).

6133. ——. *Assoc.with* Cuprite and Tetrahedrite, in ironstone. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* A.R., p. 117 (1907).

6134. ——. *Assoc.with* Redruthite, Cuprite, Tile Ore, and Limonite, in quartzite and slate. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 79-81 (1908).

6134A. ——. *Assoc.with* Redruthite, Chrysocolla, and Limonite, in quartzite and schist. *Loc.* Lady Jenny M.L. (234), Lady Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 195 (1908).

6134B. ——. *Assoc.with* Redruthite, Tile Ore, Azurite, and Limonite, in quartz and schist. *Loc.* Morning Star M.L. (306), Lady Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 199 (1908).

6135. ——. *Assoc.with* Native Copper, Redruthite, Cuprite, Cyanochalcite (?), Limonite, Calcite, and Ferro-Calcite, in granular limestone. *Loc.* Dandy P.A. (297), (McPhail Group, Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 76, 77 (1908).

6136. ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, and Limonite. *Loc.* Erin-go-bragh Extd. M.C. (372), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 77, 78 (1908).

6137. ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, and Limonite, in gossan, quartzite, and schist. *Loc.* McPhail M.L. (474), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 70-72 (1908).

6138. ——. *Assoc.with* Redruthite, Chrysocolla, Dioptase, Iron Pyrites, and Limonite, in gossan, turgite, and schist. *Loc.* Trump Extd. M.C. (368), McPhail Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 73-76 (1908).

6139. ——. *Assoc.with* Redruthite, Tile Ore, Azurite, and Limonite, in schist, quartzite, and slate. *Loc.* Monitor M.L. (419), ½-mile from Cloncurry R., 44 miles S. of Cloncurry, Monitor Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 65 (1908).

6140. ——. *Assoc.with* Copper Pyrites, Cuprite, and Azurite, in lode in porphyry. *Loc.* Mt. Devonport Copper Lease, Cloncurry R., 42 miles S.W. of Cloncurry, Monitor Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 66-68 (1908).

6140A.——. *Assoc.with* Gold, Copper (native), Copper Pyrites, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Turgite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

6140B.——. *Assoc.with* Redruthite, Iron Pyrites, and Limonite, in schist. *Loc.* Pearl M.C. (106), Pearl Group, Corella R., 30 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 188 (1908).

6141. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, Chrysocolla, Hematite, and Limonite, in slate. *Loc.* Easter Gift M.L. (290), W. of Marabah Township, 1 mile S. of Mt. Start, 23 miles S.S.W. of Cloncurry, Pioneer Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 127-129 (1908).

6142. ——. *Assoc.with* Redruthite, Turgite, Siderite, with traces of Gold and Silver, in chloritic schist and quartz. *Loc.* Noontide M.L. (239), W. of Cone Cr., ½-mile N. of Duck Cr., nr. Mt. Start, Pioneer Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 129-131 (1908).

6143. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Iron Pyrites, and Limonite, in slate. *Loc.* Pioneer Chief M.L. (231), Cone Cr., ½-mile N. of Mt. Start, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123-125 (1908).

6144. ——. *Assoc.with* Copper Pyrites and Limonite, in schist and quartz. *Loc.* Primrose Extd. M.C. (267), W.N.W. flanks of Mt. Finish, near Mt. Start, 23 miles S.S.W. of Cloncurry, Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 126 (1908).

6145. ——. *Assoc.with* Tile Ore and Limonite, in chloritic schist. *Loc.* Coronet M.C. (241), Cone Cr., Duck Cr., 2¾ miles N. of Mt. Start, Ready Rhino Group, 23½ miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 96, 97 (1908).

6146. ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, Limonite, and Turgite, in slate and quartz. *Loc.* Highland Mary M.L. (531), Duck Cr., 2¾ miles N.W.byN. of Mt. Start, Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

6147. ——. *Assoc.with* Cuprite, Redruthite, and Limonite, in schist and quartz. *Loc.* Ready Rhino M.L. (320), Cone Cr., Duck Cr., 2½ miles N.N.W. of Mt. Start, Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 93-95 (1908).

6148. ——. *Assoc.with* Tile Ore and Limonite, in quartz and schist. *Loc.* White Rose M.L. (330), nr. Cone and Duck Creeks, Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 97, 98 (1908).

6149. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, Chrysocolla, Iron Pyrites, and Limonite, in schist, slate, and quartzite. *Loc.* Banjo M.L. (590), Duck Cr., 3 miles N. of Duck Cr.-Corella Rd., Tambourine Group, 26 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

6150. ——. *Assoc.with* Copper Pyrites, Redruthite, Azurite, Iron Pyrites, Limonite, and Tourmaline, in schist, slate, and quartz. *Loc.* Tambourine R.C. (286) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 167 (1908).

6151. ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, Limonite, and Turgite, in schist and quartz. *Loc.* Brilliant M.L. (585), Duck Cr., 1½ mile N.W. of Mt. Start, 23 miles S.W. of Cloncurry, Tharsis Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 114, 115 (1908).

6152. ——. *Assoc.with* Redruthite, Tile Ore, and Iron Pyrites, in quartz and schist. *Loc.* Tharsis M.L. (240), Cone Cr., Duck Cr., 1¼ mile N. of Mt. Start, 22½ miles S.W. of Cloncurry, Tharsis Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 117-120 (1908).

6153. Malachite. *Assoc.with* Tile Ore, in schist and quartz. *Loc.* Waratah M.L. (127), Duck Cr., 1 mile N.W. of Mt. Start, 23 miles N.W. of Cloncurry, Tharsis Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 115, 116 (1908).

6154. ——. *Assoc.with* Copper Pyrites, Tile Ore, Göthite, and Limonite, in chloritic schist. *Loc.* Brilliant M.C. (159), Slaty Cr., 2 miles S. of Mt. Minde M.F., 1 mile N.W. of Gorge Hotel, Timberoo Group, 18 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 179, 180 (1908).

6155. ——. *Assoc.with* Limonite, Calcite, Ferro-Calcite, and Tourmaline, in cellular gossan and chloritic schist. *Loc.* Marguerite M.C. (151), 1 mile S. of Mt. Minde Freehold, Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 177, 178 (1908).

6156. ——. *Assoc.with* Copper Pyrites, Cuprite, and Limonite, in chloritic schist. *Loc.* Mt. Minde M.F. (2658), Friedman's Cr., br. of Slaty Cr., 3 miles N.W. of Gorge Hotel, Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 170, 171 1908).

6157. ——. *Assoc.with* Copper Pyrites, Bornite, Redruthite, Tile Ore, Iron Pyrites, Hematite, Limonite, Muscovite, and Calcite, in schist, slate, and quartz. *Loc.* Timberoo M.L. (716), Friedman's Cr., br. of Slaty Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 172-175 (1908).

6158. ——. *Assoc.with* Redruthite, Tile Ore, Azurite, and Limonite, in gossany quartz, and schist. *Loc.* Wallaroo (M.L. 392), Wee MacGregor Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 202-205 (1908).

6158A. ——. In schist and quartz. *Loc.* Newcastle M.L. (595), Duck Cr., 2 miles S.E.byS. of Mt. Start, 24 miles S.S.W. of Cloncurry, White Oxide Group, *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 161 (1908).

6159. ——. *Assoc.with* Tile Ore, in quartz. *Loc.* White Oxide M.C. (282) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 160 (1908).

6159A. ——. *Assoc.with* Gold, Tile Ore, and Limonite, in lode. *Loc.* Soldier's Cap Diggings, 24 miles S.E.byS. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* A.R., p. 178 (1910).

6160. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Chrysocolla, and Limonite, in gossany quartz and calcareous sinter. *Loc.* Boundary M.L. (582), Bull Cr. Group, Coolullah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 345-347 (1908).

6160A. ——. *Assoc.with* Chrysocolla, in siliceous gossan. *Loc.* Decima M.C. (304), Bull Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 347, 348 (1908).

6161. ——. *Assoc.with* Redruthite and Limonite, in schist. *Loc.* Iguana M.C. (268), Bull Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 349, 350 (1908).

6162. ——. In quartz. *Loc.* Overlander M.L. (661), Calton Hills Group, Gunpowder Cr., 90 miles N.W.byW. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 358 (1908).

6163. ——. *Assoc.with* Copper Pyrites, Bornite, and Limonite, in limestone. *Loc.* Centipede M.L. (375), Centipede Group, Prospector's Creek, 53 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 301, 302 (1908).

6164. ——. *Assoc.with* Native Copper, Cuprite, Redruthite, Tetrahedrite, Iron Pyrites, Hematite, Magnetite, and Limonite, in schist and quartz. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, E. of Coppermine Cr., 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), and 215, pp. 334, 335 (1908).

6165. ——. *Assoc.with* Redruthite, in gossany quartz. *Loc.* Orphan M.L. (667), Crusader Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 336 (1908).

6166. ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in quartz. *Loc.* Bauhinia M.C. (347), Dobbyn Group, 3½ miles W.N.W. of Crusader Freeholds, Coolullah, 70½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 341, 342 (1908).

6167. ——. *Assoc.with* Limonite, in gossany quartz. *Loc.* Dobbyn M.F. (2551), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 340 (1908).

6168. ——. *Assoc.with* Ironstone, in ferruginous quartz. *Loc.* Dobbyn No. 1 N. M.L. (679), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

6169. ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in schist. *Loc.* Dobbyn No. 1 S. M.L. (662), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

6170. ——. *Assoc.with* Chrysocolla and Limonite, in quartz. *Loc.* Elsie M.C., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 342, 343 (1908).

6171. ——. *Assoc.with* Redruthite, Tile Ore, and Limonite, in gossany quartz. *Loc.* Flaneur M.L. (655), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 344, 345 (1908).

6172. ——. *Assoc.with* Copper Pyrites, Redruthite, Limonite, Calcite, and Ferro-Calcite, in quartz. *Loc.* Glenferrie P.A. (300), nr. Old Man Cr., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

6173. ——. *Assoc.with* Cuprite, in kaolin. *Loc.* Widow M.C., W. bank of Soda Cr., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 342 (1908).

6174. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, and Limonite, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), Mighty Atom Group, 6-Mile Cr., Leichhardt R., 42 miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

6175. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite, in gossan and quartz. *Loc.* Mt. Bornite M.L. (376), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 309, 310 (1908).

6176. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, and Limonite, in slate, schist, and gossan. *Loc.* Mt. Millicent M.L. (663), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 307, 308 (1908).

6177. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite, in slate and kaolin. *Loc.* Mt. Millicent S.M.L. (664), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 308, 309 (1908).

6178. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, and Limonite, in schist, slate, and gossan. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group, 6-Mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H.S., 63 miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 315-318 (1908).

6179. ——. *Assoc.with* Tile Ore. *Loc.* Mt. Cuthbert M.L. (107), Mt. Cuthbert Group (*ante*). *Assay:* Average of samples—Copper = 42·4 per cent., Gold = 10 gr., and Silver = 14 dwt. 3 gr. per ton. *Ref.* A.R., p. 46 (1906).

6180. ——. *Assoc.with* Ironstone. *Loc.* Mt. Cuthbert S.M.L., Mt. Cuthbert Group (*ante*). *Assay:* Copper = 32·1 per cent., Gold = 13 gr., and Silver = 16 dwt. per ton. *Ref.* A.R., p. 46 (1906).

6181. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, Chrysocolla, and Limonite, in schist, gossan, and quartz. *Loc.* Mt. Cuthbert, No. 1 N. M.L. (381), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 318-321 (1908).

6182. ——. *Assoc.with* Copper Pyrites, Chrysocolla, Iron Pyrites, Limonite, Ironstone, and Magnesite, in kaolinised schist. *Loc.* Mt. Cuthbert 1 and 2 S. M.Ls. (257 and 294), Mt. Cuthbert Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 321, 322 (1908).

6183. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Tenorite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310), Mt. Metallic Group, Prospector Cr., trib. of Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 295-297 (1908).

6184. ——. *Assoc.with* Copper Pyrites, Redruthite, Calcite, and Jasper, in slate, gossan, and quartz. *Loc.* Queensland M.L. (436), Mt. Metallic Group. *Ref.* G.S.Q. Pub. 215, pp. 297-299 (1908).

6185. ——. *Assoc.with* Tile Ore and Atacamite, in schist and slate. *Loc.* Mt. Oxide M.L. (282), between Torpedo and Myally Crs., tribs. of Gunpowder Cr., 109 miles N.W. of Cloncurry, Mt. Oxide Group. *Co.* Tewinga; *Dist.* Burke. *Assay:* Copper = 38·6 per cent., Gold = 19 gr., and Silver = 1 oz. 18 dwt. per ton. *Ref.* G.S.Q. Pub. 215, pp. 362-364 (1908).

6186. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite, in schist, gossan, and quartz. *Loc.* Chance P.A. (283), St. Paul's Cr. Group, Leichhardt R., Coolullah, 78 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 352-354 (1908).

6187. ——. *Assoc.with* Redruthite and Tile Ore, in chloritic schist. *Loc.* Rosette M.L. (638), St. Paul's Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 351, 352 (1908).

6188. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite, in schist, gossan, and quartz. *Loc.* Isabella M.C. (360), Von Bremen's Group, St. Paul's Cr., Leichhardt R., Coolullah, 70 miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 217, pp. 325, 326 (1908).

6189. ——. *Assoc.with* Tile Ore, in quartzite. *Loc.* Warwick Castle M.L. (314) (Warwick Castle Group), head of St. Paul's Cr., Coolullah, 69 miles N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Ref.* G.S.Q. Pub. 215, p. 323 (1908).

—— **Note.**—Cloncurry References continued under District Gregory North, Nos. 6255-6275.

6190. Malachite. *Assoc.with* Native Copper and Cuprite. *Loc.* Caledonia Mine, Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

6191. ——. *Assoc.with* Azurite. *Loc.* Lion Mine, nr. Mt. Perry (*ante*). *Ref.* G.S.M.

6192. ——. *Assoc.with* Azurite, etc., in lode. *Loc.* Mt. Perry Copper Mine, Mt. Perry (*ante*) *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

6193. ——. Mt. Webster, nr. Mt. Perry (*ante*). *Ref.* B.D.

6194. ——. *Assoc.with* Turgite. *Loc.* Floris Copper Lode, Perry Scrub, St. Agnes Cr., 15 miles S. of Gin Gin Rail. Stn. (Mt. Perry line), 34 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. *Ref.* L.C.B.

6195. ——. *Assoc.with* Azurite and Psilomelane, in gossan. M.L. (16), Perry Scrub (*ante*) *Ref.* G.S.Q. Pub. 184, p. 13 (1903).

6196. ——. *Assoc.with* Azurite, in granite. *Loc.* Queensland Copper Claims, 2 miles S.W. of Wolca, 6 miles N. of Mt. Perry, 73 miles (by rail) S.S.W. of Bundaberg (Mt. Perry line). *Co.* Bowen; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 21, p. 11 (1885).

6196A. ——. *Assoc.with* Gold, Copper Pyrites, and Limonite, in lode. *Loc.* Nr. Wonbah Hill Mine, 2 miles from Wonbah Siding (Mt. Perry line), 60 miles (by rail and road) W.S.W. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* A.R., p. 264 (1910).

6197. ——. *Assoc.with* Azurite, Limonite, and Göthite. *Loc.* Lakeside, nr. Degilbo, 58 miles (by rail) W. of Maryborough (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* A.R., p. 134 (1908).

6198. ——. *Assoc.with* Azurite. *Loc.* 1 mile N.E. of Biggenden Mine, 4½ miles W. Biggenden Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 60, p. 3 (1890).

6199. ——. *Assoc.with* Copper Ores. *Loc.* Northern slope of Mt. Havilah, nr. Mt. Biggenden, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 173, p. 4 (1902).

6200. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Cuprite, Tenorite, Iron Pyrites, Pyrrhotite, Mispickel, Hematite, Zinc Blende, Bismuthinite, and Calcite, in quartz reef. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), and 207, pp. 14-19 (1907).

6201. ——. *Assoc.with* Copper Pyrites and Azurite, in ironstone. *Loc.* Don Jon (Unique) Mine, Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook (*ante*). *Ref.* A.R., p. 44 (1906).

6202. ——. *Assoc.with* Gold, Telluride of Gold, Native Bismuth, Bismuthinite, Molybdenite, Mispickel, Joseite, Zinc Blende, Copper Pyrites, Calcite, and Quartz. *Loc.* Mt. Shamrock Gold Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 125 (1897), and 168 (1901), and B.D.

6203. ——. *Assoc.with* Gold, in decomposed felspar porphyry. *Loc.* Barambah Cr., Ban Ban, 12 miles S.E. of Gayndah. *Co.* Mackenzie; *Dist.* Burnett. *Ref.* P.R.S.Q., vol. 4, pp. 38, 76 (1887).

6203A. ——. *Assoc.with* Serpentine. *Loc.* Sandy Cr., trib. of Barambah Cr., Ban Ban (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 70 (1887).

6204. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Azurite, in chloritic rock. *Loc.* Robina or Mt. Hawick Copper Mine, 12 miles (by road) W.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Mackenzie; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 150, p. 4 (1900).

6204A. ——. *Assoc.with* Galena, Anglesite, Cerussite, Massicot, Azurite, and Limonite, in lode. *Loc.* about 5 miles S. of Coalstoun Lakes, 16 miles S.W. of Biggenden Rail. Stn. (Gayndah line). *Co.* Mackenzie (*ante*). *Ref.* A.R., pp. 287, 288, 291 (1910).

6205. ——. *Assoc.with* Gold, Jasper, and Chrysocolla, in quartz. *Loc.* F. Achilles's Mine, Brovinia Goldfield, nr. Hawkwood, 50 miles S.W. of Gayndah Br. Rail. line. *Co.* Newcastle; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 114, p. 3 (1896), and G.S.M.

6206. ——. *Assoc.with* Gold, in quartz. *Loc.* Lady Rose Reef, Eidsvold Goldfield, 35 miles N.W. of Gayndah. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 160, p. 12 (1901).

6206A ——. *Assoc.with* Redruthite, Azurite, Ironstone, Barytes, and Calcite. *Loc.* Burnett Range, nr. Gaeta, about 23 miles N.byW. of Mt. Perry Rail. Stn. *Co.* Yarrol (*ante*). *Ref.* A.R., p. 263 (1910).

6207. ——. *Assoc.with* Azurite and Cuprite, in felspathic rock. *Loc.* Marshall Block Lease, Mt. Cannindah, 13 miles S.W.byS. of Many Peaks Rail. Stn. (Boyne Valley line), 71 miles (by rail and road) S. of Gladstone. *Co.* Yarrol (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 113, p. 7 (1896).

6208. ——. *Assoc.with* Tenorite, Cuprite, and Azurite, in dyke rock. *Loc.* Monument Block Lease, Mt. Cannindah (*ante*). *Ref.* G.S.Q. Pubs. 113, p. 8 (1896), 143, p. 4 (1899).

6209. ——. *Assoc.with* Gold, Silver, Native Copper, Cuprite, Tenorite, and Azurite, in lode. *Loc.* Mt. Cannindah Claim, Mt. Cannindah (*ante*). *Ref.* G.S.Q. Pubs. 105, pp. 6, 7 (1895), 113, p. 6 (1896), 143, p. 4 (1899).

6210. ——. *Assoc.with* Azurite. *Loc.* Mungai Lodes, 12 miles W.byN. of Mt. Perry, 79 miles (by rail and road) W.S.W. of Bundaberg. *Co.* Yarrol (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885).

6210A. ——. *Assoc.with* Copper Pyrites, Azurite, and Limonite, in quartz. *Loc.* Malpas's Claim, Pinnacle Cr., br. of Lynd R., 16 miles W. of Fossilbrook, **Walsh and Tinaroo Mineral Fields.** *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* A.R., p. 223 (1910).

6211. ——. *Assoc.with* Gold, Tetrahedrite, Cuprite, Azurite, Chalcanthite, and Ironstone, in lodes in gneiss and schist. *Loc.* Arbouin Mines, nr. Nondah Cr. and Walsh R., 18 miles W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 13-14 (1898).

6212. ——. *Assoc.with* Cuprite and Tile Ore, in lode stuff. *Loc.* The Granite, Maytown, 36 miles S. of Laura Rail. Stn. (Cooktown line), 103 miles (by rail and road) S.byW. of Cooktown. *Co.* Chelmsford; *Dist.* Cook. *Ref.* O.R.

6213. ——. In dyke rock. *Loc.* Glenroy Copper Mine, 7 miles N. of Palmerville, 47 miles S.W.byS. of Laura Rail. Stn. (Cooktown line), 114 miles (by rail and road) W.S.W. of Cooktown. *Co.* Chelmsford (*ante*).

6214. ——. *Assoc.with* Cuprite, in lode. *Loc.* 3 miles N. of Palmerville, 43 miles S.W.byS. of Laura Rail. Stn., 110 miles (by rail and road) S.W.byW. of Cooktown. *Co.* Chelmsford (*ante*).

6214A. ——. *Assoc.with* Copper Pyrites, Cuprite, and Azurite, in lode. *Loc.* Daintree Copper Mine, 38 miles S.E. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Copperfield; *Dist.* Cook. *Ref.* E.O.M.

6215. —— (botryoidal). *Assoc.with* other Copper Ores. *Loc.* Mt. Molloy Copper Mines, 17 miles S.S.W. of Mt. Douglas, 20 miles (by rail) N.N.W. of Biboohra Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.M.

—— For further Walsh and Tinaroo references, *see* Nos. 6218-6248.

6215A. ——. *Assoc.with* Anglesite, Massicot, Cerussite, in lode. *Loc.* Popahrairie P.A., Fiery Cr., about 15 miles N.byW. of Georgetown. *Co.* Einasleigh; *Dist.* Cook. *Ref.* A.R., p. 194 (1909).

6215B. ——. *Assoc.with* Silver, Galena, Anglesite, and Cerussite, in quartz lode. *Loc.* Wright's Leader, Donnyville, 4½ miles S. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R., p. 228 (1910).

6216. ——. South Australian Mine, Durham, 4 miles W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.M.

6217. ——. *Assoc.with* Copper Pyrites, Pyrrhotite, etc. *Loc.* Einasleigh Copper Mine, 4 miles E.N.E. of Charleston Rail. Stn., 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.M. and G.S.Q. Pub. 219, p. 19 (1909).

6217A. ——. *Assoc.with* Gold, Galena, Massicot, and Cerussite, in quartz and schist. *Loc.* Ancient Briton Mine, Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* A.R., p. 215 (1910).

6218. ——. *Assoc.with* Cassiterite and Azurite. *Loc.* Clan Ronald Mine, Eureka Cr., nr. Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 47 (1897), and P.R.S.Q., vol. 4, p. 77 (1887).

6219. ——. *Assoc.with* Cuprite, Azurite, Scheelite, and Wolfram, in defined quartz lodes, in slates, etc. *Loc.* Parada Mines, Walsh R., 1 mile N. of Parada Rail. Stn. (Chillagoe line), 65 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6220. ——. *Assoc.with* Copper Pyrites, Copper Oxide, and Cassiterite, in gossan lode in greywacke and slate. *Loc.* Crucible Tin Mine, Watsonville, head of James Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn., Chillagoe Br. line, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, pp. 21, 22 (1883).

6221. Malachite. *Assoc.with* Tile Ore, Azurite, and Iron Ochre. *Loc.* Ironclad Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 119, p. 9 (1897).

6222. ——. *Assoc.with* Azurite and Cassiterite, in serpentine. *Loc.* North Australian Tin Mine, Watsonville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 77 (1887), and G.S.M.

6223. ——. *Assoc.with* Cuprite, Tile Ore, Azurite, and Red Ochre, in greywacke and shales. *Loc.* Shaughran Copper Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

6224. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Iron Pyrites, Mispickel, Cassiterite, Stannite, Wolfram, Ironstone, Fluorspar, and Chlorite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), and 119, p. 15 (1897).

6225. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, and Chalcanthite, in greywacke. *Loc.* Wyatt's Copper Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 20 (1883).

6226. ——. *Assoc.with* Cuprite. *Loc.* Atherton Copper Mine, between Cathedral Range and Arbinjoe Cr., 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

6227. ——. *Assoc.with* Tenorite, Cuprite, Tile Ore, Azurite, Hematite, Magnetite, and Chrysocolla. *Loc.* Boomerang Copper Mine, Marble Cr., 1 mile W. of Calcifer (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 8 (1891), and 119, p. 36 (1897), and G.S.M.

6228. ——. *Assoc.with* Tetrahedrite, Cuprite, Minium, and Hematite, in lode. *Loc.* Mollie Lease, Marble Cr. (*ante*). *Assays: See* No. 2435. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

6229. ——. *Assoc.with* Silver and Cerussite, in quartz. *Loc.* Otho Lease, 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), 137 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay: See* No. 7467. *Ref.* G.S.Q. Pub. 133, p. 10 (1893).

6230. ——. *Assoc.with* Copper Pyrites, Bornite, Tetrahedrite, Cuprite, Tile Ore, Tenorite Atacamite, Iron Pyrites, and Hematite, in quartz-felspar lode. *Loc.* Ruddygore Mine, Arbinjoe Cr., 2 miles N.E. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 7 (1891), 119, p. 39 (1897), and 134, pp. 10, 11 (1898).

6231. ——. *Assoc.with* Cuprite. *Loc.* Emuford, Emu Cr., 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6232. ——. *Assoc.with* Azurite. *Loc.* 5 miles S. of Koorboora Rail. Stn. (Chillagoe line), 113 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* (?).

6233. ——. *Assoc.with* Tetrahedrite, Cerussite, Galena, and Zinc Blende. *Loc.* Eclipse Silver Mine, Muldiva, 6 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

6234. ——. Paisley Silver Mine, Muldiva (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 52 (1900).

6234A. ——. *Assoc.with* Native Silver and Azurite. *Loc.* Silver Mines, Muldiva (*ante*). *Ref.* B.D.

6235. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Azurite, Chrysocolla, Fluorspar, and Garnet. *Loc.* Dorothy Copper Mine, Opera Cr., 1½ mile S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 69, p. 2 (1898), and P.R.S.Q., vol. 15, p. 51 (1900).

6236. ——. *Assoc.with* Cuprite, Galena, Cerussite, and Ironstone, in clay and quartz. *Loc.* Girofla Mine, Opera Cr. (*ante*). *Ref.* G.S.Q. Pub. 69, p. 3 (1891), and B.D.

6237. ——. *Assoc.with* Native Copper, Tetrahedrite, Cuprite, Azurite, Hematite, Manganese-dioxide, and Selenite, in lode. *Loc.* Griffith Copper Lease, head of Julia Cr., 2 miles S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), and 134, p. 11 (1898), and G.S.M.

6238. ——. *Assoc.with* Tetrahedrite, in lode. *Loc.* Lady Jane Mine, 1 mile S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, p. 12 (1898).

6239. —— (botryoidal). Magazine Face, Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

6240. ——. *Assoc.with* Chrysocolla and Lithomarge, in quartzite. *Loc.* McIlwraith Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 6 (1898).

6241. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Galena, Cerussite, Minium, Hematite, Zinc Blende, and Garnet, in felpathic matrix and gossan. *Loc.* Penzance Mine, Redcap Cr. (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), 134, p. 11 (1898).

6242. ——. *Assoc.with* Tetrahedrite, Ironstone, Limonite, Siderite, and Manganese-dioxide. *Loc.* Queenslander Copper Lease, Redcap Cr. (*ante*). *Ref.* G.S.Q. Pub. 69, p. 7 (1898).

6243. ——. *Assoc.with* Copper Pyrites, Azurite, and Cerussite, in ferruginous lode. *Loc.* Queenslander Copper Lease, Redcap Cr. (*ante*). *Ref.* G.S.Q. Pub. 134, p. 11 (1898).

6244. ——. *Assoc.with* Azurite and Copper Pyrites. *Loc.* Mungana Mines, 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook.

6244A.——. *Assoc.with* Copper Pyrites, Bornite, Redruthite, Azurite, Hematite, Limonite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mosman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

6245. ——. *Assoc.with* Azurite. *Loc.* Fossilbrook, 28 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 19 (1898).

6246. ——. In lode. Gilberton, 24 miles S.byE. of Charleston Rail. Stn. (Etheridge line). *Co.* Victor; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 76 (1887).

6246A.——. *Assoc.with* Redruthite, Tile Ore, and Azurite, in quartz lode. *Loc.* Ortona Copper Mines, S. bank of Percy R., 13 miles N.W. of Gilberton, Etheridge Goldfield. *Co.* Victor (*ante*). *Ref.* G.S.Q. Pub. 219, pp. 17-19 (1909).

6247. ——. *Assoc.with* Cuprite, in clay slate. *Loc.* Mitchell R., 20 miles from O.K. Copper Mine, 60 miles N.N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* O.R.

6248. ——. *Assoc.with* Tetrahedrite, Cuprite, Azurite, Cerussite, and Ironstone, in lodes. *Loc.* Tartana Hill, Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 15, 16 (1898).

—— For further Walsh and Tinaroo references, *see* 6276-6285.

6249. ——. *Assoc.with* Silver, Copper Pyrites, and Mispickel, in quartz lode. *Loc.* Min. Area (26), Jibbinbar, 20½ miles S.byW. of **Stanthorpe.** *Co.* Bentinck; *Dist.* **Darling Downs.** *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

6250. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, and Zinc Blende, in quartz. *Loc.* Sel. (24), nr. Sundown Cr., Severn R., 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

6251. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Galena. *Loc.* Silver Queen Mine, Severn R., 6 miles W. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assays: See* No. 2834. *Ref.* G.S.M.

6252. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Azurite, Pyrargyrite, Galena, Cerussite, Zinc Blende, Smithsonite, Ironstone, and Calcite, in lode. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 120 (1898), 191 (1904).

6253. ——. *Assoc.with* Copper Pyrites. *Loc.* Texas Copper Mine, 2 miles N.W. of Silver Spur Mine, 45 miles W.S.W. of Stanthorpe Rail. Stn. *Co.* Clive (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

6254. ——. *Assoc.with* Galena. *Loc.* 3 miles N.W. of Silver Spur Mine, 46 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* A.R., p. 126 (1907).

6255. ——. *Assoc.with* Redruthite, Tile Ore, Tenorite, Iron Pyrites, and Limonite, in kaolinised slate and gossan. *Loc.* Labour Victory R.C. (29), S. of Agate Downs Goldfield, 53 miles S. of **Cloncurry.** *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 12-14 (1908).

6255A.——. *Assoc.with* Copper Pyrites, Bornite, and Tetrahedrite. *Loc.* Duchess M.L. (275), Jack's Cr., Burke R., 61 miles S.W. of Cloncurry *Co.* Chatsworth (*ante*). *Ref.* G.S.M.

6256. Malachite. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Limonite, Calcite, and Epsomite, in schist and quartz. *Loc.* Duchess M.L. (275) (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 18-22 (1908).

6257. ——. *Assoc.with* Cuprite, in quartz. *Loc.* Duchess M.L. (275) (*ante*). *Assay:* Copper = 31·2 per cent.; Silver = 1 oz. 2 dwt. per ton. *Ref.* A.R., p. 116 (1907).

6258. ——. *Assoc.with* Cuprite, Azurite, and Limonite, in quartz. *Loc.* Ivanhoe M.L. (277), Burke R., 61 miles S.W. of Cloncurry, Duchess Group. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 23, 24 (1908).

6259. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Tile Ore, and Limonite, in kaolinised rock, schist, and quartz. *Loc.* Italian M.L. (689), Lady Fanny Group, Wills R., 60 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, p. 34 (1908).

6260. ——. *Assoc.with* Copper Pyrites and Tile Ore, in slate, porphyry, and gossan. *Loc.* Lady Fanny M.L. (178), Lady Fanny Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 30-33 (1908).

6261. ——. *Assoc.with* Tile Ore and Limonite, in porphyry, quartzite, and quartz. *Loc.* Prodigal M.L. (490), Lady Fanny Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 36 (1908).

6262. ——. *Assoc.with* Cuprite and Azurite. *Loc.* Monastery M.L. (467), 5 miles W. of Mt. Birnie, 79 miles S.W. of Cloncurry, Mt. Birnie Group. *Co.* Chatsworth; *Dist.* Gregory North. *Assay:* Copper = 25.7 per cent.; Silver = 9 dwt. per ton. *Ref.* A.R., p. 117 (1907).

6263. ——. *Assoc.with* Redruthite. *Loc.* Monastery M.L. (467) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 28 (1908).

6264. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Iron Pyrites, Limonite, and Chrysocolla, in hornblendic schist. *Loc.* Mt. Birnie M.L. (686, etc.), Burke R., 74 miles S.S.W. of Cloncurry, Mt. Birnie Group. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 367 (1908).

6265. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Chrysocolla, and Covelline, in quartz, quartzite, and schist. *Loc.* Ardath Lease (656), 4 miles S.E. of Mt. Hope Group, Wills R., 51 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 47, 48 (1908).

—— For other Cloncurry References, *see under* District Burke, Nos. 6069-6189.

6266. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Cuprite, Tile Ore, Atacamite, Limonite, and Calcite, in quartz and chloritic schist. Blue Jacket M.L. (632), 3 miles E. of Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

6267. ——. *Assoc.with* Copper Pyrites, Redruthite, and Limonite, in gossan, quartz, and slate. Little Beauty M.L. (568), 2½ miles E.N.E. Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 44-47 (1908).

6268. ——. *Assoc.with* Copper Pyrites, Redruthite, Covelline (?), Tile Ore, Iron Pyrites, Limonite, and Calcite, in chloritic schist. Monarch Senior M.C. (352), 3 miles E. of Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42, 43 (1908).

6269. ——. *Assoc.with* Cuprite and Limonite, in quartz and quartzite *Loc.* Mt. Hope M.L. (366), Green's Cr., trib. of Burke R., 53½ miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 38, 39 (1908).

6270. ——. *Assoc.with* Azurite and Ironstone. *Loc.* Trikelana M.L. (522), Pilgrim's Cr., Burke R., 68 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* A.R., p. 116 (1907).

6271. ——. *Assoc.with* Copper Pyrites, Redruthite, Chrysocolla, and Limonite, in quartz and kaolin. *Loc.* Trikelana M.L. (522) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 26 (1908).

6272. ——. *Assoc.with* Cuprite and Azurite, in schist, quartz, and kaolin. *Loc.* Horse Cr. M.L. (220, etc.), 50 miles S.S.W. of Cloncurry, Horse Cr. Group. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, pp. 15, 16 (1908).

6273. ——. *Assoc.with* Gold, Cuprite, Tile Ore, Tenorite, Atacamite, Chalcanthite, Iron Pyrites, Limonite, Calcite, and Chalcedony, in kaolinised slate and gossan. *Loc.* Mt. Elliott Copper R.C., M.L. (3, etc.) (Mt. Elliott Group), Maggie's Cr., 58 miles S. of Cloncurry. *Co.* Merlin (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 3-12 (1908).

6274. ——. *Assoc.with* Cuprite and Tenorite, in quartz. *Loc* Mt. Elliott Copper Mine (*ante*). *Ref.* A.R., p. 118 (1907).

6275. ——. *Assoc.with* Tile Ore. *Loc.* Mt. Merlin Stn., 84 miles S.byW. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.M.

6276. ——. Bismarck Mine, Coolgarra, 12 miles (by road) N.E.byN. of Mt. Garnet Rail. Stn. (Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

6277. ——. *Assoc.with* Silver, Minium, Anglesite, and Galena, in quartz. *Loc.* Koh-i-Noor Mine, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

6278. ——. *Assoc.with* Cuprite and Azurite, in quartz. *Loc.* Round Mountain, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

6279. ——. *Assoc.with* Cassiterite, Wolfram, Iron Pyrites, Göthite, Hematite, Limonite, Mispickel, Penninite, Azurite, Chlorite, Topaz, Websterite, and Fluorspar, in quartz. *Loc.* Tin Mines, Coolgarra (*ante*).

6280. ——. *Assoc.with* Galena, in gossan. *Loc.* McFadden's or Paddy's Lode, Dry R. Tin Mines, Wild R., 12 miles S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

6281. ——. *Assoc.with* Tile Ore and Azurite, in lode. *Loc.* P.C., Dry R. Tin Mines (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

6282. ——. *Assoc.with* Azurite and Cassiterite. *Loc.* Gt. Northern P.C., Herberton, 12 miles S.S.W. of Atherton Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

6283. ——. *Assoc.with* Cassiterite and Talc, in quartz. *Loc.* Orient Tin Claim, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 13 (1883).

6284. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Cuprite, Tenorite, Malachite, Chalcanthite, Iron Pyrites, Mispickel, Hematite, Magnetite, Zinc Blende, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mine, Return Cr., 136 miles (by rail) S.W. of Cairns. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pubs. 72, p. 15 (1891), 134, p. 16 (1898).

6285. ——. *Assoc.with* Tetrahedrite, Azurite, Galena, Mimetite, Hematite, and Limonite, in lode. *Loc.* Mt. Garnet, Return Cr. (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

For other Walsh and Tinaroo References, *see under* Cook District, Nos. 6210, &c.

6286. ——. *Assoc.with* Iron Pyrites, Magnetite, Ironstone, Graphite, Garnet, and Calcite. *Loc.* Double-Barrel Cr., 27 miles (by rail) S. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* L.B. 2, p. 729 (1892).

6287. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Garnet, in calcite. *Loc.* Hein's Lode, Limestone Range, W. of Double-Barrel Cr. (*ante*). *Ref.* G.S.Q. Pub. 77, p. 7 (1891).

6288. ——. *Assoc.with* Gold, Copper Pyrites, Tenorite, Iron Pyrites, Mispickel, and Zinc Blende. *Loc.* Buck Reef, ½-mile S.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 76 (1887).

6288A. ——. *Assoc.with* Azurite, in quartz. *Loc.* Federal M.L. (60), Soda Water Cr., Ravenswood Goldfield (*ante*). *Ref.* A.R., p. 213 (1910).

6288B. ——. *Assoc.with* Cuprite, in quartz. *Loc.* Hayden Show, Wyandotte, 48 miles S.E. of Mt. Surprise Rail. Stn. (Etheridge line). *Co.* Gunawarra; *Dist.* Kennedy North. *Ref.* A.R., p. 178 (1909).

6288C. ——. *Assoc.with* Galena, in quartz. *Loc.* Old Harry Show, Wyandotte (*ante*). *Ref.* A.R., p. 178 (1909).

6288D. ——. *Assoc.with* Tile Ore, in quartz lode. *Loc.* Valley of Lagoons Run, 6 miles E. of Wyandotte Tel. Stn., about 64 miles S.E.byE. of Mt. Surprise Rail. Stn. (Etheridge line). *Co.* Gunawarra; *Dist.* Kennedy North. *Ref.* A.R., p. 176 (1909).

6289. ——. *Assoc.with* Gold, Cuprite, and Hematite. *Loc.* Copper King Mine, Happy Valley, 41½ miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., p. 62 (1906).

6290. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, and Azurite, in quartz reef. *Loc.* Venture Reef, Marengo Goldfield, 24 miles S.S.W. of Bowen. *Co.* Herbert (*ante*). *Assay: See* No. 7490. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

6291. ——. *Assoc.with* Cuprite and Hematite. *Loc.* Mt. Cavanagh, Mare's Nest Cr., Normanby Road, 44 miles S.S.E. of Bowen. *Co.* Herbert (*ante*). *Assays: See* No. 2459. *Ref.* A.R., p. 60 (1906).

6291A. Malachite. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, and Limonite. *Loc.* Mare's Nest Cr., Andromache R., 44 miles S.S.E. of Bowen. *Co.* Herbert (*ante*). *Ref.* A.R., p. 271 (1910).

6292. ——. *Assoc.with* Gold and Copper Pyrites, in quartz. *Loc.* Overland Reef, between Dreghorn and Burdekin R., 14 miles S. of Ravenswood. *Co.* Murray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

6293. ——. *Assoc.with* Gold, Copper Pyrites, Azurite, and Chalcanthite, in quartz reef in granite. *Loc.* Continong Mine, Burdekin R., 70 miles W. of Townsville. *Co.* O'Connell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 35, p. 12 (1887), and G.S.M.

6294. ——. *Assoc.with* Tile Ore and Malachite, in quartz. *Loc.* Stockyard Cr. Silver Mine (Coane's Shaft), Stockyard Cr., trib. of Basalt R., Hillgrove Run, 70 miles N.N.W. of Charters Towers. *Co.* O'Connell (*ante*). *Ref.* G.S.Q. Pub. 94, p. 13 (1893).

6295. ——. Bowen R., 50 miles S.W. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 3, p. 2 (1879).

6296. ——. Pelican Cr., br. of Bowen R. (*ante*). *Ref.* G.S.Q. Pub. 3, p. 2 (1879).

6297. ——. In outcrop of quartz reef, between Wangaratta Stn. and Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Assay:* Copper = 8 per cent.

6298 ——. *Assoc.with* Copper Pyrites and Cerussite. *Loc.* Alice Shaft, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

6299. ——. *Assoc.with* Galena, Cerussite, Azurite, and Manganese-dioxide. *Loc.* Bonnybrook Lease (178), Running R., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), 82, p 4 (1892).

6300. ——. *Assoc.with* Native Silver, Galena, Cerussite, Chrysocolla, Mispickel, Zinc Blende, Hematite, and Manganese-dioxide, in kaolin lode. *Loc.* Hidden Treasure Lease (165), nr. Donnybrook, Running R., Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), 82, p. 7 (1892), and G.S.M.

6301. ——. *Assoc.with* Azurite, Cassiterite, Iron Pyrites, Hematite, and Limonite, in quartz and chlorite. *Loc.* M.L. (40 acres), in gully, trib. of Douglas Cr., Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 71, p. 9 (1891).

6302. ——. Ingola (Long Lode), Tunnel Lease (177), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

6303. ——. *Assoc.with* Azurite, Hematite, and Limonite, in lode. *Loc.* Iron Mt., N. of Donnybrook, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 10, p. 71 (1891).

6304. ——. *Assoc.with* Cuprite, Azurite, and Limonite. *Loc.* Kallanda, Kangaroo Hills Mineral Field (*ante*). *Ref.* A.R., p. 106 (1907).

6305. ——. *Assoc.with* Galena, Cerussite, Chrysocolla, Manganese-dioxide, Lievrite, and Garnet. *Loc.* Mt. Hishon Lease (210), Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2969. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6306. ——. *Assoc.with* Bornite. *Loc.* Newton's Shaft, Day Dawn Lease (170), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

6307. ——. *Assoc.with* Cerussite. *Loc.* Pinnacle Mine, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.M.

6308. ——. *Assoc.with* Azurite, in No. 3 Shaft, northern lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

6309. ——. *Assoc.with* Azurite, in quartz. *Loc.* Victory Extd. Lease (188), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

6310. ——. *Assoc.with* Azurite. *Loc.* Waverley Tin Mines, Kangaroo Hills Mineral Field (*ante*).

6311. ——. *Assoc.with* Copper Pyrites, Galena, Cerussite, Minium, Mispickel, Manganese-dioxide, Ironstone, and Iron Ochre. *Loc.* Colorado Silver Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* (and *Assays*) G.S.Q. Pub. 26, p. 7 (1886).

6312. ——. *Assoc.with* Gold and Tenorite, in quartz. *Loc.* Excelsior Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.M.

6313. —— (and Anglesite). *Assoc.with* Hematite. *Loc.* Lady Annie Mine, Star R. (Argentine) Mineral Field (*ante*). *Assays:* (1) Lead = 69 per cent.; Silver = 186 oz. per ton. (2) Lead = 59 per cent.; Silver = 166 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

6314. ——. *Assoc.with* Minium and Cerussite, in lode. *Loc.* Royal Standard Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

6315. ——. *Assoc.with* Native Copper and Chrysocolla. *Loc.* E. side of Townsville Road, nr. Dalrymple, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 68 (1887).

6316. ——. *Assoc.with* Native Copper, Azurite, and Chrysocolla. *Loc.* Keelbottom Copper Mine, Star R., br. of Burdekin R., 2 miles N.N.E. of Dalrymple, 21 miles N.W.byN. of Charters Towers. *Co.* Wilkie Gray (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 43 (1887), and G.S.M.

6317. ——. *Assoc.with* Cuprite and Azurite. *Loc.* Kennedy Copper Mine, Sandy Cr., br. of Burdekin R., 50 miles W. of Townsville. *Co.* Wilkie Gray (*ante*). *Ref.* O.R.

6317A.——. *Assoc.with* Gold and Limonite, in quartz. *Loc.* Highland Chief Reef, Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 229, p. 30 (1910).

6318. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, Siderite, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pub. 54, p. 2 (1889).

6319. ——. *Assoc.with* Iron Pyrites, Malachite, and Galena, in quartz. *Loc.* Duffy's Mine, Blue Mts., 9 miles S.byE. of Eton Rail. Stn., 32 miles (by rail and road) S.byW. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South (*ante*). *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

6320. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Mackay's Claim, Blue Mts. (*ante*). *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

6321. ——. *Assoc.with* Azurite and Calcite. *Loc.* Emu Plains Silver Field, Bowen R., 50 miles S. of Bowen. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 54, p. 5 (1889).

6322. ——. *Assoc.with* Gold, Copper Pyrites, and Tile Ore, in lode. *Loc.* Shaft nr. Old Orchid, No. 1 N. Claim, Eungella Goldfield, 48 miles W.S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* A.R., p. 155 (1908).

6323. ——. *Assoc.with* Gold, in quartz. *Loc.* P.A., Finch Hatton, 38 miles (by rail) W.S.W. of Mackay. *Co.* Carlisle (*ante*). *Assay:* Gold = 1 dwt. per ton; Silver = 39 oz. per ton; Copper = 8·2 per cent. *Ref.* A.R., p. 101 (1907).

6324. ——. *Assoc.with* Copper Pyrites, Azurite, Galena, Cerussite, Iron Pyrites, Mispickel, and Zinc Blende, in quartz lode. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 3 (1889), 181, pp. 12-17 (1903), and 229, pp. 34, 35 (1910).

6325. ——. *Assoc.with* Gold, Iron Pyrites, Ironstone, and Chlorite, in quartz reef. *Loc.* Head of Spring Cr., Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

6325A.——. *Assoc.with* Azurite, in quartz and gossan. *Loc.* John Downie Copper Lode, Por. 83v, Mia Mia, Cattle Cr., 5 miles W. of Finch Hatton (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 229, pp. 36, 37 (1910).

6325B.——. *Assoc.with* Copper Pyrites and Azurite, in quartz. *Loc.* Mountain Bull Lode, Por. 7v, Mia Mia, Cattle Cr. (*ante*). *Ref.* G.S.Q. Pub. 229, p. 36 (1910).

6325C.——. *Assoc.with* Bornite. *Loc.* Silver King Lode, between Pors. 99v and 83v, Mia Mia, Cattle Cr. (*ante*). *Ref.* G.S.Q. Pub. 229, pp. 36, 37 (1910).

6326. ——. *Assoc.with* Azurite and Earthy Hematite, in quartz. *Loc.* O'Brien's Mine, 2 miles W. of Pine Vale Mine, Pine Vale Cr., Pioneer R., 11 miles S.byE. of Eton Rail. Stn., 34 miles (by rail and road) S.W.byS. of Mackay, Mt. Spencer Gold and Mineral Field. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 53, p. 10 (1889), and 229, pp. 12-17 (1910).

6326A.——. *Assoc.with* Silver, Azurite, and Limonite, in lode. *Loc.* Nr. Finch Hatton Rail. Stn. (Mackay line), 38 miles W.S.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* A.R., p. 280 (1910).

6327. ——. *Assoc.with* Gold, Copper Pyrites, Tenorite, Tetrahedrite, Azurite, Galena, and Ironstone, in quartz. *Loc.* Pine Vale Copper Mine, Pine Vale Cr. (*ante*). *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

6328. ——. Biralee Stn., Bowen R., 60 miles S.W. of Bowen. *Co.* Drake; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 3, p. 2 (1879).

6329. Malachite. *Assoc.with* Gold, Copper Pyrites, Cuprite, Azurite, Galena, Bismuth (native), Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Hematite, and Ironstone, in lode. *Loc.* Daisy Bismuth Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Analysis: See* No. 350. *Ref.* G.S.Q. Pub. 57, p. 7 (1889), and G.S.M.

6330. ——. *Assoc.with* Azurite and Limonite. *Loc.* Lady Jane Mine, Eukalunda (*ante*). *Ref.* O.R.

6331. ——. *Assoc.with* Cuprite. *Loc.* Lady Mary Mine, Eukalunda (*ante*). *Ref.* O.R.

6331A. ——. *Assoc.with* Azurite, in gossan. *Loc.* Nr. Burdekin Falls, about 83 miles S.W.byW. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* O.R. (1910).

6332. ——. *Assoc.with* Copper Pyrites and Azurite, in lode, in granite country. *Loc.* Lady Mary Mine, Mt. Wyatt Goldfield, 60 miles S.S.E. of Ravenswood Rail. Stn. *Co.* Sellheim (*ante*). *Assays: See* No. 2265. *Ref.* A.R., p. 74 (1906).

6333. ——. *Assoc.with* Cuprite and Azurite. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* P.R.S.Q., vol. 4, p. 77 (1887).

6334. ——. *Assoc.with* Azurite and Ironstone, in pipe vein. *Loc.* Freedom of Contract 1 Mine, Ruby Cr., 6½ miles N.E.byN. of Withersfield Rail. Stn. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

6335. ——. *Assoc.with* Bornite and Limonite, in lode. *Loc.* Freedom of Contract 2 Mine (*ante*). *Assay:* Copper = 17 per cent.; Silver = 4 oz. per ton. *Ref.* G.S.Q. Pub. 81, p. 4 (1892).

6336. ——. In small irregular patches at contact of diorite and slate. *Loc.* Rannes Stn., 34 miles S. of Westwood Rail. Stn. (Central line), 65 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Ferguson; *Dist.* Leichhardt. *Ref.* B.D.

6337. ——. *Assoc.with* Ferro-Calcite and Epidote. *Loc.* Collaroy Stn., 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.M.

6338. ——. *Assoc.with* Gold, Silver, and Mispickel, in quartz. *Loc.* Ironbark Mine, Miners' Cr., Collaroy (*ante*). *Assay: See* 4181. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

6339. ——. *Assoc.with* Copper (native) and Azurite, in epidote rock. *Loc.* On hill, W. br. of Murray Cr., Collaroy (*ante*). *Assay:* Copper = 2·4 per cent. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

6339A. ——. *Assoc.with* Azurite, in slate. *Loc.* Absolon's M.F. 2417, Royal Prince M.C. (54), Sunbeam M.L. (30), and Wallaroo M.F (634), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, pp. 19, 20, 43, 45 (1910).

6339A(1). ——. *Assoc.with* Azurite, Copper Pyrites, and Hematite, in quartz. *Loc.* Ballyhooley Claim, 5 miles from Mt. Flora Freehold, Mt. Flora Gold and Mineral Field (*ante*). *Assay: See* 2269H. *Ref.* A.R., p. 243 (1910).

6339B. ——. In granite and slate. Banner of Freedom M.L. (33), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 20 (1910).

6339C. ——. *Assoc.with* Chrysocolla and Hematite, in granite. *Loc.* Brown's M.F. (1807), Native Youth P.P.A. (129), and Paddock Workings, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 21, 39 (1910).

6339D. ——. *Assoc.with* Tile Ore. *Loc.* Clooracorn P.P.A. 147, Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 21, 39 (1910).

6339E. ——. *Assoc.with* Azurite, in granite. *Loc.* Comet P.P.A. (135) and Robertson Front Sel., M.F. (1828), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 22, 41 (1910).

6339F. ——. *Assoc.with* Redruthite, in granite. *Loc.* Dalrymple M.F. (1865), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 22 (1910).

6339G. ——. *Assoc.with* Azurite, Limonite, and Jasper, in gossan in granite and slate. *Loc.* Eastern Sel. M.F. (2755), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 288, p. 23 (1910).

6339H. ——. *Assoc.with* Azurite, Hematite, and Manganese-dioxide, in granite. *Loc.* Emperor P.P.A. (320), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 25 (1910).

6339I. ——. *Assoc.with* Azurite, Hematite, and Mispickel, in slate. *Loc.* Fitzgerald's M.F. (1408), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, p. 26 (1910).

6339J. ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, Iron Pyrites, and Ironstone, in slate. *Loc.* Isen's M.F. (2642), Mt. Flora Gold and Mineral Field (*ante*). *Assay: See* No. 2269B. *Ref.* G.S.Q. Pub. 228, pp. 27-29 (1910).

6339k.——. *Assoc.with* Copper Pyrites, Azurite, Iron Pyrites, and Hematite, in granite. *Loc.* Iron Duke M.C. (42) and Painted Peak M.F. (1807), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 27, 39 (1910).

6339l.——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Azurite, in gossan in slate. *Loc.* Keeley's M.F. (2382), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 29, 30 (1910).

6339m.——. *Assoc.with* Copper Pyrites, Iron Pyrites, Azurite, and Hematite, in gossan in slate. *Loc.* Laird of the Hills M.L. (32), Mt. Flora Gold and Mineral Field (*ante*) *Ref.* G.S.Q. Pub. 228, pp. 30, 31 (1910).

6339n.——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, Iron Pyrites, Chlorite, and Calcite, in slate and granite. *Loc.* MacFadzen's M.F. (1749) (Douchang, Flora, Essie, Dozzler, Green Outcrops Lodes), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 31-35 (1910).

6339o.——. *Assoc.with* Azurite and Chrysocolla, in gossan in granite. *Loc.* Marjorie M.L. (31), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 35, 36 (1910).

6339p.——. *Assoc.with* Redruthite, Azurite, Iron Pyrites, Hematite, and Limonite, in granite. *Loc.* Monarch P.P.A. (116, etc.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

6339q.——. *Assoc.with* Copper Pyrites, Azurite, Iron Pyrites, Pyrrhotite, Hematite, Limonite, and Magnetite, in granite and slate. *Loc.* Rodger's Back Sel. M.F. (1430), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

6339r.——. *Assoc.with* Mispickel and Hematite, in gossan in granite. *Loc.* True Blue M.L. (29), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 43, 44 (1910).

6339s.——. *Assoc.with* Copper Pyrites, Tenorite, Azurite, and Hematite. *Loc.* Mt. Orange Copper Mines, 75 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* P.R.S.Q., vol. 4, pp. 52, 77 (1887).

6340. ——. *Assoc.with* Tetrahedrite, in lode, and in tuffaceous shales. *Loc.* Balcomba Range, 24 miles N. of Duaringa, 90 miles (by rail and road) W. of Rockhampton (Central line). *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

6341. ——. *Assoc.with* Azurite and Ironstone, in pipe of ore. *Loc.* Ruby Cr., 8 miles N.N.W. of Anakie Rail. Stn., 201 miles (by rail) W. of Rockhampton. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* B.D.

6342. ——. *Assoc.with* Azurite, in altered slate. *Loc.* Bonser P.P.A. (133), in gully N. of Boothill Cr., 3¼ miles W. of Tierawoomba Homestead, about 50 miles S.S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, p. 50 (1910).

6343. ——. *Assoc.with* Gold and Ironstone, in quartzite. *Loc.* Blackbutt, 14 miles W.byS. of Benarkin Rail. Stn. (Brisbane-Valley line), 125 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* O.R.

6344. ——. *Assoc.with* Azurite, in altered sedimentary rocks. *Loc.* Gt. Pyramid Copper and Silver Mine, Cressbrook Cr., 2 miles S.W. of Rising Star, about 14 miles N. of Esk Rail. Stn. (Brisbane-Valley line), 81 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

6345. ——. *Assoc.with* Cuprite and Azurite, in quartz lode. *Loc.* 7-Mile Diggings, 7 miles S.E. of Nanango, about 15 miles N.W.byW. of Benarkin Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 29, p. 2 (1886).

6346. ——. *Assoc.with* Gold, Ironstone, and Copper Oxide, in quartz. *Loc.* Black Diamond Mine, nr. Taromeo, 6 miles W.N.W. of Benarkin Rail. Stn. (Brisbane-Valley line), 117 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish (*ante*). *Assay: See* No. 4203. *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

6347. ——. *Assoc.with* Native Copper and Native Silver, in lode. *Loc.* Red Queen Mine, nr. Taromeo (*ante*). *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

6348. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Azurite, and Malachite. *Loc.* Par. of Dixon (Por. 140), 13 miles E. of Esk Rail. Stn., 70 miles (by rail and road) N.W.byN. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Assay: See* No. 2280. *Ref.* A.R., pp. 156, 157 (1908).

6349. Malachite. *Assoc.with* Bismuthinite, Bismutite, and Minium, with traces of Gold, in quartz. *Loc.* Mt. Samford, Enoggera Ranges, 6½ miles W. of Brisbane. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 159, p. 18 (1890).

6350. ——. *Assoc.with* Azurite and Copper Pyrites, in garnet rock. *Loc.* P. Area, Diglum Cr., Barmundoo, 21 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

6351. ——. *Assoc.with* Gold, Silver, Azurite, and Mispickel, in quartz, ironstone, and clay. *Loc.* P. Area (56), Diglum Cr., Barmundoo (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

6352. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, Azurite, Iron Pyrites, Hematite, Magnetite, Limonite, and Calcite. *Loc.* Many Peaks Copper Mine, 58 miles (by rail) S. of Gladstone (Boyne Valley line). *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 150, p. 8 (1900), 194, p. 28 (1904).

6353. ——. *Loc.* Blue Bag Shaft, Glassford Cr. Copper Mine, 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne-Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.M.

6354. ——. *Assoc.with* Bornite, Copper Pyrites, Cuprite, Tenorite, Azurite, Galena, Zinc Blende, Hematite, Magnetite, Garnet, Chlorite, and Calcite. *Loc.* Copper Mines, Glassford Cr. (*ante*). *Ref.* G.S.Q. Pubs. 150, p. 5 (1900), and 194, p. 28 (1904).

6355. ——. *Assoc.with* Azurite, in dyke. *Loc.* Maxwelton Goldfield, 35 miles S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Assay: See* No. 244. *Ref.* A.R., p. 111 (1907).

6356. ——. *Assoc.with* Actinolite. *Loc.* Mt. Alma Stn., Calliope R., 30 miles S.W.by W. of Gladstone. *Co.* Clinton (*ante*).

6356A. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, and Ironstone, in crystalline limestone. *Loc.* Mt. Hector Mine, E. side of Dawes Range, 60 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* Q.G.M.J., vol. 4, pp. 174-177 (1903).

6357. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Zinc Blende, and Galena, in quartz. *Loc.* Brigham Young (Tadman's Tapautohaunga), Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 208, pp. 15, 16 (1907).

6358. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Azurite, Iron Pyrites, Mispickel, Scorodite, and Zinc Blende, in quartz. *Loc.* Chandler's Reefs, Norton Goldfield (*ante*). *Assay: See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

6358A. ——. *Assoc.with* Bornite, Azurite, and Limonite, in quartz lode. *Loc.* 4 miles from Mt. Bennett, about 30 miles W.S.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* A.R., p. 218 (1910).

6359. ——. *Assoc.with* Cuprite and Azurite, in quartz lode. *Loc.* 2 miles W. of Old Diggings, nr. Raglan Goldfield, 34 miles (by rail) W.N.W. of Gladstone. *Co.* Deas Thompson (*ante*). *Ref.* G.S.Q. Pub. 21, p. 2 (1885).

6360. ——. *Assoc.with* Copper Pyrites, in small vein near Arthur's Reef. *Loc.* Targinnie Goldfield, 4 miles N.N.W. of Yarwun Rail. Stn. (N. Coast line), 15 miles (by rail and road) N.W.by W. of Gladstone. *Co.* Deas Thompson (*ante*). *Ref.* B.D.

6361. ——. *Assoc.with* Azurite, in quartz and felspathic rock. *Loc.* Targinnie Goldfield (*ante*). *Assay: See* No. 248. *Ref.* A.R., p. 104 (1907).

6362. ——. *Assoc.with* Azurite and Cuprite, in granite. *Loc.* Iveragh Copper Lode, Iveragh Cr., Boyne R., 20 miles S. of Gladstone. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 3 (1885).

6363. ——. *Assoc.with* Hematite, in quartz. *Loc.* Miriam Vale, 43 miles (by rail) S. byE. of Gladstone. *Co.* Flinders (*ante*). *Ref.* L.C.B.

6364. ——. In small quantities. *Assoc.with* other Copper Ores. *Loc.* Great Fitzroy Copper Mine, Mt. Chalmers, 4 miles N.W. of New Zealand Gully Rail. Stn., 19 miles (by rail and road) N.E. of Rockhampton, Cawarral Goldfield. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 216 (1907).

6365. ——. *Assoc.with* Silver, Cuprite, Tenorite, Cerussite, Iron Pyrites, Zinc Blende, and Barytes. *Loc.* Mt. Warminster, nr. Mt. Chalmers, 20 miles (by rail) N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* O.R.

6366. ——. *Assoc.with* Gold and other Copper Ores. *Loc.* Alliance Mine, Morinish Goldfield, 29 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* Q.M.

6367. ——. *Assoc.with* Copper Pyrites and Azurite. *Loc.* Conachan's Sel., W. of Quarry Cr., 3 miles E. of Stanwell Rail. Stn., 19 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

6368. ——. *Assoc.with* Native Copper, Cuprite, and Azurite, in epidote rock. *Loc.* Copper Deposits, Clairview, 12 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

6369. ——. *Loc.* Connor's Range, 15 miles N.W. of St. Lawrence. *Co.* Murchison (*ante*). *Ref.* Q.M.

6370. ——. *Assoc.with* other Copper Ores, in quartz reef in clay slates. *Loc.* Gogango Ranges, 4 miles from Gogango Rail. Stn. (Central line), 43 miles (by rail) S.W. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* Q.M.

6371. ——. *Loc.* Westwood, 31 miles (by rail) S.W. of Rockhampton (Central line). *Co.* Pakington (*ante*). *Ref.* Q.M.

6372. ——. *Assoc.with* Azurite and Magnetite. *Loc.* Kroombit Cr., 5 miles above Kroombit Hd. Stn., 55 miles S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

6372A.——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Iron Pyrites, Hematite, Magnetite, and Limonite, in gossan lodes. *Loc.* M.L. (262), Kroombit Copper Mines, 4¼ miles E.S.E. of Kroombit Hd. Stn., 56 miles S.S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* Q.G.M.J., vol. 7, p. 98 (1906).

6373. ——. *Assoc.with* Gold, Silver, Galena, Copper (native), Copper Pyrites, Redruthite, Cuprite, Azurite, Molybdenite, Iron Pyrites, and Ironstone, in granitic rock. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pubs. 143, p. 27 (1899); 156, p. 2 (1900); and 196, pp. 18-20 (1904).

6374. ——. *Assoc.with* Copper Pyrites, in quartzite rock. *Loc.* Old Dee Copper Mine, 3 miles N.E. of Mt. Morgan Rail. Stn., 27 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* A.R., p. 85 (1907).

6375. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Azurite, Galena, Zinc Blende, Iron Pyrites, and Calcite, in slate, diorite, andesite, etc. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. of Gympie. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* Q.G.M.J., vol. 8, pp. 524-526 (1907).

6376. ——. *Assoc.with* Azurite and Cuprite. *Loc.* Luge-e-nor Lode, Calgoa Copper Mines, Thunder Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* B.D.

6377. ——. *Assoc.with* Copper Pyrites, Azurite, Galena, and Mispickel, in granitic dyke. *Loc.* Calgoa West Lode, Calgoa Copper Mines (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

6378. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tenorite, Azurite, Iron Pyrites, Hematite, and Limonite, in lodes in syenitic granite. *Loc.* Calgoa Copper Mines (*ante*). *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

6379. ——. *Assoc.with* Azurite. *Loc.* Federal P.A., Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Assay: See* No. 256. *Ref.* A.R., p. 100 (1907).

6380. ——. *Assoc.with* Gold, Iron Pyrites, Redruthite, Cuprite, Bismuthinite, Magnetite, and Limonite. *Loc.* Kabonga Mine, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897), and G.S.M.

6381. ——. *Assoc.with* Gold and Azurite, in quartz leader. *Loc.* New Year's Reef, Kilkivan Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886).

6382. ——. *Assoc.with* Azurite, in gossan. *Loc.* Mudloo Copper Lease, Marodian Goldfield, 5 miles N.N.W. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Yield:* Copper = 20 to 25 per cent. (hand picked). *Ref.* G.S.Q. Pub. 179, p. 10 (1902).

6382A.——. *Assoc.with* Redruthite. *Loc.* Sunnyside, Mudloo, Marodian Goldfield (*ante*). *Ref.* L.C.B.

6383. ——. *Assoc.with* Tetrahedrite, Cuprite, Azurite, and Hematite, in quartz. *Loc.* White Rocks Copper Lease, Marodian Goldfield (*ante*). *Ref.* G.S.Q. Pub. 179, p. 11 (1902).

6384. Malachite. *Assoc.with* Azurite and Tile Ore, in quartz. *Loc.* Mt. Alice, S. of Bullock Cr., Gigoomgan Stn., 25 miles W.S.W. of Maryborough. *Co.* Lennox; *Dist.* Wide Bay. *Assay: See* No. 259. *Ref.* A.R., p. 112 (1907).

6385. ——. *Assoc.with* Copper Pyrites, Redruthite, Cuprite, Tile Ore, and Azurite, in quartz. *Loc.* Teebar Copper Lode, Munna Cr., nr. Clifton Stn., 2 miles S. of Boompa Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 7 (1890), and G.S.M.

Manganese (Mn.). *Atom.wt.*, 54·93 *Sp.gr.* 8·0. *Colour*, reddish-white metallic, somewhat like cast iron. Brittle. Hard. Crystalline.

MINERALS: *See* Asbolane, "Manganese dioxide," Manganite, Psilomelane, Pyrolusite, Rhodochrosite, Rhodonite, Wad, Wolfram.

MINERAL NOTE: In Queensland manganese commonly occurs as Psilomelane in association with Rhodonite, Rhodochrosite, and Pyrolusite, and is of frequent occurrence with ores of iron, lead, copper, zinc, bismuth, and with Calcite, Fluorspar, Talc, Garnet, and Wolfram. The rocks in which manganese is found include kaolin, limestone, schists, serpentine, slate and other sedimentary rocks, chlorite, granite, greisen, etc. It is often found as Wad on or near Wolfram, being formed as a decomposition product of that mineral. It is common in the rocks of the Gympie Goldfield, in Middle Gympie Formation, but is an unfavourable feature in gold-mining, as gold is rarely present in quartz where the reefs on this field come in contact with slate that is manganiferous. Slate that contains graphite is a favourable feature under the same conditions.

USES: Manganese ores are smelted with iron to form ferro-manganese and spiegel-eisen, both these alloys being commonly used in the processes of hardening and toughening steel. With copper it forms a very tough alloy called manganese bronze. Compounds of manganese are used in glass-staining, pottery, dyeing, calico printing, as a flux in smelting ores, as a disinfectant, in the generation of chlorine gas, and in making cells for batteries in electrical work. The minerals Pyrolusite and Psilomelane are much in demand for chlorine making, on account of their high percentage of available dioxide, and these, with Asbolite, Braunite, Manganite, and Rhodochrosite, are also suitable for most other metallurgical processes. Rhodonite, in addition, is used as an ornamental stone for inlaid work on account of its pleasant pink colour.

GEOLOGICAL NOTE: Some miles to the south of Gympie there exists an enormous area of undeveloped manganese-bearing country lying as a belt between the Lower Gympie Formation (Permo-Carbonifercus) and serpentine, the manganese forming large irregular masses in slate, quartzites, and jasper. The country is difficult to prospect, being very rugged and mostly covered with dense scrub. Deposits occur in many other places, principally near Gladstone, in similar country. *See* G.S.Q. Pubs. 190, 194 for details.

MINERAL STATISTICS: *See tables and diagrams*, Pls. 40, 45, 46, 46A, 53.

STATISTICAL NOTE: Only a small quantity of manganese has been produced, the amount being 17,004 tons, having a value of £64,589, most of which has been obtained from the Gladstone District, and utilised by the Mount Morgan Gold Mining Company. Most of the manganese used in the Commonwealth is imported from Russian mines, and contains about 80 per cent. of available manganese dioxide.

DISCOVERY: The manganese deposits of Mt. Millar, near Gladstone, were found in 1895; those at Pie Creek, south of Gympie, in 1908.

6402. ——. *Assoc.with* Limonite. *Loc.* Stewart's Gt. Eastern Mine, Cadarga (*ante*).

6402A. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Limonite, in quartz. *Loc.* Cadarga Cr. Gold Mines, between Auburn R. and Cadarga Cr. (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

6403. ——. *Assoc.with* Gold, in quartz. *Loc.* South Cross Reef, Limestone, Palmer Goldfield, 60 miles S. of Laura Rail. Stn. (Cooktown line), 127 miles (by rail and road) S.W. of Cooktown. *Co.* Chelmsford; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 46, p. 1 (1889).

6404. ——. *Assoc.with* Quartz. On hill, N. of Mitchell R., below mouth of St. George R., 6 miles S.E. of Limestone, Palmer Goldfield. *Co.* Dagmar; *Dist.* Cook. *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

6405. ——. *Assoc.with* Limonite and traces of Gold, in large lode. *Loc.* On hill, N. of Mitchell R., below mouth of St. George R. (*ante*). *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

6406. ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Lady Franklin Reef, Caledonia Cr., br. of Goldsmith Cr., 9 miles S.E. of Charleston Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

6407. ——. *Assoc.with* Cassiterite and Ironstone, in altered sandstone. *Loc.* Tourmaline United Mine, on Baker's Cr., 4 miles W. of Watsonville, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 27 (1897).

6408. —— (earthy). *Assoc.with* Wolfram, Scheelite, Molybdenite, Bismuth (native), Bismuthinite, Bismutite, Cassiterite, Mispickel, and Scorodite, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz, in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6409. ——. *Assoc.with* Galena, Massicot, Anglesite, Cerussite, and Actinolite, in limestone and granite. *Loc.* Macrossan Mine, 2 miles E. of Chillagoe Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay: See* No. 28. *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

6410. ——. *Assoc.with* Native Copper, Tetrahedrite, Cuprite, Malachite, Azurite, Hematite, and Selenite, in quartz. *Loc.* Griffith Copper Lease, head of Julia Cr., 2 miles S.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 5 (1891), and 134, p. 11 (1898), and G.S.M.

6411. ——. *Assoc.with* Tetrahedrite, Malachite, Ironstone, Limonite, and Siderite. *Loc.* Queenslander Copper Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 7 (1891).

6412. ——. In quartz. *Loc.* Ord (on Mt. Garnet Rail. line), 120 miles W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* O.R.

6413. ——. *Assoc.with* Quartz Veins, in contorted mica and talc schist. *Loc.* Entrance of Mourilyan Harbour, 130 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Ref.* B.D.

6414. ——. *Assoc.with* Gold, Bismutite, Magnetite, Limonite, Ruby, and Garnet, in alluvial deposits. *Loc.* Agate Cr., br. of Robertson R., 38 miles S. of Georgetown, 21 miles S.S.W. of Charleston, Etheridge. *Co.* Victor; *Dist.* Cook. *Ref.* L.B. 1, p. 940 (1887).

6415. ——. *Assoc.with* Asbolane (as Cobaltiferous Wad), in small quantities in clay matrix. *Loc.* Pittsworth, 36 miles (by rail) S.W.byW. of Toowoomba. *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* G.S.M. and A.R., p. 144 (1908).

6416. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Glenelg Reef, nr. Oakey Cr., 55 miles (by road) W.S.W. of Warwick. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 40, pp. 1, 2 (1887).

6417. ——. *Assoc.with* Psilomelane, Pyrolusite, and Limonite. *Loc.* Pikedale Hotel, 11 miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

6418. ——. *Assoc.with* Copper Pyrites, Redruthite, Copper carbonate, Galena, Zinc Blende, and Ironstone, in lode. *Loc.* Pikedale Silver Mine, Woolshed Gully, Pikedale Hd. Stn., 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

6419. ——. Glenlyon, 30 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

6420. ——. Six miles N. of Silver Spur Mine, Texas, 49 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Ref.* L.C.B.

6421. ——. Canal Cr. Goldfield, 28 miles W.byS. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 29 (1897).

6422. ——. Occurs as lode several feet wide, sometimes 20 ft. thick. *Loc.* Manganese Hill, on Sandy Cr. road, 7 miles due west of Warwick. *Co.* Merivale (*ante*). *Yields:* 200 tons averaged 50 per cent. available Manganese-dioxide. *Ref.* B.D.

6423. ——. In lode. *Loc.* Mt. Gammie, 1½ mile from Thane's Cr., 25 miles W. of Warwick. *Co.* Merivale (*ante*). *Assay:* 48·9 per cent. of available Manganese-dioxide. *Ref.* G.S.Q. Pubs. 40, p. 3 (1887), 189, p. 10 (1904).

6424. ——. Pors. 95v, 96v, and 43v, Par. of Rosenthal, 6 miles S.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 194, p. 66 (1904).

6425. ——. *Loc.* Darkey Flat, Talgai Goldfield, 21 miles N.N.W. of Warwick. *Co.* Merivale (*ante*). *Ref.* L.B. 3, p. 677 (1895).

6426. ——. *Assoc.with* Gold and Limonite, in quartz leaders. *Loc.* Golden Gate Lease, 3 miles W. of Pratten, Talgai Goldfield (*ante*). *Ref.* G.S.Q. Pub. 205, p. 29 (1906).

6427. ——. *Assoc.with* Rhodonite and Rhodochrosite. *Loc.* The Glen, Town Common, Warwick, 169 miles (by rail) S.W. of Brisbane. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* L.C.B.

6428. ——. On knoll, nr. Horse Cr., trib. of Gregory R., 50 miles S.S.W. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 10, p. 9 (1885).

6429. ——. Tin Mines, Coolgarra, 12 miles (by coach) E.byN. of Mt. Garnet Rail. Stn. (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 125, p. 48 (1897).

6429a. ——. As lode. One mile N. of Coolgarra (*ante*). *Ref.* A.R., p. 229 (1910).

6430. Manganese (earthy). *Assoc.with* Wolfram, Scheelite, Cassiterite, Molybdenite, and Monazite, with traces of Cuprite, Malachite, Azurite, Iron Pyrites, Limonite, Mispickel, and Scorodite, in irregular masses and in defined lodes, in slate and greisen. *Loc.* Nettle's Cr. Wolfram Mines, 4 miles E. and 3 miles S.E. of Coolgarra, between 10 and 14 miles N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

6431. ——. *Assoc.with* Gold, in quartz reef. *Loc.* ½-mile N.E. of Mt. Deane, E.byS. of Mt. Leyshon, 20 miles S.S.E of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 14 (1891).

6432. ——. *Assoc.with* Gold, Iron Pyrites, Magnetite, Hematite, Limonite, Chalcanthite, and Talc, in porphyry rock. *Loc.* Mt. Leyshon Mine, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* G.S.Q. Pubs. 18, p. 2 (1885), 73, p. 13 (1891).

6433. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Lissner Reef, 7 miles W.N.W. of Lamond's Sel., 41 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 13 (1891).

6434. ——. *Assoc.with* Galena, Copper carbonate, Cerussite, Chrysocolla, and Garnet, in quartz. *Loc.* Black Star Lease (116), Kangaroo Hills Mineral Field. 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6435. ——. *Assoc.with* Magnetite and Minium, in lode. *Loc.* Black Star S. Lease (199), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6436. ——. *Assoc.with* Azurite, Malachite, Cerussite, and Galena, in kaolin. *Loc.* Bonnybrook Lease (178), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), 82, p. 4 (1892).

6437. ——. *Assoc.with* Lievrite, Cerussite, and Garnet, in lode. *Loc.* Boomerang Lease (186), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

6438. ——. *Assoc.with* Native Silver, Galena, Cerussite, Malachite, Chrysocolla, Mispickel, Zinc Blende, and Hematite, in kaolin lode. *Loc.* Hidden Treasure Lease (165), Running R., Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), 82, p. 7 (1892).

6439. ——. *Assoc.with* Galena, Cerussite, and Ironstone, in chloritic lode. *Loc.* Hidden Treasure E. Lease (166), Running R., Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 2966. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891), 82, p. 7 (1892).

6440. ——. *Assoc.with* Galena, Cerussite, Malachite, Chrysocolla, Lievrite, and Garnet, in lode. *Loc.* Mt. Hishon Lease (210), Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2969. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6441. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Zinc Blende, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 82, p. 3 (1892).

6442. ——. *Assoc.with* Cerussite, in lode. *Loc.* Red Rover Lease (179), Kangaroo Hills Mineral Field (*ante*). *Ref.* (and *Assay*) G.S.Q. Pub. 82, p. 4 (1892).

6443. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Vigilant Lease (193), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 7 (1892).

6444. ——. *Assoc.with* Ironstone, Copper carbonate, and Cerussite, in lode. *Loc.* White Star Lease (160), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p 5 (1892).

6445. ——. *Assoc.with* Copper Pyrites, Minium, Cerussite, Malachite, Galena, Mispickel, Ironstone, and Iron Ochre. *Loc.* Colorado Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assays: See* No. 2983. *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

6446. ——. *Assoc.with* Gold, Copper Pyrites, Cuprite, Malachite, Azurite, Galena, Native Bismuth, Bismuthinite, Bismutite, Bismite, Hematite, and Ironstone. *Loc.* Daisy Bismuth Mine, 3 miles E. of Eukalunda, 95 miles S.W.byS. of Bowen, Sellheim Mineral Field. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 57, pp. 7, 8 (1889), and G.S.M.

6447. ——. *Assoc.with* Copper Pyrites, Hematite, Bismuth, and other Bismuth Ores, in lode. *Loc.* Eukalunda Bismuth Mine, 3 miles E. of Eukalunda (*ante*). *Ref.* G.S.Q. Pub. 57, p. 8 (1889).

6448. ——. *Assoc.with* Gold, Hematite, Copper oxides, and Copper carbonates, in gossan lode. *Loc.* Peak Downs Copper Mine, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Assay: See* No. 4160. *Ref.* G.S.Q. Pub. 27, p. 7 (1886).

6448A——. *Assoc.with* Malachite, Azurite, and Hematite, in granite. *Loc.* Emperor P.P.A. (320), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 228, p. 25 (1910).

6449. ——. In clay slate. *Loc.* Iron Mountain, Balcomba Range, 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 9 (1901).

6450. ——. In clay slates. Slaty Cr., E. of Mackenzie R., 5 miles below Wallbury Stn., 5 miles N. of Herbert Cr. Rail. Stn. (Central line), 59 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Pakington; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 9 (1901).

6451. ——. *Assoc.with* Gold, as vein in quartzite. *Loc.* Collins's Banana Plantation, Por. 66, Par. of Bunya, South Pine R., ½-mile S. of Curtis's Crossing, 11 miles N.N.W. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* O.M.

6452. ——. In clay slate and jasperoid. *Loc.* Dandy's Knob, Par. of Kholo, 9 miles N. of Ipswich. *Co.* Stanley (*ante*). *Assay:* 47·4 per cent. *Ref.* G.S.Q. Pub. 194, p. 59 (1904), and A.R., p. 121 (1904).

6452A.——. *Assoc.with* Cobalt, in nodules in alluvium. *Loc.* Eagle Junction, 4 miles (by rail) N. of Brisbane (Suburban line). *Co.* Stanley (*ante*). *Ref.* A.R., p. 193 (1909).

6453. ——. Pors. 56 and 124, Mt. Crosby, Par. of Kholo, 6½ miles N.E. of Ipswich. *Co.* Stanley (*ante*). *Analysis:* Manganese-dioxide = 42·4 per cent.; Iron = 0·67 per cent.; Silica = 27·6 per cent. *Ref.* G.S.Q. Pub. 194, p. 60 (1904).

6454. ——. In jasperoid clay slate. *Loc.* William's Hill, Por. (91), Parish of Kholo, 7 miles N. of Ipswich Rail. Stn. *Co.* Stanley (*ante*). *Ref.* G.S.Q. Pub. 194, pp. 59, 60 (1904).

6455. ——. Par. of Moggill, 10 miles N.E. of Ipswich, and about 10 miles W.byS. of Brisbane. *Co.* Stanley (*ante*). *Ref.* O.R.

6456. ——. *Assoc.with* Ironstone, in vein. *Loc.* Dennis's Sel. (381), 5 miles N. of Beenleigh Rail. Stn. (South Coast line), 29 miles (by rail and road) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

6457. ——. *Assoc.with* Ironstone, in quartz reef. *Loc.* In gully on Jamieson's Sel. (36), Wonga Wallen Cr., Coomera R., 38 miles S.E. of Brisbane, on South Coast line. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 51, p. 5 (1889).

6458. ——. *See* No. 6459.

6459. ——. In clay slates. *Loc.* Auckland Hill, Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Analysis:* Manganese = 46·7 per cent., Manganese-dioxide = 69·4 per cent., Silica = 7·6 per cent., Iron = 2·2 per cent., Phosphorus = 0·33 per cent., Sulphur = trace. *Ref.* G.S.Q. Pub. 194, pp. 40, 41 (1904, and P.R.S.Q., vol. 4, p. 61 (1887).

6460. ——. *Assoc.with* Chloropal, in slates and quartzites. *Loc.* nr. jetty, Auckland Point (*ante*). *Ref.* B.D.

6460A. ——. In quartzose slates. *Loc.* Cairncross's Workings, Por. 115, Toolooa, 4 miles N.E. of Calliope, 9 miles S. of Gladstone. *Co.* Clinton (*ante*).

6461. ——. *Assoc.with* Ironstone, in decomposed clay slate. *Loc.* Gardner's Workings, on Por. 364, East Stowe, Calliope, 10 miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Analysis:* Manganese-dioxide = 43·6 per cent., Manganese = 29·7 per cent., Iron = 22·1 per cent. *Ref.* G.S.Q. Pub. 194, pp. 45, 46 (1904).

6462. ——. In slate. Mt. Crosisco Workings, Por. 13v, East Stowe, 8 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6463. ——. In slate. Shaw and Morris's Workings, 3½ miles N. of Calliope, 8½ miles S.S.W. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Manganese = 46·7, Manganese-dioxide = 69·5, Iron = 2·7, Silica = 4·5, Phosphorus = 0·14 per cent. *Ref.* G.S.Q. Pub. 194, p. 44 (1904).

6464 ——. In slate. *Loc.* Torbeck's and Kirkwood's Workings, Calliope R., 1 mile S.E. of Mt. Beecher, 8 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Analysis:* Manganese-dioxide = 54·4, and Manganese = 37·7 per cent. *Ref.* G.S.Q. Pub. 194, p. 46 (1904).

6465. ——. In clay slate. *Loc.* Mt. Miller Mine, Calliope, 1 mile S. of Mt. Miller Rail. Stn. (North Coast line), 7 miles (by rail and road) W.S.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, pp. 38-40 (1904), and A.R., p. 121 (1907).

6466. Manganese. In slate. Boat Cr. Workings, S. of Boat Cr., Targinnie Cr., 7 miles W. of Gladstone. *Co.* Clinton (*ante*). *Shipments:* 144 tons of ore, averaging 65·5 per cent. to 70·8 per cent. of Manganese-dioxide. *Ref.* G.S.Q. Pub. 194, pp. 43, 44 (1904).

6467. ——. In red jasperoid slate. *Loc.* Morgan and Reid's Workings, between Targinnie and Calliope R., 8 miles W.byS. of Gladstone. *Co.* Clinton (*ante*). *General Averages:* Manganese-dioxide = 67·1 per cent. to 72·70 per cent. *Ref.* G.S.Q. Pub. 194, pp. 42, 43 (1904).

6468. ——. In clay slate. One Tree (or Round) Hill Workings, 2 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 45 (1904).

6469. ——. In veinlets. E. side of Compigne Island, 3 miles N. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6470. ——. In slate. S. end of Picnic Island, 1½ mile N.N.W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6471. ——. In quartz. Quarry, Turtle Island, 2½ miles N. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6472. ——. In slate and quartz. Lee's Manganese Outcrop, 1 mile N.E. of Targinnie Township, 5 miles N.N.W. of Yarwun Rail. Stn. (North Coast line), 15 miles (by rail and road) N.W.byW. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6473. ——. Ulam Goldfield, 3 miles S. of Toonda Rail. Stn. (North Coast line), 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* A.R., p. 111 (1907).

6474. —— (earthy). *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismutite, and Tungstic Ochre, with traces of Copper Pyrites, Tenorite, Iron Pyrites, Hematite, etc., in defined quartz lodes in greisen and mudstone. *Loc.* Wolfram Mines, Rosedale, 34 miles (by rail) N.W. of Bundaberg (North Coast line). *Co.* Flinders; *Dist.* Port Curtis. *Ref.* B.D.

6475. ——. In many localities, Cawarral Goldfield, 15 miles N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.M.

6476. ——. Coorooman, 23 miles (by rail) N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Assays:* Manganese-dioxide = 60 and 70 per cent. *Ref.* G.S.Q. Pub. 194, p. 22 (1904).

6477. ——. Malchi, 5 miles N.N.E. of Stanwell, 21 miles (by rail and road) W.S.W. of Rockhampton (Central line). *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

6478. ——. *Assoc.with* Limonite, in quartz veins. *Loc.* Taranganba Gold Mine, 1½ mile S. of Yeppoon, 42 miles (by rail and road) N.E.byN. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 50, p. 3 (1889).

6479. ——. In large lode several miles long, containing up to 20 per cent. of Manganese-dioxide. *Loc.* Heads of Alma Cr., Pibald, nr. Dundee, 20 miles S. of Westwood Rail. Stn. (Central line), 51 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* B.D.

6480. ——. *Assoc.with* Magnetite, Hematite, Iron Pyrites, Copper Pyrites, and Copper carbonate. *Loc.* Callide or 5-Mile Copper Mines, Kroombit, 50 miles S.S.W. of Gladstone. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 194, p. 47 (1904).

6481. ——. Raspberry Cr., Mt. Morgan, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* L.C.B.

6482. ——. In clay slates. *Loc.* Por. 856, Walla, 5 miles S.S.W. of Gin Gin Rail. Stn. (Mt. Perry line), 34 miles (by rail and road) W. of Bundaberg. *Co.* Bowen; *Dist.* **Wide Bay.** *Analysis:* Manganese = 42 per cent., Manganese-dioxide = 67 per cent., Silica and insoluble = 16 per cent. *Ref.* G.S.Q. Pub. 189, p. 5 (1904).

6483. ——. In clay slate. Por. 917, Walla (*ante*). *Analyses:* (1) Manganese = 48·4, Manganese-dioxide = 76·5 per cent.; (2) Manganese = 47·2, Manganese-dioxide = 67·7, Silica and insoluble = 8·2, Phosphorus = 0·07, Sulphur = trace, Iron = 0·91 per cent. *Ref.* G.S.Q. Pub. 189, pp. 8, 9 (1904).

6484. ——. In slate. Por. 1033, Walla (*ante*). *Analyses:* (1) Manganese = 40, Manganese-dioxide = 64, Silica and insoluble = 20 per cent.; (2) Manganese = 47, Manganese-dioxide = 75 per cent. *Ref.* G.S.Q. Pub. 189, pp. 6, 7 (1904).

6485. ——. In clay slate. Por. 1147, Walla (*ante*). *Analysis:* Manganese-dioxide = 74 per cent. *Ref.* G.S.Q. Pub. 189, p. 8 (1904).

6486. ——. *Assoc.with* Asbolane and Nickel, in cobalt lode. *Loc.* Mt. Clara Hills, Black Snake, 7 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Assay: See* No. 122. *Ref.* G.S.Q. Pubs. 28 (1886), 38 (1887), and G.S.M.

6487. ——. *Assoc.with* Cobalt, Rhodochrosite, and Rhodonite, in serpentine. *Loc.* Mt. Cobalt, Black Snake (*ante*). *Ref.* (and *Analyses*) G.S.Q. Pub. 169, pp. 16-19 (1901).

6488. ——. *Assoc.with* Cobalt Oxide, Rhodochrosite, Rhodonite, Nickel, and Copper Oxide, in serpentine. *Loc.* Mt. Coora, Black Snake (*ante*). *Analyses: See* No. 1837. *Ref.* G.S.Q. Pubs. 28 (1886), 38 (1887), 48 (1888), and 169, pp. 16-19 (1901).

6489. ——. Bonney's Sel. 96v, Par. of Maleney, Chinaman's Cr., Mary R., 12 miles W.byN. of Yandina Rail. Stn. (North Coast line), 81 miles (by rail and road) N.byW. of Brisbane. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* B.D.

6489A.——. Mt. Walli, Upper Mary River. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* B.D. A large deposit of manganese is said to exist on this mountain, but the locality has not been officially examined.

6490. ——. *Assoc.with* Gold and Native Arsenic, in porphyry. *Loc.* Long Tunnel P.C., Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 3 (1886), and G.S.M.

6491. ——. As bunches, in jasper. Mt. Colo, Marodian Goldfield, 12 miles N.byE. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 14 (1902).

6492. ——. Marodian Goldfield, 8 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Assay:* Manganese-dioxide = 83·9 per cent. *Ref.* A.R., p. 121 (1907).

6493. ——. In quartzite and shale. *Loc.* Mt. Nansen Mine, Mary Cr., br. of Eel Cr., W. of Por. 1386, Par. of Glastonbury, 7 miles S.W. of Gympie. *Co.* Lennox (*ante*). *Assay:* Manganese = 50·0, Manganese-dioxide = 75·9 per cent. *Ref.* A.R., p. 171 (1908), and A.R.D.M., p. 169 (1909).

6493A.——. Cross's Sel., adjoining Nansen's, on br. of Eel Cr., Mary R., 7 miles S.W. of Gympie (*ante*). *Assay:* Manganese = 42·7, Manganese-dioxide = 50·2 per cent. *Ref.* A.R., p. 192 (1909), and A.R.D.M., p. 169 (1909).

6494. ——. In quartzite and shale. *Loc.* Skyring's Mine, Pie Cr., W. of Por. 1335, Par. of Glastonbury, 10½ miles S.S.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* B.D., and A.R.D.M., p. 169 (1909).

6494A. ——. *Assoc.with* Asbolane, in lode. *Loc.* Pie Cr., W. of Por. 1335, Par. of Glastonbury (*ante*). *Assay:* Manganese = 6·6 per cent, Cobalt = 7·2 per cent. *Ref.* A.R., p. 151 (1908).

6494B.——. P.A. 742, Brooyar, Woolooga Estate, 36 miles (by rail) N.W.byW. of Gympie (Kilkivan Br. line). *Co.* Lennox (*ante*). *Assays:* Manganese = 48·3 and 50·9 per cent. *Ref.* A.R., p. 202 (1909).

6495. ——. Devil's Mountain, 10 chain road, 17 miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* A.R., p. 160 (1908). Note: Large deposits are exposed on the surface.

6496. ——. Rigo, Broad Arrow, 36 miles S.E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 56, p. 2 (1889).

Maranoa District—

Situation, Etc.: *See maps,* Pls. 12, 13. (*Lat.,* 25° and 29°; *Long.,* 146° and 150°). It is bounded on the N.E. by the Leichhardt District, on the E. by the Darling Downs, on the S. by the State of New South Wales (*Lat.* 29°), and on the W. by the District of Warrego. The principal Rivers are Culgoa, Balonne, Ballandoon, Narau, Condamine, Moonie, and Barwon.

Area: 39,235 sq. miles.

Principal Centre: Roma, *which see.*

Marchmont Bore. *See under* Artesian Bores. No. 199.

Mareeba, 46 miles (by rail) W.S.W. of Cairns. The junction station of the Atherton and Chillagoe lines, and railway base for the Mareeba Goldfield and the Tinaroo Tin and Wolfram Mines. *Min.Ref.* Ottrelite, *see* 7059.

Mareeba Goldfield—

Situation: *See maps,* Pls. 8, 9, 22. The field is about 5 miles S.E. of Mareeba Rail. Stn., 51 miles (by rail and road) W.S.W. of Cairns. Included in Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. Centre about *Lat.* 17° 0′ S.; *Long.* 145° 30′ E.

Discovery: Payable gold reef discovered by Messrs. Hort and Finlayson on 21st February, 1893.

Population: Goldfield, 18; Township, 882 (estimated by Warden, 1910. No later return).

Proclamation of Field: First (and only one) gazetted, 7th June, 1905, as follows:—Commencing at the confluence of Tinaroo Creek with the Barron River, and bounded thence by the right bank of the Barron River downwards north-easterly to the confluence of the Clohesy River by the left bank of the Clohesy River upwards south-easterly to its extreme head in the range forming the eastern watershed of the Barron River; by that range and the range forming the southern watershed of Emerald Creek and Tinaroo Creek south-westerly to the Barron River; and by the right bank of that river downwards to the point of commencement.

Area: 125,440 acres (196 sq. miles).

Mineral Statistics: *All included in* "Other Goldfields." *See tables,* Pls. 36, 46, 46A.

Mineral References: Gold, *see* 3773-3776; Antimony (Stibnite), 7632; Zinc Blende, 8089; Iron (Hematite), 4721, (Iron Pyrites) 5079, 5080.

Geological Note: The country rocks consist of clay slates and schists covered in places by flows of basalt. Mareeba township is situated on basalt. Auriferous quartz reefs occur in the slates and schists.

Geological Publications: Nos. 97 (1894), 119 (1898). *See under* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Herberton.

Marengo Cr., 19 miles S. of Bowen. *Min.Ref.* Hornblende, *see* 4836.

Marengo Goldfield—Unproclaimed.

Situation: *See maps,* Pls. 16, 17. The field is about 24 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. Centre about *Lat.* 20° 25′ S.; *Long.* 143° 56′ E.

Discovery: The reefs were opened up in 1871.

Mineral Statistics: *Included in* "Other Goldfields." *See tables,* Pls. 36, 46, 46A.

Mineral References: Gold, *see* 4074-4077; Silver, 7490; Copper (Azurite), 215A, (Copper) 1846, (Copper carbonate) 1916-1918, (Copper Pyrites) 2240, 2240A, (Malachite) 6290; Iron (Iron Pyrites), 5275, 5276, (Ironstone) 5555; Ochre (Yellow), 5935. Other Minerals: Rock Crystal, 7193; Selenite, 4644.

Geological Note: The whole of the field is made up of granite rocks with small areas of gneiss, mica schist, and unaltered shales, etc. The granite is usually micaceous, but often hornblendic, and is frequently intruded by felspar porphyry dykes. There are several gold-bearing reefs exposed on the field, a number of which have been worked to a limited extent.

Geological Publications: Nos. 5 (1879), 48 (1888). *See under* Geol. Surv. Pub. List. for title.

Warden: Stationed at Bowen. Inspector of Mines: Stationed at Charters Towers.

Mare's Nest Creek, S.S.E. of Bowen. *Min.Ref.* Copper Pyrites, *see* 2239A; Cuprite, 2459; Hematite, 4742; Limonite, 5879A; Malachite, 6291, 6291A; Redruthite, 7297A; Tile Ore, 2563B.

Marga Co. Cook Dist. *See map*, Pl. 8.

Marguerite M.C. (151), Cloncurry. *Min.Ref.* Calcite, *see* 460; Ferro-Calcite, 574; Limonite, 5794; Malachite, 6155; Tourmaline, 7816.

Maria Creek, 133 miles W.byS. of Rockhampton. *Min.Ref.* Mineral Water, *see* 6571.

Geological Note: The rocks in this locality appear to belong to the Tolmies Coal Measures (Permo-Carboniferous). Boring operations failed to discover coal, but a supply of water was struck which is highly charged with carbonate of soda. The water, by pneumatic action, is intermittently driven out of the bore, and one discharge frequently continues for several hours. *See* G.S.Q.P. 155.

Marlborough, 60 miles N.W. of Rockhampton. *Min.Ref.* Chrysoprase, *see* 1389.

Marmor, 42 miles (by rail) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Min.Ref.* Limestone (crinoidal), *see* 732.

Geological Note: The rocks in this locality comprise shales and limestones belonging to the Devonian System, the latter being extensively worked for flux near the Marmor Railway Station by the Mount Morgan Company.

Marodian Goldfield—

Situation: *See maps*, Pls. 4, 5. On Running Cr., 8 miles N. of Kilkivan Rail. Stn., 56 miles (by rail and road) N.W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. Centre about *Lat.* 25° 55′ S.; *Long.* 152° 20′ E.

Discovery: Gold found on Colo Flats in 1367.

Proclamation of Field: First (and only one) gazetted, 20th November, 1896, as follows:—Commencing on the north bank of Running Creek at the south-west corner of 21v; thence north along the west boundaries of 21v, 20v, 19v, 18v; thence east along the north boundary of 18v; thence north along the west boundary of 14v; thence east along the north boundaries of 14v, 13v, and 10v; thence north along the west boundary of Selection No. 1129; thence east along the north boundary of No. 1129; thence south along the east boundary of No. 1129 to Yorkey's Creek; thence along the north bank of Yorkey's Creek east to the south-west corner of 4v; thence north along the west boundaries of 4v and 3v; thence west along the south boundary of Selection No. 1682; thence north along the west boundary of No. 1682; thence west along the south boundaries of Selections Nos. 1359 and 864; thence south along the eastern boundary of 59v; thence west along the south boundary of 59v; thence northerly along the west boundary of 59v to the south-west corner of Selection No. 355; thence by a line bearing south-west for about 5½ miles to the watershed of Wide Bay and Burnett districts; thence along that watershed in a south direction about 4 miles; thence east along the south watershed of Running Creek for about 3½ miles; thence north to the south-east corner of Selection 844; thence west along the south boundary and north along the west boundary and east along the north boundary of Selection 844 to Running Creek; thence east along the north bank to that creek to the point of commencement.

Area: 15,360 acres (24 sq. miles).

Leases: Miners' Homesteads in force, 4; area, 90 acres (1912).

Principal Mining Centres: Colo Gold Mines, Mudloo Copper Mines.

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagram*, Pls. 36, 46, 46A, 47.

Mineral References: Gold (alluvial), *see* 3407, 3408, (reef) 4407, 4408; Copper (Azurite), 254A, 255, (Cuprite) 2485, (Malachite) 6382, 6383, (Redruthite) 7309, (Tetrahedrite) 7781, 7782; Manganese-dioxide, 6491, 6492; Iron (Hematite), 4804A. Other Minerals: Epidote, 2608.

Geological Note: The rocks of this field consist of slates, schists, and quartzites of Gympie Formation (Permo-Carboniferous), associated with masses of granite and diorite. Dykes of felsite, porphyrite, rhyolite, and diorite are present in the granite, and quartz reefs occur in the diorite and in adjoining slates.

Geological Publications: No.—179 (1902). *See under* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Gympie.

Maryborough—

Situation: *See maps*, Pls. 4, 5. The town is 167 miles (by rail) N.byW. of Brisbane. *Lat.*, 25° 32′ S.; *Long.*, 145° 45′ E. *Co.* March; *Dist.* Wide Bay. Town established in 1851.

Port for the Wide Bay and Burnett Districts; commands the Goldfields of Paradise, Chowey Cr., Eidsvold, and St. John's Cr.; the Mineral Fields of Mt. Shamrock, Marodian, and Kilkivan; the Black Snake Gold and Cobalt Workings; the Auburn Falls and Dykehead Gold Mines; the Young Australian Copper Mine; Yorkey's Gold Workings; the Mt. Biggenden Gold and Bismuth Mines; the Commonwealth Copper Mine; the Calgoa, Teebar, and Munna Copper Mines; and the Burrum Coalfield. The settlement of Maryborough first took place in February, 1851.

Harbourage: The Outer Harbour can be reached from the north (Hervey Bay) and also from the south (Wide Bay), the depth of the bar in the South Channel being 14 ft. 6 in. at L.W.O.S.T. Rise of tides at the Mary River Heads is from 7 ft. to 10 ft. Depth of river at low water varies from 9 ft. 6 in. to 12 ft. Depth at wharves at L.W.S. varies from 7 ft. 6 in. to 21 ft. Burrum River, tapping the Burrum Coal Mines at 20 miles from the entrance, is only available for vessels of shallow draught.

Population: 11,612 (Census 1911).

Rainfall: Yearly av. (1902-1907), 42·42 inches. Wet Days (1902-1907), 101.

Geological Note: The rocks in this locality comprise sandstones, shales, and other rocks belonging to the Burrum Coal Measures, having at their base a group of fine-grained marine sandstones called the "Maryborough Beds," the whole forming a series equivalent to the "Rolling Downs" of Western Queensland.

Chamber of Commerce: Sec., A. McWatters.

Technical College: For mining subjects taught *see under* "Technical Colleges."

General Information: Consult *Pugh's Almanac; Queensland Post Office Directory; Queensland Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Maxwelton Goldfield—

Situation: *See maps,* Pls. 2, 3, 34. The field is about 35½ miles S.W. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. Centre about *Lat.* 20° 47′ S.; *Long.* 142° 42′ E.

Proclamation of Field: First gazetted, 15th December, 1891; last alteration, 5th May, 1897, as follows:—Commencing at a point 40 chains south from the western extremity of the northern boundary line of portion No. 1v., Galloway Plains, being the south-west corner of Galloway Plains Lease; and bounded thence, on the north-east by a line bearing 135 degrees 2 miles; on the south-east by a line bearing 225 degrees 1 mile; on the south-west by a line bearing 315 degrees 2 miles; and on the north-west by a line bearing 45 degrees 1 mile, to the point of commencement.

Area: 1280 acres (2 sq. miles).

Mineral Statistics: *included in* "Other Goldfields" *in tables and diagram,* Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 4261; Copper (Azurite), 244, (Malachite), 6355; Molybdenite, 6862, 6863.

Geological Note: The country rock is granite.

Mercury (Hg.). *Atom.wt.,* 200·6. *Sp.gr.,* 14·93. *Colour,* bright-white-metallic. Liquid at ordinary temperatures.

USES: Mercury is chiefly used as a metallurgical reagent in the extraction of free gold from quartz and other gangues. It is also used in the manufacture of medicines, pigments, chemical reagents, explosives, dyeing and calico printing, and in mercurial thermometers and barometers. It forms amalgams with tin, zinc, gold, silver, sodium, etc., for which there is a variety of uses, the tin amalgam being commonly used in the process of "silvering" mirrors. Cinnabar, the principle ore of mercury, is used as a red pigment.

MINERALS: *See* Native Mercury, Cinnabar.

MINERAL AND GEOLOGICAL NOTE: Bornite, Copper Pyrites, Gold, Iron Ores, Limestone, Oxidised Copper Ores, and Redruthite are associated minerals. The gangues are usually calcite, quartz, and ironstone in lode formations. Small isolated patches of Cinnabar have been found in the Mt. Perry Copper Mines, but only in the Kilkivan District have deposits of any extent been worked. Many of the reported deposits of native mercury have only been the accumulations of the metal in water-courses where gold washing or crushing machines, using mercury to catch the gold, have once been in operation.

VALUES: *See* Table under Metal Values in London for maximum and minimum prices for all years since 1892.

DISCOVERIES: About 1872 at Mt. Perry, about 1876 at Kilkivan.

Meteor M.C. (145), Cloncurry. *Min.Ref.* Malachite, *see* 6110; Redruthite, 7218.

Meteor Downs Run, 20 miles S.E. of Springsure. *Min.Ref.* Coal, *see* 1676A.

Meteorites. Several occurrences of meteorites have been reported, but only four authenticated falls have been recorded.

6551A. Meteorite Thunda Station, 32 miles E.byS. of Windorah, 68 miles W.N.W. of Adavale. *Co.* Thunda; *Dist.* Gregory South. *Lat.*, 25° 15′ S.; *Long.*, 142° 40′ E. *Weight:* Original specimen was one cwt. or more. *Compo.:* "It consists mainly of iron, with nickel [98·85 per cent. nickel-iron], and a trace of cobalt; both sulphur and phosphorus are present, together with some carbon." *Sp.gr.*, 7·77. *Fall,* 1886 *Ref.* A. Liversidge in Proc. Roy. Soc. N.S.W., 1887, vol. 20, p. 73; *also* in Minerals of N.S.W., 1888, p. 221. *Collection:* Mining and Geological Museum, Sydney.

6551B.—— (in two pieces). Mungindie (3 miles north of), near Barwon River, S.E. Queensland. *Co.* Belmore; *Dist.* Maranoa. *Lat.*, 28° 58′ E.; *Long.*, 149° E. *Weight:* The two pieces are 62 and 51 lb. respectively. *Compo.:* Iron, 90·307 per cent.; nickel, 8·230; cobalt, 1·360; phosphorus, ·093; carbon ·010; sulphur, trace. *Sp.gr.*, 7·4. *Ref.* G. W. Card in Rec. Geol. Surv. N.S.W., vol. 5 (1897), p. 121; Dr. H. A. Ward in Amer. Jour. Sci. (1898), ser. 4, vol. 5, p. 138. *Fall,* 1897. *Collections:* Mining and Geological Museum, Sydney; and Ward-Cooney Coll., Chicago.

6551C.——. Rockhampton. Three specimens of stony meteorites fell in this city about May, 1895, each piece being a few lbs. in weight. *Ref.* H. Tryon in Q'land Naturalist, vol. 1, No. 7 (1910), pp. 161-71. One specimen is in the possession of J. S. Edgar, Botanic Gardens, Rockhampton, another one is in the collection of the Rockhampton School of Arts.

6551D.——. "Queensland." Said to have been found in 1894. Uncertain locality in S. Q'land. Weight 72 grammes. Undescribed (Ward). *Fall,* 1894.

6551E.——. Tenham Stones (15). Weights vary from 20 to 5,241 grammes. *Loc.* Tenham Station, junction of Cooper and Kyabra Creeks, Western Queensland. *Lat.* 25° 30′ S.; *Long.* 142° 40′ E. *Compo.:* Mostly silicates, with a few per cent. of nickel-iron. *Sp.gr.*, 3·4. *Fall,* about Feb., 1879, between 2 and 3 o'clock in the morning, and apparently coming from west to east. *Observer,* P. Hammond, of Tenham Station. *Collections:* Geological Survey Museum and Queensland University. *Ref.* B.D.

Mewstone (Moturina) Island, Brit. New Guinea. *Min.Ref.* Limestone, *see* 707.

—— Sub-artesian Bores. *See under* Artesian Bores. No. 118.

Mia Mia (Par. of), (Por. 83v and 7v, 99v), W.S.W. of Mackay. *Min.Ref.* Azurite, *see* 229A, 229B; Bornite, 429B, 430A; Copper Pyrites, 2253A, 2253B; Malachite, 6325A-6325C.

Mica. *Sp.gr.* 2·7-3·1. *H.* 2·5. *Compo.*, variable silicates of alumina with potash, soda, magnesia, lime, iron, and lithia.

VARIETIES: *See* Biotite, Lepidolite, Muscovite, Chalcolite, Vermiculite.

USES: Mica is commonly used for glazing windows in furnaces and stoves, as a substitute for glass in lamp chimneys, and as insulators in electrical work, also being used in making lubricants and paints. For windows, insulators, and indeed for most other purposes, Muscovite is preferred, Biotite and other dark-coloured micas, for various reasons, not being suitable. The general utility of Muscovite depends on its easy cleavage, softness, flexibility, absence of colour, and the size of the cleavage sheets, the minimum of which for market purposes must not be less than three square inches. Scrap mica is greatly in demand for heat insulation, and large quantities of this scrap, when ground to a coarse powder, are used in the colouring of paper for wall decoration, in the manufacture of roofing and fireproof paints, and for boiler-covering and packing. When finely ground it is used as an absorbent for nitro-glycerine in making dynamite

Mica—*continued*:

and other explosives, and as a lubricant for the bearings of heavy machinery. A special use for the very finest sheet mica, and for which only Indian mica is applicable, is in the making of sounding-diaphrams for phonographs, and large quantities of mica are now being used for this purpose. Canadian amber mica and Indian Lepidolite are used specially for electrical work, their softness being a very important quality in certain classes of work, and greatly in demand on this account.

NOTE: On many of the mining fields of Northern Queensland, particularly at Brooklands, near Junction Creek, and at the Einasleigh River, mica deposits are of common occurrence. Up to the present time, however, sheet mica of marketable quality and quantity has not been found. In the following occurrences the varieties have not been classified, but further references are given under the variety names mentioned above, more particularly under Muscovite.

6552. ——. *Assoc.with* Gold, in quartz and felspar. *Loc.* Golden Gate 10 N. Lease, Golden Gate Centre, 90 miles (by rail) S.E. of Normanton (Croydon line). *Co.* Surrey; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 118, p. 10 (1896).

6553. ——. *Assoc.with* Cassiterite, Tourmaline, Mispickel, and Felspar. *Loc.* Harris and Party's Tin Lease, Rossville, Annan R. Tinfield, 25 miles S. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 35, p. 16 (1887).

6554. ——. *Assoc.with* Silver. *Loc.* Head of Wandoo Cr., trib. of Muldiva Cr., 10 miles N.W. of Mungana Rail. Stn. (Chillagoe line). *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 16 (1898).

Milton (Norton) Goldfield—

Situation: *See maps*, Pls. 2, 3, 34. Thirty-three miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. Centre about *Lat.* 24° 20′ S., *Long.* 151° 20′ E.

Discovery: In 1871, by Geo. Williams and Charles Lett.

Population: Less than 20.

Proclamation: First (and only one) gazetted, 12th May, 1879, as follows:—Commencing at a point bearing north from the north-east corner of Selection 291, Gladstone Register, and west from tree on survey of Milton Run marked G.6 on Eastern Boyne River, and bounded thence by a line east passing through said tree about six and a-half miles to Many Peaks Range, being the eastern watershed of Boyne River; thence by that range southerly about four miles in a direct line to a point bearing east from junction of Wattle Creek with Boyne River; thence west about six and a-half miles to a point south of the south-east corner of abovementioned selection; thence north by a line passing along eastern boundary of said selection about four miles to the point of commencement;—exclusive of all alienated, selected, and reserved lands.

Area: 16,640 acres (26 sq. miles).

Mineral Statistics: *Included in* "Other Goldfields," *tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 4264-4294; Silver, 7518-7527; Lead (Galena), 3043-3052; Copper (Azurite), 245, (Bornite) 433, (Copper Pyrites) 2288-2294, (Malachite) 6357, 6358, (Redruthite) 7301, 7302; Antimony (Stibnite), 7650; Zinc Blende, 8186-8200; Iron (Iron Pyrites), 5365-5390, (Limonite) 5908, (Mispickel) 6787-6800, (Scorodite) 7375, 7376. Other Minerals: Biotite, 308; Calcite, 530-534; Hornblende, 4843; Orthoclase, 7050; Scapolite, 7338b.

Geological Note: The rocks are granite, syenite, diorite, dolerite, porphyry, and slate. The first three merge into one another and form an eruptive boss in contact with the slate. Veins of quartz pass from the granite boss into the slate, but the gold-bearing quartz reefs are found in the granite in association with dykes of diorite, porphyry, and dolerite formed subsequent to the reefs. *See* G.S.Q. Pub. Nos. 21 and 208 for details.

Geological Publications: Reports—Nos. 21 (1885), 58 (1890), 208 (1907). *See under* Geol. Surv. Pub. List for title. *See also under* Supplementary Report List, Nos. 6, 21.

Warden: Stationed at Gladstone. Inspector of Mines: Stationed at Rockhampton.

Reports: Inspector's and Warden's monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Mimetite. *Sym.* Green Lead Ore. *Compo.*, Arsenate of lead. *Colour*, yellowish, whitish. *Streak*, whitish. Resinous. *H.* = 3·5. *Sp.gr.* = 7·2. *Contents (max.)*, Lead 69 per cent.

6566. ——. *Assoc.with* Galena, Tetrahedrite, Malachite, Azurite, Hematite, and Limonite, in lode. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Cairns. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

Mineral Exports. *See under* Exports.

Mineral Fields of Queensland. Of the 670,500 square miles contained in the State, there are actually 78,000 square miles officially reserved as gold and mineral fields, while 50,000 square miles are known to contain coal measures. Opal deposits are scattered over 40,000 square miles, and 250,000 square miles (including the opal area) are artesian-water bearing. About one-quarter of the State, therefore, contains minerals of commercial value.

The gold, coal, and other mineral areas are called "fields," some of which are "proclaimed," others being classed as "provisional." There are also unclassified areas now being utilised for agricultural or grazing purposes, on nearly all of which mining operations are permitted under certain restricted conditions.

The following is a list of mineral fields (other than gold or coal fields):—

Anakie (Gems). *See maps*, Pls. 10, 11.
Bowden (Tin, Wolfram). *See maps*, Pls. 8, 9.
Burketown (Silver, Lead, Copper). *See maps*, Pls. 20, 21.
Chillagoe (late Walsh and Tinaroo, *in part*) (Copper, Silver, Lead, etc.), *See maps*, Pls. 8, 9, 32.
Cloncurry (Copper). *See maps*, Pls. 20, 21, 23.
Cooktown (Tin). *See maps*, Pls. 8, 9, 32.
Cunnamulla (Opal). *See maps*, Pls. 18, 19.
Glassford Creek (Copper). *See maps*, Pls. 2, 3, 34.
Herberton (late Walsh and Tinaroo, *in part*) (Tin, Copper, Gold, Bismuth, Wolfram, etc.). *See maps*, Pls. 8, 9, 16, 17, 22.
Kangaroo Hills (Tin, Copper, Silver, Lead). *See maps*, Pls. 16, 17.
Kilkivan (Copper, Silver). *See maps*, Pls. 4, 5.
Kynuna (Opal). *See maps*, Pls. 20, 21.
Mt. Cannindah (Copper). *See maps*, Pls. 4, 5.
Mt. Flora (Copper). *See maps*, Pls. 10, 11.
Noble Island (Wolfram). *See maps*, Pls. 8, 9.
Opalton (Opal). *See maps*, Pls. 18, 19, 20, 21.
Paroo (Opal). *See maps*, Pls. 18, 19.
Rosedale (Wolfram). *See maps*, Pls. 2, 3.
Sellheim (Silver, Bismuth). *See maps*, Pls. 14, 15.
Stanthorpe (Tin, Silver, Lead, Copper, etc.). *See maps*, Pls. 12, 13, 30).
Star River (Argentine) (Silver, Lead, Bismuth, Wolfram, etc.). *See maps*, Pls. 16, 17.

Farther references are given under names of fields.

Mineral Localities. Nearly all the gold, mineral, and coal deposits are confined to the eastern half of Queensland, while the artesian water basin and all the opal deposits are exclusively confined to the western half, a line joining Normanton, on the Gulf of Carpentaria, with Wallangarra, the southern border town, roughly representing the boundary between the eastern and western portions. Of all payable minerals *Gold* is found in the greatest number of localities and is scattered over the largest area of country, Charters Towers, Mt. Morgan, and Gympie being the principal centres. *Copper* and *Silver* also occur in many places, and are frequently associated with the gold, although copper occurs in many lodes with only traces of the precious metal, while the great bulk of the silver has been found with lead.

Coal is well distributed over the eastern half of the State, but the largest and most important coal areas—Ipswich, Burrum, Dawson-Mackenzie, and Clermont—are contained in the south-eastern quarter. *Tin* is comparatively restricted in its occurrence, the two principal districts being Herberton (Walsh and Tinaroo) and Stanthorpe, each of which has produced large quantities of the mineral, and will probably continue to yield it for many years to come. *Wolfram*, next in importance, commonly occurs in Northern Queensland, most of the yields coming from the Chillagoe district. *Lead* is being mined in association with silver, principally about Stanthorpe and Chillagoe. *Bismuth* is being produced at Biggenden in the Burnett District, and also in the Herberton District, while *Molybdenite*, in association with wolfram and bismuth, is mined exclusively in the latter area.

Ironstone occurs in fairly large quantities in the State, the largest available deposit being that on Iron Island, to the north of Rockhampton, other large deposits of good ironstone occurring in the Cloncurry district. *Manganese* is also to be found in many parts of the State, the deposits occurring near Gladstone and Gympie being very extensive, those to the south of Gympie, about Pie Creek, being considered to have a prospective value unequalled by any of the others.

Limestone is an important asset, and no trouble need be experienced in obtaining supplies for smelting purposes, or for the manufacture of Portland cement or other building material. *Precious Opal* is to be found over an area of thousands of square miles in Western Queensland, and *Sapphires* of beautiful orange, yellow, green, and blue shades, occur in a small area at the Anakie fields in Central Queensland. *Diamonds* are of rare occurrence, and have only been recorded at a few localities, probably the number of specimens of this gemstone found in the whole State not exceeding one hundred.

Zinc, mostly in association with minerals containing gold, silver, and copper, is to be found all over the eastern districts, although no works have been established for its treatment, nor has it been saved as a by-product. *Cobalt*, *Nickel*, and *Mercury* have only been found in small quantities, and may be considered three of our rarest metals. *Antimony* occurrences are recorded at Hungry Hill, near Eidsvold, Northcote, near the Hodgkinson Goldfield, Cocoa Creek, Mitchell River, and other places. The first-mentioned is important, as large deposits are known to occur there. *Platinum* is disseminated with gold in the beach sands along the coast, but the quantities obtained in the past have not been sufficient to pay working expenses; this metal also occurring with gold in some of the alluvial deposits at Gympie. Of the few minerals which contain *Rare Elements*, Monazite has been found in a large

Mineral Localities—*continued:*

number of mines associated with Wolfram and Tin. *Graphite* occurrences are common, but the quality is generally poor, a mine at Mt. Bopple, near Tiaro, being the only one to produce it on a commercial scale.

Mineral Statistics. The total value of all minerals produced in the State between 1860 and 1912 amounted to £104,009,087. During the first few years the values fluctuated between £10,000 and £100,000, but after 1877 nearly every year showed an increase on the previous year's return—up to 1906. Notwithstanding the numerous discoveries in gold and other minerals at various times, these increases were fairly uniform, and are shown tabulated on Plate 45.

The largest annual mineral yield was in 1906, the value being £4,198,648, this representing 4·03 per cent. of the total value of the mineral production for all years. The gold yield for this year was the lowest for ten years, but the activity in copper and tin mining resulted in the production of large yields of these two metals, and more than compensated for the low gold returns. The last year, 1912, is remarkable for having yielded the smallest quantity of gold since 1886, a period of 25 years, and for producing the highest yield in minerals other than gold since the commencement of mining in the State, the returns for copper and coal being the highest recorded, those for tin being the second highest.

Amongst individual mineral yields gold, of course, takes first place, with a value of £75,218,494, up to the end of 1912, this representing 72·31 per cent. of the whole of the value of the mineral products of the State. Copper comes next, with a value of £10,948,399 (10·52 per cent.); then tin, £8,199,391 (7·88 per cent.); coal, £5,377,240 (5·17 per cent.); silver, £1,722,319 (1·65 per cent.); antimony, bismuth, wolfram, lead, molybdenite, opal, sapphire, all being less, with values below 1 per cent. From the above it will be seen that the value of the gold yield of the State is more than 2½ times greater than that of all the other minerals put together.

Regarding mineral centres, the richest mineral locality is shown to be the Charters Towers Goldfield, with its mineral production, up to the end of 1912, valued at £27,272,495, of which the odd thousands about make up the value of minerals other than gold. This is 26·22 per cent. of the value of the whole mineral production, which indicates that this goldfield, contained in an area of about five square miles of productive ground, has produced more than a quarter of the whole mineral wealth of Queensland.

Rockhampton, with Mt. Morgan, is the next richest district, the total value of its mineral returns being £20,543,837, of which £17,090,154 is from gold produced at Mt. Morgan and smaller fields, the value of all minerals representing 19·74 per cent. of the State's total mineral production.

Gympie Goldfield comes next, with a production valued at £11,321,552, all of which is from gold, with the exception of £30,000 from various copper mines outside the goldfield proper, the total value being 10·89 per cent. of that of the whole State's production.

The Palmer Goldfield, which is now almost deserted, has to its credit a mineral production valued at £5,802,054, which is equivalent to 5·58 per cent. of the State's total mineral production. It is 20 years since its annual production reached 3,000 ounces, and during the last two years the yearly returns have not reached 300 ounces. In 1878 the annual output reached 116,759 ounces, and in the four years previous to this 819,697 ounces were recorded.

Herberton, Chillagoe, and Hodgkinson (Walsh and Tinaroo) have yielded minerals to the value of £9,776,243, this being made up of tin, copper, silver, wolfram, lead, etc., the tin yield being the highest, with a value of £4,171,916, the decreasing importance of the other minerals being in the order they are mentioned.

Ipswich, even with its large coal output, comes below the important metal-producing centres in its mineral wealth, its products being valued at £4,135,428 up to the end of 1912. Other localities coming close to Ipswich in the value of their minerals are Ravenswood (£3,695,607), Croydon (£3,189,393), and Stanthorpe (£3,163,138). For other details regarding mineral statistics *see tables and diagrams*, Plates 36-47.

Mineral Testing. The Geological Survey Office undertakes the classification of all mineral specimens free of cost. *See under* Assaying Mineral Samples.

Mineral Wax. A simple hydrocarbon of indefinite composition. *See* Ozokerite.

Mineral Water.

6567. —— ——. Einasleigh Hot Springs, 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. Analysis show total solids equal 57·6 grains per gallon, of which 32·6 per cent. is chlorides of soda and potash, and 16 per cent. is carbonate of soda and potash, the remainder being principally carbonate of lime and magnesia. *Ref.* G.S.Q. Pub. No. 77, p. 6 (1891).

6568. —— ——. Petford (Oakvale) Mineral Springs, 2 miles S. of Petford Rail. Stn. (Chillagoe line), 99 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. Analysis shows 104 grains of total solids per gallon, of which 25 per cent. is carbonate of lime, 54 per cent. is carbonate of soda, and 11 per cent. is chloride of soda, the remainder being made up of silica, iron, alumina, and carbonate of magnesia. *Ref.* G.S.Q. Pub. No. 159, p. 19 (1901). *See also* Water Analyses (Table of), No. 465.

6569. —— ——. Silver Spur Mine (300 ft. level), Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. Analysis shows 27·7 per cent. of total solids per gallon, of which 37 per cent. is carbonate of lime, and 23 per cent. is sulphate of magnesia, the other constituents being silica, carbonate of magnesia, and sulphates of potash and soda.

6570. —— ——. Nettle's Cr. or Innot Hot Springs, 8 miles E.byN. of Mt. Garnet Rail. Stn. (Chillagoe br. line), 7 miles S.S.E. of Coolgarra. *Co.* Cardwell; *Dist.* Kennedy North Analysis shows the water contains 41 grains of total solids per gallon, of which 19 per cent. is chloride of soda, and 8 per cent. is carbonate of soda. Other constituents include small percentages of iron, alumina, carbonate of lime, and sulphate of soda. *Ref.* G.S.Q. Pub. No. 159, p. 19 (1907). *See also* Table of Water Analyses. No. 4667.

6571. —— ——. Maria Cr., 4 miles W. of Tolmie's Rail. Stn. (Central line), 133 miles (by rail and road) W.byS. of Rockhampton. *Co.* Humboldt; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155, p. 18 (1901). Analysis shows 864 grains of total solids per gallon, of which 576 grains is carbonate of soda, 223 grains is chloride of soda, 45 grains carbonate of magnesia, and 15 grains of carbonate of lime, other constituents being silica, iron, and alumina. *Ref. See under* Water Analysis No. 54, Q.G.M.J., vol. 1, p. 4 (1900), G.S.Q. Pub. 143, p. 24 (1898), and G.S.Q. Pub. 155, p. 18 (1901).

6571a. —— ——. Muckadilla Bore, 344 miles W. of Brisbane (Western Railway line). *Co.* Waldegrave; *Dist.* Maranoa. *Ref. See* Water Analysis (Table of), No. 38. The water contains 34 grains of solids per gallon, of which carbonate and chloride of soda constitutes 31 per cent., the other ingredients being carbonate of lime, with iron and alumina. The flow, uncontrolled, is 23,000 gallons daily. *See under* Artesian Bores and Water Analyses, No. 31, for other details.

6572. —— ——. "The Springs," nr. Helidon, 72 miles (by rail)W.byS. of Brisbane. Par. Terry. *Co.* Cavendish; *Dist.* Moreton. *Ref.* G.S.Q. Pub. No. 143, p. 1 (1898). Helidon Spa Water is obtained from natural springs in an alluvial swamp. The water is charged with carbon dioxide, and contains about 200 grains per gallon of carbonate of soda, with small quantities of carbonates of lime and magnesia. *See table under* Water Analyses, No. 493, for details. This is the only Queensland mineral water on the market.

6572a. —— ——. *Loc.* near Boonah Rail. Stn. (Fassifern Branch). *Co.* Churchill; *Dist.* Moreton. The spring is said to be a good flow passing through 60 feet of sandstone. No analyses available.

6573. —— ——. Sanderson's (Stanwell) Bore, Stony Creek, 2 miles S.S.W. of Stanwell Rail. Stn. (Central line), 18 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. For Analysis *see table under* Water Analysis, No. 53.

6574. —— ——. Cape La Billardière, Fergusson Is., 231 miles E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 23 (1892).

—— ——. For other mineral waters *see under* Table of Artesian Bores and Water Analyses.

Minerals of Queensland. List of Synonyms and Varieties. (Adopted names in black type.)

Actinolite, var. of Hornblende.
Agate, var. of Chalcedony.
Alabaster, var. of Gypsum.
Albite, syn. Soda Felspar.
Almandine, var. of Garnet.
Altaite.
Alum (Native), see Kalinite.
Aluminite, see Websterite.
Alunogen.
Amethyst, var. of Quartz.
Amphibole, see Hornblende.
Analcime, syn. Analcite.
Andalusite, var. Chiastolite.
Andradite, var. of Garnet.
Anglesite.
Ankerite.
Anthracite, var. of Coal.
Antimonial Lead Ore, see Bournonite.
Antimonite, see Stibnite.
Antimony Glance, see Stibnite.
Apatite.
Apophyllite.
Aquamarine, var. of Beryl.
Aragonite.
Argentine, var. of Calcite.
Argentite.
Arsenic (Native).
Arsenical Pyrites, see Mispickel.
Arsenolite, syn. White Arsenic.
Arsenopyrite, see Mispickel.
Asbestos, var. of Serpentine and Hornblende.
Asbolane, syn. Asbolite, Earthy Cobalt, Cobaltiferous Wad.
Asphaltum, syn. Mineral Pitch.
Asteria, syn. Star Sapphire.
Atacamite.
Augite, var. Diallage.
Aurichalcite.
Azurite.

Barklyite, sub. var of Ruby (var. of Corundum).
Barytes, syn. Heavy Spar.
Basaltic Hornblende, var. of Hornblende.
Bat Guano.
Beauxite, syn. Bauxite.
Beryl, var. Aquamarine.
Biotite, syn. Magnesia-iron Mica, Black Mica.
Bismite, syn. Bismuth Ochre.
Bismuth (Native).
Bismuth Glance, see Bismuthinite.
Bismuth Ochre, see Bismite.
Bismuthinite, syn. Bismuthine, Bismuth Glance.
Bismutite, syn. Bismuthite.
Bitter Spar, see Dolomite.
Black Copper, see Tenorite.
Black Jack, see Zinc Blende.
Black Jasper, syn. Lydianstone, Touchstone.
Black Mica, see Biotite.
Black Opal, var. of Opal.
Black Tin, var. of Cassiterite.
Blacklead, see Graphite.
Blende, see Zinc Blende.
Bloodstone, syn. Heliotrope, var. of Chalcedony.
Blue Iron Earth, see Vivianite.
Blue Vitriol, see Chalcanthite.
Bog Iron Ore, var. of Limonite.
Bog Manganese.
Bornite, syn. Erubescite, Variegated Copper Ore.
Bournonite, syn. Antimonial Lead Ore.
Bronzite.
Brown Coal, see Lignite.
Brown Hematite, see Limonite.
Brown Iron Ore, see Limonite.

Cacoxenite.
Cadmium Blende, syn. Greenockite.
Cairngorm, var. of Quartz.
Calamine.
Calaverite.
Calcareous Sinter, var. of Calcite.
Calcareous Tufa, var. of Calcite.
Calcite, syn. Calc-Spar. Varieties—Argentine, Dogtooth Spar, Iceland Spar, Ferro-calcite, Fontainbleau Sandstone, Nailhead Spar, Satin Spar, Stalactite, Stalagmite, Strontiano-calcite, Calcareous Sinter, Travertine, Tufa, Oolitic Limestone, Fossiliferous Limestone, Crinoidal Limestone, Massive Limestone, Chalk, Marble.

Minerals of Queensland—*continued:*

List of Synonyms and Varieties. (Adopted names in black type.)

Calc-Spar, see Calcite.
Cannel-Coal, var. of Coal.
Carbonaceous Shale.
Carnelian, syn. Sard. var. of Chalcedony.
Cassiterite, syn. Tinstone. Varieties—Stream Tin, Resin Tin, Toad's-eye Tin, Wood Tin.
Cat's-eye, var. of Corundum.
Celestine, syn. Celestite.
Cerargyrite, syn. Kerargyrite.
Cerussite, syn. White Lead Ore.
Cervantite.
Ceylonite, var. of Spinel.
Chabazite.
Chalcanthite, syn. Blue Vitriol, Copper Vitriol.
Chalcedony, vars. Chrysoprase, Hornstone Lithophyses, Prase, Agate, Bloodstone, Carnelian ; sub-vars. Onyx, Sardonyx.
Chalcocite, see Redruthite.
Chalcolite, syn. Uran Mica, Torbernite, Copper Uranite.
Chalcopyrite, see Copper Pyrites.
Chalcostibite, syn. Antimonial Copper Ore.
Chalcotrichite, var. of Cuprite.
Chalk, var. of Calcite.
Chalybite, see Siderite.
Charcoal (Natural).
Chert.
Chiastolite, syn. Cross-Stone (var. of Andalusite.)
Chillagite.
Chlorite.
Chloropal.
Chrome Ochre.
Chrome Spinel, var. of Spinel.
Chromite, syn. Chrome-iron.
Chrysocolla, var. Cyanochalcite.
Chrysolite, see Olivine.
Chrysoprase, var. of Chalcedony.
Chrysotile Asbestos, var. of Serpentine.
Cimolite.
Cinnabar.
Clay, see Kaolin.
Clay Ironstone.
Coal, vars. Anthracite, Semi-bituminous, Bituminous, Cannel, Lignite.
Cobalt Bloom, see Erythrine.
Cobalt Ochre, see Erythrine.
Cobaltiferous Wad, see Asbolane.
Colophonite, var. of Garnet.
Columbite, syn. Niobite.
Cone-in-cone Limestone, var. Calcite.
Copper Glance, see Redruthite.
Copper (Native).
Copperas, syn. Green Vitriol, Melanterite.
Copper Pyrites, syn. Chalcopyrite.
Copper Uranite, see Chalcolite.
Copper (variegated), see Bornite.
Copper Vitriol, see Chalcanthite.
Coralline Limestone.
Corundum—
  (a) Gem varieties :—Pink Sapphire, Ruby, Barklyite, Purple (Oriental Amethyst), Blue, Green (Oriental Peridot and Emerald), Yellow (Oriental Topaz), Orange, Particoloured, Asteria, Oriental Cat's-eye, Oriental Moonstone.
  (b) Corundum varieties :—Black, bluish, bronze, grey, milky, opalescent, pearly, silky.
  (c) Emery.
Covelline, syn. Covellite, Blue Copper .
Crinoidal Limestone, var. of Calcite.
Cross-Stone, see Chiastolite.
Cupreous Anglesite, see Linarite.
Cuprite.
Cyanite, syn. Kyanite.
Cyanochalcite, var. of Chrysocolla.

Dark Red Silver Ore, see Pyrargyrite.
Diallage, var. of Augite.
Dialogite, see Rhodochrosite.
Diamond.
Diatomaceous Earth, see Tripolite (var. of Opal).
Dioptase.
Dogtooth Spar, var. of Calcite.
Dolomite, syn. Bitter Spar, Magnesian Limestone.

Earthy Cobalt, see Asbolane.
Egyptian Jasper.
Emery, var. of Corundum.
Enargite.
Epidote.
Epsomite, syn. Epsom Salts.
Erubescite, see Bornite.
Erythrine, syn. Erythrite, Cobalt Bloom, Cobalt Ochre.
Eulytite.

Fahlerz, see Tetrahedrite.
Fayalite, syn. Iron Chrysolite.
Felspar.
Ferro-calcite, var. of Calcite.
Fibrolite, syn. Sillimanite.
Fiorite, see Siliceous Sinter (var. of Opal).
Fireclay.
Floatstone, var. of Opal.
Fluorspar, syn. Fluorite.
Fontainbleau Sandstone, var. of Calcite.
Foraminiferal Chalk, var. of Calcite.
Fossil Resin, see Retinite.
Fossiliferous Limestone, var. of Calcite.
French Chalk, see Steatite (var. of Talc).
Fulgurites.

Galena, syn. Lead Glance.
Galmei, see Smithsonite.
Garnet, vars. Almandine (syn. Precious Garnet), Andradite, Colophonite, Melanite, Pyrenite, Pyrope (Precious), Grossularite (syn. Essonite).

Minerals of Queensland—*continued:*

List of Synonyms and Varieties. (Adopted names in black type.)

Garnierite, see Noumeaite.
Gismondite, syn. Gismondine.
Glassy Felspar, see Sanidine.
Gold (Native).
Goslarite, syn. White Vitriol, Zinc Vitriol.
Göthite, syn. Goethite.
Graphite, syn. Plumbago, Black Lead.
Grass-stone, see Sagenite (var. of Rutile).
Grey Copper Ore, see Tetrahedrite.
Greenockite, see Cadmium Blende.
Guano.
Gypsum, vars. Alabaster, Selenite, Satin Spar.

Halite, syn. Rock Salt, Common Salt.
Halloysite.
Harmstome.
Heavy Spar, see Barytes.
Heliotrope, see Bloodstone.
Hematite, syn. Specular Iron, Iron Glance (var. Reddle, Red Ochre).
Hemimorphite, see Smithsonite.
Hercynite, syn. Iron Spinel.
Hessite, syn. Telluric Silver.
Heulandite.
Hornblende. Varieties—Actinolite, Tremolite.
Hornstone, var. of Chalcedony.
Hyacinth, var. of Zircon.
Hyalite, syn. Müller's Glass (var. of Opal).
Hyalosiderite, var. of Olivine.
Hypersthene.

Iceland Spar, var. of Calcite.
Ilmenite, syn. Iserine, Menaccanite, Titanic (Titaniferous) Iron.

Ilvaite, see Lievrite.
Infusorial Earth, see Tripolite.
Iridosmine, see Osmiridium.
Iron Chrysolite, see Fayalite.
Iron Glance, see Hematite.
Iron Jasper, var. of Jasper.
Iron Pyrites, syn. Mundic, Pyrites.
Iron Spinel, see Hercynite.
Iserine, see Ilmenite.

Jargoon, var. of Zircon.
Jasp-opal, var. of Opal.
Jasper. Vars.—Brown, Egyptian, Green, Red, Iron, Black (syn. Lydianstone, Touchstone), Porcellanite.
Joseite.

Kalinite, syn. Potash Alum.
Kaolin, syn. China-clay, Kaolinite, Fireclay, Pipeclay.
Kieselguhr, see Tripolite.
Kerargyrite, see Cerargyrite.
Kyanite, syn. Cyanite.

Labrador Felspar, see Labradorite.
Labradorite.
Laumonite.
Lazulite.
Lead Ochre, see Massicot.
Lepidolite, syn. Lithia Mica.
Leucoxene, see Sphene.
Lievrite, syn. Ilvaite.
Lignite, syn. Brown Coal.
Lime-iron Garnet, see Andradite.
Lime Mesotype, see Scolecite.
Limestone, var. of Calcite.
Limonite, syn. Brown Hematite, Brown Iron Ore.
Linarite, syn. Cupreous Anglesite.
Lithia Mica, see Lepidolite.
Lithomarge, var. of Kaolin.
Lithophyses, var. of Chalcedony.
Lollingite, syn. Prismatic Mispickel.
Lydianstone, var. of Jasper.

Magnesian Limestone, see Dolomite.
Magnesite, syn. Brown Spar.
Magnetic Pyrites, see Pyrrhotite.
Magnetite, syn. Magnetic Iron Ore.
Malachite.
Manganese Spar, see Rhodonite.
Magnesia-iron Mica, see Biotite.
Manganite, syn. Grey Oxide of Manganese.
Marble, var. of Calcite.
Marcasite, syn. Prismatic Iron Pyrites, Radiated Pyrites, Secondary Pyrites, Mundic.
Massicot, syn. Lead Ochre.
Matlockite.
Melaconite, see Tenorite.
Melanite, sub-var. of Andradite (var. of Garnet.)
Melanterite, see Copperas.
Menaccanite, see Ilmenite.
Mercury, syn. Quicksilver.
Mesotype, see Natrolite.
Mica, see Biotite, Muscovite.
Mica (Uran), see Chalcolite.
Mimetite, syn. Green Lead Ore.
Mineral Pitch, see Asphaltum.
Minium, syn. Red Lead Ore.
Mispickel, syn. Arsenical Pyrites, Arsenopyrites.
Molybdenite.
Molybdite, syn. Molybdic Ochre, Molybdine.
Monazite.
Müller's Glass, see Hyalite.
Mundic, see Pyrites, Marcasite, Copper Pyrites.
Muscovite, syn. Potash Mica, Common White Mica.

Nail-head Spar, var. of Calcite.
Natrolite, syn. Mesotype.
Natural Gas.
Nepheline.
Niobite, see Columbite.
Noble Serpentine, var. of Serpentine.
Noumeaite, syn. Garnierite.

Oligoclase.
Olivenite, syn. Olive Copper Ore.
Olivine, syn. Peridot, Chrysolite.
Onyx, var. of Chalcedony.
Oolitic Limestone.

Minerals of Queensland—*continued*:

List of Synonyms and Varieties. (Adopted names in black type.)

Opal. Vars.—Siliceous Sinter (syn. Fiorite, Geyserite), Floatstone, Hyalite, Tripolite (syn. Diatomaceous Earth, Kieselguhr), Black Opal, Precious Opal, Common Opal, Wood Opal, Semi-Opal, Jasp-Opal.
Orthoclase, syn. Potash Felspar, var. Sanidine (syn. Glassy Felspar).
Osmiridium, syn. Iridosmine.
Ottrelite.
Ozokerite, syn. Mineral Wax.

Parian Marble, see Alabaster.
Penninite, var. Rhodochrome.
Phacolite, var. of Chabazite.
Picotite, var. of Spinel.
Pinite.
Pipeclay, var. of Kaolin.
Pitch, see Asphaltum.
Pitchblende, syn. Uraninite.
Platinum.
Pleonaste, var. of Spinel.
Plumbago, see Graphite.
Porcelain Clay, var. of Kaolin.
Porcellanite, syn. Porcelain Jasper.
Potash Alum, see Kalinite.
Potash Felspar, see Orthoclase.
Potash Mica, see Muscovite.
Prase, var. of Chalcedony.
Prehnite.
Prosopite.
Proustite, syn. Ruby Silver Ore.
Psilomelane.
Pyrargyrite, syn. Dark Red Silver Ore.
Pyreneite, var. of Andradite, sub-var. of Garnet.
Pyrites, see Iron Pyrites.
Pyrolusite.
Pyromorphite.
Pyrope, var. of Garnet.
Pyrrhotite, syn. Pyrrhotine, Magnetic Pyrites.

Quartz. Varieties—Amethyst, Cairngorm, Rock Crystal, Rose Quartz, Smoky Quartz.
Quicksilver, see Mercury.

Radiated Pyrites, see Marcasite.
Redruthite, syn. Chalcocite, Cop. Glance.
Red Ochre, var. of Hematite.
Resin Tin, var. of Cassiterite.
Reddle, var. of Hematite.
Rhodochrome, var. of Penninite.
Retinite, syn. Fossil Resin.
Rhodochrosite, syn. Dialogite.
Rhodonite, syn. Manganese Spar.
Rock Crystal, var. of Quartz.
Rock Salt, see Halite.
Rose Quartz, var. of Quartz.
Rubellite, var. of Tourmaline.
Ruby, var. of Corundum.
Ruby Silver Ore, see Proustite.
Ruby Tin, var. of Cassiterite.
Rutile.

Sagenite, var. of Rutile.
Sal-ammoniac.
Salt, see Halite.
Sanidine, syn. Glassy Felspar, var. of Orthoclase.
Saponite.
Sapphire, var. of Corundum.
Sard, see Carnelian.
Sardonyx, var. of Chalcedony.
Satin Spar, var. of Gypsum.
Scapolite, syn. Wernerite.
Scheelite.
Schorl, var. of Tourmaline.
Scolecite, syn. Lime Mesotype.
Scorodite.
Secondary Pyrites, see Marcasite.
Selenite, var. of Gypsum.
Semi-anthracite, var. of Coal.
Semi-Opal, var. of Opal.
Serpentine, var. Chrysotile Asbestos.
Siderite, syn. Chalybite (var. Sphaero-siderite.
Siliceous Sinter, syn. Fiorite, Geyserite, var. of Opal.
Sillimanite, syn. Fibrolite.
Silver (Native).
Smithsonite, syn. Galmei, Hemimorphite, Calamine (Dana).
Smoky Quartz, var. of Quartz.
Soapstone, see Steatite.
Soda Felspar, see Albite.
Specular Iron, see Hematite.
Sphalerite, see Zinc Blende.
Sphaero-siderite, var. of Siderite.
Sphene, syn. Leucoxene, Titanite.
Spicular Earth, var. of Opal.
Spinel. Varieties — Almandine, Picotite (syn. Chrome Spinel), Pleonaste (syn. Ceylonite).
Stalactite, var. of Calcite.
Stalagmite, var. of Calcite.
Stannite, syn. Stannine, Tin Pyrites.
Staurolite, syn. Staurotide.
Steatite, syn. French Chalk (var. of Talc).
Stephanite.
Stibnite, syn. Antimony Glance.
Stilbite.
Stream Tin, see Cassiterite.
Strontianite.
Strontiano-Calcite, var. of Calcite.
Sulphur (Native).

Tabular Spar, see Wollastonite.
Talc, var. Steatite (syn. Soapstone, French Chalk).
Tantalite.
Tenorite, syn. Melaconite, Black Copper.
Tetradymite, syn. Telluric Bismuth.
Tetrahedrite, syn. Fahlez, Grey Copper Ore.
Thompsonite.
Thulite, see Zoicite.
Tile Ore, var. of Cuprite.
Tin Pyrites, see Stannite.
Titanic Iron, see Ilmenite.
Titanite, see Sphene.
Toad's-eye Tin, var. of Cassiterite.

Minerals of Queensland—*continued:*

List of Synonyms and Varieties. (Adopted names in black type.)

Topaz.
Torbernite, see Chalcolite.
Touchstone, see Black Jasper.
Tourmaline. Varieties—Rubellite, Schorl.
Travertine, var. of Calcite.
Tremolite, var. of Hornblende.
Tripolite, syn. Diatomaceous Earth, Kieselguhr, Infusorial Earth (var. of Opal).
Tufa, var. of Calcite.
Tungstite, syn. Tungstic Ochre.
Turgite, syn. Hydrohematite.
Turquoise.

Uraninite, see Pitchblende.
Uran-Mica, see Chalcolite.

Valentinite.
Variegated Copper Ore, see Bornite.
Vermiculite.
Viridite.
Vivianite, syn. Blue Iron Earth.

Wad.
Websterite, syn. Aluminite.
Wernerite, see Scapolite.
White Arsenic, see Arsenolite.
White Mica, see Muscovite.
White Sapphire (so-called), see Topaz.
White Vitriol, syn. Goslarite.
Willemite.
Witherite.
Wolfram, syn. Wolframine.
Wollastonite, syn. Tabular Spar.
Wood-Opal, var. of Opal.
Wood-Tin, var. of Cassiterite.
Wulfenite.

Yellow Ochre, var. of Limonite.

Zinc Blende, syn. Sphalerite, Black Jack, Blende.
Zinc Vitriol, syn. Goslarite.
Zircon, var. Hyacinth.
Zoicite, syn. Thulite.

Mining Acts, and Regulations thereunder.

(By Authority, Gov. Printer, Brisbane, 1911, pp. 310.) (Pamphlet.)

SYNOPSIS:

Mining Act of 1898 (62 Vic. No. 24).
Mining Act Amendment Act of 1901 (1 Edw. VII. No. 10).
Mining Act Amendment Act of 1902 (2 Edw. VII. No. 24).
Regulations under the Mining Act of 1898.
Mining on Private Land Act of 1909 (9 Edw. VII. No. 15).
Regulations under the Mining on Private Lands Act of 1909.
Mines Regulation Act of 1910 (1 Geo. V. No. 24).
Mining Machinery Advances Act of 1906 (6 Edw. VII. No. 10).
Regulations under the Mining Machinery Advances Act of 1906.

Copies of the Act are obtainable at Mines Department, Brisbane; at Government Printing Office, Brisbane; and at Wardens' Offices in country districts.

Mining and Geological Reports and Plans. *See* Publications *under* Geological Survey of Queensland.

—— Dredges. *See under* Dredges.

Mining Fields of Queensland. *See under* Antimony, Coal, Copper, Gold, Opal, Sapphire, Silver-Lead, Tin, and Wolfram.

—— Inspectors. *See* Inspectors of Mines.

Mining Journal (Queensland Government). *See under* Government Mining Journal.

—— Laws (Royal Commission on). *See under* Royal Commissions.

Mining Machinery and Advances Act, 1906. The object of this Act is to permit of money being borrowed from the Government for the purpose of procuring and erecting mining and metallurgical machinery and plant. Half the total cost has to be contributed by the borrower, and interest has to be paid on the amount advanced at the rate of 5 per cent. per annum. The prescribed form, and a copy of the Act, giving the conditions to be fulfilled, may be obtained at the Mines Department, Brisbane.

Mining Machinery in Queensland, 1911. (Value of, on each Mining Field) :—

	£		£
Alice River	800	Herberton	214,900
Biggenden	4,500	Horse Cr. & Rocky	1,100
Bowen	2,165	Innisfail	1,000
Charters Towers & Cape River	300,000	Kangaroo Hills	7,000
		Mackay	300
Chillagoe	181,064	Mt. Morgan	777,495
Clermont	21,630	Mt. Perry	38,700
Cloncurry	169,390	Nanango	1,000
Coen	2,700	Normanby	1,200
Cooktown	10,000	Palmer	1,900
Croydon	110,700	Possession Islands	800
Eidsvold	7,500	Ravenswood	108,310
Etheridge, Woolgar, &c.	30,610	Rockhampton	128,675
Gladstone	34,998	Stanthorpe	20,560
Gympie	133,933	Starcke	2,200
Hamilton	2,000	Warwick	3,000

—— Manager's Certificates. *See under* Board of Examiners for Mining Managers.

Ministers for Mines (list of). *See* Secretaries for Mines.

Minium. *Syn.* Red Lead Ochre. *Compo.*, Oxide of lead. *Colour,* usually bright red. *Streak,* orange-yellow. Opaque. *H.* = 2·3; *Sp.gr.* = 4·6. *Contents* (*max.*), Lead 90 per cent.

6575. ——. *Assoc.with* Hematite, in black slate. *Loc.* Dugald Mine, Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 10, p. 3 (1885).

6576. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Eureka Reef, 1 mile from Flanagan's, 13 miles E.byS. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 35, p. 11 (1887).

6577. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Cerussite, and Pyromorphite, in quartz reefs. *Loc.* Tabletop, 8 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 113, p. 348 (1896).

6578. ——. *Assoc.with* Gold and Silver, in lode. *Loc.* Allendale Silver Lode, 1½ mile of Chowey Cr., 6 miles N.W. of Chowey Rail. Stn. (Gayndah line), 68 miles (by rail and road) W. of Maryborough. *Co.* Bowen (Cook?); *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

6579. ——. *Assoc.with* Ironstone. *Loc.* Rose and Thistle Silver Lode, ½-mile down Didcot Cr., E. of Mt. Melville, 2½ miles N. of Chowey Rail. Stn. (Gayndah line), 64 miles (by rail and road) W. of Maryborough (*ante*). *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

6580. ——. As a secondary deposit. *Loc.* Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

6581. ——. *Assoc.with* Cuprite, Tetrahedrite, Malachite, and Hematite. *Loc.* Mollie Lease, Marble Cr., Calcifer, 132 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assays: See* No. 2435. *Ref.* G.S.Q. Pub. 69, p. 8 (1891).

6582. ——. *Assoc.with* Cerussite, in gossan. *Loc.* Arbouin and party's P. Area, Dargalong, 7 miles S. of Zillmanton Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

6583. ——. *Assoc.with* Galena and Anglesite, in gossan. *Loc.* Chillagoe Queen Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

6584. ——. *Assoc.with* Anglesite, Cerussite, and Hematite, in lode. *Loc.* Excelsior Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

6585. ——. *Assoc.with* Copper carbonate and Cerussite, in ferruginous gossan. *Loc.* Johnson and Smyth's Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

6586. ——. *Assoc.with* Massicot, Anglesite, Galena, Cerussite, Copper carbonate, in lode. *Loc.* Pandora Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

6587. ——. *Assoc.with* Cerussite and Galena, in ferruginous clay. *Loc.* P.A. (40 acres), Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

6588. ——. *Assoc.with* Cerussite, in lode. *Loc.* Silver Crown Mine, Dargalong (*ante*). *Ref.* G.S.Q. Pub. 69, p. 10 (1891).

6589. ——. As a secondary deposit. *Loc.* Muldiva Silver-Lead Mines, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

6590. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Malachite, Galena, Cerussite, Zinc Blende, Hematite, and Garnet. *Loc.* Penzance Mine, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), 152 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

6591. ——. *Assoc.with* Cerussite and Galena, in limestone. *Loc.* Queenslander Copper Mine, Redcap Cr. (*ante*). *Assay:* Silver = from 30 oz. to 200 oz. per ton. *Ref.* G.S.Q. Pub. 69 p. 7 (1891).

6592. ——. *Assoc.with* Cerussite, Copper Carbonate, and Limonite, in lode in slate, greywacke, and quartzite. *Loc.* Monte Video Mine, between Ashton and Bowler Creeks, 3 miles E. of Ashtonville, 15 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mnieral Fields. *Co.* Wrotham; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 15 (1898).

6593. ——. *Assoc.with* Gold, Mispickel, and Galena, in quartz. *Loc.* Min. Area (25), Jibbinbar, 20½ miles S.byW. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Assays:* *See* No. 2830. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

6594. ——. *Assoc.with* Silver, Galena, Anglesite, and Malachite. *Loc.* Koh-i-noor Silver-Lead Mine, Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Assay:* Silver = 500 oz. per ton. *Yield:* Silver = 94 oz. per ton; Lead = 40 per cent. *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

6595. ——. *Assoc.with* Galena and Anglesite, in quartz. *Loc.* Tucker's Silver-Lead Lode, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 5 (1891).

6596. ——. *Assoc.with* Galena, Chalcanthite, Anglesite, Massicot, and Limonite, in slate. *Loc.* John Bull Mine, Dry R., br. of Wild (Upper Herbert) R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 32 (1883).

6597. ——. *Assoc.with* Argentite, Liderite, and Galena. *Loc.* Target Silver Mine, Dry R. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 46 (1887).

6598. ——. *Assoc.with* Gold, Silver, Cerussite, Iron Pyrites, Hematite, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Mispickel, Zinc Blende, and Chalcanthite, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mine, Return Cr., 136 miles (by rail) S.W. of Cairns. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

6599. ——. *Assoc.with* Magnetite and Manganese-dioxide, in lode. *Loc.* Black Star S. Lease (199), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 82, p. 6 (1892).

6600. ——. *Assoc.with* Cerussite, in lode. *Loc.* Mt. Moss Extd. Lease (169) (Queen Lode), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

6601. ——. In quartzite. *Loc.* White Star Lease (160), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 5 (1892).

6602. ——. *Assoc.with* Galena, Cerussite, Chrysocolla, Copper carbonate, Zinc Blende, and Hematite, in gossan lode. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

6603. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Albion Mine, Star R. (Argentine) Mineral Field, 40 miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

6604. ——. *Assoc.with* Galena, Anglesite, Cerussite, Pyromorphite, and Limonite, in lode. *Loc.* Alpha Silver-Lead Mine, Star. R. (Argentine) Mineral Field (*ante*). *Assay:* Lead = 79 per cent.; Silver = 107 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

6605. ——. *Assoc.with* Galena and Ironstone, in lode. *Loc.* Ard Righ Mine, Star R. (Argentine) Mineral Field (*ante*). *Assay:* Lead = 61 per cent.; Silver = 57 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

6606. Minium. *Assoc.with* Cerussite in lode. *Loc.* Ben Lomond Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Assay:* Lead = 27 per cent.; Silver = 234 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

6607. ——. *Assoc.with* Anglesite, Cerussite, Massicot, and Ironstone, in lode. *Loc.* Bonanza Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6608. ——. *Assoc.with* Lead Ochre and Ironstone, in quartz and slate. *Loc.* Bonanza North Mine, Star (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6609. ——. *Assoc.with* Cerussite, in lode. *Loc.* Cleopatra Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q., Pub. 26, p. 2 (1886).

6610. ——. *Assoc.with* Galena, Cerussite, Copper Pyrites, Malachite, Manganese-dioxide, Mispickel, Ironstone, and Iron Ochre. *Loc.* Colorado Silver-Lead Mine, Star R. Mineral Field (*ante*). *Assay:* Silver = 114 oz. per ton; Lead = 62 per cent. *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

6611. ——. *Assoc.with* Galena and Cerussite, in gossan. *Loc.* Crœsus Silver-Lead Mine, Star R. Mineral Field (*ante*). *Assay:* (1886).

6612. ——. *Assoc.with* Anglesite, Cerussite, and Ironstone, in ferruginous rock. *Loc.* Eureka Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

6613. ——. *Assoc.with* Galena, Anglesite, and Ironstone. *Loc.* Hero Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, pp. 2, 3 (1886).

6614. ——. *Assoc.with* Cerussite and Anglesite, in lode. *Loc.* Humphrey and Co.'s Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

6615. ——. *Assoc.with* Galena, Cerussite, Massicot, and Ironstone, in lode. *Loc.* John Bull Silver Mine, Star R. (Argentine) Silver Field (*ante*) *Assay: See* No. 2986. *Ref.* G.S.Q. Pub. 26, p. 3 (1886).

6616. ——. *Assoc.with* Cerussite and Ironstone, in lode. *Loc.* Jones's Sel. (139), Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

6617. ——. *Assoc.with* Cerussite [and Anglesite], in lode. *Loc.* Lady Annie Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Assays:* Lead = 69 per cent. and 59 per cent.; Silver = 186 oz. and 166 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 3 (1886), and G.S.M.

6618. ——. *Assoc.with* Cerussite and Ironstone. *Loc.* Morrison and Co.'s Sel. (165), Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

6619. ——. *Assoc.with* Lead, Gossan, and Ironstone, in lode. *Loc.* Morrison and Co.'s Sel. (166), Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

6620. ——. *Assoc.with* Galena and Cerussite, in lode. *Loc.* Nonpareil Silver-Lead Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

6621. ——. *Assoc.with* Cerussite and Anglesite, in quartz and schist lode. *Loc.* Northbrook (A. Beazley's) Sel. (179), Star R. (Argentine) Silver Field (*ante*). *Assays:* Silver = 108 oz. and 69 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

6622. ——. *Assoc.with* Galena, Cerussite, and Ironstone, in gossan lode. *Loc.* Overlander Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

6623. ——. *Assoc.with* Cerussite, in gossan. *Loc.* P.F. Hanran Silver Sel., Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

6624. ——. *Assoc.with* Galena and Cerussite. *Loc.* Prince of Wales Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6625. ——. *Assoc.with* Cerussite and Malachite, in gossan lode. *Loc.* Royal Standard Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886).

6626. ——. *Assoc.with* Galena, Cerussite, Anglesite, and Ironstone. *Loc.* St. John's Lease, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6627. ——. *Assoc.with* Galena, Anglesite, and Hematite, in quartz. *Loc.* Struck Oil Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6628. ——. *Assoc.with* Galena, Anglesite, and Cerussite, in ferruginous rock. *Loc.* True Blue Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Assay:* Lead = 72 per cent., Silver = 68 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. (3) (1886), and G.S.M.

6629. ——. *Assoc.with* Gold, Iron Pyrites, Anglesite, Cerussite, Zinc Blende, and Siderite, in quartz and gossan lode. *Loc.* Union Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), and G.S.M.

6630. ——. *Assoc.with* Galena, Anglesite, and Cerussite, in sandstone. *Loc.* Venture Mine, Star R. (Argentine) Mineral Field (*ante*). *Assays:* Lead = 60 and 68 per cent., Silver = 69 and 82 oz. per ton. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

6631. ——. *Assoc.with* Galena, Cerussite, Anglesite, and Ironstone, in ferruginous gossan. *Loc.* Washington 1 and 2 Silver Mines, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 4 (1886).

6632. ——. *Assoc.with* Cerussite and Mispickel, in veins. *Loc.* Long Hill Gold and Silver Mine, Star R. (Argentine) Silver Field (*ante*). *Ref.* G.S.Q. Pub. 26, *Dist.* **Kennedy South.** *Assays: See* No. 1287. *Ref.* G.S.Q. Pub. 39, pp. 9, 10 (1887).

6633. ——. *Assoc.with* Galena, Cerussite, Iron Pyrites, Copper Pyrites, and Zinc Blende, in clay lode. *Loc.* General Gordon Mine, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Assay: See* No. 1289. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

6634. ——. *Assoc.with* Galena, Cerussite, and Clay, in lode in slate. *Loc.* New Year's Gift Mine, Two-mile Cr., Sellheim Mineral Field (*ante*). *Assay: See* No. 1290. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

6635. ——. *Assoc.with* Galena, Anglesite, Cerussite, Iron Pyrites, and Ironstone, in lode. *Loc.* Pyramid Silver Lode, Sellheim Mineral Field (*ante*). *Assays: See* No. 1291. *Ref.* G.S.Q. Pub. 57, pp. 2, 3 (1889).

6636. ——. *Assoc.with* Silver, Galena, Cerussite, Iron Pyrites, Ironstone, and Zinc Blende, in lode. *Loc.* Rob Roy Mine, Sellheim Mineral Field (*ante*). *Assays: See* No. 3017. *Ref.* G.S.Q Pub. 57, p. 4 (1889).

6637. ——. *Assoc.with* Silver, Galena, and Cerussite, in lode. *Loc.* Silver King Mine, Sellheim Mineral Field (*ante*). *Assay: See* No. 1293. *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

6638. ——. *Assoc.with* Galena, in gossany quartz. *Loc.* Stackpool's Lease, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

6639. ——. *Assoc.with* Gold, Galena, and Mispickel. *Loc.* Venture Silver Mine, Sellheim Mineral Field (*ante*). *Assays: See* No. 4147. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

6640. ——. *Assoc.with* Galena and Cerussite, in veins of quartz in sandstone. *Loc.* Reefs, E. of Mt. Clarke, Mt. Britton Goldfield, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

6641. ——. *Assoc.with* Gold, Silver, Tile Ore, Copper carbonate, and Steatite, in quartz lode. *Loc.* 4 miles N.W. of junction of Tierawoomba and Boothill Creeks, 50 miles S.S.W. of Mackay. *Co.* Wodehouse (*ante*). *Assay: See* No. 7505. *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

6642. ——. *Assoc.with* Bismuthinite, Bismutite, and Malachite, and Gold (trace). *Loc.* Mt. Samford, Enoggera Ranges, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 159, p. 18 (1901).

6643. ——. *Assoc.with* Gold, Silver, Anglesite, Cerussite, Galena, Hematite, Limonite, and Massicot, in lode. *Loc.* Bompa Silver-Lead Mines, Glassford Cr., about 2 miles W.byS. of Littlemore Rail. Stn. (Boyne-Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 159, p. 7 (1901).

Geological Note: The prevailing country rock is granite. Some miles to the west there are deposits of Tertiary (?) sandstones and shales containing an oil-bearing or resin-bearing shale, similar in composition to that found at Duaringa, *which see.*

Misima, Brit. New Guinea. *See* St. Aignaus Is.

Mispickel. *Syn.* Arsenical Pyrites. Arsenopyrite. *Compo.*, Arseno-sulphide of iron. *Colour*, whitish or greyish. Metallic. *Streak*, greyish-black. *H.* = 5·5-6. *Sp.gr.* = 6·0-6·4. *Contents* (*max.*), Arsenic 46 per cent.

6644. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, and Galena, in granite. *Loc.* Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 202, p. 10 (1905).

6645. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Happy Jack Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

6646. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Zinc Blende, in lode. *Loc.* Allendale Silver Mine, ½-mile up Chowey Cr., nr. Mt. Shamrock, 6 miles N.W. of Chowey Rail. Stn. (Gayndah line), 68 miles (by rail and road) W. of Maryborough. *Co.* Bowen; *Dist.* **Burnett.** *Assay: See* No. 3567.. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

6647. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites. *Loc.* Mt. Ophir Mine, Mt. Ophir, Chowey Cr., 62 miles (by rail) W. of Maryborough. *Co.* Bowen (*ante*). *Ref.* A.R., p. 158 (1908).

6648. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in felsite. *Loc.* Achillea Mine, Gebangle Goldfield, 3 miles up Yarrabil Cr., 12 miles N.W. of Degilbo Rail. Stn. (Gayndah line), 70 miles (by rail and road) W. of Maryborough. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890), and G.S.M.

6649. ——. *Assoc.with* Gold and Iron Pyrites, in porphyry. *Loc.* Gebangle P.C., ridge nr. Yarrabil Cr., Gebangle Goldfield (*ante*). *Ref.* G.S.Q. Pub. 60, p. 5 (1890).

6650. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and. calcite. *Loc.* Caledonia Reef, Reid's Cr. Goldfield, 4½ miles S.W. of Mt. Perry Rail. Stn., 71 miles (by rail and road) S.W.byS. of Bundaberg. *Ref.* G.S.Q. Pubs. 21, p. 11 (1885), 125, p. 28 (1897).

6651. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* California Reef, Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and G.S.M.

6652. ——. *Assoc.with* Iron Pyrites, Galena, and Stibnite. *Loc.* Lady Norman and Reid's Cr. Mines, Reid's Cr. Goldfield (*ante*). *Contents:* Gold = 2·25 oz. to 5·05 per ton. *Ref.* A.R.D.M., p. 34 (1894).

6653. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Stibnite, and Zinc Blende, in quartz and felsite. *Loc.* Reid's Cr. Reefs, Branch Cr., Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885).

6654. ——. *Assoc.with* Gold and Silver, in quartz reef. *Loc.* Three miles S. of Mt. Perry, on Eidsvold Road. *Co.* Bowen; *Dist.* Burnett. *Assay:* Gold = 8 dwt., Silver = 13 dwt. 14 gr. per ton of ore. *Ref.* A.R., p. 158 (1908).

6655. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, Magnetite, Native Bismuth, Bismuthinite, Bismutite, Bismite, Manganese-dioxide, Erythrine, Viridite, Actinolite, Calcite, Chalcedony, and Epidote. *Loc.* Biggenden Gold and Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn. (Gayndah line), 58½ miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 60, p. 2 (1890), 173 (1902), 194 (1904).

6656. ——. *Assoc.with* Copper Pyrites, Bismite, and Calcite, in lode. *Loc.* In Shaft, 1 mile N.N.E. of Mt. Biggenden (*ante*). *Ref.* G.S.Q. Pub. 60, p. 3 (1890).

6657. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Cuprite, Tenorite, Malachite, Iron Pyrites, Hematite, Bismuthinite, Pyrrhotite, Zinc Blende, and Calcite, in quartz reef. *Loc.* Commonwealth Copper Mine, Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), 207, pp. 14-19 (1907).

6658. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Native Bismuth, Bismuthinite, Magnetite, and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, Mt. Havilah (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), 207, pp. 13, 14 (1907).

6659. ——. *Assoc.with* Gold, Iron Pyrites, Bismuthinite, and Bismutite, in breccia. *Loc.* Kent's Knob Mine, ¼-mile N.W. of Mt. Shamrock, 63 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 25, p. 2 (1886), and B.D.

6660. ——. *Assoc.with* Native Gold, Telluride of Gold, Native Bismuth, Joseite, Bismuthinite, Molybdenite, Copper Pyrites, Malachite, Zinc Blende, and Calcite, in syenite [diorite], volcanic tuff, and breccia. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo, 63 miles (by rail and road) W. of Maryborough (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 125 (1897), 168, pp. 4-8 (1901), and B.D.

6661. ——. *Assoc.with* Copper Pyrites, Tenorite, Iron Pyrites, and Galena, in quartz and calcite. *Loc.* Gympie Copper Mines, Ltd., P. Area No. 2, Gooroomjam Cr., 23 miles N.N.E. of Nanango Rail. Stn., 30 miles S. of Kilkivan Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Assays: See* No. 2139. *Ref.* G.S.Q. Pub. 169, p. 10 (1901).

6662. ——. *Assoc.with* Gold, Silver, and Iron Pyrites, in quartz lode. *Loc.* Auburn Falls Gold Mine, junction of Cardarga Cr. and Auburn R., 32 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 207, p. 11 (1907), and A.R., p. 56 (1906).

6662A. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, and Manganese-dioxide, in quartz. *Loc.* Cadarga Cr. Gold Mines, between Cadarga Cr. and Auburn R., 33 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle (*ante*). *Ref.* Q.G.M.J., vol. 5, pp. 162, 163 (1904), and G.S.Q. Pub. 207, p. 11 (1907).

6663. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Cosmopolitan Lease (42), Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 102, p. 3 (1895).

6664. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* Mt. Rose P.C., Mt. Rose Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

6665. ——. *Assoc.with* Gold and Galena, in quartz reef. *Loc.* E. side of Burnett R., Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 43, p. 5 (1887).

6666. ——. *Assoc.with* Cassiterite, Tourmaline, and Chlorite, in quartz. *Loc.* Dodd's Lode Claim, Byer's Gully, trib. of Jones's Cr., Rossville, 26 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

6667. ——. *Assoc.with* Cassiterite, Wolfram, and Tourmaline, in talcose quartz. *Loc.* Gladstone Tin Mine, Mt. Amos, about 20 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 9 (1891).

6668. ——. *Assoc.with* Wolfram, Cassiterite, Tourmaline, and Talc, in quartz. *Loc.* Mt. Amos Tin Mine, Mt. Amos (*ante*). *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

6668A. ——. *Assoc.with* Iron Pyrites and Cobalt, in quart lode. *Loc.* Asmus Claim, Mt. Hartley, head of Wallaby Cr., 4 miles E. of Rossville, 26 miles S.S.E. of Cooktown. *Co.* Banks; *Dist.* Cook. *Ref.* A.R., p. 199 (1909).

6669. ——. *Assoc.with* Cassiterite, Wolfram, Tourmaline, and Felspar, in quartz. *Loc.* Wright's Lease (99), Black Prince Lode, Mt. Hartley (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

6670. ——. *Assoc.with* Cassiterite, Iron Pyrites, and Tourmaline, in talc. *Loc.* Collingwood Tin Lease (81), E. side of Mt. Leswell, 1½ mile S.S.W. of Rossville, about 26 miles S. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 66, p. 4 (1891).

6671. ——. *Assoc.with* Cassiterite and Tourmaline, in quartz. *Loc.* Cahill Bros.' Lease (89), Jones's Cr., E. side of Mt. Leswell (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

6672. ——. *Assoc.with* Cassiterite, Mica, Felspar, and Tourmaline, in decomposed rock. *Loc.* Harris and Party's Tin Lease, Rossville, 25 miles S. of Cooktown. *Co.* Banks; *Dist.* Cook. *Ref.* G.S.Q. Pub. 35, p. 16 (1889).

6672A. ——. *Assoc.with* Gold, in quartz. *Loc.* St. Patrick Workings, in Starcke Consols Lease (23), Munburra, 40 miles N.N.W. of Cooktown, Starcke Goldfield. *Co.* Banks (*ante*). *Ref.* G.S.Q. Pub. 223, p. 41 (1909).

6673. ——. *Assoc.with* Gold, in quartz. *Loc.* German Miner Reef, Limestone, 60 miles S. of Laura Rail. Stn. (Cooktown line), 127 miles (by rail and road) S.W. of Cooktown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

6674. ——. *Assoc.with* Gold, in quartz. *Loc.* Good Hope Reef, Limestone (*ante*). *Ref.* G.S.Q. Pub. 46, p. 2 (1889).

6675. ——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* Mt. Madden, Oakey Cr., 13 miles S.E.byS. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 108, p. 11 (1896), 123, p. 8 (1897).

6676. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Long Tunnel Mine, Coen Goldfield, 45 miles (by road) N.N.W. of Port Stewart, 189 miles N.W. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* G.S.Q. Pub. 163, p. 21 (1901).

6677. ——. *Assoc.with* Gold, in quartz. *Loc.* Wilson Mine, Coen Goldfield (*ante*). *Ref.* G.S.Q. Pub. 163, p. 19 (1901).

6678. ——. *Assoc.with* Galena, in quartz. *Loc.* Rothwell Reef, about 9 miles (by road) S.E. of Coen, about 54 miles (by road) N.N.W. of Port Stewart. *Co.* Coen; *Dist.* Cook. *Ref.* O.R.

6679. Mispickel. *Assoc.with* Galena and Massicot, in quartz. *Loc.* Ebagoola, Hamilton Goldfield, 33 miles W. of Port Stewart, 173 miles N.W.byW. of Cooktown. *Co.* Coen (*ante*). *Ref.* O.R.

6680. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz and calcite. *Loc.* Balmoral Reef, Castleton, 5 miles S.S.E. of Charleston Rail. Stn., Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 151, p. 12 (1900).

6681. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Galena, and Zinc Blende, in quartz reef. *Loc.* Nil Desperandum Mine, Charleston, 140 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 219, p. 14 (1909).

6682. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Papa Reef, Georgetown, 20 miles N. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

6683. ——. *Assoc.with* Gold, in quartz. *Loc.* Caledonia Reef, 5½ miles S.W. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 4 (1887).

6684. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Just-in-Time Reef, Northcote, 15 miles W. of Mareeba Rail. Stn. (Cairns line), 61 miles (by rail and road) W. of Cairns, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 28 (1885).

6685. ——. *Assoc.with* Gold, in quartz. *Loc.* Captain Cook Reef, Woodville, 9 miles N.W.byW. of Thornborough, Hodgkinson Goldfield (*ante*). *Ref.* G.S.Q. Pub. 16, p. 22 (1884).

6686. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Union Reef, Woodville, 13 miles N.W. of Thornborough, Hodgkinson Goldfield (*ante*). *Ref.* G.S.Q. Pub. 16, p. 24 (1884), and P.R.S.Q., vol. 4, p. 47 (1887).

6687. ——. *Assoc.with* Scorodite, Wolfram, Cassiterite, Molybdenite, Native Bismuth, and Bismutite, with traces of Copper Pyrites, Cuprite, Tenorite, Malachite, Azurite, Iron Pyrites, Hematite, etc., in irregular masses of quartz and greisen in granite. *Loc.* Boonmoo Mine, 81 miles (by rail) S.W. of Cairns (Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

6688. ——. *Assoc.with* Cassiterite, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Consolidated Tin Mine, 4½ miles N.E. of Montalbion, 11 miles (by rail and road) S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

6689. ——. *Assoc.with* Silver, Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in lode. *Loc.* Tornado Mine, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Analysis: See* No. 2155. *Ref.* P.R.S.Q., vol. 4, p. 52 (1887).

6690. ——. *Assoc.with* Iron Pyrites, Cassiterite, Wolfram, Scheelite, and Copper carbonate, in diorite dyke. *Loc.* Chance Tin Mine, Watsonville, head of James's Cr., br. of Walsh R., 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 119, p. 18 (1897), 125, p. 40 (1897).

6691. ——. *Assoc.with* Copper Pyrites, Cassiterite, and Orthoclase, in quartz. *Loc.* Gt. Western Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 27 (1883).

6692. ——. *Assoc.with* Copper Pyrites, in diorite. *Loc.* King of the North Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 25 (1883).

6692A. ——. *Assoc.with* Cassiterite, Copper Pyrites, Galena, Wolfram, Garnet, and Chlorite, in greywacke. *Loc.* King of the Ranges Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 222, pp. 41-50 (1910).

6693. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Cassiterite, Stannine, Iron Pyrites, Ironstone, Wolfram, Fluorspar, and Chlorite, in lode. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), 119, p. 15 (1897).

6694. ——. In elvan dyke. *Loc.* St. Kilda Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

6695. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Copper carbonate, Chalcanthite, Marcasite, Cassiterite, Wolfram, Limonite, and Red and Yellow Ochre. *Loc.* Try Again and Chance Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

6696. ——. *Assoc.with* Cassiterite and Chlorite. *Loc.* Ulster Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 21 (1883).

6697. ——. *Assoc.with* Cassiterite and Wolfram, in quartzite. *Loc.* Victoria Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

6698. ——. *Assoc.with* Scorodite, Wolfram, Scheelite, Molybdenite, Native Bismuth, Bismuthinite, Bismutite, Cassiterite, Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

6699. ——. *Assoc.with* Scorodite, Wolfram, Molybdenite, Scheelite, Native Bismuth, Bismutite, and Molybdenite, with traces of Copper Pyrites, Tenorite, Chrysocolla, Iron Pyrites, etc., in irregular quartz masses in greisen. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

6700. ——. *Assoc.with* Iron Pyrites, Cassiterite, Wolfram, Molybdenite, and Monazite, in quartz and mica in greisen country. *Loc.* California Cr., nr. Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6701. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Boomerang Copper Mine, 1 mile W. of Calcifer Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

6702. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Cassiterite, and Galena. *Loc.* Iolanthe Mine, Koorboora Rail. Stn. (Chillagoe line), 108 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

6703. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Cassiterite, and Galena, in lode. *Loc.* Shakespeare Tin Lease, Koorboora (*ante*). *Ref.* G.S.Q. Pub. 69, p. 11 (1891).

6703A.——. In quartz. Mark Tapley Mine, Mungana, 149 miles (by rail) W.S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* A.R., p. 234 (1910).

6704. ——. *Assoc.with* Fluorspar. *Loc.* Ord, on Mt. Garnet line (Chillagoe Br. line), 120 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*).

——. *See further* Walsh and Tinaroo references, No. 6734, etc.

6705. ——. *Assoc.with* Gold, in granite. *Loc.* Jordan P.C., Jordan Gully, Jordan Goldfield, 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Assay:* Gold = 2 oz. 10 dwt. 7 gr. per ton; Silver = 15 dwt. per ton. *Ref.* G.S.Q. Pub. 157, p. 3 (1907).

6706. ——. *Assoc.with* Gold, in quartz. *Loc.* Phœnix Reef, Towalla Camp, Russell Extd. Goldfield, 18 miles W. of Geraldton. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 89, p. 4 (1893).

6706A.——. *Assoc.with* Galena, Massicot, Cerussite, Iron Pyrites, and Zinc Blende, in lode. *Loc.* Chillagoe Mine, off Wise's Knob, Oaks Goldfield, 30 miles (by road) S. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 187 (1909).

6707. ——. *Assoc.with* Scorodite and Iron Pyrites, in quartz reef. *Loc.* Gummo's Claim, Horn Is. Goldfield, 3 miles S.E. of Thursday Island, Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 150, p. 13 (1900).

6708. ——. Glenelg, 35 miles W.byS. of Warwick, and 31 miles W.byS. of **Stanthorpe.** *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.M.

6709. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende, in chloritic rock. *Loc.* Doctor's Lode, in Sel. (39), Jibbinbar, 20½ miles S.W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 67, p. 2 (1890).

6710. ——. *Assoc.with* Gold, Silver, and Copper Pyrites, in quartz reef. *Loc.* Fletcher's Claim, in Sel. (29), Jibbinbar (*ante*). *Assay: See* 3832. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

6711. ——. *Assoc.with* Silver, Galena, Iron Pyrites, and Zinc Blende, in quartz reef. *Loc.* Jibbinbar Silver Mine, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 125, p. 29 (1897).

6712. ——. *Assoc.with* Iron Pyrites and traces of Copper and Mica, in quartz lode. *Loc.* Mogg's Mine, Sel. (26), Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

6713. ——. *Assoc.with* Gold, Galena, and Minium, in quartz and gossan. *Loc.* Min. Area (25), Jibbinbar (*ante*). *Assays: See* No. 2830. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

6714. ——. *Assoc.with* Silver, Copper Pyrites, and Malachite, in lode. *Loc.* Min. Area (26), Jibbinbar (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 87, p. 10 (1892).

6715. Mispickel. *Assoc.with* Galena, in quartz reef. *Loc.* Sels. 34, 35, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

6716. ——. *Assoc.with* Gold, Silver, and Zinc Blende, in quartz lode in granite country. *Loc.* Steele's Sel. (31), Jibbinbar (*ante*). *Assay: See* No. 3833A. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

6717. ——. In massive outcrops. *Loc.* North of Mt. Jibbinbar, head of Pike's Cr., 20½ miles S.W.byW. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* B.D.

6718. ——. *Assoc.with* Copper carbonate and Cassiterite, in lode. *Loc.* Nundubbermere Run, 13 miles S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay:* Silver = 3 oz. 6 dwt., and Gold = trace per ton. *Ref.* G.S.Q. Pub. 40, p. 4 (1887), A.R., p. 85 (1907).

6719. ——. *Assoc.with* Gold and Galena, in quartz and calcite. *Loc.* Kaffir Chief Mine, Pikedale Goldfield, 20 miles N.W.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* (and *Yields, Assays*) G.S.Q. Pub. 120, pp. 73-77 (1898).

6720. ——. *Assoc.with* Gold, in quartz. *Loc.* P. and O. Mine, W. slope of Herries Range, 3 miles W. of Macintyre Brook, Pikedale Goldfield (*ante*). *Assay: See* No. 3835. *Ref.* G.S.Q. Pubs. 105, p. 6 (1895), 120, p. 77 (1898).

6721. ——. *Assoc.with* Gold, Cassiterite, Wolfram, and Molybdenite, in quartz and greisen. *Loc.* Pikedale Lode, (Sels. 705 and 706W), 10 miles W.byN. of Stanthorpe Rail. Stn. *Co.* Bentinck; *Dist* Darling Downs. *Assays: See* No. 3840. *Ref.* G.S.Q. Pubs. 40, p. 4 (1887), 120, p. 47 (1898).

6722. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Azurite, Cassiterite, and Zinc Blende, in quartz, greisen, and slate. *Loc.* Ballandean Tin Mine, Severn R., 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M. and L.C.B., and B.D.

6723. ——. *Assoc.with* Iron Pyrites, Galena, and Zinc Blende. *Loc.* Ballandean Mine, Severn R. (*ante*). *Ref.* G.S.Q. Pub. 125, pp. 29, 30.

6724. ——. *Assoc.with* Iron Pyrites, Scorodite, Cassiterite, Wolfram, and Molybdenite, in quartz. *Loc.* P.A. (48), Severn R., 6 miles, W. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

6725. ——. *Assoc.with* Copper Pyrites, Chrysocolla, Cassiterite, and Wolfram, in quartz. *Loc.* Gt. Eastern Tin Mine (Block 24), Red Rock Cr., Severn R., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 49 (1898).

6726. ——*Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, and Zinc Blende, in lode. *Loc.* Silver Queen Mine, Severn R., 6 miles W. of Ballandean Rail. Stn. 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assays: See* No. 2834. *Ref.* G.S.Q. Pub. 191, pp. 24, 39 (1904).

6727. ——. *Assoc.with* Copper Pyrites, Cassiterite, Wolfram, Zinc Blende, Calcite, Chlorite, and Orthoclase, in quartz lode. *Loc.* Sundown Copper Mine, Sundown Cr., Severn R., 12 miles S.W.byW. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 2192. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), and B.D.

6728. ——. *Assoc.with* Silver, in quartz. *Loc.* Sel. (23), Sundown Cr., Severn R. (*ante*). *Assays:* Silver = 70 oz. 2 dwt. 4 gr., and Gold = 2 dwt. 4 gr. per ton (?). *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

6729. ——. *Assoc.with* Scorodite, Iron Pyrites, Cassiterite, Zinc Blende, Hornblende, etc., in slate. *Loc.* Beacroft's Workings, Sundown Cr., Severn R. (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

6730. ——. *Assoc.with* Cassiterite and Wolfram, in slate and greisen. *Loc.* Clare's Open Cut, Min. Lease (24), Sundown Cr., Severn R. (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

6731. ——. Warroo Mine, about 3½ miles E. of Mt. Bullaganang, 38 miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* B.D.

6732. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* 2½ miles S.W. of Talgai Stn., 23½ miles W.N.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Assays:* (1) Gold = 3 oz. per ton. (2) Gold = 2 oz. 15 dwt. per ton; Silver = 3 oz. per ton. *Ref.* G.S.Q. Pub. 120 (1898).

6733. ——. *Assoc.with* Gold, in quartz. *Loc.* Telegraph Reef, Thane's Cr. Goldfield, 24 miles W. of Warwick. *Co.* Merivale (*ante*). *Ref.* G.S.Q. Pub. 87, p. 9 (1892).

6734. ——. *Assoc.with* Cassiterite, in lode. *Loc.* North Britain Tin Mine, Coolgarra, 12 miles N.E.byN. of Mt. Garnet Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 3 (1891).

6735. ——. *Assoc.with* Iron Pyrites, Göthite, Limonite, Hematite, Cassiterite, Azurite, Malachite, Wolfram, Websterite, Chlorite, Fluorspar, Penninite, Topaz, in quartz lodes. *Loc.* Tin Mines, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

6736. ——. *Assoc.with* Wolfram. *Loc.* Devon Wolfram Mine, 3 miles from Coolgarra, 15 miles N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

6737. ——. *Assoc.with* Cassiterite, Hornblende, Steatite, Chlorite, Biotite, and Orthoclase, in lode formation. *Loc.* Gt. Northern Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn., Cairns-Herberton line, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 3 (1883), and P.R.S.Q., vol. 4, p. 53 (1887).

6738. ——. *Assoc.with* Copper Pyrites, Chalcanthite, and Cassiterite, in elvan dyke and quartz. *Loc.* Ironclad Tin and Copper Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 8 (1883).

6739. ——. *Assoc.with* Zinc Blende and Galena, in lode. *Loc.* Koh-i-noor Mine, Coolgarra, 12 miles N.N.E. of Mt. Garnet rail. line, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 40 (1887).

6740. ——. *Assoc.with* Cassiterite, in quartz lode. *Loc.* Ulster Tin Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

6741. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Iron Pyrites, Hematite, Magnetite, Zinc Blende, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., Wild R., 136 miles (by rail) S.W. of Cairns, Cairns-Chillagoe Rail., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16, 17 (1898).

——. *See further* Walsh and Tinaroo references, No. 6687, etc.

6742. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* New Imperial Mine, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Assay:* Gold = 8½ oz. per ton. *Ref.* A.R.D.M., p. 33 (1894).

6743. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Victoria Mine, Charters Towers (*ante*). *Ref.* G.S.M.

6744. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Good Luck United (Lancashire Lass No. 1 W.) Mine, Far Fanning, 28 miles (by road) N.W. of Ravenswood Junction, Gt. Northern line. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 133, p. 7 (1898).

6745. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Nil Desperandum Reef, in New Consols Mine, Donnybrook, 6½ miles S. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

6746. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Australia Felix Mine, 2½ miles E.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Assay:* Gold = 20 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 35 (1887).

6747. ——. *Assoc.with* Copper Pyrites, Tenorite, Malachite, Iron Pyrites, and Zinc Blende. *Loc.* Buck Reef, ½-mile E.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 76 (1887).

6748. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Shellmalier Reef, Elphinston Cr., 30 Chains N.N.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 8 (1900), and G.S.M.

6749. ——. *Assoc.with* Gold, in quartz. *Loc.* Martin's Reef, Mt. Remarkable, 6 miles W.byN. of Pentland Rail. Stn., 72 miles (by rail and road) S.W.byW. of Charters Towers, Cape R. Goldfield. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 73, p. 5 (1891).

6750. ——. *Assoc.with* Gold, in quartz. *Loc.* High Bar Reef, Old Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* G.S.Q. Pub. 73, p. 12 (1891).

6751. ——. *Assoc.with* Native Silver, Galena, Cerussite, Malachite, Chrysocolla, Manganese-dioxide, Hematite, and Zinc Blende, in kaolin lode. *Loc.* Hidden Treasure Lease (165), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Assays:* *See* 1241. *Ref.* G.S.Q. Pubs. 71, p. 9 (1891) and 82, p. 7 (1892).

6752. ——. *Assoc.with* Bornite, Copper carbonate, and Chrysocolla, in chloritic lode. *Loc.* Ingola Lease (177), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

6753. Mispickel. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Zinc Blende, Smithsonite, Hematite, Ironstone, Fluorspar, and Garnet, in lodes. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 82, p. 3 (1892).

6754. ——. *Assoc.with* Cassiterite and Fluorspar, in Chloritic lode. *Loc.* New Chum Lease (194), Butterfly Gully, Mt. Brown, 12 miles W. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

6755. ——. *Assoc.with* Copper Pyrites, Tile Ore, Bornite, Galena, Cerussite, and Hematite, in lode. *Loc.* Wallaroo Lease (162), nr. Running R. Crossing, Kangaroo Hills Mineral Field (*ante*). *Assay:* Silver = 3 oz. 13 dwt. 12 gr. per ton, Copper = 1·7 per cent. *Ref.* G.S.Q. Pub. 82, p. 11 (1892).

6756. ——. *Assoc.with* Cerussite. *Loc.* Bowden's Sel. (147), Star R. (Argentine) Silver Field, 50 miles (by coach) N.W. of Ravenswood Junction (Gt. Northern line). *Co.* Wilkie Grey; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 26, p. 6 (1886).

6757. ——. *Assoc.with* Copper Pyrites, Malachite, Galena, Cerussite, Minium, Magnetite, Manganese-dioxide, Ironstone, and Iron Ochre. *Loc.* Colorado Silver-Lead Mine, Star R. (Argentine) Silver Field (*ante*). *Assays: See* No. 2983. *Ref.* G.S.Q. Pub. 26, p. 7 (1886).

6758. ——. *Assoc.with* Iron Pyrites and Galena, in vein. *Loc.* Venture Mine, Star R. (Argentine) Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

6759. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bismutite, and Hematite. *Loc.* Gold Workings, Mine Cr., Black Waterhole Cr., 5 miles N.E. of Hazledean, 37 miles S.W. of Mackay, Mt. Spencer Goldfield. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 164, pp. 10-12 (1901).

6760. ——. *Assoc.with* Galena, Cerussite, Iron Pyrites, Copper Pyrites, Malachite, Azurite, and Zinc Blende, in quartz lode. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 3 (1889); 181, pp. 12-17 (1903); and 229, pp. 34, 35 (1910).

6761. ——. *Assoc.with* Gold, Copper Pyrites, and Siderite, in vein of quartz. *Loc.* Faith (formerly Just-in-Time) Reef, Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Assay:* Gold = 9 oz. 6 dwt. per ton. *Ref.* G.S.Q. Pub. 88, p. 5 (1893).

6762. ——. *Assoc.with* Gold, Copper Pyrites, and Marcasite, in quartz. *Loc.* Frederick I. Reef, nr. Peter's Cr., Normanby Goldfield (*ante*). *Assay:* Gold = 2½ oz. per ton. *Ref.* G.S.Q. Pub. 88, p. 1 (1893), and G.S.M.

6763. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Glengarry Mine, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 83, p. 3 (1893).

6764. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Tetrahedrite, Siderite, Ironstone, and Yellow Ochre, in quartz reef. *Loc.* Grace Darling Lease (11), Normanby Goldfield (*ante*). *Assay: See* No. 4128. *Ref.* G.S.Q. Pubs. 5, p. 6 (1879), and 88, p. 3 (1893).

6765. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Marcasite, and Steatite, in quartz reef. *Loc.* Victor Tunnel, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pub. 88, p. 5 (1893), and G.S.M.

6766. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Copper carbonate, in quartz reef. *Loc.* Welcome Reef, Normanby Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 5, p. 5 (1879), and 88, p. 2 (1893).

6767. ——. *Assoc.with* Cerussite and Minium, in vein. *Loc.* Long Hill Gold and Silver Mine, Scrubby Cr., on Coast Range, 9 miles S. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Assays: See* No. 1287. *Ref.* G.S.Q. Pub. 39, p. 9 (1887).

6768. ——. Altering into Scorodite. *Loc.* Lady Jane Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* O.R.

6769. ——. *Assoc.with* Gold, Galena, and Minium. *Loc.* Venture Silver Mine, Sellheim Mineral Field (*ante*). *Assays: See* No. 4147. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

6770. —— *Assoc.with* Gold and Iron Pyrites, in quartz and chlorite. *Loc.* Star of Hope Reef, Copperfield, 4 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 27, p. 5 (1886).

6771. ——. *Assoc.with* Gold, Silver, and Malachite, in quartz reef. *Loc.* Ironbark Mine, Miners' Cr., Collaroy, 5 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. *Assay: See* No. 4181. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

6771A.——. *Assoc.with* Malachite, Azurite, and Hematite, in slate. *Loc.* Fitzgerald's M.F. (1408), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney (*ante*). *Ref.* G.S.Q. Pub. 228, p. 26 (1910).

6771B.——. *Assoc.with* Hematite and Malachite, in gossan in granite. *Loc.* True Blue M.L. (29), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 43, 44 (1910).

6772. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Zinc Blende, in quartzite. *Loc.* Silver-Lead Deposit, on Por. 46, Par. of Monsildale, 35 miles N.byW. of Esk Rail. Stn., 102 miles (by rail and road) N.N.W. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Ref.* (and *Assays*) G.S.Q. Pub. 169, pp. 1-4 (1901).

6773. ——. *Assoc.with* Iron Pyrites, Galena, Massicot, Bismite, and Chlorite. *Loc.* Blackbutt, 14 miles W.byS. of Benarkin Rail. Stn. (Brisbane-Valley line), 125 miles (by rail and road), W.N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* O.R.

6774. ——. Eskdale Stn., Burnett R., 14 miles N.W. of Esk Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Ref.* G.S.M.

6775. ——. *Assoc.with* Iron Pyrites, Cerussite, Massicot, Wolfram, and Scorodite. *Loc.* Plant's Leasehold, 4 miles E. of Crow's Nest Rail. Stn., 38 miles (by rail and road) N.N.E. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* A.R., pp. 148, 149 (1908).

6776. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Massicot, Anglesite, Galena, and Limonite. *Loc.* Silver Knob P.A., Emu Cr., Mt. Langan, 14½ miles W.N.W. of Kannangar Rail. Stn. (Brisbane-Valley line). *Co.* Cavendish (*ante*). *Assay: See* No. 3033. *Ref.* Q.G.M.J., vol. 7, p. 467 (1906).

6777. ——. *Assoc.with* Gold, Iron Pyrites, and Tourmaline, in quartz reefs. *Loc.* Seven-mile Diggings, 7 miles S.E. of Nanango, 123 miles N.W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* L.C.B. and Q.G.M.J., vol. 7, p. 525 (1906).

6778. ——. *Assoc.with* Gold, Copper Pyrites, and Garnet, in quartz and chlorite. *Loc.* P. Area, head of Ithaca Cr., Mt. Cootha, 4 miles S.W.byW. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.Q. Pub. 98, p. 2 (1894).

6779. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Beaton's Sel. (68), 6 miles S.E. of Beenleigh Rail. Stn. (South Coast line), 30 miles (by rail and road) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Assays:* Gold = 2 dwt. and 13 dwt. per ton. *Ref.* G.S.Q. Pub. 51, p. 6 (1889).

6780. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Buckley's Shaft, 8 miles S. of Beenleigh, 28 miles (by rail and road) S.E. of Brisbane, on South Coast line. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 36, p. 2 (1887).

6781. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Fischer's Sel. (121), ¾-mile W. of Beenleigh Rail. Stn. (S. Coast line), 27 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Assays: See* No. 4225. *Ref.* G.S.Q. Pub. 36, p. 1 (1887).

6781A.——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* 5 miles S. of Beenleigh Rail. Stn. (South Coast line), 29 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 217 (1910).

6782. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Witty's Mountain, Sel. (239), 6 miles S.E. of Beenleigh, and 30 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* G.S.Q. Pub. 36, p. 1 (1887).

6783. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Griffith's Reef, W. side of Digger's Cr., Barmundoo (Tableland) Goldfield, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Yield: See* No. 4235. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

6784. ——. *Assoc.with* Gold, Silver, Azurite, and Malachite, in quartz, ironstone, and clay. *Loc.* P. Area (56), Diglum Cr., Barmundoo Stn., 21 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

6785. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* Good Hope Mine, Crow's Cr., Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Assays: See* No. 4242. *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

6786. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz reef. *Loc.*, Roger's Mine, Bompa Goldfield, 44½ miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

6787. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, Zinc Blende, and Calcite, in quartz. *Loc.* Advance Reef, Norton (Milton) Goldfield, 33 miles S.byE. of Gladstone. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), 208, pp. 10, 11 (1907).

6788. Mispickel. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Scorodite, in quartz. *Loc.* Bald Hills Reef, Norton (Milton) Goldfield (*ante*). *Assays: See* No. 4266. *Ref.* G.S.Q. Pub. 208, p. 13, 14 (1907).

6789. ——. *Assoc.with* Gold, Silver Iron Pyrites, Copper Pyrites, Redruthite, Azurite, Malachite, Zinc Blende, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assay: See* 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

6790. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Conran's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

6791. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc Blende, in quartz and calcite. *Loc.* Frampton Reef, Norton Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 208, pp. 21, 22 (1907).

6792. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, Zinc Blende, and Redruthite, in quartz. *Loc.* Goody's (Carmichael's) Reef, Norton Goldfield (*ante*). *Assay: See* No. 4277. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

6793. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay: See* 4280. *Ref.* G.S.Q. Pub. 208, p. 29 (1907).

6794. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Never Never Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

6795. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* New Constitution Mine, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 33 (1907).

6796. ——. *Assoc.with* Gold, Iron Pyrites, Limonite, and Zinc Blende, in quartz. *Loc.* Paddock Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 34 (1907).

6797. ——. *Assoc.with* Gold and Iron Pyrites, in calcite. *Loc.* Sailor Boy Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 35 (1907).

6798. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Sulphide Reef, Norton Goldfield (*ante*). *Assay: See* No. 4292. *Ref.* G.S.Q. Pub. 208, p. 38 (1907).

6799. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Zinc Blende, and Galena, in quartz and calcite. *Loc.* Who'd-Ha'-Thought-It Reef, Norton Goldfield (*ante*). *Assay: See* No. 4294. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), and 208, p. 39 (1907).

6800. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reefs. *Loc.* On Granite Ridges, between Wattle and Cattle Creeks, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 7 (1885).

6800A.——. *Assoc.with* Gold and Silver, in quartz. *Loc.* Archer Reef, Targinnie Goldfield, 4 miles N.N.W. of Yarwun Rail. Stn. (North Coast line). *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J., vol. 2, pp. 529, 530 (1901).

6801. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Mt. Gordon, nr. Sandy Cr., 3 miles W. of Wycarbah Rail. Stn. (Central line), 27 miles (by rail and road) S.W of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

6802. ——. *Assoc.with* Gold, in quartz. *Loc.* Wild Horse Reef, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 21, p. 9 (1885).

6803. ——. *Assoc.with* Copper Pyrites and Zinc Blende. *Loc.* Mine nr. Cania Goldfield (*ante*). *Ref.* A.R.D.M., p. 34 (1894).

6804. ——. *Assoc.with* Copper Pyrites, Copper carbonate, Ironstone, and Biotite Mica, in quartz lode. *Loc.* Dee R. Copper Mine, above Dundee, 20 miles S.S.W. of Mt. Morgan, 44 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 155, p. 8 (1901).

6805. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz reef. *Loc.* Queen of the Valley Mine, between Dee R. and Crocodile Cr., 4 miles N.E. of Mt. Morgan Rail. Stn., 28 miles (by rail and road) S.S.W. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

6806. ——. *Assoc.with* Scorodite. *Loc.* Grey Dawn, Cordalba Rail. Stn. (Isis Br. line), 48 miles (by rail) N.W. of Maryborough. *Co.* Cook; *Dist.* **Wide Bay.** *Ref.* L.C.B.

6807. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Pyrrhotite, Galena, and Stibnite, in lode. *Loc.* Mariner's Reef, Black Snake Goldfield, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Assays and Analysis of Ore: See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

6808. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Rose, Shamrock, and Thistle Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 5 (1886).

6809. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Galena, Zinc Blende, and Schorl, in quartz. *Loc.* Victoria Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

6810. ——. *Assoc.with* Gold, Iron Pyrites, Copper carbonate, Limonite, and Zinc Blende, in quartz and calcite. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar Head Stn., 20 miles W. of Tiaro Rail. Stn. (North Coast line). *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

6811. ——. *Assoc.with* Copper Pyrites, Azurite, Malachite, and Galena, in granite formation. *Loc.* West Calgoa Lode, in Sel. 1393, 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

6812. ——. *Assoc.with* Gold. *Loc.* Columbia Consolidated Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

6813. ——. In quartzite. *Loc.* Samarai (Dinner) Is., 259 miles E.S.E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q Pub. 55, p. 2 (1889).

Missing Link Claim, Sudest Is. *Min.Ref.* Gold, *see* 4557.

Mistake Cr., trib. of Gunpowder Cr., N.W.byN. of Cloncurry. About *Lat.* 19° 36′ S., *Long.* 139° 44′ E. *Min.Ref.* Gold (alluvial), *see* 3174.

—— ——, Stanhills. Flows S.W. into 10-Mile Creek, 20 miles S.E. of Croydon. *Min.Ref.* Cassiterite, *see* 764.

—— —— Bore. *See under* Artesian Bores. No. 262.

—— Co. Mitchell Dist. *See map*, Pl. 18.

Mitchell District. (*See maps.*, Pls. 18, 19).

SITUATION, ETC.: (*Lat.*, 20° and 26°; *Long.*, 142° and 147°.) In the Central part of Queensland, and bounded on the E. by the districts of North and South Kennedy and Leichhardt, on the S. by Warrego and Gregory South, on the W. by Gregory North, and on the N.W. by Burke. Principal Rivers:—Thompson (tribs. Darr R., Landsborough Cr., Vergemont Cr.), Barcoo, and Alice.

AREA: 55,362 sq. miles.

PRINCIPAL MINING CENTRE: Opalton Mineral Field, including the Jundah Opal Field, *which see.*

COUNTIES:

Barcoo Co. Cheviot Co. Coorajah Co. Coreena Co.
Cumberland Co. Camoola, Muttaburra, Tangorin.
Evora Co.
Fermoy Co. Opalton Mineral Field (*in part—See also* Vergemont Co., Warbrecca Co., Musgrave Co. *See also* Gregory North Dist.). Opalton or Fermoy Opal Field. Opal Mines—Little Wonder, Brilliant, Conways, and Black Knob.
Gayundah Co. Maneroo Co. Mexico Co. Mitchell Co.
Musgrave Co. Opalton Mineral Field (*in part—See also* Fermoy Co.).
Paluma Co.
Portland Co. Arrilalah, Ilfracombe, Longreach, Wellshot.
Rodney Co. Aramac, Barcaldine, Scarrburg.
Ruthven Co. Tambo Co. Towerhill Co. Uanda Co.
Vergemont Co. Opalton Mineral Field (*in part—See also* Fermoy Co.).
Walker Co.
Warbreccan Co. Opalton Mineral Field (*in part—See also* Fermoy Co.). Jundah Field (Opal). Opal Mines—Old Field (Top Flat) and Black Mine Workings.
Windeyer Co.
Wolseley Co. Jundah Township, Stonehenge.
Wooroolah Co. Woura Co. Youranigh Co.

Moffat (Par. of) (Por. 261), S.E.byS. of Brisbane. *Min.Ref.* Coal, *see* 1782F.

Moggill (Par. of), 12 miles W.byS. of Brisbane. Centre about *Lat* 27° 30′ S., *Long.* 152° 55′ E. Coal was discovered at Moggill before 1854, and in this year was found in a borehole sunk by J. Williams on Sel. 14. *Min.Ref.* Coal, *see* 1765, 1766; Manganese-dioxide, 6455.

GEOLOGICAL NOTE: Rocks comprise shales, sandstones, etc., of Ipswich Formation (Trias-Jura), schists of undetermined age, and basalt. Coal seams occur in the Ipswich Beds, and quartz reefs traverse the schists, the basalt being below the coal measures. *See* G.S.Q. Pubs. No. 58 and 63 for details. (Note by the late Mr. Fryar.—Fault cut off the coal towards Goodna, the beds dipping 10° to the S.W. All the Govt. Reserves at Goodna should be coal-bearing.)

—— Bores (no record). *See note under* Ipswich Coalfield *under* Coal Bores.

Mollie Lease, Marble Cr., Calcifer. *Min.Ref.* Cuprite, *see* 2435; Hematite, 4712; Malachite, 6228; Minium, 6581; Tetrahedrite, 7762.

Molybdate of Lead. *See* Wulfenite.

Molybdenite. *Compo.* Sulphide of molybdenum. *Colour*, Lead-grey. Metallic. Micaceous. *H.* = 1-1·5. *Sp.gr.* = 4·4. *Contents* (*max.*), Molybdenum 60 per cent.

ASSOCIATED MINERALS: Ores of Bismuth, Copper, Gold, Iron, Lead, Manganese, Silver, and Zinc, also Monazite, Wolfram, Calcite, Felspar, Fluorspar, Mica, Quartz, Topaz.

DISCOVERY: First observed at Bamford in 1892; first discovery in payable quantities at Wolfram Camp in 1894.

MINERAL NOTE: Wolfram is its common associate, but bismuth often occurs with it. The three minerals, Molybdenite, Wolfram, and Native Bismuth are frequently crystallised together in Quartz. The gangue is always white quartz, but mica and felspar are often present.

USES: *See note under* Molybdenum.

GEOLOGICAL NOTE: Quartz masses containing Molybdenite are nearly always irregular in form, and are generally distinguishable on the surface as white "blows." They usually occur in belts of granite or greisen country, but at times are to be seen in chlorite, quartz-felsite, schist, or slate—in the vicinity of granite.

STATISTICAL TABLES AND DIAGRAM: *See* Pls. 42, 45, 46, 46A, 54.

6814. ——. *Assoc.with* Wolfram and Cassiterite, in small leaders, in quartz felsite. *Loc.* Right-hand br. of Ten-mile Cr., about 30 miles S.E. of Croydon, Stanhills Tinfield. *Co.* Esmeralda; *Dist.* **Burke.** *Ref.* B.D.

6814A. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, and Redruthite, in lode formation. *Loc.* May Graham P.A., 4 miles W. of Soldier's Cap, about 33 miles (by road) S.E. of Cloncurry, Mt. Wheeler Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 225 (1908).

6815. ——. *Assoc.with* Gold, Iron Pyrites, and Ironstone, in quartz. *Loc.* White's Reef, nr. Mt. Ophir, Chowey Cr., 62 miles (by rail) W. of Maryborough (Gayndah Br. line). *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 25, p. 3 (1897).

6816. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* P. Area (28), Perry Scrub, St. Agnes Cr., Perry Goldfield, 15 miles S. of Gin Gin Rail. Stn. (Mt. Perry line), 34 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 184, p. 9 (1903).

6817. ——. In quartz reefs. Perry Scrub, St. Agnes Cr. (*ante*). *Ref.* G.S.Q. Pub. 184, p. 91 (1903).

6818. ——. *Assoc.with* Gold, Silver, and Copper Pyrites, in quartz veins in granite. *Loc.* Globe Copper Mine, Wolca, 6 miles N. of Mt. Perry Rail. Stn. *Co.* Bowen. *Assay: See* No. 2130. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and B.D.

6819. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Lady Florence Mine, Chowey Goldfield, 6 miles N. of Didcot Rail. Stn. (Gayndah line), 74 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 125, p. 35 (1897).

6820. ——. *Assoc.with* Gold and Molybdenite, in quartz reef. *Loc.* Old Chowey Mine, Chowey Goldfield (*ante*). *Ref.* G.S.Q. Pub. 25, p. 4 (1886), and G.S.M.

6821. ——. *Assoc.with* Gold, Telluride of Gold, Native Bismuth, Bismuthinite, Joseite, Copper Pyrites, Malachite, Mispickel, Zinc Blende, and Calcite. *Loc.* Mt. Shamrock Mine, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah Br. line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 60, p. 6 (1890), 125 (1897), 168 (1901), and B.D.

6822. ——. *Assoc.with* Gold and Molybdenite, in quartz reef. *Loc.* Mt. Venus Mine, Mt. Steadman, 4½ miles W. of Biggenden Rail. Stn. (Gayndah Br. line). *Co.* Cook (*ante*). *Ref.* G.S.M.

6823. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Mt. Steadman (*ante*). *Ref.* G.S.M.

6824. ——. *Assoc.with* Gold, in quartz. *Loc.* Moonlight Reef, Burnett R., Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 43, p. 5 (1887).

6825. ——. *Assoc.with* Wolfram and Bismutite, with traces of Hematite, Limonite, Mispickel, and Scorodite, in quartz, chlorite, muscovite, and felspar. *Loc.* Blackfellow's Cr., br. of Lynd R., 10 miles W. of Fossilbrook, 40 miles S.W. of Almaden Rail. Stn. (Chillagoe line), **Walsh and Tinaroo Mineral Fields.** *Co.* Bolwarra; *Dist.* **Cook.** *Ref.* B.D.

6826. Molybdenite. *Assoc.with* Wolfram, Cassiterite, Scheelite, Native Bismuth, and Bismutite, with traces of Copper Pyrites, in quartz, chlorite, and muscovite. *Loc.* Pinnacle Cr., 20 miles W. of Fossilbrook, 50 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6827. ——. *Assoc.with* Wolfram and Bismutite, in quartz, fluorspar, etc. *Loc.* Rose Cr., br. of Lynd R., 6 miles S.W. of Fisherton, Tate R., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6828. ——. *Assoc.with* Wolfram and Cassiterite, in quartz and muscovite. *Loc.* Spring Cr., br. of Blackfellow's Cr., 12 miles W. of Fossilbrook, 45 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6829. ——. *Assoc.with* Wolfram and Cassiterite, in quartz, chlorite, and muscovite. *Loc.* Tableland, head of Dixon's Cr., br. of Lynd R., 30 miles W. of Fossilbrook, 8 miles from the Einasleigh R., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6830. ——. *Assoc.with* Wolfram, Scheelite, Tungstite, and Cassiterite, with traces of Tenorite, Malachite, Chrysocolla, Iron Pyrites, etc., in defined quartz lodes in slates. *Loc.* Mt. Carbine, 11 miles W. of Port Douglas, 34 miles (*viâ* Mt. Molloy) N.N.W. of Biboohra Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Dogmar; *Dist.* Cook. *Ref.* B.D.

6831. ——. *Assoc.with* Wolfram, Cassiterite, Native Bismuth, Busmutite, Mispickel, and Scorodite, with traces of Iron Pyrites, Copper Pyrites, Tenorite, Malachite, and Azurite, in irregular masses of quartz and greisen in granite. *Loc.* Boonmoo, 81 miles (by rail) S.W. of Cairns (Cairns-Chillagoe lines), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

6832. ——. *Assoc.with* Wolfram, Native Bismuth, and Bismutite, with traces of Mispickel, Hematite, Limonite, and Scorodite, in irregular masses of quartz and greisen in granite. *Loc.* Stannary Hills Mines, 93 miles (by rail) S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6833. ——. *Assoc.with* Wolfram, Bismuth (native), Bismuthinite, Bismutite, Mispickel, Scorodite, Scheelite, Cassiterite, and Manganese-dioxide, with traces of Iron Pyrites, Hematite, Limonite, Magnetite, etc., in irregular masses of quartz, in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Cairns line), Walsh an Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6834. ——. *Assoc.with* Wolfram, Scheelite, Bismuth (native), Bismutite, Molybdite, Mispickel, and Scorodite, with traces of Iron Pyrites, Copper Pyrites, Tenorite, Chrysocolla, etc., in irregular masses of quartz, in greisen. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

6835. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Galena, and Zinc Blende. *Loc.* Bamford Wolfram Mines (*ante*). *Assay: See* No. 2167. *Ref.* A.R., p. 101 (1907).

6836. ——. *Assoc.with* Wolfram, Cassiterite, and Tenorite, with traces of Iron Pyrites, Hematite, Limonite, Mispickel, and Scorodite, in veins of mica and quartz in greisen. *Loc.* California Cr., nr. Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

6837. ——. *Assoc.with* Monazite, Wolfram, Cassiterite, Iron Pyrites, and Mispickel, in quartz and mica in greisen country. *Loc.* California Cr. (*ante*). *Ref.* B.D.

6838. ——. *Assoc.with* Wolfram, Scheelite, Tungstite, Native Bismuth, and Bismutite, with traces of Cuprite, Malachite, Iron Pyrites, Hematite, and Limonite, in quartz. *Loc.* Eight-mile Mountain, 8 miles N.N.W. of Fossilbrook, 28 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6839. ——. *Assoc.with* Wolfram, Cassiterite, Bismutite, Chalcolite, and Topaz, with traces of Hematite and Limonite, in small veins in large quartz topaz lode in granite. *Loc.* Lappa Wolfram Lode, 2½ miles S.S.W. of Lappa Rail. Stn. (Chillagoe line), 104 miles (by rail and road) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6840. ——. *Assoc.with* Wolfram, Native Bismuth, and Bismutite, in quartz and fluorspar. *Loc.* Schardon's Mine, 4 miles N. of Almaden Rail. Stn. (Chillagoe line), 124 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6840A. ——. *Assoc.with* Scheelite, in quartz. *Loc.* Wolfram Mine, ½-mile from eastern bank of Copperfield R., 12 miles S. of Kidston, Etheridge Goldfield. *Co.* Lyndhurst; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 30 (1911).

6841. ——. *Assoc.with* Wolfram, Scheelite, and Cassiterite, with traces of Iron Pyrites, Malachite, and Azurite, in defined quartz lodes and leaders in granite. *Loc.* Glen Atherton, Tinaroo Cr., 12 miles S.E. of Mareeba Rail. Stn. (Cairns line), 18 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* B.D.

6842. ——. *Assoc.with* Wolfram, with traces of Bismutite and Copper carbonate, in quartz. *Loc.* Leases (1988 and 1989), Tinaroo Cr., 6 miles N.N.E. of Tolga Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Nares (*ante*). *Ref.* G.S.Q. Pub. 188, pp. 12, 13 (1903).

6843. ——. Rocky R. Goldfield, 26 miles N.E. of Coen, 71 miles N.N.W. of Port Stewart. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.M.

6844. ——. *Assoc.with* Wolfram, Cassiterite, and Bismutite, with traces of Copper Pyrites, Copper carbonate, Mispickel, Hematite, Limonite, in quartz, chlorite, and muscovite. *Loc.* Four-mile Mountain, 4 miles N.W. of Fossilbrook, 35 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* B.D.

6845. ——. *Assoc.with* Wolfram and Cassiterite, with traces of Hematite and Limonite, in quartz and chlorite. *Loc.* Nightshade, nr. Fossilbrook, 34 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

——. *See further* Walsh and Tinaroo references, Nos. 6855, etc.

6846. ——. In quartz veins. Sels. (550 and 363), on Blue Mountain Cr., 3 miles N.E.byE. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D. and A.R.D.M., p. 175 (1902).

6847. ——. *Assoc.with* Wolfram and Cassiterite, in quartz and greisen. *Loc.* Shannon's Reef, Block 459, Brown's Gully, nr. Sugarloaf M.L., 7½ miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

6848. ——. *Assoc.with* traces of Wolfram, in small quartz veins with greisen. *Loc.* Ranges W. of Dalcoath Cr., and 1 mile N. of Quart Pot Cr., 3 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

6849. ——. *Assoc.with* Wolfram and Cassiterite, in quartz and greisen. *Loc.* Noble Tin and Lode Cr. Tin Mines, Blocks 351 and 352, head of Lode Cr., 6¼ miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 45 (1898), and G.S.M.

6850. ——. *Assoc.with* Wolfram, Cassiterite, and Copper Pyrites, in greisen. *Loc.* Kettle Swamp, trib. of Quart Pot Cr., Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 29 (1897), and G.S.M.

6851. ——. *Assoc.with* Molybdite, Wolfram, and Cassiterite, in quartz and greisen. *Loc.* Burnt Hut, Severn R., 6 miles W.byS. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 48 (1898).

6852. ——. *Assoc.with* Molybdite, in quartz. *Loc.* Greenup's, Severn R., Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

6853. ——. *Assoc.with* Wolfram, Cassiterite, Iron Pyrites, Mispickel, and Scorodite, in quartz. *Loc.* P.A. 48, Sluices, Severn R., 6 miles W. of Ballandean Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

6854. ——. *Assoc.with* Gold, Mispickel, Cassiterite, and Wolfram, in quartz and greisen. *Loc.* Pikedale Lode, 10 miles W. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Assays: See* No. 3840. *Ref.* G.S.Q. Pubs. 40, p. 4 (1887), and 120, p. 47 (1898).

6855. ——. Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.**

6856. ——. *Assoc.with* Wolfram, Monazite, Cassiterite, Scheelite, and Manganese-dioxide, with traces of Cuprite, Malachite, Azurite, Iron Pyrites, Mispickel, Limonite, and Scorodite, in irregular masses and defined lodes in greisen. *Loc.* Nettle's Cr. Wolfram Mines, 4 miles E. of and 3 miles S.E. of Coolgarra, and between 10 and 14 miles N.E. of Mt. Garnet Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*). *Ref.* B.D.

6857. ——. *Assoc.with* Cassiterite and Wolfram, in diorite. *Loc.* Young American Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 9 (1883).

——. *See further* Walsh and Tinaroo references, No. 6825, etc.

6858. Molybdenite. In small quantities, in quartz masses. *Loc.* Spring Cr., on road to Salisbury Plains Stn., 10 miles W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* B.D.

6858A.——. In quartz lode in Granite and Q. Porphyry. *Loc.* Rail. cutting, $\frac{1}{4}$-mile west of Eurie Cr., 8 miles W. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D.

6858B.——. In quartz vein in Q. Porphyry and Granite. *Loc.* N. of Mt. Pring, 1 mile S. of rail. line, 10 miles W. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D.

6858C.——. As lode in granite country. *Loc.* Head of Saltwater Cr., Salisbury Plain, 20 miles W. of Bowen. *Co.* Herbert (*ante*). *Ref.* B.D.

6859. ——. Halifax Bay, 36 miles N.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

6860. ——. *Assoc.with* Bismuth and Wolfram. Wandoo and Bolingbroke Stations, about 25 miles E.N.E. of Nebo, and about 40 miles S.W.byS. of Mackay. *Co.* Wodehouse; *Dist.* **Leichhardt.** *Ref.* L.C.B.

6861. ——. Cressbrook, 3 miles N.byE. of Toowoomba Rail. Stn., 82 miles (by rail and road) N.N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* L.C.B.

6862. ——. Fry and Stoodleigh's Mine, Maxwelton Goldfield, 35½ miles S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* L.C.B.

6863. ——. In quartz lode. Maxwelton Goldfield (*ante*). *Ref.* G.S.M.

6864. ——. *Assoc.with* Wolfram, Tungstite, Wad, Native Bismuth, Bismutite, with traces of Copper Pyrites, Tenorite, Iron Pyrites, Hematite, etc., in defined quartz lodes, in greisen and mudstone. *Loc.* Rosedale Wolfram Mines, Rosedale, 34 miles (by rail) N.W. of Bundaberg, North Coast line. *Co.* Flinders; *Dist.* Port Curtis. *Ref.* B.D.

6865. ——. *Assoc.with* Gold and Copper Pyrites, in calcite and quartz. *Loc.* Mt. Rose Reef, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.M.

6866. ——. *Assoc.with* Gold, Silver, Native Copper, Copper Pyrites, Redruthite, Cuprite, Azurite, Malachite, Iron Pyrites, Ironstone, and Galena, in granitic rock. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn. (Mt. Morgan line), 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pubs. 143, p. 27 (1899), and 195, pp. 18-22 (1904).

6867. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Gt. Eastern 2 S. Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* **Wide Bay.** *Ref.* B.D.

Molybdenum (Mo.). *Atom.wt.* 96·0. *Sp.gr.* 9·01. *Colour*, silver-white. Brittle.

MINERALS: *See* Molybdenite, Molybdite, and Wulfenite, the first for notes.

USES: When certain iron and molybdenum ores are smelted together ferromolybdenum is formed and chromium steel is rendered self-hardening if an addition of this alloy is made to the smelting charge. Molybdenum is also used in the manufacture of dyes, pigments, medicines, and chemical reagents. Molybdenite, the sulphide, is the principal molybdenum-bearing ore, Molybdite being a secondary mineral resulting from the oxidation of Molybdenite. The presence of copper in molybdenum ores lessens their commercial value.

—— oxide. *See* Molybdite.

—— sulphide. *See* Molybdenite.

Molybdic Ochre. *Syn.* Molybdite, *which see.*

Molybdine. *Syn.* Molybdite, *which see.*

Molybdite. *Syn.* Molybdic Ochre, Molybdine. *Compo.*, Oxide of molybdenum. *Colour*, yellowish. Dull. *H.* = 1-2. *Sp.gr.* = 4·5. *Contents* (*max.*), Molybdenum 66 per cent.

6868. ——. *Assoc.with* Gold and Molybdenite, in quartz reef. *Loc.* Old Chowey Mine, Chowey Goldfield, 6 miles N. of Didcot Rail. Stn., 74 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.M.

6869. ——. *Assoc.with* Gold and Molybdenite. *Loc.* Mt. Venus Mine, Mt. Steadman, 4½ miles W. of Biggenden Rail. Stn. (Gayndah br. line). *Co.* **Cook** (*ante*). *Ref.* G.S.M.

6870. ——. *Assoc.with* Molybdenite and Wolfram, in quartz lodes and in greisen *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.M. and B.D.

6871. ——. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismutite, Scheelite, Mispickel, and Scorodite, with traces of Copper Pyrites, Tenorite, Chrysocolla, Iron Pyrites, etc., in irregular quartz masses in greisen. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Monal Goldfield—

SITUATION: *See maps*, Pls. 2, 3, 34. The field is about 42½ miles S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. Centre about *Lat* 24° 3′ S., *Long.* 151° 2′ E.

PROCLAMATION OF FIELD: First gazetted, 2nd October, 1891; last alteration, 6th November, 1908, as follows:—Commencing on Mount Graarbi, and bounded thence by the western watershed of Monal Creek northerly to Dawe's Range; thence by a line northerly to the S.W. corner of por. 315, par. of Dalgalgil; thence by a line E. to Koolkooroom Creek, by that creek downwards to Dalgalgil Creek, by that creek downward to N.W. corner of por. 7V, par. of Milton, by the S.W. boundaries of por. 7V and 11V south-easterly to the range forming the northern watershed of Station, Deception, and Glassford Creeks, by that range south-westerly to Dawe's Range, by Dawe's Range to the extreme east corner of por. 1V, par. of Monal, on the N.W. side of a road running between pors. 1 and 2, by that road southerly to Monal Creek, by that creek upwards about 40 chains to the W. boundary of por. 1, by that boundary N. 283 chains; thence W. about 90 chains to the confluence of Broad Creek with Monal Creek; thence by Monal upwards to a point 3 miles southerly from Mount Graarbi; and thence by a line northerly to the point of commencement.

AREA: 66,300 acres = 103 19/32 sq. miles.

PRINCIPAL MINING CENTRES: Mt. Hector Goldfield, including Mt. Hector Copper Mines, *which see.*

MINERAL STATISTICS: *Included in* "Other Goldfields." *See tables and diagram*, Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold, *see* 4262, 4263A; Copper (Azurite) 244A, (Bornite) 434, (Copper Pyrites) 2237B, (Cuprite) 2473A, (Malachite) 6356A, Tenorite, 7739A; Iron (Iron Pyrites) 5364A, (Ironstone) 5617B.

Monazite. *Compo.*, Phosphate of Cerium, Lanthanum, and Thorium. *Colour*, brownish, yellowish, reddish. Resinous. Translucent. *H.* = 5-5·5; *Sp.gr.* = 4·9-5·2.

Uses: The thoria contained in Monazite is used in the manufacture of incandescent gas mantles, and the value of the mineral depends on the amount of this oxide present. The percentage of thoria is usually about 3 per cent., but the Queensland Monazite samples treated contain less than this. *See* reference below. *See also note under* Thorium.

Mineral and Geological Note: Monazite is a frequent associate of Wolfram in lode deposits, but is also found with Molybdenite, Cassiterite, Mispickel, Iron Pyrites, Scheelite, Beryl, Fluorspar, Calcite, Biotite, Quartz, and Chlorite, the associated rocks being granite and greisen. In beach sands it has been found with gold, platinum, tin, osmiridium, etc. The percentage of thorium present in Monazite is always very small, the other two elements mentioned above making up the great bulk of the mineral compound. A sample, not cleaned from gangue, yielded 2·6 per cent. of Thoria, and 56·1 per cent. of oxides of the Cerium and Yttrium groups. For "Monazite in Queensland," *see* G.S.Q. Pub. No. 196, p. 12 (1905).

Note: The discovery of this mineral was made by B. Dunstan in 1904, in alluvial deposits of tin at Fossilbrook, and in the same year in wolfram lodes at Bamford. There are now several localities where Monazite deposits are known to occur, but no endeavour has been made to work them. The percentage of thoria in the Monazite is not high enough to encourage miners to prospect the lodes, and the quantities in sight in the various individual deposits do not seem to offer sufficient inducement to companies to establish works for its extraction.

6874. ——. *Assoc.with* Wolfram, Biotite, and Topaz, in quartz lode. *Loc.* Fingertown, 9 miles N. of Nymbool, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* B.D.

6875. ——. *Assoc.with* Wolfram, Molybdenite, Cassiterite, Mispickel, and Iron Pyrites, in quartz and mica in greisen country. *Loc.* California Cr. Mine, nr. Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

6876. ——. *Assoc.with* Wolfram and Cassiterite. *Loc.* Emerson's Wolfram Mine, nr. head of California Cr., 6 miles E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6877. ——. *Assoc.with* Mica, Chlorite, Clay, and Quartz. *Loc.* Emuford, Emu Cr., br. of Walsh R., 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Tin = 11·6 per cent., Tungstic Acid = 1·0 per cent. *Ref.* A.R., p. 120 (1907).

6877A.——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Emu Creek, 3 miles N. of Fossilbrook, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6878. ——. In beach deposits. *Loc.* South side of mouth of Johnstone R., Geraldton, 130 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Analysis:* 2·6 per cent. of Thoria, and 56·1 per cent. of Oxides of Cerium and Yttrium. *Ref.* G.S.Q. Pub. 196, p. 12 (1905).

6878A.——. *Assoc.with* tin. *Loc.* Broadwater Cr., Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* B.D.

6879. ——. *Assoc.with* Wolfram, Molybdenite, Wad, Cassiterite, Scheelite, with traces of Cuprite, Malachite, Azurite, Mispickel, and Scorodite, in irregular masses of quartz in greisen country. *Loc.* Nettle's Cr., 4 miles E. and 3 miles S.E. of Coolgarra, between 10 and 14 miles N.E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* B.D. Note: The mineral is radio-active.

6880. ——. Six miles N. of Innot Springs, nr. Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

6881. ——. *Assoc.with* Gold, Silver, Cassiterite, and Platinum, in beach deposits. *Loc.* Currumbin Cr. to Pt. Danger, S. Coast of Queensland, 69 miles (by rail) S.S.E. of Brisbane. *Co.* Ward; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 198 (1905).

6882. ——. In beach deposits. *Loc.* Tweed R., Tweed Heads, 69 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref. and Analyses*, G.S.Q. Pub. 196, p. 11 (1905). *Min. Note:* A sample of concentrates from the beach sand yielded 1·2 per cent. of Monazite, associated with Tantalite, Zircon, Ilmenite, Magnetite, etc.

Montalbion—

Situation: *See maps*, Pls. 8, 9, 22. The Mining Centre is about 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Lat.*, 17° 23′ S.; *Long.*, 145° 12′ E.

Discovery: Montalbion Silver Mine discovered about 1884.

Population: 26 (estimated in 1910 by Warden. No official estimate since).

Mineral Statistics: Silver and Lead—included in Herberton Returns. *See* Pls. 37, 38, 46, 46A.

Mineral References: Silver, *see* 7451, (native) 7549, Cerargyrite 1179, 1180; Mercury (Cinnabar), 1542; Lead (Anglesite) 22-27, (Cerussite) 1193, Galena) 2767-2773, Lead) 5724, (Minium) 6580, (Pyromorphite) 7141; Copper (Bournonite) 437, (Chalcanthite) 1320, (Copper Pyrites) 2153, 2154, (Tetrahedrite) 7761; Tin (Cassiterite) 875-877, Scheelite, 7343; Zinc (Goslarite) 4561, (Willemite) 7925, (Zinc Blende) 8081; Iron (Marcasite) 6503, (Mispickel) 6688, (Pyrrhotite) 7155, (Scorodite) 7365; Limestone, 635; Other Minerals—Chlorite, 1434; Mica, 6556.

Geological Note: The rocks in the country round Montalbion are a series of shales, sandstones, and grits, in association with porphyry. It is in the porphyry that the silver-lead deposits of Montalbion and Silverfield occur. *See* G.S.Q. Pub. 119 for details.

Moonda Park, nr. Thompson R., 75 miles S.W. of Longreach. *Min.Ref.* Coal, *see* 1709B.

Moondilla Goldfield, about 10 miles S. of Adavale, N.N.W. of Charleville. Centre about *Lat.* 26° 5′ S.; *Long.* 144° 42′ E. *Min.Ref.* Chalcedony, *see* 1364; Gold, 4385. This field has also been known as Adavale, Hoomooloo, and Gumbardo.

Geological Note: The gold occurs in a cemented wash, associated with sandstones, grits, and conglomerates belonging to the "Desert Sandstone" Formation (Upper Cretaceous). From its appearance, the gold seems to have been precipitated from solution, and not as an alluvial accumulation. *See* G.S.Q. Pub. No. 78 for details.

Moonie Scrub Bore. *See under* Artesian Bores. No. 105.

Moonmera. *See maps,* Pls. 2, 3. 20 miles (by rail) S.S.W. of Rockhampton. *Min.Ref.*, Coal, *see* 1804; Gold (alluvial), 3402, 3403; Hornblende, 4847; Limonite, 5919; Magnesite, 5963; Vermiculite, 7917.

Geological Note: The rocks at the base of Mommera Range are principally granite and syenite, above which in places there are irregular masses of copper-bearing breccias and sandstones. Over these, unconformably, have been deposited the Trias-Jura (Ipswich) shales, sandstones, and tuffs, the peaks in the range being composed of sandstones belonging to this formation. *See* G.S.Q. Pub. No. 195 for details and maps. *Also* G.S.Q. Pub. 150, p. 1 (1900).

Moreton District—

Situation, Etc.: *See maps*, Pls. 6, 7. *Lat.*, 26° and 29° S.; *Long.*, 151° and 154° E. The extreme south-eastern part of Queensland. Bounded on the N. by the districts of Burnett and Wide Bay, on the E. by the Pacific Ocean, on the S. by the State of New South Wales, and on the W. by the district of Darling Downs. Principal Rivers: Maroochy, Mooloolah, Caboolture, North Pine, South Pine, Brisbane (tribs. Stanley, Lockyer, and Bremer), Logan, Albert (trib. Coburg), Pimpama, Coomera, and Nerang.

Area: (in sq. miles) 8,828. With islands included, 9,102.

Principal Mining Centres: Gold and Mineral Fields—Nanango (*in part*), and Enoggera. Coalfields—Ipswich, West Moreton, and Beaudesert, *which see.*

Counties:

Canning Co., Caboolture, Caloundra, Crohamhurst, Kilcoy, Landsborough, Woodford, Yandina.

Cavendish Co., Biarra (Copper), Blackbutt, Blackbutt Range, Bum Bum, Cooyar, Crow's Nest, Djuan, Esk (Gallanani), Eskdale, Hampton, Harlin, Helidon (Spa Water), Mooretown, Mt. Esk, Nanango Goldfield (*in part—see also* Fitzroy Co. *See also under* Burnett Dist.); Pechey, Ravensbourne, Round Mountain, Taromeo (Gold), Yarraman Cr. (Gold).

Churchill Co., Boonah, Dugandan, Fernvale, Gatton, Grandchester, Harrisville, Laidley, Lowood (Garnets), Marburg, Munbilia, Normanby, Peak Crossing, Rosewood (Coal), Walloon (Coal) (Collieries—Walloon and Caledonia).

Stanley Co., Bundanba (Collieries—Aberdare, Blackheath, Bogside, Bonnie Dundee, Borehole, Box Flat, Braeside, Denham, Dinmore, Ebbw Vale, Fairbank, Fernie Cr., Mafeking, New Chum, Noble Vale Nos. 1 and 2, Old West Moreton, Rhondda, Swanbank, and Whitwood); North Ipswich (Collieries—Donnybrook, Eastwood, Haighmoor, new Colliery, Tivoli, Waterstown, and Wright's); Bald Hills, Blackstone, Brisbane North, Brisbane South, Cleveland, Goodna, Indooroopilly, Moreton Island (Coal), Mt. Coot-tha, Mt. Crosby, North Pine, Nundah (Nundah Colliery), Pine Mountain, Sandgate, Tingalpa, Toorbul Point.

Ward Co., Alberton, Beaudesert, Beenleigh, Bethania Junction, Burleigh, Coomera, Nerang, Pimpama, Southport.

Mineral References and Statistics: *See under* names of Principal Mining Centres.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 343.

Moreton Island, 41 miles N.N.E. of Brisbane. Centre about *Lat.* 27° 02′ S.; *Long.* 153° 28′ E. *Min.Ref.* Cuprite, *see* 2471; Coal, 1767, 1768; Fulgurites, 2686.

Geological Note: The island is made up of rocks belonging to the Ipswich Series (Trias-Jura), in which a number of bands of coal are to be seen near the Cape Moreton Lighthouse. Mt. Tempest, a prominent landmark, is composed of an altered acid volcanic rock associated with the Trias-Jura sandstones. There are large areas of blown sand on the island, and fulgurites are common in the sand dunes at Tangalooma.

Morinish Goldfield—

Situation: *See maps,* Pls. 2, 3. The field is about 25 miles N.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. Centre about *Lat.* 23° 10′ S.; *Long.* 150° 13′ E.

Discovery: Gold was discovered on a spur of Morinish Range, 35 miles W. of Rockhampton, in 1866, by Smith Bros., and a "rush" took place in January of the following year (1867).

Proclamation of Field: First gazetted, 1st November, 1871; last alteration, 7th August, 1886, as follows:—Commencing at the south-eastern corner of the Morinish Goldfield Reserve; bounded on the south by a line bearing west four miles; on the west by a line bearing north three miles one and a quarter chains; and again on the south by a line bearing west three miles twenty-two and a-half chains to the south-west corner of portion 2v; on the west by the western boundary of the parish of Morinish bearing northerly about five and a-half miles to the southern boundary of selection 1846; on the north by part of selection 1846 and part of portion 1v bearing east two miles fifty chains to the boundary of selection 678; and again on the east by part of that selection and by selection 1498, bearing south about two miles thirty-five chains to the north-east corner of selection 1902; and again on the north by the southern boundary of selection 1498 bearing east two miles thirty-one chains; on the north-east by a Government road and by the eastern boundary of selection 1840 bearing south-easterly two and three-quarter miles to the south-east corner of that selection; and again on the south by part of that selection bearing west about thirty-six chains; and again on the east by a line bearing south four miles fifty-two chains and fifty-four links to the point of commencement;—including Morinish Goldfield Reserve No. 2 (otherwise known as Blackfellow's Gully Goldfield), and exclusive of all alienated lands.

Area: 24,960 acres = 39 sq. miles.

Principal Mining Centre: Blackfellow's Gully.

Mineral Statistics: *Included in* "Other Goldfields" *in tables and diagram,* Pls. 36, 46, 46a, 47.

Statistical Note: *See under* Rockhampton.

Mineral References: Gold (alluvial) 3394, (reef) 4332-4336; Lead (Galena), 3061-3062; Copper (Native) 2010, (Pyrites) 2297, (Malachite) 6366, (Redruthite) 7303, (Tenorite) 7740; Zinc Blende, 8204; Chromite, 1485; Iron (Pyrites) 5407, 5407a, (Pyrrhotite) 7163. Other Minerals—Analcime, 11; Calcite, 536; Natrolite, 6903.

Geological Note: The country rocks consist of slates, etc., belonging to the Gympie Formation, and granite.

Geological Publications: Report—No. 22 (1885). *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour., Report No. 23, and Supplementary Report List, No. 7.

Warden and Inspector of Mines: Both stationed at Rockhampton.

Mourilyan Harbour—

Situation: *See maps*, Pl. 8, 9. The harbour is about 122 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Lat.*, 17° 35′ S.; *Long.*, 146° 5′ E.

Harbourage: The navigable channel is 70 ft. wide, having a depth at L.W.S. of 18 ft. 6 in. Spring tides vary from 7 ft. to 10 ft.; Neaps from 2 ft. to 4 ft. Spring tides run in and out of the harbour at the rate of 6 or 7 knots per hour.

Mineral Reference: Manganese-dioxide, *see* 6413.

Geological Note: In the neighbourhood clay schists are the prevailing rocks, in which gold-bearing reefs are known to exist.

Mowarra Co. Gregory North Dist. *See map*, Pl. 20.

Mowbray Cr. Runs into Dry R., trib. of Upper Herbert R., 12 miles S.S.W. of Herberton. *Min.Ref.* Cassiterite, *see* 1133, 1134.

—— Reef, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3753.

Mrs. Alison's Mine, Sugarloaf, Stanthorpe. *Min.Ref.* Copper Pyrites, *see* 2191; Galena, 2837; Iron Pyrites, 5116.

—— Trouston's Sel., 2½ miles from Kingston Rail. Stn. (South Coast line). *Min.Ref.* Kaolin, *see* 5698.

Mount Abundance and Railway Line (between), 26 miles W. of Roma. *Min. Ref.* Coal, *see* 1707.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 345.

—— Adler, 7 miles N. of Einasleigh. *Min.Ref.* Gold (alluvial), *see* 3211a.

—— Agnes, Irvinebank. *Min.Ref.* Cassiterite, *see* 866.

—— —— Mine, Bompa Goldfield. *Min.Ref.* Gold, *see* 4247.

—— Alexander, Mt. Morgan Goldfield. *Min.Ref.* Copper Pyrites, *see* 2311; Gold, 4369a; Hematite, 4800; Iron Pyrites, 5425; Ironstone, 5630; Limonite, 5920.

Geological Note: The rocks of Mt. Alexander comprise quartzites, shales, and chloritic and serpentinous slates, together with dykes of dolerite and gabbro. A large formation of gold-bearing ironstone is associated with these rocks on the surface, and which is also copper-bearing at water level. *See* G.S.Q. Pub. 132 for details.

—— Alfred Bore. *See under* Artesian Bores. No. 346.

—— Alice, nr. Gigoomgan Stn. *Min.Ref.* Azurite, *see* 259; Malachite, 6384; Tile Ore, 2571. *Geological Note.*—Diorite is the prevailing rock. *See* G.S.Q. Pub. No. 1, pp. 16, 17.

—— —— P.C., Maxwelton Goldfield. *Min.Ref.* Gold, *see* 4261.

—— Allen, Gigoomgan Run. *Min.Ref.* Copper, *see* 1864; Nickel Ore, 6908.

—— —— Mine, Gebangle. *Min.Ref.* Gold, *see* 3579; Iron Pyrites, 4981.

—— Alma Station, 30 miles S.W.byW. of Gladstone. *Min.Ref.* Actinolite, *see* 4866; Malachite, 6356; Magnetite, 6038.

—— Alto, 40 miles S.W. of Port Douglas. *Note:* Tin discovered here by Mr. J. V. Mulligan in September, 1892. *Min.Ref.* Cassiterite, *see* 838.

Mount Amos Group of Tin Mines—

Situation: *See maps*, Pls. 8, 9, Annan Tinfield. *Includes* Mt. Amos, Sullivan and Party's, Owen and Davidson's, Keating and Madden's, Mt. Browning, Fiery Star, Murray and McArdle's, Gladstone and Creighton Tin Mines, *which see.*

Mineral Reference: Cassiterite, *see* 790-799; Iron Pyrites, 5023; Mispickel, 6668; Orthoclase, 7035; Talc, 7671, 7672; Tourmaline, 7828-7836; Wolfram, 7928, 7929.

Geological Note: The country rock is granite, in which felspar is occasionally present as very large crystals. The lodes carry tin in a quartz matrix, usually associated with tourmaline, but sometimes with wolfram. *See* G.S.Q. Pubs. Nos. 35, 66, and 210 for details.

—— —— Tin Mine, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 794a; Mispickel, 6668; Talc, 7672; Tourmaline, 7833; Wolfram, 7929.

——Angus, Croydon Goldfield. *Min.Ref.* Gold, *see* 3534; Graphite, 4577.

—— Archer, Targinnie. *Min.Ref.* Gold, *see* 4311.

—— Bobunga, Cloncurry. *Min.Ref.* Cuprite, *see* 2401a; Malachite, 6126.

Mount Barker Silver Mine, 10 miles W. of Eungella Range Rail. Stn. *Min.Ref.* Azurite, *see* 230; Calamine, 444; Cerussite, 1286; Copper Pyrites, 2254; Iron Pyrites, 5300; Galena, 3011; Malachite, 6324; Mispickel, 6760; Zinc Blende, 8168.

GEOLOGICAL NOTE: The country rocks consist of greywackes and quartzites. Two silver-bearing lodes occur on the mount, and are made up of an ironstone-quartz-felspathic gangue containing galena, mispickel, copper pyrites, zinc blende, and iron pyrites in varying proportions. *See* G.S.Q. Pub. No. 181 for details and plan.

Mount Bartle Frere, and Reef, W.byN. of Geraldton. *Min.Ref.* Gold (alluvial), *see* 3220A, (reef) 3786; Ironstone, 5533.

GEOLOGICAL NOTE: The mountain is composed of granite, at the base of which there are slates, quartzites, etc., of undetermined age, both igneous and sedimentary rocks being partly covered by flows of basalt. *See* G.S.Q. Pubs. Nos. 45, 89 for details.

—— Barunda, 1 mile E.N.E. of Fisherton. *Min.Ref.* Amethyst, *see* 7166; Cassiterite, 951; Lepidolite, 5733; Rose Quartz, 7199.

—— Bassett Estate Sub-artesian Bore. *See under* Artesian Bores. No. 97.

—— Beardmore, Balcomba Range. *Min.Ref.* Nepheline, *see* 6906.

—— Benham, Kangaroo Hills Mineral Field. *Min.Ref.* Cassiterite, *see* 1154; Galena, 2968.

—— Bennett (4 miles from), Langmorn Goldfield. *Min.Ref.* Azurite, *see* 247A; Bornite, 435A; Limonite, 5908A; Malachite, 6358A.

Mount Biggenden, 58 miles (by rail and road) W. of Maryborough. *See* Biggenden Gold and Bismuth Mine for additional information.

GEOLOGICAL NOTE: The rocks about the Mount comprise slates, tuffs, and limestones, of Gympie Formation (Permo-Carboniferous), and granite. The Biggenden bismuth deposits are between slate and limestone near the granite, and are associated with masses of magnetite. Other deposits of bismuth and gold occur under similar conditions in the neighbourhood. *See* G.S.Q. Pubs. Nos. 60 and 173 for details.

MINERAL REFERENCES: Actinolite, *see* 4855; Aragonite, 86; Bismuth (native), 326; Bismite, 311; Bismuthinite, 357; Bismutite, 379; Calcite, 474-475; Chalcedony, 1339; Chlorite, 1427; Dolomite, 2585; Epidote, 2592; Erythrine, 2619; Eulytite, 2621; Felspar, 2627; Galena, 2724; Gold, 3597; Hematite, 4696; Hornblende, 4824; Iceland Spar, 581; Iron Pyrites, 4997; Kaolin, 5672; Limestone, 625; Lollingite, 5942; Magnetite, 5976; Manganese-dioxide, 6399; Mispickel, 6655; Olivine, 6920-6921; Scorodite, 7362; Tourmaline, 7822; Viridite, 7918.

—— —— (W. of granite ridge, nr.), 4½ miles W. of Biggenden Rail. Stn. *Min. Ref.* Copper carbonate, *see* 1881; Magnetite, 5977.

—— —— (1 mile N.N.E. of). *Min.Ref.* Azurite, *see* 179; Bismutite, 380; Calcite, 476; Copper Pyrites, 2132; Malachite, 6199; Mispickel, 6656.

—— —— (hill, N.E. of). *Min.Ref.* Epidote, *see* 2593; Wollastonite, 8041.

Mt. Birnie Group, Cloncurry. *Includes* Mt. Birnie and Monastery Leases. *Min. Ref.* Azurite, *see* 206; Chrysocolla, 1522; Copper Pyrites, 2203; Cuprite, 2449, 2450; Iron Pyrites, 5133; Limonite, 5864; Malachite, 6262, 6264; Redruthite, 7287, 7288.

—— —— M.L. (686, etc.), Cloncurry. *Min.Ref.* Chrysocolla, *see* 1522; Copper Pyrites, 2203; Cuprite, 2450; Iron Pyrites, 5133; Limonite, 5864; Redruthite, 7288; Malachite, 6264.

—— Bismarck, Return Cr., Coolgarra. *Min.Ref.* Cassiterite, *see* 1050.

—— Black, Cape R. Goldfield. *Min.Ref.* Gold (alluvial), *see* 3267; Magnetite, 6012.

—— Blowhard (Mt. Hope), S.S.W. of Rockhampton. *Min.Ref.* Gold, *see* 4183; Ironstone, 5599A.

—— Bona, nr. Mt. Fox, and close to Kangaroo Hills Stn. *Min.Ref.* Antimony, *see* 75.

—— Boorambool, 3 miles W.byN. of Springsure. *Min.Ref.* Hyalite, *see* 7015.

Mount Bopple, 3 miles N.E. of Gundiah Rail. Stn. (North Coast line). *Lat.*, 25° 50′ S.; *Long.*, 152° 37′ E. *Min.Ref.* Biotite, *see* 310; Coal, 1826, 1827; Graphite, 4610.

Geological Note: Syenitic granite forms the top of the mountain, altered Trias-Jura Coal Measures occurring around the base. Where the Coal Measures are much crampled and intruded by dykes of andesite and syenite the coal seams have been altered to anthracite and graphite. The latter has been worked to a limited extent, and has proved to be of some commercial value.

—— Bornite M.L. (376), Cloncurry. *Min.Ref.* Copper Pyrites, *see* 2109; Limonite, 5814; Malachite, 6175; Redruthite, 7263; Tile Ore, 2532.

—— Brisbane, N.N.E. of Esk. *Min.Ref.* Ilmenite, *see* 4904.

Mount Britton Goldfield. *See* Nebo Goldfield.

Mount Brown, Kangaroo Hills Mineral Field. *Min.Ref.* Bismuth Ore, *see* 354; Cassiterite, 1154-1156; Cerussite, 1245-1248; Chrysocolla, 1529; Copper carbonate, 1930-1932; Fluorspar, 2683; Galena, 2978-2980; Hematite, 4748, 4749; Ironstone, 5557; Limonite, 5882; Minium, 6602; Mispickel, 6754; Zinc Blende, 8159.

Geological Note: The rocks on the field embrace slates, schists, quartzites, limestones, etc. The tin lodes occurring in these rocks contain a good deal of calcite and fluorspar, with a little mispickel, and at times a small quantity of bismuth. Silver lodes occur in micaceous schists and clay slates, and contain galena, zinc blende, mispickel, and copper pyrites in a matrix of quartz. *See* G.S.Q. Pub. No. 82 for details and maps.

—— —— Lease (183), Kangaroo Hills Mineral Field. *Min.Ref.* Cerussite, *see* 1246; Copper carbonate, 1931; Galena, 2978; Hematite, 4748; Limonite, 5882.

—— Browning Tin Mine, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 796; Hornblende, 4826A; Orthoclase, 7036; Tourmaline, 7837.

—— Buchanan, Oaky Cr., Palmer Goldfield. *Min.Ref.* Gold, *see* 3688; Ironstone, 5518.

—— Buderim, 7 miles E. of Woombye. *Min.Ref.* Opal (common-black), *see* 6987.

—— Bullaganang (Trig Stn.), W. of Stanthorpe. *Lat.*, 28° 35′ S. *Long.*, 151° 24′ E. *Min.Ref.* Mispickel, *see* 6731.

—— Bullock, N.W.byN. of Anakie. *Min.Ref.* Gold (alluvial), *see* 3362.

Mount Cannindah Mineral Field—

Situation: *See maps*, Pls. 4, 5, 34. Nr. head of Cabbage-tree Cr., br. of Splinter Cr., 13 miles S.W.byS. of Many Peaks Rail. Stn. (Boyne-Valley Br. line), 71 miles (by rail and road) S. of Gladstone. *Co.* Yarrol; *Dist.* Burnett. Centre about *Lat.* 24° 55′ S.; *Long.* 151° 10′ E.

Proclamation of Field: First (and only one) gazetted, 12th September, 1898, as follows:—Commencing at the north-west corner of Pre-emptive No. 3, New Cannindah, and bounded thence on the north by a line bearing west one mile and a-half; on the west by a line bearing south one mile and a-half; on the south by a line bearing east one mile and a-half to Pre-emptive No. 3; and on the east by that pre-emptive bearing north one mile and a-half to the point of commencement.

Area: 1,440 acres (2¼ sq. miles).

Mineral Statistics: Copper, *see under* Gladstone, *in tables*, Pls. 39, 46, 46A.

Mineral References: Gold, 3657-3659; Silver, 7443-7445; Copper (Azurite), 182-184, (Cuprite) 2422-2424, (Copper, native) 1990, (Copper Pyrites) 2141, (Malachite) 6207-6209, (Tenorite) 7717, 7718; Iron (Iron Pyrites), 5021, 5022, (Limonite) 5837, (Magnetite) 5984; Limestone, 629-631.

Geological Note: The country rocks at Mt. Cannindah are sandstones, grits, shales, limestones, and basalt, the latter being intrusive along the bedding planes of the sedimentary rocks. Large brecciated formations of decomposed rock occur in the slates, containing extensive copper deposits. *See* G.S.Q. Pub. 113 for details.

Geological Publications: Reports—Nos. 113 (1896), 143 (1899). *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour., Report No. 77.

Discovery: Copper was first found here in March, 1895.

Warden: Stationed at Gladstone. Inspector of Mines: Stationed at Rockhampton.

Smelting Works: *See under* Smelting Works in Queensland.

—— —— Mine. *Min.Ref.* Azurite, *see* 184; Native Copper, 1990; Cuprite, 2424; Gold, 3659; Malachite, 6209; Silver, 7445; Tenorite, 7718.

Mount Carbine Wolfram Mines, 34 miles (*viâ* Mt. Molloy Tramway) N.N.W. of Biboohra (Cairns-Herberton line). *See maps*, Pls. 8, 9, 22. *Statistics: See under* Herberton. *Min.Ref.* Cassiterite, *see* 839; Molybdenite, 6830; Scheelite, 7341; Tungstite, 7878; Wolfram, 7940.

GEOLOGICAL NOTE: The prevailing country rocks on the field are slates, greywackes, and quartzites, with granite also occurring in the vicinity. The lodes are well defined, sometimes several feet thick, and contain wolfram associated with small quantities of tin and scheelite in a quartz gangue. The lodes trend N.W. and S.E., the country rocks N. and S., the intersection of one by the other tending to produce alternating rich and poor zones. (No G.S.Q. Pub. issued, but one in preparation by L.C.B.).

—— Cardwell Mine, 5 miles S. of Ord Rail. Stn. (Califorinia Cr.) (Mt. Garnet line). *Min.Ref.* Copper Pyrites, *see* 2172; Magnetite, 5992.

—— Cassiterite, Stanhills Tinfield. *Min Ref.* Cassiterite, *see* 761A.

—— Cavanagh, S.S.E. of Bowen. *Min.Ref.* Cuprite, *see* 2459; Hematite, 4742; Malachite, 6291.

Mount Chalmers (Gt. Fitzroy Copper Mine), Cawarral Goldfield. *See maps*, Pls. 2, 3, 34. (Gold discovered here in 1870; Copper about 1896.) *Min.Ref.* Azurite, *see* 251; Barytes, 279; Copper Pyrites, 2298; Gold, 4323; Iron Pyrites, 5401; Jasper, 5665; Malachite, 6364; Silver, 7530; Zinc Blende, 8202. *See also under* Govt. Ming. Jour., Report No. 101.

GEOLOGICAL NOTE: The rocks comprise shales, quartzites, and interbedded dolerite, with serpentine, sandstone, and limestone in the neighbourhood. The quartzites and shales are impregnated with gold-bearing iron pyrites and copper pyrites, the quartzites forming an immense lenticular or kidney-shaped mass. *See* G.S.Q. Pub. No. 216 for details and maps.

SMELTING WORKS: *See under* Smelting Works in Queensland.

HISTORICAL NOTE: Gold discovered here in 1860 (?); copper developments began in 1894 with the Osborne-Charley Syndicate; present company started in 1907. *See* G.S.Q. Pub. No. 216, p. 33.

STATISTICS: Included in Rockhampton.

—— Chelona (S. of), S.E.byS. of Mackay. *Min.Ref.* Gold, *see* 4117; Ironstone, 5584.

—— Clara Hills, Black Snake. *Min.Ref.* Asbolane, *see* 122; Manganese-dioxide, 6486; Nickel, 6909.

GEOLOGICAL NOTE: *See under* Mt. Coora.

—— —— Mine, Black Snake Goldfield. *Min.Ref.* Copper, *see* 1861.

—— Clarke (East of), Mt. Britten Goldfield. *Min.Ref.* Cerussite, *see* 1294; Galena, 3025; Minium, 6640.

—— Clifford, 9½ miles N.W. of Anakie. Proclaimed a Prov. Goldfield in September, 1897. *Includes* Mt. Clifford, Oswald, and Stewart and Spier's Mines. *Min.Ref.* Bornite, *see* 431; Chalcanthite, 1335; Copperas, 2337; Copper Pyrites, 2268A; Gold, 4167-4169; Hematite, 4767; Ironstone, 5597; Limestone, 663; Limonite, 5892, 5895; Magnetite, 6028.

GEOLOGICAL NOTE: Country rocks are talcose and mica schists and slates, in contact with diorite. Gold-bearing quartz reefs and ironstone formations occur in the schists, slates, and diorite. *See* G.S.Q. Pub. No. 127 for details and map.

Mount Cobalt Workings, 7 miles S.S.E. of Kilkivan. *Min.Ref.* Asbolane, *see* 123; Cobalt, 1836; Kyanite, 5716; Manganese-dioxide, 6487; Noumeite, 6911; Rhodochrosite, 7316; Rhodonite, 7322; Turquoise, 7913.

—— Colo Manganese deposits, Marodian Goldfield. *Min.Ref.* Manganese-dioxide, *see* 6491.

GEOLOGICAL NOTE: The rocks consist of jasperoid slates belonging to the Devonian System. Laminations of manganese-dioxide, cobalt-bearing, replace the slates in places. *See* G.S.Q. Pub. 179, p. 14, for details.

—— Cook, Magnetic Is. *Min.Ref.* Gold, *see* 3997, 4001; Iron Pyrites, 5231.

Mount Coora Cobalt Deposits, 8 miles S.S.E. of Kilkivan. Discovered about 1886. *Min.Ref.* Azurite, *see* 258; Chrysotile, 7397, 7398; Cobalt, 1837; Copper, 1862; Copper carbonate, 1964; Copper oxide, 2055; Copper Pyrites, 2328; Galena, 3070; Hematite, 4802; Manganese-dioxide, 6488; Nickel, 6910; Rhodochrosite, 7317; Rhodonite, 7323.

GEOLOGICAL NOTE: The country rock is brownish jasperoid quartzites and slates. The ore is manganese-cobalt wad, which, with associated rock, make up a thickness of 32 ft. The mine has recently been worked, but is now idle, the percentage of cobalt becoming less and less until now, it is considered, the quantity is too small for profitable working. *See* G.S.Q. Pub. No. 38 for details.

—— Cooroora, nr. Pomona Rail. Stn. *Min.Ref.* Gold (alluvial), *see* 3412A.

—— Coot-tha, 5 miles W. of Brisbane. *Min.Ref.* Copper Pyrites, *see* 2279; Garnet, 3138; Gold, 4217; Mispickel, 6778.

Mount Flora Gold and Mineral Field—

Situation: *See maps*, Pls. 10, 11. The field is 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* Leichhardt. Centre about *Lat.* 21° 57′ S.; *Long.* 148° 38′ E.

Discovery: Mines opened about 1871, by Messrs. Orange, McFayden, Thompson, and "Red Pat."

Population: Less than 30.

Proclamation of Field: Gazetted on 19th September, 1907, as follows:—Commencing on the right bank of Bee Creek at the north-east corner of the resumed part of Oxford Downs, and bounded thence on the north by a line bearing west about six miles; on the west by the Annandale Lease bearing south-easterly about three miles and south-westerly about three miles and a-half to the north corner of the parish of Kerlong; on the south by the south boundary of the resumed part aforesaid easterly about eleven miles; thence by a line at right angles about three miles to Bee Creek; and thence by that creek upwards to the point of commencement.

Area: 33,920 acres = 53 sq. miles.

Mineral Statistics: Copper, *see under* Mackay, *in tables*, Pls. 39, 46, 46A.

Mineral References: **Copper** (Azurite) 235B-235N; (Chrysocolla) 1534A, 1534B, (Copper carbonate) 1950, (Copper Pyrites) 2269A-2269H, (Malachite) 6339A-6339R, (Redruthite) 7299A, 7299B (Tenorite) 7735A, (Tile Ore) 2568A, Mount Flora Gold and Mineral Field—*continued:*

2568B; Manganese-dioxide, 6448A; Iron (Hematite) 4769A-4769H, (Iron Pyrites) 5327A-5327H, (Ironstone) 5598A, (Limonite) 5895A-5895C, (Magnetite) 6029A, (Mispickel) 6771A, 6771B, (Pyrrhotite) 7161A; Other Minerals—Calcite, 511A; Chlorite, 1461A; Porcellanite, 5661A.

Geological Note: The country rocks of Mt. Flora are highly inclined slates and shales, with masses of granite in close proximity. The Copper Lodes occur as well-defined but small lenticular bodies in the slates, and are made up of pure Copper Pyrites. *See* G.S.Q. Pub. No. 181, for details.

Geological Publications: Reports—Nos. 181 (1903), and 228 (1910). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Mackay; Inspector of Mines: Stationed at Rockhampton.

—— Fox, 30 miles S.W. of Ingham. *Min.Ref.* Antimony, *see* 75; Wolfram, 8031B.

Mount Fraser Tin Mines, 20 miles N.byW. of Biboohra Rail. line. *See* Pl. 22. *MinRef.* Cassiterite, *see* 960.

—— Gammie (Big Hill) Thane's Cr. Goldfield. *Min.Ref.* Gold, *see* 3857-3862, 3872; Ironstone, 5543, 5544; Manganese-dioxide, 6423; Psilomelane, 7088; Pyrolusite, 7122.

Mount Garnet Rail. Stn. and Mines—

Situation: *See maps,* Pls. 16, 17, 22. Return Cr., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Lat.*, 17° 46′ S.; *Long.*, 145° 9′ E.

Railway Base for Mt. Garnet Copper Mines and Coolgarra Tin and Wolfram Mines.

Population: 104 (estimated in 1910 by Warden. No estimate since.)

Mineral Statistics: Copper. *See under* Herberton in *Stat. tables,* Pls. 39, 46, 46A.

Mineral References: Gold, 3878; Silver, 7479; Lead (Cerussite) 1224, (Galena) 2863, (Mimetite) 6566, (Minium) 6598; **Copper** (Azurite) 212A, 213, (Bornite) 421, (Chalcanthite) 1330, (Copper carbonate) 1912, 1913, (Copper Pyrites) 2213, (Cuprite) 2456, (Malachite) 6284, 6285, (Tenorite) 7729, (Tetrahedrite) 7770, (Tile Ore) 2563; **Zinc Blende,** 8111; Iron (Hematite) 4732, 4733, (Iron Pyrites) 5143, (Limonite) 5874, (Magnetite) 6005, 6006, (Mispickel) 6741; Limestone, 649. Other Minerals—Garnet, 3121; Kaolin, 5689; Talc, 7679.

Geological Note: The country is made up of altered sedimentary rocks in contact with a decomposed elvan rock. The lodes contain kaolin, garnet rock, ironstone, and sulphides of iron, copper, and zinc. *See* G.S.Q. Pub. 134 for details.

Geological Publications: Report—No. 134 (1898), Map No. 220 (1909). *See* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Herberton.

Smelting Works: *See under* Smelting Works in Queensland.

—— Garnet (East of), 11 miles S. of Coolgarra. *Min.Ref.* Garnet, *see* 3121; Magnetite, 6006.

—— —— and Coolgarra (in br. of Return Cr., between), 6 miles N.byE. of Mt. Garnet. *Min.Ref.* Copper Pyrites, *see* 2215A; Iron Pyrites, 5143A; Rhodochrosite, 7315.

—— Geaoro, Brit. New Guinea. *Min.Ref.* Limestone, *see* 705.

—— Gilmore, nr. Mt. Morgan. *Min.Ref.* Gold, *see* 4368; Iron Pyrites, 5423.

—— Godkin, 34 miles W. of Cloncurry. *Min.Ref.* Native Copper, *see* 1974; Cuprite, 2383.

—— Gordon, about 3 miles W. of Wycarbah. *Min.Ref.* Iron Pyrites, *see* 5409; Kaolin, 5700; Mispickel, 6801.

Mount Gordon Group, Oxide Cr., Cloncurry. Now included in the Mt. Oxide Gold and Mineral Field. *Includes* Mt. Gordon M.L., 1 N., 1 S., and 2 S. Mining Leases. *Min.Ref.* Hematite, *see* 4678; Malachite, 6092.

—— Gordon M.L. (597), Cloncurry. *Min.Ref.* Hematite, *see* 4678; Malachite, 6092.

—— Gravatt, 4½ miles S.E. of Brisbane. *Min.Ref.* Coal, *see* 1769.

—— Greentop, 15 miles W.S.W. of Bowen. *Min.Ref.* Copper carbonate, *see* 1919.

—— Gregory, N.W. of Clermont. *Lat.*, 22° 3′ S.; *Long.*, 146° 40′ E. *Min.Ref.* Gypsum, *see* 4635.

—— Grim, nr. Gladstone. *Min.Ref.* Calcite, *see* 535; Copper carbonate, 1956; Garnet, 3141; Gold, 4263; Limestone (fossiliferous) 734, (oolitic) 743; Magnetite, 6039; Marble, 594; Rock Crystal, 7197.

—— Halley Sub-artesian Bores. *See under* Artesian Bores. No. 118.

—— Harbord Tin Mine, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 800; Tourmaline, 7843.

Mount Hartley Tin Mines, Annan R. Tinfield. *Include* Black Prince Lode and Caledonia Tin Claims. *Min.Ref.* Cassiterite, *see* 801-804; Cobalt, 1834A; Felspar, 2629; Iron Pyrites, 5023A; Mispickel, 6668A, 6669; Orthoclase, 7037; Tourmaline, 7838; Wolfram, 7930, 7931.

—— Hastings, 5 miles S.byW. of Degilbo. *Min.Ref.* Actinolite, *see* 4856; Bismuth ore, 353; Calcite, 605; Garnet 3096, (andradite) 3158; Gold, 3598; Iron Pyrites, 4998; Magnetite, 5978.

Mount Havilah, 2¾ miles S.S.W. of Degilbo. *Lat.*, 25° 32′ S.; *Long.*, 151° 57′ E. *Min.Ref.* Bismuth, *see* 319; Calcite, 479A; Epidote, 2593A; Garnet, 3166; Gold, 3602; Ironstone, 5513; Malachite, 6199.

Geological Note: The rocks in the vicinity of the mines consist of granite and slate, between which, as contact deposits, there are irregular masses of ironstone containing gold, copper, bismuth, and other minerals. *See* G.S.Q. Pubs. Nos. 185, 207.

—— Hawick (formerly Robina) Copper Mine, 12 miles W.S.W. of Degilbo. *Min.Ref.* Azurite, *see* 181; Calcite, 482; Copper Pyrites, 2140; Iron Pyrites, 5013; Malachite, 6204.

Mount Hay, 1½ mile S. of Wycarbah Rail. Stn. (Central line). *Min.Ref.* Agate, *see* 1382; Calcite, 540; Carnelian, 1388; Chalcedony, 1362; Jasper, 5647; Kaolin, 5701; Limonite, 5911; Lithophyses, 1396; Porcellanite, 5662; Rock Crystal, 7198.

Mount Hector (Dooboon) Copper Mine, 12 miles W.N.W. of Many Peaks Rail. Stn. (Boyne Valley line), Monal Goldfield. *See* Pl. 34. About *Lat.* 23° 33′ S.; *Long.* 150° 12′ E. *Min.Ref.* Azurite, *see* 244A; Bornite, 434; Copper Pyrites, 2287B; Cuprite, 2473A; Gold, 4263A; Iron Pyrites, 5364A; Ironstone, 5617B; Malachite, 6356A; Tenorite, 7739A; Wollastonite, 8046A. *See also under* Govt. Mining Jour., Report No. 19.

Discovery: Copper first found here on 17th Jan., 1903.

Geological Note: The rocks of Mt. Hector comprise granite, felsite, and limestones. The lodes contain iron pyrites, copper pyrites, gold, quartz, and wollastonite, the latter forming the gangue of the metallic minerals.

Smelting Works: *See under* Smelting Works in Queensland.

—— Hector Goldfield ? An old field situated in the Monal Goldfield, in which is included the Mt. Hector Copper Mines.

—— Helen Bore. *See under* Artesian Bores. No. 161.

—— Henry Copper Deposits, N. of Cloncurry. *See* Pl. 23.

—— High, Normanby Goldfield. *Min.Ref.* Gold, *see* 4138.

—— Hillalong, W.byS. of Mackay. *Min.Ref.* Sal-Ammoniac, *see* 7338.

—— Hishon Lease (210), and 1 E lease (224), Kangaroo Hills Mineral Field. *Min.Ref.* Cerussite, *see* 1249, 1250; Chrysocolla, 1530; Galena, 2969, 2970; Garnet, 3128; Lievrite, 5738; Malachite, 6305; Manganese-dioxide, 6440.

Mount Hogan Goldfield, S.E.byS. of Charleston. *Min.Ref.* Gold, *see* 3792, 3793; Telluride Ore, 7700. *Note.*—300 men worked here many years ago on quartz reef mining.

Mineral Statistics: *Included in* Etheridge.

Mount Hope Group, Wills R., Cloncurry. *Includes* Mt. Hope, Regina, Blue Jacket, Little Beauty, and Ardath M. Leases, and Monarch Senior M. Claim. *Min.Ref.* Atacamite, *see* 132; Calcite, 493, 494; Chrysocolla, 1523; Copper (native), 1997; Copper Pyrites, 2204-2207; Covelline, 2375, 2376; Cuprite, 2451; Iron Pyrites, 5131, 5132; Limonite, 5865-5868; Malachite, 6265-6269; Redruthite, 7289-7291; Tile Ore, 2556, 2557.

—— —— (Homeward Bound) Reef, Cania Goldfield. *Min.Ref.* Gold, *see* 4356; Ironstone, 5626.

—— Hope (Mt. Blowhard), S.S.W. of Rockhampton. *Min.Ref.* Gold, *see* 4183; Ironstone, 5599A.

—— Howitt Run Bores. *See under* Artesian Bores. No. 350.

—— Hurford, Palmer Goldfield. *Min.Ref.* Cassiterite, *see* 835.

—— Hutton Stn., 6 miles N. of Roma. *Min.Ref.* Coal, *see* 1699.

Mount Jacob, Bompa Goldfield. *Min.Ref.* Copper Pyrites, *see* 2284; Galena, 3039; Gold, 4246-4248, 4251; Iron Pyrites, 5359, 5360; Zinc Blende, 8183.

Geological Note: The country rock of Mt. Jacob is granite, which contains a quartz reef carrying gold, iron pyrites, galena, zinc blende, and calcite. *See* G.S.Q. Pub. 58, p. 7, for details.

—— —— Mine (Mt. Fairbrother, Garden, and Stanley Reefs), Bompa Goldfield. *Min.Ref.* Copper Pyrites, *see* 2284; Galena, 3039; Gold, 4248, 4251; Iron Pyrites, 5359, 5360; Zinc Blende, 8183.

—— Jardine, 12 miles N. of Einasleigh. *Min.Ref.* Copper Ore, *see* 2033B; Galena, 2814A; Iron Pyrites, 5086B.

—— Jibbinbar, head of Pike's Cr., Stanthorpe. *Min.Ref.* Mispickel, *see* 6717.

—— Keelbottom, N.W.byN. of Charters Towers. *Min.Ref.* Chrysocolla, *see* 1533; Copper (native), 2004; Malachite, 6316.

—— Kelly, 16½ miles S.E. of Gympie. *Min.Ref.* Gold, *see* 4550.

Mount Langan, 14½ miles W.N.W. of Kannangur Rail. Stn. *Min.Ref.* Anglesite, *see* 61; Bismuth, 321, 322; Calcite, 524; Cassiterite, 1171; Cerussite, 1295; Clay, 1577; Copper Pyrites, 2277; Galena, 3031-3033; Gold, 4195-4198; Iron Pyrites, 5336, 5337; Lead, 5727; Limonite, 5898; Massicot, 6546-6548; Mispickel, 6776; Zinc Blende, 8176, 8176A. *See also* Q.G.M.J., vol. 4, p. 188 (1903).

Mount Larcombe, 22 miles W.N.W. from Gladstone (Rockhampton line). *See* Pl. 34.

Railway Base for Targinnie Gold Mines.

Geological Note: The rocks around the flank of the mountain consist of Devonian slate, limestone, and quartzite, the latter rock also forming the three peaks at the summit of the mountain. Granite forms an outcrop close to the base on the eastern side. *See* G.S.Q. Pub. No. 194 for map.

—— —— Scrub, Raglan Goldfield. *Min.Ref.* Gold (alluvial), *see* 3387.

—— Leslie (between Blenheim Stn. and), S.byW. of Bowen. *Min.Ref.* Coal, *see* 1645.

Mount Leswell Tin Mines, Annan R. Tinfield. *Include* Leases Nos. 22, 28, 51, and and 52. *Min.Ref.* Cassiterite, *see* 778, 781, 783, 785, 786, 800, 805, 806, 809; Iron Pyrites, 5024, 5025; Mispickel, 6670, 6671; Tourmaline, 7839-7845.

Geological Note: The country rock is biotite granite, with quartzite and greywacke in the vicinity. The tin ore occurs in lodes of quartz and tourmaline. *See* G.S.Q. Pub. 66 for details.

Mount Leviathan, (Black Mt.), Cloncurry. *Min.Ref.* Hematite, *see* 4671; Limestone, 740; Magnetite, 5966.

Geological Note: The rocks about the mountain are slates, sandstones, and limestones, with intrusive masses of diorite. The greater part of the mount itself is composed of hematite iron ore, other portions being made up of magnetite. Near the summit there are quartz reefs and ironstone lodes. *See* G.S.Q. Pub. No. 136 for details.

—— Lewis Tin Mines, 9 miles N.byW. of Mt. Molloy Tramway line. *See* Pl. 22. *Min.Ref.* Cassiterite, *see* 961.

Mount Leyshon, 16 miles S. of Charters Towers. *Lat.*, 20° 17′ S.; *Long.*, 146° 17′ E. *See maps*, Pls. 16, 17, 28. *Min.Ref.* Chalcanthite, *see* 1331; Copper carbonate, 1914; Copper Pyrites, 2221; Felspar, 2641; Gold (alluvial) 3257, 3258, (reef) 3979, 3980; Hematite, 4734; Iron Pyrites, 5220, 5221: Limonite, 5875; Magnetite, 6009; Manganese-dioxide, 6432; Pyrolusite, 7123; Rock Crystal, 7191; Talc, 7680.

Mineral Statistics: *Included in* Charters Towers.

Geological Note: The rocks comprise porphyry, greywacke, shale, and volcanic agglomerate, the latter forming the apex of the mountain. Quartz reefs occur in the porphyry, greywacke, and shale, and there is an ironstone formation in the agglomerate, all carrying gold. *See* G.S.Q. Pub. 18 for details and maps.

—— —— (¾-mile E. of), S. of Charters Towers. *Min.Ref.* Cerussite, *see* 1226b; Galena, 2921b; Gold, 3976b; Limonite, 5875a; Silver, 7480c.

—— —— (1½ mile S.E. of, and 2½ miles E. of). *See under* One-mile Gully and Chinaman's Gully respectively.

—— Lidster Group, Corella R., Cloncurry. *Includes* Mt. Lidster, Hidden Treasure, Faded Rose, and Roseleaf M. Leases. *Min.Ref.* Copper Ore, *see* 2016a.

Mount Lion (between Warren and), 6 miles N.N.W. of Stanwell. *Min.Ref.* Limestone (oolitic), *see* 745. *Also under* Supplementary Report, No. 94, for further reference.

Geological Note: Mt. Lion consists of masses of felsite, closely in association with sandstones, limestone, shales, and conglomerates of Gympie Formation (Permo-Carboniferous). *See* G.S.Q. Pub. 149 for notes and map.

Mount Lindsay, 32 miles S.S.W. of Beaudesert. *Min.Ref.* Copper Pyrites, *see* No. 2280a.

Note: Coal Measures and interbedded basalts and trachytes occur around the base of the mountain, the peak itself being made up of trachyte.

—— Little, nr. Bowen. *Min.Ref.* Marble, *see* 585a.

—— Lloyd Group, Cameron R., Cloncurry. *Includes* Mt. Lloyd M. Leases Nos. 1 S, 2 S, 3 S, and 1 N. *Min.Ref.* Malachite, *see* 6075a.

Mount Lucy, 4 miles W. of Almaden Rail. Stn. (Chillagoe line). *Min.Ref.* Chert, *see* 1411; Epidote, 2594; Garnet, 3109; Hematite, 4715; Ironstone, 5529; Limestone, 638a; Magnetite, 5993; Wollastonite, 8042.

Geological Note: Mt. Lucy is a prominent hill of ironstone and garnet rock, and contains many thousands of tons of available iron ore. The base of the mount is granite, on which the garnet rock rests in irregular masses. Portions of the garnet outcrops have been weathered to magnetite and hematite. *See* G.S.Q. Pub. 196 for details.

—— Luxton (E. of) (Luxton's Mine), 3 miles N.E. of Ord Rail. Stn. (Chillagoe-Mt. Garnet line). *Min.Ref.* Galena, *see* 2788; Gold, 3766; Hornblende, 4829; Iron Pyrites, 5072.

—— —— (reef near (*ante*). *Min.Ref.* Anglesite, *see* 36; Galena, 2789; Iron Pyrites, 5073; Limonite, 5842.

—— Macedon Range, 75 miles S.W.byW. of Bowen. *Min.Ref.* Agate, *see* 1377; Chalcedony, 1346; Opal (common), 6977.

—— Mackenzie, W. side of Chine Bluff, N.W. of Rockhampton. *Min.Ref.* Copper, *see* 1854.

—— Madden, Oakey Cr., Palmer Goldfield. *Min.Ref.* Gold, *see* 3689; Ironstone, 5519; Mispickel, 6675.

—— Mahen Sub-artesian Bore. *See under* Artesian Bores. No. 98.

—— Margaret Run. *Includes* Laman's and Potts' Opal Mines, *which see.* *Min.Ref.* Opal (precious), *see* 6948c, 6948d.

—— —— Sub-artesian Bore. *See under* Artesian Bores. No. 23.

—— Marley, N.E.byE. of Stanthorpe. *Min.Ref.* Bismuth (native), *see* 342; Bismuthinite, 371; Bismutite, 402; Cassiterite, 993, 994; Wolfram, 7987.

—— Mawe, 16 miles S. of Charters Towers. *Min.Ref.* Gold, *see* 3981; Iron Pyrites, 5222.

—— McCabe Group of Copper Mines, Martin's Cr., Cloncurry. *Includes* Mt. McCabe, McCabe's Hill, and Vulcan M. Leases. *Min.Ref.* Copper Ore, *see* 2019a.

Mount McConnell (nr.), Sellheim Mineral Field. *Min.Ref.* Gold (alluvial), *see* 3294.

—— McGann Range, Hodgkinson Goldfield. *Min.Ref.* Chalcedony, *see* 1341; Jasper, 5639.

—— McGregor, 2½ miles N.N.E. of Mirani Rail. Stn. (Mackay line). *Min.Ref.* Agate, *see* 1380; Calcite, 508; Chalcedony, 1350; Hyacinth, 8235; Ironsand, 5478; Laumonite, 5721; Limestone, 657; Limonite, 5886; Magnetite, 6024; Zircon, 8235.

Mount Mee, Woodford. *Min.Ref.* Copper Oxide, *see* 2050.

Geological Note: The mountain is made up of basalt, schist, and slates, the basalt forming the top, the two latter the base. Outcrops of the schists occur to the north and east, and trachytic lavas to the south-east.

—— Meerschaum, 14 miles E.S.E. of Beaudesert. *Min.Ref.* Tripolite, *see* 7031.

—— Melville, nr. Chowey Cr., W. of Maryborough. *Min.Ref.* Gold, *see* 3570; Ironstone, 5511; Manganese-dioxide, 6396.

—— Merlin Stn., S.byW. of Cloncurry. *Min.Ref.* Malachite, *see* 6275; Tile Ore, 2561.

—— Metallic Group of Copper Mines, Cloncurry. *Includes* Mt. Metallic R.C., Queenslander, and Dreadnought M. Leases. *Min.Ref.* Calcite, *see* 469; Chalcedony, 1338; Copper (native), 1988; Copper Pyrites, 2115, 2116; Cuprite, 2416; Iron Pyrites, 4969, 4970; Jasper, 5635, 5636; Limonite, 5821, 5822; Malachite, 6183, 6184; Redruthite, 7267, 7268; Tenorite, 7712; Tile Ore, 2538.

—— —— R.C. (310), Cloncurry. *Min.Ref.* Copper (native), *see* 1988; Copper Pyrites, 2115; Cuprite, 2416; Iron Pyrites, 4970; Limonite, 5822; Malachite, 6183; Redruthite, 7267; Tenorite, 7712; Tile Ore, 2538.

Mount Millar Mine, 6 miles (by rail) W.S.W. of Gladstone. *See* Pl. 34. Manganese was discovered here in 1895. *Min.Ref.* Manganese-dioxide, *see* 6465; Psilomelane, 7100; Pyrolusite, 7130.

Geological Note: The rocks comprise quartzites, slates, and jasperoids with associated deposits of manganese. The ore is made up principally of pyrolusite and psilomelane, and is very free from impurities, but very irregular in its occurrence. It has been formed, probably, by the replacement of slate. *See* G.S.Q. Pub. No. 194 for details.

Discovery: No official records exist concerning the discovery of manganese at Mt. Millar, but the mine was opened in 1895.

—— Millicent (663) and S. (664) M. Leases, Cloncurry. *Min.Ref.* Copper Pyrites, *see* 2110, 2111; Cuprite, 2412A; Limonite, 5815, 5816; Malachite, 6176, 6177; Redruthite, 7264, 7265; Tile Ore, 2533, 2534.

—— Minerva, 12 miles N. of Springsure. *Min.Ref.* Common Opal, *see* 6981.

—— Minde M.F. (2658), Cloncurry. *Min.Ref.* Cuprite, *see* 2409; Copper Pyrites, 2099A; Limonite, 5795; Malachite, 6156.

—— Misery, 5 miles N.N.W. of Stanwell. *Min.Ref.* Travertine, *see* 750.

Geological Note: The mountain consists of an inlier of felsite, around which there are shales and limestones of Gympie Formation (Permo-Carboniferous). *See* G.S.Q. Pub. 149 for details and map.

Mount Molloy Copper Mine, 20 miles (by rail) N.N.W. of Biboohra Rail. Stn. (Cairns line). *See* Pl. 22. *Min.Ref.* Azurite, *see* 187; Copper Pyrites, 2143; Iron Pyrites, 5036; Malachite, 6215; Redruthite, 7278. *See also under* Govt. Ming. Jour., Reports 27, 58.

Mineral Statistics: *Included in* Herberton.

Smelting Works: *See under* Smelting Works in Queensland.

—— Mona, nr. Mt. Cotton. Thorn's Sel. *Min.Ref.* Coal, *see* 1774A.

Mount Morgan, 24 miles (by rail) S.S.W. of Rockhampton (Central Rail. line). Railway Base for Mt. Morgan Goldfield and Moonmera Copper Mines.

Technical College: For mining subjects taught here, *see under* "Technical Colleges."

General Information: Consult *Pugh's Almanac; Queensland Post Office Directory; Post and Telegraph Guide.* Official Monthly News, *Queensland Government Mining Journal* (Brisbane).

Local Newspapers: *Mt. Morgan Argus*; *Mt. Morgan Chronicle and Mining Gazette*

Mount Morgan Goldfield (*includes* Crocodile Cr.)—

SITUATION: *See maps*, Pls. 2, 3, 35. The goldfield extends from 6 miles S of, to about 43 miles S.S.W. of Rockhampton. *Cos.* Livingstone and Raglan; *Dist.* Port Curtis. Centre about *Lat.* 23° 35′ S.; *Long.* 150° 25′ E.

DISCOVERIES: Gold was discovered in Crocodile Creek in 1865, but it was only in June, 1866, that payable deposits were found. The Hector Reef, on this creek, was opened in 1866, being the first reef worked in Queensland.

POPULATION: 12,195 (Census 1911).

PROCLAMATION OF FIELD: First (and only one) gazetted, 18th September, 1900, as follows:—Commencing at the north-east corner of portion 277, parish of Bouldercombe, and bounded thence by the road dividing portions 727, 730, 702 from portions 772, 918, and 936 north-west; thence by the road dividing portions 306, 65, and 50 from portions 756, 790, and 711; thence by the road dividing portions 497 north-east to the north boundary of same, by the north boundaries of portions 497, 54, 707, and 705 easterly, by the north-east boundaries of portions 704, 1040, 768, 931, 717, 775, 765, 1571, and 1856 south-east, by the east and south boundaries of portion 1575 south and west, by the west boundary of same north to Midge Creek, by that creek upwards southerly to the south-east corner of portion 779, by the south and west boundaries of that portion west and north, by the south boundaries of portions 767, 923, and 1009 west to portion 772, by part of the east, the south boundary of that portion south and west, and a line south-west to the point of commencement,—exclusive of all alienated lands.

AREA: 237,600 acres = 371¼ sq. miles.

LEASES: Goldmining leases and application in force, 12; area, 301 acres. Mineral leases and applications, 6; area, 262 acres. Miners' homesteads, 2,147; area, 14,172 acres (1910).

PRINCIPAL MINING CENTRES: Mt. Morgan, Moonmera, Mt. Usher, Mt. Victoria, Clanricarde, Struck Oil, Dee River, Gavial Creek, etc., *which see.*

MINERAL STATISTICS: Gold, *see tables and diagram*, Pls. 36, 46, 46A, 47. Copper, *see tables*, Pls. 39, 45, 46, 46A.

STATISTICAL NOTE: *See under* Rockhampton.

MINERAL REFERENCES: Gold (nugget) 3446, 3448, (reef) 4337, 4338, 4359-4384, (Calaverite) 446; Silver, 7532; Copper (Copper carbonate) 1962, (Copper Pyrites) 2308-2317; Bismuth (Tetradymite), 7748, 7749; Antimony (Stibnite), 7651; Manganese (Pyrolusite), 7131; Zinc Blende, 8206, 8207; Iron (Göthite) 4569, (Hematite) 4800A, (Iron Pyrites) 5406, 5416-5437, (Ironstone) 5621, 5630, 5631, (Limonite) 5920-5922, (Magnetite) 6055-6060, (Mispickel) 6805; Fire Clay, 2651. Other Minerals—Apophyllite, 85; Calcite, 548,549; Clay, 1583; Floatstone, 7011; Kaolin, 5704, 5705; (Satin Spar) 4637; Schorl, 7876; Selenite, 4647; Siliceous Sinter, 7200; Tourmaline, 7872; Websterite, 7924.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 17 (1884), 57 (1888), 83 (1892), 132 (1898), 161 (1901). *See under* Geol. Sur. Pub. List for title; *see also under* Govt. Ming. Jour., Report No. 11.

GEOLOGICAL NOTE: The rocks about the mine are altered sedimentary rocks, principally quartzites, which in the neighbourhood of the mount are in contact with granite. Between the granite and the quartzites there are limestones and garnet rock, while dolerite dykes traverse the quartzites in all directions. The quartzites throughout are pyrites-bearing, but it is only in a zone near the granite that they are copper-and-gold-bearing. Some of the peaks near Mt. Morgan are capped with sandstone belonging, probably, to the Stanwell (Trias-Jura) Coal Measures. *See* G.S.Q. Pub. No. 47, 83, 131, 161, for details.

WARDEN: Stationed at Mt. Morgan. INSPECTOR OF MINES: Stationed at Rockhampton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.M.G. Jour.; annually in A.R.D.M.

CRUSHING MILLS: Five batteries (35 stamps). Charges, 12s. 6d. to 15s. per ton.

SMELTING WORKS: *See under* Smelting Works in Queensland.

Mount Morgan Mine, Mt. Morgan (Crocodile Cr.) Goldfield. The rich deposits of gold were discovered in 1882, but gold was found in the vicinity in 1865.

MINERAL REFERENCES: Calaverite, *see* 446; Clay, 1583; Copper Pyrites, 2313-2313A; Floatstone, 7011; Gold, 4370; Göthite, 4569; Hematite, 4800A; Iron Pyrites, 5426-5428; Limonite, 5921; Magnetite, 6058; Mispickel, 6805; Pyrolusite, 7131; Satin Spar, 4637; Selenite, 4647; Silver, 7532; Siliceous Sinter, 7200; Tetradymite, 7749; Websterite, 7924. *See also under* Govt. GEOLOGICAL NOTE: The rocks comprise acidic volcanic tuff and breccia, with intrusive porphyry, in which there is a wide formation carrying gold-bearing veinlets of quartz. *See* G.S.Q. Pub. No. 25 for details.

Mount Orange Copper Mines, 75 miles S.W. of Mackay. *Lat.*, 22° 0′ S.; *Long.*, 148° 35′ E. Discovered about 1871. *Min.Ref.* Azurite, *see* 239; Copper Pyrites, 2272; Hematite, 4771; Malachite, 6339s; Tenorite, 7377; Tetrahedrite, 7777.

GEOLOGICAL NOTE: The rocks of Mt. Orange are highly inclined slates and schists of undetermined age. They form an outlier older than the Bowen River Formations (Permo-Carboniferous) of the adjacent country. *See* G.S.Q. Pub. 200 for details.

SMELTING WORKS: *See under* Smelting Works in Queensland.

—— Ormonde, 6 miles E. of Irvinebank. *Min.Ref.* Cassiterite, *see* 1135

Mount Oxide Gold and Mineral Field—

Situation: *See maps,* Pls. About 109 miles N.W. of Cloncurry. In the Counties of Kamileroi, Tewinga, and Undilla; District of Burke. *Includes* Mt. Oxide and Mt. Gordon Groups of Copper Mines.

Proclamation of Field: First and only one gazetted, Nov. 14th, 1912. Now superseded by Proclamation of 9th January, 1913, by which the area is included in the Cloncurry Gold and Mineral Field, *which see.*

Area: About 440 square miles.

Mineral References: Atacamite, see 127; Copper, 1839; Hematite, 4678, 4695; Ironstone, 5488; Malachite, 6092, 6185; Tile Ore, 2539.

—— —— M.L. (282), Mt. Oxide Group, Cloncurry. *Min.Ref.* Atacamite, see 127; Malachite, 6185; Tile Ore, 2539.

Mount Perry (Bundaberg and Mt. Perry line), 67 miles (by rail) S.W.byW. of Bundaberg. *Lat.,* 25° 10′ S.; *Long.,* 151° 38′ E. *See maps,* Pls. 4, 5.

Railway Base for Reid's Creek, Gaeta, and Boolboonda Gold and Mineral Fields; Mt. Perry, Canterbury, Normanby, Mungai, Potosi, Wolca, Cambria, and New Moonta Copper Mines; Allendale Silver Mine, Eidsvold Goldfield, and the Rawbelle Copper Mine.

Discoveries: Copper found in 1869 by H. Dingle on Yenda Station. Mercury (as Cinnabar) found in 1872 on cap of Mt. Perry Copper Lode by Captain Osborne.

Geological Note: *See under* Tenningering Gold and Mineral Field.

Geological Publications: Report—No. 21 (1885). *See under* Geol. Surv. Pub. List for title; *see also under* Govt. Ming Jour., Report—No. 24.

—— Pullen, Brit. New Guinea. *Min.Ref.* Limestone, see 706.

Mount Rainbow Goldfield—

Situation: *See maps,* Pls. 2, 3, 34. The field is about 42 miles S.W. of Gladstone. *Co.* Raglan; *Dist.* Port Curtis. Centre about *Lat.* 24° 15′ S.; *Long.* 150° 30′ E.

Proclamation of Field: First gazetted, 2nd July, 1896; last alteration 6th November, 1908, as follows:—Commencing on Mount Buckland, on the Calliope Range, and bounded thence by that range easterly and northerly to Rocky Point Mount; thence by that range south-easterly to the south-west corner of portion 1v, Maxwelton, by the south boundary of that portion east about 215 chains; thence by a line bearing south about 2½ miles; thence by a line bearing west 5 miles; thence by a line bearing north 210 chains; thence westerly 183 chains and north to the point of commencement.

Area: 8,960 acres = 14 sq. miles.

Mineral Statistics: Gold, *included in* "Other Goldfields" in *stat. tables* and *diagrams,* Pls. 36, 46, 46A, 47.

Mineral References: Gold (alluvial), *see* 3400, 3401; Jasper, 5667.

Geological Note: The rocks in and around Mt. Rainbow consist of quartzite, altered conglomerate, schist, granite, and basalt. The altered sedimentary rocks belong to the Gympie Formation, and are intruded by granite. The basalt covers both granite and sedimentary rocks, and also gold-bearing alluvial deposits which have formed in old water-worn channels in the granite. Small reefs occur in the granite and adjoining rocks, some of which have been proved to be payable.

Geological Publications: Report—No. 126 (1897). *See* Geol. Surv. Pub. List for Title.

Warden: Stationed at Gladstone. Inspector of Mines: Stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

GEOLOGICAL NOTE: Granite prevails at Mt. Samford in contact with metamorphosed sedimentary strata, and the reefs there contain traces of gold, copper, lead, and bismuth. *See* G.S.Q. Pub. 159 for details.

—— Scott, nr. Moonmera Rail. Stn. *Min.Ref.* Gold (alluvial), *see* 3405.

Mount Shamrock Goldfield—

SITUATION: *See maps,* Pls. 4, 5. The field is about 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. Centre about *Lat.* 25° 25′ S.; *Long.* 152° E.

DISCOVERY: Gold was found at Mt. Shamrock about the month of June, 1886.

AREA: 4,500 acres = $7\frac{1}{32}$ sq. miles.

PROCLAMATION OF FIELD: First gazetted, 22nd February, 1905; last alteration, 18th May, 1905, as follows:—Commencing at the south corner of the Paradise Goldfield, proclaimed in *Government Gazette,* 1890, vol. 3, p. 1087; and bounded thence on the north-west by that goldfield bearing north-east for about 3 miles and 5 chains; on the east by a line passing along the west boundaries of designed portions 50, 51, a timber reserve, and 60, southerly about 3 miles and 34 chains to Chowey Creek; thence by a line passing along the west boundary of designed portion 227 and a camping reserve south to the north side of the Degilbo-Gayndah road; by the north-west side of that road south-west to the east corner of portion 186v, by the north-east boundaries of portions 186v, 1v, and 2v, north-west about 2 miles to the right bank of Chowey Creek; thence by Chowey Creek downwards to the south corner of a reserve for mining situated on the east corner of portion 37v, by the south-west and north-west boundaries of that reserve north-west 16 chains and north-east 18 chains to the north-east boundary of portion 37v; and thence by that boundary bearing north-west about 62 chains to the point of commencement.

PRINCIPAL MINING CENTRES: Mt. Shamrock Gold Mine, Allendale Silver Mines, *which see.*

MINERAL STATISTICS: Gold, *included in* Other Goldfields, in *stat. tables,* Pls. 36, 46, 46A.

MINERAL REFERENCES: Gold, *see* 3603-3606, (Telluride) 7698; Copper (Copper Pyrites) 2136, (Malachite) 6202; Bismuth (Bismite) 312, (native) 328, (Bismuthinite) 362, 363; (Joseïte) 5668; Molybdenite, 6821; Zinc Blende, 8069; Iron (Hematite) 4699, (Iron Pyrites) 5002, (Limonite) 5830, (Mispickel) 6660. Other Minerals—Ankerite, 64; Calcite, 480; Dolomite, 2586.

GEOLOGICAL NOTE: The rocks of Mt. Shamrock comprise mudstones and quartzites, a fine-grained diorite, an intrusive acid volcanic dyke, and a coarse breccia. The diorite has intruded the mudstones, etc., the dyke has disturbed the mudstones and the diorite, while the breccia is an agglomerate of all three. All of these rocks contain fine veins of rich

Mount Shamrock Goldfield—*continued:*
bismuth-gold-bearing ore without quartz. The veins in the acidic dyke are richest, those in the diorite next in value, and those in the mudstone and breccia poorest.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 25 (1886), 60 (1890), 168 (1901), *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour., Report No. 119.

WARDEN: Stationed at Maryborough. INSPECTOR OF MINES: Stationed at Rockhampton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

—— —— M.C. (184), Cloncurry. *Min.Ref.* Calcite, *see* 459B; Copper Pyrites, 2090B; Iron Pyrites, 4926B; Tourmaline, 7814A.

—— Simpson, Stanhills Tinfield. *Min.Ref.* Cassiterite, *see* 761B.

—— Smyth, S.E. of Gympie. *Min.Ref.* Gold, *see* 4551.

—— Spec, Kangaroo Hills Mineral Field. *Min.Ref.* Cassiterite, *see* 1157.

Mount Spencer, Gogango Ranges, 4 miles S. of Gogango Rail. Stn. (Central line).

GEOLOGICAL NOTE: The rocks are slates and intrusive dykes, the slates having a general north and south trend. Large reefs can be traced along the surface for miles. *See* G.S.Q. Pub. No. 155 for notes.

Mount Spencer Gold and Mineral Field—

SITUATION: *See maps,* Pls. 14, 15. The Field is situated about 6 miles S.W. of Eton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. Centre—about *Lat.* 21° 20′ S., *Long.* 149° 50′ E.

PROCLAMATION OF FIELD: First gazetted, 10th June, 1890; last alteration, 7th March, 1902, as follows:—Commencing on the right bank of the Pioneer River at the north-west corner of Bong Bong Run, (Mount Spencer Consolidated), and bounded thence on the north by a line bearing east to the north-west corner of portion 566; thence by that portion bearing south and east to the north-west corner of portion 1002; thence by that portion bearing south-east and north to portion 566; thence by that portion bearing east to its south-east corner; thence by a line bearing south about five miles to Black Waterhole Creek; by that creek upwards to the west boundary of a reserve for timber proclaimed in *Government Gazette,* 1886, vol. 2, p. 1274, by the west and north boundaries of that reserve north and east to Black Waterhole Creek, by that creek northerly to portion 1602, by part of the south boundary of that portion, by the west boundary and a line in continuation northerly about a mile to the range, by that range north-west to the south-east corner of portion 1562, by the south boundary of that portion and a line crossing Cut Creek to the south-east corner of portion 990, by the south, the west, and part of the north boundaries of that portion; thence by the telegraph line northerly to a point west from the south-west corner of portion 1017; thence by a line west about six miles to the Pioneer River; and thence by that river downwards northerly to the point of commencement.

AREA: 16,640 acres (26 sq. miles).

PRINCIPAL MINING CENTRES: Pine Vale Creek Copper Mines; Mine Creek Gold Workings, *which see.*

MINERAL STATISTICS: Silver, Copper, and Lead. *See under* Mackay *in stat. tables,* Pls. 37, 38, 39, 46, 46A. (No gold returns.)

MINERAL REFERENCES: Gold (alluvial) 3275, 3365, (reef) 4118, 4141; Silver, 7498, 7499; Lead (Galena), 3007-3010; Copper (Azurite) 230A, 231, (Bornite) 429A, (Copper) 1848, (Copper Pyrites) 2255, 2255A, 2271, (Malachite) 6319, 6326, 6327, (Tenorite) 7734, (Tetrahedrite) 7775; Zinc Blende, 8167A; Bismuth (Bismutite), 409; Iron (Hematite) 4758, 4759A, (Ironstone) 5588, (Magnetite) 6023, (Mispickel) 6759; Coal, 1702.

GEOLOGICAL NOTE: The mount consists of a mass of granite surrounded by the sedimentary rocks of the Lower Bowen Formation (Permo-Carboniferous). *See* G.S.Q. Pub. No. 92 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 53, 164, 181, and 229. *See* Geol. Surv. Pub. List for titles.

WARDEN: Stationed at Mackay. INSPECTOR OF MINES: Stationed at Rockhampton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

—— —— Run, 10 miles S. of Eton Rail. Stn. *Min.Ref.* Coal, *see* 1643; Copper Pyrites, 2271A; Gold, 4188A; Iron Pyrites, 5329A; Silver, 7505A.

Mount Spurgeon Tin Mines, 22 miles N.W. of Port Douglas. *Lat.*, 16° 35′ S.; *Long.*, 145° 10′ E. Tin discovered here in 1886. *Statistics included in* Port Douglas returns. *Min.Ref.* Cassiterite, *see* 962.

—— St. Paul, Ravenswood Goldfield. *Min.Ref.* Ironstone, *see* 5556.

—— Stanley, 17 miles N. of Benarkin Rail. Stn. *Min.Ref.* Ironstone, *see* 5607; Kaolin, 5696.

—— Start, 23½ miles S.S.W. of Cloncurry. Smelting Works established here treat ore for various groups of copper mines.

—— Station Gully, trib. of Quart Pot Cr., Stanthorpe. *Min.Ref.* Cassiterite, *see* 995, 1007; Wolfram, 7991.

Mount Steadman, 4½ miles W. of Biggenden. Proclaimed a Prov. Goldfield in 1893. *Min.Ref.* Native Bismuth, *see* 327; Bismuthinite, 364; Gold, 3606A, 3607; Molybdenite, 6822. 6823; Molybdite, 6869; Telluride of Gold, 7699.

—— Sturgeon Run, 44 miles N.E. of Hughenden. *Min.Ref.* Coal, *see* 1598A.

—— Sturt, 2 miles N.N.W. of Yangan Rail. Stn. (Killarney line). *Min.Ref.* Gold, *see* 3874; Limonite, 5855; Turgite, 7897.

Mount Success. *See maps*, Pls. 16, 17. 15 miles W.N.W. of Ravenswood Junction. Gold discovered and rush took place in 1896.

Mineral References: Gold (alluvial), *see* 3261, (reef) 4003-4006; Iron Pyrites, 5233, 5234; Limonite, 5877; Silver, 7482, 7483; Zinc Blende, 8136, 8137.

Geological Note: The country rocks are granite and felsite, along the line of contact of which there are small quartz reefs containing zinc blende, iron pyrites, calcite, and gold. *See* G.S.Q. Pub. 133 for details

—— —— Reef, Mt. Success. *Min.Ref.* Gold, *see* 4006; Iron Pyrites, 5234; Zinc Blende, 8137.

—— Surprise, S.W. of Almaden. *Min.Ref.* Kaolin, *see* 5680; Penninite, 7061; Rutile, 7330.

—— Sylvan, 12 miles S. of Gatton. *Min.Ref.* Chalcedony, *see* 1353; Opal (resin), 6990.

—— Sylvia M.L. (422), Cloncurry. *Min.Ref.* Hematite, *see* 4685; Limonite, 5769.

—— Tamborine, 10 miles S.S.E. of Logan Village. *Min.Ref.* Olivine, *see* 6930; Opal (resin), 6995; Pyrrhotite, 7161B.

Mount Taylor (Bennett's Sel., 411), 1 mile N. of Kingston Rail. Stn. *Min.Ref.* Cassiterite, *see* 1173; Gold, 4218.

Geological Note: The rocks comprise clay slates and schists probably belonging to the Devonian System, in which there are large low-grade gold-bearing quartz reefs and ironstone formations.

—— Terrible Lode, Black Snake Goldfield. *Min.Ref.* Copper carbonate, *see* 1965; Galena, 3071; Gold, 4391; Native Copper, 2014; Silver, 7537.

—— Thabor, 3 miles N.E. of Warwick. *Min.Ref.* Coal, *see* 1633B, 1633C. *See also* Q.G.M.J., vol. 11, p. 605 (1910).

—— Thekla Copper Mine, Kangaroo Hills Mineral Field. *Min.Ref.* Bornite, *see* 425; Copper carbonate, 1934; Copper Pyrites, 2247; Cuprite, 2463; Galena, 2972; Iron Pyrites, 5281; Ironstone, 5564; Tenorite, 7731; Zinc Blende, 8161.

Mount Toby, 4½ miles N. of Mirani Rail. Stn. *Min.Ref.* Strontiano-calcite, *see* 613; Coal, 1647.

Geological Note: The rocks of Mt. Toby consist of sandstones, shales, and thin seams of coal belonging to the Lower Bowen Series. *See* G.S.Q. Pubs. 164, 181 for details and map.

—— Toussaint Range, 45 miles S.W. of Bowen. *Min.Ref.* Agate, *see* 1378; Chalcedony, 1347; Opal (common), 6978.

—— Tyson, 12 miles N.N.W. of Pittsworth. *Min.Ref.* Fayalite, *see* 2622.

Mount Ubi, W. of Blackall Range. *Min.Ref.* Galena, *see* 3074; Gold (alluvial) 3411, (reef) 4417A, 4418; Iron Pyrites, 5451; Silver, 7541, 7542.

Geological Note: The country rocks consist of slate with diorite, syenite, and granite intrusions. Small gold-bearing quartz reefs occur on Chinaman's Creek in the igneous and sedimentary rocks, and at their junction alluvial deposits of gold have formed along the beds of the streams. *See* G.S.Q. Pub. No. 196 for details and map.

Geological Publications: Reports—No. 196 (1905). *See* Geol. Surv. Pub. List for Title.

Mount Usher, N.E. of Mt. Morgan. *Min.Ref.* Gold, *see* 4338, 4338A; Iron Pyrites, 5406, 5406A; Silver, 7531A; Telluride of Gold and Silver, 7702; Zinc Blende, 8209A. *Statistics included in* Rockhampton returns.

Geological Note: The rocks about the Mt. Usher Mine comprise quartzites and conglomerates (containing marine fossils) of Gympie Formation (Permo-Carboniferous), in contact with diorite, with granite also in the vicinity. A gold-bearing reef traverses the sedimentary rocks and diorite, and was extensively worked some years ago.

—— Venus Mine, Mt. Steadman. *Min.Ref.* Gold, *see* 3606A; Molybdenite, 6822; Molybdite, 6869; Telluride of Gold, 7699.

Mount Victoria, W.S.W. of Mt. Morgan. *Min.Ref.* Fire Clay, *see* 2651A; Gold (alluvial) 3406, (reef) 4372, 4373; Hematite, 4801.

Geological Note: The shales, conglomerates, etc., at the base of the mountain belong to the Gympie Formation (Permo-Carboniferous). The sandstones form a capping to the shales, etc., which, with associated alluvial gold deposits belong to the Walloon Series (Trias-Jura), and which are a portion of the Stanwell Coal Measures. *See* G.S.Q. Pub. 87, p. 11; 103, p. 28 (1894) for details.

—— ——, nr. Mt. Perry. *Min.Ref.* Tourmaline, *see*, 7820.

—— Walker, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 813 and 814.

—— ——, 11 miles N.W.byN. of Clermont. *Min.Ref.* Gold (alluvial), *see* 3356.

—— ——, 7 miles S. of Hughenden. *Min.Ref.* Hematite, *see* 4674.

—— Walli, Upper Mary River. *Min.Ref.* Manganese-dioxide, *see* 6489A.

Mount Warminster Copper-Lead Mine. 20 miles (by rail) N.E. of Rockhampton. About *Lat.* 23° 45′ S.; *Long.* 150° 36′ E. Copper was discovered here in 1870 by Hill at the same time that he and his party made the discovery of gold at Mt. Chalmers. *Min.Ref.* Barytes, *see* 280; Cerussite, 1299; Chalcotrichite, 2490; Cuprite, 2477; Iron Pyrites, 5404; Jasper, 5666; Malachite, 6356; Serpentine, 7394; Silver, 7531; Steatite, 7695; Tenorite, 7741; Zinc Blende, 8203. *See also under* Govt. Ming. Jour., Report No. 101.

Geological Note: The rocks are bedded serpentine and slate, which contain quartz lodes and irregular "formations." Copper occurs sparingly in the lodes and "formations" as copper pyrites, but it also occurs as black copper oxide (Tenorite), richly impregnating the beds of slate.

—— Webster, nr. Mt. Perry. *Min.Ref.* Gold, *see* 3588; Iron Pyrites, 4988; Malachite, 6193.

Mount Wheeler, 15 miles N.E. of Rockhampton. Gold discovered here about the middle of 1868. A nugget weighing 258 oz. 11 dwt., valued at £1,000, was found on July 14th, 1869. The following day another one was picked up weighing 178 oz. 14 dwt. Other nuggets found about the same time scaled respectively 26 oz., 30 oz., 26 oz., 36 oz. (*Ref.* A.R.D.M., pp. 47 (1887), and "Early Hist. of Rockhampton," by J. T. S. Bird (1904). *Min.Ref.* Asbestos, *see* 112; Chrome Ochre, 1472; Chromite, 1486; Gold (alluvial) 3447, (reef) 4339; Magnesite, 5959; Serpentine, 7395.

—— Wheeler Group, Cloncurry. *Includes* Mt. Wheeler, Weatherley, King Fisher, and Mackinlay M. Leases, Shamrock M. Claim, and May Graham P. Area.

Mineral References: Atacamite, *see* 126A; Calcite, 459A, 459B; Chlorite, 1424A; Chrysocolla, 1505A; Copper (native), 1980A, 1980B; Copper Pyrites, 2090A, 2090B; Cuprite, 2407A; Dioptase, 2582A; Göthite, 4562A; Gold, 3469A; Iron Pyrites, 4926A, 4926B; Ironstone, 5490A; Limonite, 5780A; Malachite, 6140A; Molybdenite, 6814A; Redruthite, 7241A; Selenite, 4638A; Tourmaline, 7814A; Turgite, 7881A.

—— —— M.L. (351, etc.), Cloncurry. *Min.Ref.* Atacamite, *see* 126A; Calcite, 459A; Chlorite, 1424A; Chrysocolla, 1505A; Copper (native), 1980A; Copper Pyrites, 2090A1; Dioptase, 2582A; Göthite, 4562A; Gold, 3469A; Iron Pyrites, 4926A; Ironstone, 5490A; Limonite, 5780A; Malachite, 6140A; Selenite, 4638A; Turgite, 7881A.

—— Widgee, 14 miles W. of Gympie. *Min.Ref.* Copper Pyrites, *see* 2331; Galena, 3092; Zinc Blende, 8216.

—— Wilson (Wilson s Peak ?), 20 miles S. of Boonah. *Min.Ref.* Calcite, *see* 571; Limonite, 5899.

Mount Windsor Tin Mines, N.W. of Port Douglas. Lode tin worked here prior to 1899. Operations, according to the Warden, were abandoned in that year. *Min.Ref.* Cassiterite, *see* 829; Garnet, 3098; Wolfram, 7934A.

—— Wiseman, 85 miles S.S.W. of Rockhampton. *Min.Ref.* Calcite, *see* 566.

Geological Note: The rocks consist of sandstones and shales of Upper Bowen Formation (Permo-Carboniferous). Coal is reported to occur in the vicinity. *See* G.S.Q. Pub. No. 155 for notes and maps.

—— Witty, S.W. of Brisbane. *Min.Ref.* Gold, *see* 4226; Mispickel, 6782.

—— Wright, Ravenswood Goldfield. *Min.Ref.* Gold, *see* 4043; Iron Pyrites, 5257.

Mount Wyatt Goldfield—

Situation: *See maps,* Pls. 14, 15. The field is about 90 miles S.S.E. of Ravenswood, and 90 miles S.W. of Bowen. *Co.,* Sellheim; *Dist.* Kennedy South. Centre—about *Lat.* 20° 50′ S.; *Long.* 147° 20′ E.

Discovery: Gold discovered about 1868.

Proclamation of Field: First (and only one) gazetted, 13th October, 1885, as follows:—Commencing at a point bearing north-east for seven miles 568 links from the top of Mount Wyatt, and bounded thence on the north by a line bearing west for ten miles; on the west by a line bearing south for ten miles; on the south by a line bearing east for ten miles, on the east by a line bearing north for ten miles to the point of commencement.

Area: 64,640 acres (101 sq. miles).

Mineral Statistics: *Included in* Ravenswood Returns.

Mineral References: Gold (alluvial), *see* 3291A, (reef) 4148; Lead (Galena), 3022A; Copper (Azurite) 233, (Copper Pyrites) 2264A, 2265, (Malachite) 6332; Zinc (Zinc Blende), 8168A; Manganese (Pyrolusite), 7125A; Wolfram, 8034A. Other Minerals—Gypsum, 4628.

Geological Note: The rocks on the field consist of grits and sandstones of "Star" Formation near slates and shales of "Gympie" Formation (all Permo-Carboniferous). *See* G.S.Q. Pub. 92, pp. 31, 95 for details.

Geological Publications: *Nil.*

Warden: Stationed at Bowen. Inspector of Mines: Stationed at Charters Towers.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

—— Yuckawow, S.W.byW. of Mackay. *Min.Ref.* Coal, *see* 1706.

—— Yule, Brit. New Guinea. *Min.Ref.* Felspar, *see* 2650; Magnetite, 6066; Olivine, 6935.

—— Zahel (12 miles from). *Min.Ref.* Hyalite, *see* 7019.

Muckadilla Bores. *See under* Artesian Bores. Nos. 38, 353. *Min.Ref., see* 6571A.

Mudloo Copper Mines, Marodian Goldfield. *See maps,* Pls. 4, 5. *See also* A.R.D.M., pp. 155, 156 (1904). 5 miles N.N.W. of Kilkivan Rail. Stn. *Includes* Mount Mudloo, Sunnyside, and White Rocks Leases, *which see.*

Mineral References: Azurite, *see* 254A; Malachite, 6382, 6382A; Redruthite, 7309; Tetrahedrite, 7782.

Geological Note: The country rocks are granite and slates, at the junction of which there is a ferruginous quartz lode and several small veins of quartz containing copper carbonate. *See* G.S.Q. Pub. No. 179 for details and maps.

Mueller Co. Burke Dist. *See map,* Pl. 20.

Muggleton Sub-artesian Bores. *See under* Artesian Bores. No. 100.

Mulcahy's Opal Mine, Kyabra Opal Field. *Min.Ref.* Precious Opal, *see* 6948.

Muldiva—

Situation: *See maps*, Pls. 8, 9, 22. The Muldiva Silver-Lead Mines are situated about 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Lat.*, 17° 25′ S.; *Long.*, 144° 38′ E.

Population: Included in Chillagoe returns, 1910.

Mineral Statistics: Silver and Lead. *Included with* Chillagoe for years 1909 and 1910, and *with* Herberton for previous years. *See stat. tables*, Pls. 37, 38, 46, 46A.

Mineral References: Silver (Argentite) 97, (Cerargyrite) 1183, (Proustite) 7078, (Pyrargyrite) 7113, (Silver), 7463, (Native), 7552, (Stephanite), 7602; Lead (Anglesite) 29, (Cerussite) 1203-1205, (Galena) 2803, 2804, (Minium) 6589, (Pyromorphite) 7143; Copper (Azurite) 198, 198A, (Atacamite) 131; Cerussite, 1203-1205, (Chrysocolla) 1518, (Copper carbonate) 1896, (Cuprite) 2436, (Dioptase) 2583, (Malachite) 6233-6234A, (Olivenite) 6918, (Tetrahedrite) 7764; Zinc (Smithsonite) 7568, (Zinc Blende) 8086, 8087; Limestone, 639. Other Minerals—Actinolite, 4861; Calcite, 484; Harmotome, 4665; Kaolin, 5679; Natrolite, 6896; Tremolite, 4874.

Geological Note: The country rocks at Muldiva are granite, limestones, shales, quartzites, and conglomerates. At the contact of the granite with the other rocks there is a massive lode formation carrying silver-lead-copper ore. *See* G.S.Q. Pub. 69 for details.

Geological Publications: Reports—Nos. 119 (1897), 134 (1898). Map No. 220 (1900). *See under* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Chillagoe.

Mulga Downs Bores. *See under* Artesian Bores. No. 354.

Mulgar Bores. *See under* Artesian Bores. No. 416.

Mulgrave Goldfield—

Situation: *See maps*, Pls. 8, 9, 22. The goldfield is about 9 miles S.S.W. of Nelson Rail. Stn. (Cairns-Mulgrave Tramway), and 23 miles (by rail and road) S. of Cairns, and about 25 miles N.W.byW. of Geraldton. *Co.* Nares; *Dist.* Cook. Centre—about *Lat.* 17° 33′ S., *Long.* 145° 48′ E. (First return of gold was in 1879.)

Population: Less than 20.

Proclamation of Field: First (and only one) gazetted, 1st July, 1880, as follows:—Commencing on the eastern bank of the Mulgrave River at a point known as the Fisheries Crossing, thence due east to the western watershed of the Russell River; thence by that watershed southerly to the northern watershed of the Johnstone River; thence by that watershed westerly to the eastern watershed of the Barron River; thence by that watershed northerly to a point due west of the point of commencement, and thence to that point, including about 400 square miles.

Area: 256,000 acres (400 sq. miles).

Leases: Gold-mining Leases and Applications in force, nil; Miners' Homestead Leases, 4; area, 210 acres (1912).

Mineral Statistics: *Included in* "Other Goldfields" in *stat. tables and diagrams*, Pls. 36, 46, 46A, 47.

Mineral References: *See* Gold (alluvial) 3235, (reef) 3777, 3778; Iron Pyrites, 5081.

Geological Note: The rocks of the Mulgrave Valley are mainly greywacke, slate, and quartzite, but between the Lower and Upper Camps there are flows of basalt.

Geological Publications: Report—No. 48 (1888). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Cairns; Inspector of Mines: Stationed at Herberton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Population: Included in Chillagoe Returns, 1910.

Mineral Statistics: Silver, Lead, Copper. *See under* Herberton, in *stat. tables*, Pls. 37, 38, 39, 46, 46A.

Mineral References: Silver, 7464-7466; Lead (Cerussite) 1206-1211, (Galena) 2805-2809, (Minium) 6590, 6591; **Copper** (Azurite) 195, 197, 199-201, (Chrysocolla) 1519, (Copper Native) 1992, (Copper Pyrites) 2173-2176, (Cuprite) 2437-2441, (Dioptase) 2584, (Malachite) 6235-6243, (Redruthite) 7280, (Tetrahedrite) 7765-7767; Wolfram, 7971A; Manganese (Dioxide) 6410, 6411, (Pyrolusite) 7118-7119; Iron (Hematite) 4716-4719, (Iron Pyrites) 5077, (Ironstone) 5530, 5531, (Limonite) 5843-5845, (Mispickel) 6703A, (Pyrrhotite) 7157, (Scorodite) 7367A, (Siderite) 7407; Other Minerals—Barytes, 268; Calcite, 485; Clay, 1569; Fluorspar, 2664, 2665; Garnet, 3110-3112; Lithomarge, 5709; Selenite, 4639.

Geological Note: Silurian limestones form conspicuous lenticular outcrops in the vicinity, and are associated with mica-schist, gneiss, and granite. A variety of minerals have been formed where the limestone comes in contact with the granite, including garnet and wollastonite. Copper deposits occur in the limestone and in the garnet, and also in associated hematite and magnetite. *See* G.S.Q. Pubs. 134, 159 for details.

Geological Publications: Map No. 220 (1909). *See under* Geol. Surv. Pub. List for Title. *See also under* Govt. Mining Jour., Report—No. 12.

Warden: Stationed at Chillagoe; Inspector of Mines: Stationed at Herberton.

Mungar Junction, 48 miles (by rail) N. of Gympie. *Min.Ref.* Chalcedony, *see* 1365.

Mungin Cr., 9 miles N. of Maytown. *Min.Ref.* Gold, *see* 3691.

Mungamby Cr., trib. of Annan R. Rises near the Tableland, and flows W. to join the Annan R. near Helenvale, about 22 miles S. of Cooktown. *Min.Ref.* Cassiterite, *see* 810-812; Tourmaline, 7847; Wolfram, 7933.

Munjerie Bore. *See under* Artesian Bores. No. 167.

Munna Cr. Heads at Main Coast Range, W. of Maryborough, flows S.E. into Mary R., 5 miles N. of Miva Rail. Stn., on the Kilkivan line. Length, about 30 miles. *Min.Ref.* Azurite, *see* 260; Barytes, 285; Bornite, 436; Coal, 1817; Copper Pyrites, 2329; Cuprite, 2486; Garnet, 3147; Malachite, 6385; Pinite, 7067; Redruthite, 7310; Tile Ore, 2572; Wollastonite, 8049.

—— Copper Mines, Por. 167, Marodian, N. of Kilkivan. *Min.Ref.* Bornite, *see* 436; Garnet, 3147; Wollastonite, 8049.

GEOLOGICAL NOTE: The country rocks are limestones and slates in contact with granite. At the junction of the granite with the sedimentary rocks there are deposits of wollastonite, garnet, etc., containing bornite. *See* G.S.Q. Pub. 179 for details. *See also under* Miva for notes on coal deposits.

Munro Cr., trib. of Munna Cr., Par. of Goomgan, S.W. of Tiaro. *Min.Ref.* Copper, *see* 1865.

Nanango Goldfield—

Situation: *See maps,* Pls. 4, 5. The field is 96 miles (by rail) S.S.W. of Theebine Rail. Stn. (North Coast line), 224 miles (by rail) W.N.W. of Brisbane, and 135 miles (by rail) S.S.W. of Maryborough. *Cos.* Fitzroy and Cavendish; *Districts,* Burnett and Moreton. Centre about *Lat.* 26° 39′ S.; *Long.* 152° 1′ E.

Population: 504 (1912). Only a few are engaged in mining.

Proclamation of Field: First gazetted, 17th January, 1890; last alteration, 4th July, 1912, as follows:—Commencing on Sandy Creek at the south-east corner of a reserve for pound R 104, proclaimed in *Government Gazette,* 1878, volume 1, page 403, being the eastern termination of Dalby street, and bounded thence on the west by a line bearing north two miles; on the north by a line bearing east to the eastern boundary of portion 12, by that portion north-westerly to the south-eastern corner of portion 171v, by a line and the southern boundaries of portions 176v, 177v, and 180v to its south-east corner, by the eastern boundary of 180v northerly to the south-west corner of portion 261, by the south boundary of that portion and part of portion 147 about forty-three chains easterly; on the east by a line bearing south about six miles seventeen chains; on the south by a line bearing west to the north-east corner of portion 61v; again on the west by a line, the eastern boundaries of portions 64v, 65v, 68v, 70v, 71v, 261, 262, 263, the western side of George street northerly to the north side of Appin street, by that street easterly to the corner of a recreation and water reserve R 111, proclaimed in *Government Gazette,* 1900, volume 2, page 1622, by the western boundary of that reserve northerly to the north-west corner of same, by a line westerly to the western side of George street; thence by that street northerly to Sandy Creek; and by that creek north-westerly to the point of commencement.

Area: 15,360 acres (24 sq. miles).

Leases: Mineral Leases and Applications in force, 7; area, 167 acres. Miners' Homestead Leases and Application, No. 143; area, 1,024 acres (1912).

Mineral Statistics: *Included in* "Other Goldfields" in *stat. tables and diagrams,* Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 3624a-c, 4199, 4200; Bismuth (native), 325. Other Minerals, Agate, 1367; Bloodstone, 1383; Carnelian, 1384; Olivine, 6936; Tourmaline, 7823.

Geological Note: The rocks of this goldfield comprise granite, felspathic sandstone, grey shale, kaolin, and basalt. Gold-bearing quartz reefs traverse the felspathic sandstone, and sometimes gold is found in the sandstone itself. To the south there are several outcrops of granite, in which quartz reefs and porphyry dykes are exposed. The slates also contain reefs, but they have not proved to be gold-bearing. The basalt occupies the top of the ranges in the vicinity. *See* G.S.Q. Pub. 29 for details.

Geological Publications: Reports—Nos. 29 (1886), 169 (1901). *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour., Report No. 69.

Natural Gas—

Geological Note: A bore put down for water at Roma, on the Western Railway line, tapped an underground supply of inflammable gas. This gas has been derived, probably, from a regional disturbance of the Walloon Coal Measures which, below more recent strata, extend in this direction from the north. For information concerning the bores which have produced inflammable and other gases, *see* Q.G.M.J., vol. 11, p. 391 (1910), G.S.Q. Pub. 175, p. 4 (1902), and *under* Artesian Bores and Notes. Nos. 24 (1), 46 (2), 387, 406 (3), 439 (2). *See also note under* Oil.

6904. —— ——. In bore. Roma, 318 miles (by rail) W.byN. of Brisbane. *Co.* Waldegrave; *Dist.* **Maranoa.** *Analysis:* Carbon dioxide = 1·5 per cent.; Carbon monoxide = 5·8 per cent.; Benzine series = 5·0 per cent.; Olefine series = 1·5 per cent.; Paraffin series, including Ethane, 9·8 per cent., = 82·4 per cent.; Nitrogen and residual gas = 3·4 per cent.; Oxygen = nil; Hydrogen = nil. *Ref.* G.S.Q. Pub. 175, p. 4 (1902).

6905. —— ——. *Compo.*, undetermined. In bore in coal measures. *Loc.* nr. Rosewood Rail. Stn., 35 miles (by rail) W.S.W. of Brisbane. *Co.* Churchill; *Dist.* **Moreton.** *Ref.* B.D.

Natural Oil. *See note under* Oil, and Oil-bearing Shale.

Neardie. *See* Neerdie.

Nebine Co. Maranoa Dist. *See map*, Pl. 12.

Nebine-Dulla Bore. *See under* Artesian Bores. No. 165.

Nebo Goldfield (Mt. Britton)—

Situation: *See maps*, Pls. 10, 11, 14, 15. The goldfield is about 20 miles S.W. of Eton Rail. Stn., 43 miles (by rail and road) S.W.byS. of Mackay. *Cos.* Carlisle and Wodehouse; *Dists.* Kennedy South and Leichhardt. Nebo Centre—about *Lat.* 21° 26′ S.; *Long.* 148° 35′ E.

Discovery: The field was opened in 1881, when several nuggets were found in the alluvial deposits of Nuggety Gully and Oaky Creek.

Proclamation of Field: First gazetted, 25th April, 1881; Last alteration, 5th August, 1887, as follows:—Commencing at a point 21 miles east of the extreme northerly point of Lake Elphinstone, and bounded thence on the east by a line bearing north 20 miles; on the north by a line bearing west 10 miles; on the west by a line bearing south 20 miles; and on the south by a line bearing east 10 miles to the point of commencement;—exclusive of Agricultural Reserve No. 2, situated on Moonlight and Oakey Creeks.

Area: 128,640 acres = 201 sq. miles.

Mineral Statistics: *Included in* "Other Goldfields" in *stat. tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral References: **Gold,** *see* (alluvial) 3366, (nugget) 3442, 3443, (reef) 4185-4188; Lead (Cerussite) 1294, (Galena) 3025, (Minium) 6640; Copper (Atacamite) 136; Iron (Iron Pyrites) 5329, (Ironstone) 5602. Other Minerals—Calcite, 518-521; Chlorite, 1462; Common Opal, 6984; Pleonaste, 7590; Steatite, 7694a.

Geological Note: The rocks of the Nebo Goldfield include slates, sandstones, and diorite belonging to the Bowen River Formation (Permo-Carboniferous), the diorite being partly interbedded with, and partly intruding, the shales and sandstones. Reefs occur in the diorite and slate, and have proved very productive. Alluvial gold in large quantities has been obtained from the watercourses near the reefs.

Geological Publications: Reports—Nos. 39 (1887), 48 (1888). *See under* Geol. Surv. Pub. List for title. *See also* A.R.D.M., p. 175 (1909).

Warden: Stationed at Mackay. Inspector of Mines: Stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Nebo (Fort Cooper), 51 miles S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt.

Geological Note: The rocks in and about Nebo consist of basalt with underlying coal measures belonging to the Upper Bowen Formation (Permo-Carboniferous). Good coal seams outcrop about Walker and Bee Creeks, westerly from Nebo. *See* G.S.Q. Pubs. Nos. 39 and 200 for details.

—— Road Brickworks, nr. Mackay. *Min.Ref.* Clay, *see* 1573.

Needlewood Sub-artesian Bore. *See under* Artesian Bores. No. 421.

Neenah Park Sub-artesian Bore. *See under* Artesian Bores. No. 167.

Neerkol Creek Bore (Stanwell). *See* Quarry Creek *under* Coal Bores.

Neerdie Antimony Mines, 14 miles N.byE. of Gympie. Antimony discovered in 1872. *Min.Ref.* Cervantite, *see* 1312; Stibnite, 7660.

Geological Note: The rocks comprise shales of Gympie Formation, coal measures of Burrum Formation, and granite. Antimony occurs as Stibnite in lodes made up of broken shale and quartz veinlets, and has associated with it small quantities of gold and silver. *See* G.S.Q. Pub. 59 for details.

Neill's Paradise Mine, Paradise Goldfield. *Min.Ref.* Gold, *see* 3615; Ironstone, 5515.

Neilson Creek, nr. Mt. Jukes, W. of Mackay. *Min.Ref.* Ilmenite, *see* 4900; Magnetite, 6025.

Neila Ponds Run Bores. *See under* Artesian Bores. No. 360.

Nelia Bore. *See under* Artesian Bores. No. 407.

Nelly Mine, Chillagoe. *Min.Ref.* Copper Ore, *see* 2029A; Silver (native), 7550.

—— Grant Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1104; Mica, 6559; Wolfram, 8022.

Nelson's (Bylong) Bore. *See under* Artesian Bores. No. 188.

Nepheline. *Compo.*, silicate of alumina, potash, and soda. *Colour*, white, etc *Lustre*, greasy. *H.* = 5·5-6. *Sp.gr.* = 2·5-2·6

6906. ——. In basalt. *Loc.* Mt. Beardmore, Balcomba Range, near Mackenzie R., 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

Nerang Cr., 56 miles S.byE. of Brisbane. *Min.Ref.* Opal, *see* 6996; Tripolite, 7033, 7033A, 7033B. *Geological Note:* The rocks here include basalt and sandstones belonging to the Bundamba (?) Series, a deposit of Tripolite occurring interbedded with the basalt all through this district.

—— —— (mouth of), Tweed Heads. *Min.Ref.* Gold, *see* 3372; Magnetite, 6034.

—— Rail. Stn. (4 miles S. of), 53 miles (by rail and road) S.E. of Brisbane. *Min.Ref.* Gold, *see* 4229, 4230; Ironstone, 5616; Silver, 7512.

—— to Tweed Heads, S.E. of Brisbane. *Min.Ref.* Gold (alluvial), *see* 3372.

Nerum Creek, 40 miles N.N.W. of Brisbane. *Min.Ref.* Gold, *see* 4219.

Netherby Rail. Stn., 35 miles N.byW. of Gympie. *Co.* March; *Dist.* Wide Bay. Railway Base for Mt. Bopple Graphite Mines.

Nettle's or Innot's Cr., 7 miles S.S.E. of Coolgarra. *Min.Ref.* Halite, *see* 4655; Mineral Water, 6570; Siliceous Sinter, 7023.

Nettle's Cr. Wolfram Mines, 4 miles E. of and 3 miles S.E. of Coolgarra.

Mineral References: Cassiterite, *see* 1136-1138; Corundum, 2371; Manganese-dioxide, 6430; Molybdenite, 6856; Monazite, 6879; Scheelite, 7352; Wolfram, 8030.

Geological Note: The rocks of this locality comprise slate, granite, greisen, and aplite. Wolfram and tin occur in the slates and greisen close to granite, both in defined quartz lodes and in irregular quartz masses, and sometimes associated with Monazite. The mines produce Wolfram of a high quality.

Nevada Mine, Argentine Silver Field. *Min.Ref.* Galena, *see* 2988.

Never-can-tell Tin Claim, Coolgarra. *Min.Ref.* Cassiterite, *see* 1051; Topaz, 7797.

Newellton (Silver Valley), (*see also* Dry River)—

SITUATION: *See maps*, Pls. 16, 17, 22. Head of Dry River, 9 miles S.W. of Herberton, and 10 miles S.E.byS. of Stannary Hills Rail. Stn. (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Lat.*, 17° 26′ S.; *Long.*, 145° 17′ E.

DISCOVERIES: Tin discovered in Lancelot Mine in 1895. Silver discovered by Harrold Bros. in 1881.

POPULATION: 77 (Estimated by Warden, 1910. No official estimate since this year).

MINERAL STATISTICS: Silver, Tin. *See under* Herberton, *in stat. tables,* Pls. 37, 38, 46, 46A.

MINERAL REFERENCES: **Silver,** 7480; Lead (Anglesite) 42, (Cerussite) 1225, (Galena) 2864, (Lead) 5725, (Pyromorphite) 7146; Copper (Azurite) 214, (Copper, native) 2000, (Copper Ore) 2035, (Copper Pyrites) 2214, (Olivenite) 6917A; **Tin** (Cassiterite) 1139-1141; Bismuth (native) 345, 346; Zinc (Calamine), 443, (Zinc Blende) 8112, 8113; Iron (Iron Pyrites) 5144, (Ironstone) 5547, 5548, (Magnetite) 6007; Limestone), 650. Other Minerals—Aragonite, 89; Calcite, 496; Chlorite, 1456, 1457; Fluorspar, 2679; Garnet Rock, 3122; Magnesite, 5947; Cinnabar, 1541A; Enargite, 2590A.

GEOLOGICAL NOTE: The rocks about the Lancelot Tin Mine are quartz schists and clay schists, the lode being well-defined and parallel to the stratification. The gangue of the tin ore is siliceous, the ore being mixed with considerable quantities of copper pyrites and metallic bismuth.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 119 (1897), 192 (1904). *See* Geol. Surv. Pub. List for title.

WARDEN AND INSPECTOR OF MINES: Both stationed at Herberton.

Nickel (Ni.). *Atom. Wt.* = 58·68; *Sp. gr.* = 8·9. *Colour,* white-metallic. Malleable. Tenaceous. Strongly magnetic.

MINERALS: *See* Noumeite, Pyrrhotite, *also* references further on.

MINERAL NOTE: Nickel in small quantities is found in association with ores of manganese, cobalt, and copper, and with pyrrhotite. Traces of nickel have been found in the rocks of the Glasshouse Mountains and other peaks in the district between Landsborough, Gympie, and the coast, occurring as a constituent of many of the intrusive masses disturbing the Mesozoic Coal Measures, and in some of the glancophane schists of this district. Nickel is found in Pyrrhotite at the Hector Mine near Rockhampton, but no determinations have been made to show the average percentage of the mineral in the ore.

USES: Nickel is chiefly in demand for the manufacture of German silver, an alloy of the metal with copper and zinc. It is used as a protecting and hardening cover for articles made of iron, copper, zinc, type-metal, etc., on which it is deposited electrolytically. With iron it forms ferro-nickel, an alloy commonly used to produce in steel the properties of hardness, strength, and elasticity. Chrome-nickel, tungsten-nickel, and molybdenum-nickel have somewhat the same properties. Nickel alloyed with copper is used in foreign coinage, and as a covering to rifle bullets to prevent their flattening after being fired.

VALUES. *See* Table under Metal Values in London for maximum and minimum quotations for all years since 1892.

Normanby Goldfield—

Situation: *See maps*, Pls. 14, 15, 16, 17. The field is about 46 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Co.* Carlisle; *Dist.* Kennedy South. Centre—about *Lat.* 20° 39′ S., *Long.* 148° 18′ E.

Discoveries: Gold was found by Sam Verge about 1872, when the Grace Darling, Albion, Star of Hope, and other reefs were discovered. Tin was found here in 1872.

Population: 46 (estimated by Warden in 1910. No returns since this year).

Proclamation of Field: First gazetted, 28th January, 1887; last alteration gazetted 15th January, 1904, as follows:—Commencing at Mount Roundback on the eastern boundary of Ellen Valley Resumption, and bounded thence on the north by the Normanby Range east about 9¼ miles to the western boundary of Mountain Home Lease, by that boundary north to the Andromache River, by that river upwards southerly to the north-west corner of Occupation Lease No. 6, by the north boundary of that license east about 3¼ miles, by the west and part of the north boundaries of Cattle Vale Lease north and east about 3½ miles to the watershed between the Proserpine and Lethe brook Rivers, by that watershed northerly about 9¾ miles to the Proserpine River, by that river downwards easterly to the western boundary of portion 327, Crystal Brook, by that boundary and the boundary between Crystal Brook 3 and Crystal Brook 7 on the west and Crystal Brook 4 and Crystal Brook 6 on the east southerly about 15 miles to the Andromache River, by that river upwards westerly about half-a-mile to the old boundary between the Bowen and Mackay Land Agents' Districts, by that boundary passing through Mount Hector south-westerly about 6¾ miles to the Normanby Range, by that range south-easterly to a point due north from Mount Marion; thence by a line south to that mount about 4 miles; on the south by a line bearing west about 12 miles; and on the west by a line north to the point of commencement—exclusive of all alienated lands.

Area: 128,000 acres = 200 sq. miles.

Leases: Number of Goldmining Leases in force, 1; area, 16 acres. Number of Miners' Homestead Leases and Applications in force, 16; area, 22 acres (1912).

Mineral Statistics: *Included in* "Other Goldfields" in *stat. tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral References: Gold (alluvial) 3276, (reef) 4120-4140; Silver, 7494, 7499, 7500; Copper (Azurite) 228, (Copper carbonate) 1940-1945, (Copper Pyrites) 2239, 2256-2264, (Malachite) 6325, (Tetrahedrite) 7774; Tin (Cassiterite), 1168; Iron (Hematite) 4741, 4759, (Ilmenite) 4901, (Iron Pyrites) 5274, 5301-5315, (Ironstone) 5586, 5587, (Magnetite) 6026, (Marcasite) 6509, 6510, (Mispickel) 6761-6766, (Siderite) 7412-7414, (Yellow Ochre) 5936; Other Minerals—Chlorite, 1461; Epidote, 2595; Zircon, 8225.

Geological Note: The country rocks comprise tourmaline porphyry, schists, quartzites, and slates. Granite also occurs in the district. Gold-bearing reefs exist in the altered sedimentary rocks and in the porphyry, and are very large and extensive along their outcrops.

Geological Publications: Reports—Nos. 5 (1899), 48 (1888), 49 (1889), 88 (1893), 181 (1903). *See under* Geol. Surv. Pub. List for title. *See also under* Supplementary Reports List, No. 15, 120.

Warden: Stationed at Bowen; Inspector of Mines: Stationed at Charters Towers.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Normanby Copper Mine, Mt. Perry. *Min.Ref.* Copper (Ore), *see* 2023; Copper Pyrites, 2128; Iron Pyrites, 4989; Tenorite, 7714.

Normanton—

Situation: *See maps*, Pls. 20, 21. On the S.W. Coast of Cape York Peninsula, 2063 miles (by steamer) N.W. of Brisbane. *Co.* Norman; *Dist.* Burke. *Lat.*, 17° 40′ S.; *Long.*, 141° 04′ E.

Port for the Croydon Goldfield and Stanhills Tinfield. The mineral products for foreign ports, and at times also for interstate ports, are transhipped at Thursday Island.

Harbourage: The town is on the Norman R., and 55 miles from the Gulf of Carpentaria. Up to the town wharves the river is navigable for vessels drawing 6 feet. The entrance has a channel of 6 feet L.W.S. Anchorage inside bar is from 12 feet to 16 feet at L.W.S. Rise and fall of tides average from 8 feet to 13 feet., but there is only one tide in 24 hours.

Population: 838 (Census, 1911).

Rainfall: Yearly average between 1903 and 1907, 38·99 in. Yearly average of wet days between 1903 and 1907, 48.

Mineral References: Ironstone, *see* 5489; Porcellanite, 5661.

Geological Note: The country in and about the town is slightly undulating, and very little above sea-level, the rocks on the surface being of recent formation. At Normanton there is a flowing bore which receives its supply of water from the Cretaceous artesian basin underlying all this part of Queensland.

Oaks Diggings (Old), S.S.W. of Einasleigh. *Min.Ref.* Gold (alluvial), *see* 3237A.

Oaks Gold and Mineral Field—

SITUATION: *See maps,* Pls. 8, 9. The field is 30 miles (by road) S.byE. of Einasleigh Rail. Stn. (Etheridge line). *Cos.* Percy, Copperfield, and Gilbert; *Dist.* Cook. Centre—about *Lat.* 18° 45′ S., *Long.* 144° 8′ E.

DISCOVERY: Alluvial gold discovered in 1907 near Copperfield River, 7 miles S. of Oaks Out-Station of Carpentaria Downs.

POPULATION: Included in Etheridge Returns.

PROCLAMATION OF FIELD: First (and only one) gazetted, 14th April, 1908, as follows:—Commencing on the left bank of Christmas Hill Creek at the south-west corner of Christmas Hill No. 2 Block, and bounded thence on the west by the west boundary of that block, a line north, and the west boundary of Red Rock No. 4; on the north by the north boundaries of Red Rock No. 4, Rienza, Preston, and Myall Downs East to the Einasleigh River, by that river upwards about twenty miles to the south-east corner of Myall Downs No. 2 Block; on the south by the south boundaries of Myall Downs No. 2, Myall Downs No. 3, Oakview No. 6. and Christmas Hill No. 2 westerly to the point of commencement.

AREA: 396,288 acres (619 3/16 sq. miles).

LEASES: Gold-mining and applications in force 21; area, 111 acres; Miners' Homestead Leases, 135; area, 80 acres.

MINERAL STATISTICS: Gold, included in Etheridge Goldfield.

MINERAL REFERENCES: Gold (alluvial), *see* 3237, (reef) 3794-3797; Silver, 7468; Lead (Cerussite), 1213, 1213A, (Galena) 2811, 2812, (Massicot) 6530A; Copper (Copper Pyrites), 2178; Zinc (Zinc Blende), 8089A; Iron (Iron Pyrites), 5086, (Mispickel) 6706A.

GEOLOGICAL NOTE: The country rock is gneissic schist, with granite in close proximity. The schist is traversed by numerous dykes of quartz-felspar-porphyry, and also by innumerable small quartz veins which have, roughly, a circular strike of about a mile in diameter. The rock between the veins is partly sericitic, and, like the veins, is gold-bearing. *See* G.S.Q. Pub. 234 for details.

GEOLOGICAL PUBLICATIONS: Report—No. 234. *See under* Geol. Surv. Pub. List for title. *Also under* Supplementary Report, No. 123.

WARDEN: Stationed at Georgetown. INSPECTOR OF MINES: Stationed at Croydon.

Oil (natural).

GEOLOGICAL NOTE: No reliable evidence is available to show that mineral oil, as a natural product, is to be found in any part of the State, although there are general features present in some localities which might be indicative of its occurrence. On the eastern side of the Dawson River Valley, south of the Central Railway line, there are disturbed and contorted Palæozoic Coal Measures which are known to contain several coal seams, and probably also kerosene shale. These beds have been enveloped by Mesozoic strata where they extend south near the Western Railway line, and where natural gas has been discovered. *See note under* Natural Gas; *also* Q.G.M.J., vol., 11, p. 390 (Aug., 1910).

Oil-bearing Shale.

MINERAL AND GEOLOGICAL NOTE: This substance is a buff-coloured, resin-bearing sediment of low specific gravity. The lighter varieties, which will float on water, and do not absorb water, contain about 5 per cent. of fixed carbon, and 30 per cent. of volatile carbon. The resinous substance is contained in minute granular particles which appear to be seed spores. Fossil leaves and fragment of fish bones and scales occur in the shale, and with it there are associated fragments of fossil wood and small bands of lignite. The age of the deposits is Cretaceous. The short description of the oil-bearing clays at Duaringa given in the G.S.Q. Pub. No. 155 would apply to all known deposits, but a general examination has not been made to determine their extent or economic value.

Localities where oil-bearing shale has been found include Duaringa, Bowen River Coalfield, Redbank Plains (Ipswich district), Mackay, Toowoomba Range, The Narrows near Gladstone, Casuarina Is. near Rockhampton, and Miriam Vale.

6912. Oil-bearing Shale. Toowoomba, 101 miles (by rail) W.byS. of Brisbane. *Co.* Aubigny; *Dist.* **Darling Downs.** *Analysis:* Moisture = 4·88 per cent.; Vol. Hydro-Carbons = 44·82 per cent.; Fixed Carbon = 1·80 per cent.; Ash = 48·50 per cent. *Ref.* L.B. 3, p. 210 (1893).

6912A.—— ——. Connole's Prickly Pear Sel., at foot of Toowoomba Range, about 4 miles from Toowoomba. *Co.* Aubigny (*ante*). *Analysis:* Moisture = 5·8 per cent.; Vol. matter = 30·0 per cent.; Fixed Carbon = 5·2 per cent.; Ash = 59·0 per cent. *Ref.* L.B. 12, pp. 418, 419 (1910).

Olivine. *Syn.* Peridot, Chrysolite. *Compo.*, silicate of magnesia and iron. *Colour*, usually olive-green. Vitreous. *H.* = 6·5-7. *Sp.gr.* = 3·27-3·37. Ferruginous, *var.* Hyalosiderite. *See* note below.

Mineral Note : Many occurrences are noted for this mineral, but only in the Toowoomba District has any attention been paid to it as a gemstone. The mineral is to be seen as inclusions in the basalt around Spring Bluff and Picnic Point, and although common and in large pieces, it is seldom that a fragment is found large enough to make a gem of two carats in weight. For trade purposes Olivine is classified as follows :—*Chrysolite* (pale sulphur yellow colour), *Olivine* (lemon or yellowish green), Peridot (pale or dark olive green). Much, if not all, of the olivine on the local market, said to be Queensland stones, are foreign productions.

Opal. *Compo.*, Hydrous Silica. *H.* = 5·5-6·5. *Sp.gr.* = 1·9-2·3. *Colour*, white, yellow, red, blue, green, purple, black, etc. *Varieties*, precious, common, black, "matrix," wood, resin, and pitch opal; Floatstone, Hyalite, Siliceous Sinter, Spicular Earth, and Tripolite (diatomaceous earth) are also included as varieties of Hydrous silica. *Gangues*, sandstone, clay, clay ironstone, porcellanite, vesicular lava. *Associated Minerals*, Gypsum, Calcite, and Chalcedony.

Mineral and Geological Note: The opals of Western Queensland (and New South Wales) are unquestionably the finest in the world, and make absolutely perfect gems of their class. They contain the most beautiful of tints, and have an endless variety of colour arrangement or "fire." Many pieces as large as a man's head have been found, and one specimen when discovered is said to have been an unbroken piece 5 ft. long. In such large specimens much of the opal is valueless, only the centre or core being good.

Pieces of precious opal the size of a man's hand are not uncommon, but they are always fractured and mixed with common opal and matrix opal and only fit to cut up into small gems, a perfect gem as large as a pigeon's egg being a rarity.

Recently a market has been created for the brownish-black ironstone matrix containing veinlets of fire opal. This is sometimes called black opal, but is more correctly termed "matrix opal." Some specimens are very pretty when polished, and bring prices almost as high as that of the precious opal itself. Black opal is also a beautiful gemstone, the play of bright purples, blues, greens, and reds, alternating with black, being very attractive in good specimens. It is found near Hungerford, close to the southern boundary of Queensland, and is known as "Lightning Ridge Opal."

Stones of first-class quality, of about 20 carats in weight, are usually worth about £1 per carat, and some special merit will increase their value to £3 per carat, while stones of inferior quality are hardly worth the cost of cutting. The cutting and polishing of first-class opal is carried on in Brisbane, Sydney, and Melbourne, and also in London, but the low-grade opal is sent to Germany to be fashioned, and is then put on the market at a price often less than 1s. per carat.

Specimens of opalised shark's teeth, saurian bones, fish scales, and shells are to be occasionally met with in the opal mines, and sometimes the opal, as a pseudomorph, takes the crystalline form of gypsum, The latter mineral is a common associate of opal, and is known amongst the miners as "Copai."

Most of the opal deposits, so far discovered, are close to the surface, and are in beds of sandstone, clay ironstone, and other sedimentary rocks belonging to the "Desert Sandstone" Formation in the Upper Cretaceous System. Sometimes very beautiful specimens are found in nodules of clay ironstone, embedded in sandstone or clay, and are known as "boulder opal."

Precious opal was once obtained in decomposed trachytic and basaltic rocks at Springsure in Central Queensland, but the deposits were of very limited extent, and the opals, although good, were almost always too small for gem purposes. The Springsure mines have been idle for many years.

An enormous area of country in Western Queensland has been proved to be opal-bearing, but until greater facilities exist for mining and prospecting, there will be no systematic work on these opal fields.

Discovery: The first discovery of opal was at Listowel Downs, on Blackwater Creek, N.E. of Adavale in 1872. In the following year, 1873, it was found on the Bulloo R., Opalton in 1888, Paroo in 1893, and Kynuna 1894. For other localities *see under special heading* "Discoveries."

Statistics: *See stat. tables*, Pls., *and diagram*, 44, 45, 46, 46a, 56.

Statistical Note: In the year 1895 opal of an estimated value of £32,750 was produced, that year eclipsing all previous and later records by a very large amount. In the following year (1896) £23,300 worth of opal was mined. The next year's yield was valued at £10,250, and since then the production of opal on the various fields has been gradually declining, the last year, 1912, showing a value of only £3,000. The total value of opal produced from the years 1890 to 1912 is estimated at £172,195. *See tables*, Pls. 44, 45.

6949. ——. In vesicular volcanic rock. *Loc.* Rainworth Run, ¾-mile S.W. of Springsure. *Co.* Denison; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 177, p. 33 (1902), and G.S.M.

6950. ——. In boulder matrix. Canmaroo Stn. (Yeulba), 48 miles S.E. of Yeulba Rail. Stn. (Western line), 24 miles S.E.byE. of Surat. *Co.* Elgin; *Dist.* **Maranoa.** *Ref.* G.S.M.

6951. ——. *See* No. 6936A.

6951A.——. Silsoe, 25 miles S.E. of Fermoy. *Co.* Musgrave; *Dist.* **Mitchell.** *Ref.* B.D.

6952. ——. In boulder matrix. Barcoo R., nr. Blackall, 380 miles (by rail) W.byS. of Rockhampton (Central line). *Co.* Tambo; *Dist.* Mitchell. *Ref.* G.S.M.

6953. ——. As bands and veins in clay, and in boulders of fine reddish sandstone, with Gypsum. *Loc.* Old Field, and Black Mine Opal Workings, Jundah Opal Field, **Opalton Mineral Field,** 130 miles S.W. of Longreach Rail. Stn. (Central line). *Co.* Warbreccan; *Dist.* Mitchell. *Ref.* G.S.Q. Pub. 177, pp. 30, 31 (1902).

6953A.——. Dyson's Opal Mine, 5 miles S.E. of Jundah Opal Field, Opalton Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 31 (1902).

6954. ——. Moriarty's Range, **Koroit Opal Field,** 38 miles N.N.W. of Cunnamulla Rail. Stn. (Western line). *Co.* Bando; *Dist.* **Warrego.** *Ref.* G.S.Q. Pub. 177, p. 18 (1902).

6955. ——. Duck Cr. Mines, Yowah Cr., 77 miles N.W.byW. of Cunnamulla Rail. Stn. (Western line), **Paroo Mineral Field.** *Co.* Homeburn; *Dist.* Warrego. *Ref.* G.S.Q. Pub. 177, p. 19 (1902).

6956. ——. Emu Cr. Opal Mines, 4 miles S.E. of Duck Cr., 71 miles N.W. of Cunnamulla Rail. Stn. (Western line), Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 20 (1902).

6957. ——. Goodman's Flat, 2½ miles N.W. of Duck Creek Field, 80 miles N.W. of Cunnamulla Rail. Stn., Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 20 (1902).

6958. Opal. Lushington Opal Mines, 90 miles N.W.byN. of Cunnamulla Rail. Stn. (Western line), Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 21 (1902).

6959. ——. One-mile Opal Workings, E. of Duck Creek Old Field, 76 miles N.W.byW. of Cunnamulla Rail. Stn., Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 20 (1902).

6960. ——. Pride of the Hills Opal Mine, 12 miles N.W. of Duck Cr. Field, 89 miles N.W. of Cunnamulla Rail. Stn. (Western line), Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 20 (1902).

6961. ——. Sheep Station Creek Opal Workings, 5 miles S.W. of Duck Cr., 81 miles N.W.byW. of Cunnamulla Rail. Stn. (Western line). Paroo Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 20 (1902).

6961A.——. Listowell Downs Stn., head of Blackwater Cr., trib. of Bulloo R., 65 miles N.E. of Adavale. *Co.* McKinlay; *Dist.* Warrego.

6962. ——. *See* No. 6936B.

6963. ——. Gt. Extended Opal Mine, **Yowah Opal Field,** Cunnamulla Mineral Field. 63 miles W.byN. of Cunnamulla Rail. Stn. (Western line). *Co.* Wellington; *Dist.* Warrego. *Ref.* G.S.Q. Pub. 177, p. 15 (1902).

6964. ——. Old Flat Opal Workings, Yowah Opal Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 18 (1902).

6965. ——. Southern Cross Opal Mine, Yowah Opal Field (*ante*). *Ref.* G.S.Q. Pub. 177, p. 18 (1902).

6966. ——. *See* No. 6936C.

6967. ——. **Fiery Cross Opal Field,** 25 miles N.N.W. of Yowah, 85 miles W.N.W. of Cunnamulla Rail. Stn. (Western line), Paroo Mineral Field. *Co.* Wellington; *Dist.* Warrego. *Ref.* G.S.Q. Pub. 177, p. 19 (1902).

6967A.——. In decomposed volcanic rock. Blackall Range, 50 miles N.N.W. of Brisbane, *viâ* Landsborough. *Co.* March; *Dist.* Wide Bay.

6968. —— (Common). Glenore, 14 miles (by rail) S. of Normanton. *Co.* Norman; *Dist.* Burke. *Ref.* B.D.

6969. ——. As small grains in ferruginous ("Desert") sandstone. *Loc.* Jardine Valley, 222 miles (by rail) S.W.byW. of Townsville, on Gt. Northern line. *Co.* Douglas; *Dist.* Burke. *Ref.* B.D.

6970. ——. *Assoc.with* Siderite and Iron Pyrites. *Loc.* Riverbank Colliery, 1¼ miles S.E. of Howard Rail. Stn. (North Coast line), Burrum Coalfield. *Co.* Bowen; *Dist.* Burnett.

6970A.——. Mondure, about 40 miles S.byE. of Gayndah Rail. Stn. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* B.D.

6971. ——. Auburn Falls P.C., Auburn R., Cadarga, 32 miles W.S.W. of Gayndah. *Co.* Newcastle; *Dist.* Burnett.

6972. ——. Dixon's Paddock, 25 miles W. of Croydon Rail. Stn. *Co.* Surrey; *Dist.* Cook. *Ref.* B.O.

6973. ——. *Assoc.with* Cassiterite, in gravel. *Loc.* Severn R., 1 mile N.W. of Ballandean Rail. Stn., 15 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* B.D.

6974. ——. In clay ironstone. In Railway Cutting on Goondiwindi Railway, Glen Road Crossing, 58 miles W. of Inglewood Rail. Stn. (Goondiwindi line), 131 miles (by rail and road) W.byS. of Warwick. *Co.* Marsh; *Dist.* Darling Downs. *Ref.* L.C.B.

6975. ——. Old Mud Springs, 8 miles S.E. of Winton. *Co.* Ayrshire; *Dist.* **Gregory North.** *Ref.* G.S.M.

6976. ——. *Assoc.with* Cairngorm, Opalized Wood, and Cassiterite, in alluvial deposits under decomposed basalt. *Loc.* Brewery Hill, Nigger Cr., 3 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* B.D.

6977. ——. Mt. Macedon Range, 75 miles S.W.byW. of Bowen. *Co.* Salisbury; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

6978. ——. Mt. Toussaint, 45 miles S.W. of Bowen. *Co.* Salisbury (*ante*). *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

6979. ——. Pelican Cr., br. of Bowen R., 50 miles S.W. of Bowen. *Co.* Salisbury (*ante*). *Ref.* G.S.Q. Pub. 4, p. 6 (1879).

6980. ——. Cape Hillsborough, 18 miles N.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 53, p. 9 (1889).

6980A.——. Glendon Run, nr. Burdekin Falls, about 82 miles S.W.byW. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* O.R.

6981. ——. Mt. Minerva, 12 miles N. of Springsure Rail. Stn. (Central line), 218 miles (by rail and road) W.S.W. of Rockhampton. *Co.* Denison; *Dist.* **Leichhardt.** *Ref.* G.S.M.

6982. —— (resin). Near railway line, Nogoa R., nr. Emerald Rail. Stn. (Central line), 166 miles W. of Rockhampton. *Co.* Denison (*ante*). *Ref.* G.S.M.

6982A.——. Grosvenor Downs, about 60 miles N.N.E. of Clermont. *Co.* Grosvenor; *Dist.* Leichhardt. *Ref.* O.R.

6983. ——. On surface of basalt. Near Blackwater Rail. Stn. (Central line), 118 miles (by rail) W.byS. of Rockhampton. *Co.* Humbolt; *Dist.* Leichhardt. *Ref.* B.D.

6984. —— (pitch). Hills E. of Mt. Britton Township, 75 miles (by road) S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 39, p. 61 (1887).

6985. —— (wood). *Assoc.with* Fossil Wood, in slate and sandstone. *Loc.* Of general occurrence on the Dawson, Mackenzie, Isaacs, and Nogoa Rivers in the Leichhardt District. *Ref.* B.D.

6986. ——. Muttaburra, 65 miles N.byE. of Longreach Rail. Stn., or 70 miles N.W. of Barcaldine Rail. Stn. (Central line). *Co.* Cumberland; *Dist.* **Mitchell.** *Ref.* L.B. 3, p. 479 (1894).

6987. —— (black). *Assoc.with* Sandstone. *Loc.* Buderim Mt., 7 miles E. of Woombye Rail. Stn. (North Coast line), 69 miles (by rail and road) N. of Brisbane. *Co.* Canning; *Dist.* Moreton. *Ref.* B.D.

6988. ——. Glasshouse Mountains, 2 miles W. of Glass Mountain Rail. Stn., 46 miles (by rail and road) N.byW. of Brisbane. *Co.* Canning (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 65 (1887).

6989. ——. Por. (286), Brassall, Pine Mountain Rail. Stn., 7 miles (by rail) N.N.W. of Ipswich, and 31 miles (by rail) W.S.W. of Brisbane. *Co.* Churchill; *Dist.* Moreton. *Ref.* L.C.B.

6990. —— (resin). Mt. Sylvia, 12 miles S. of Gatton Rail. Stn. (Main line), 73 miles (by rail and road) W. of Brisbane. *Co.* Churchill (*ante*). *Ref.* L.C.B.

6991. ——. Near Norman Park, 2 miles E. of Brisbane Rail. Stn. *Co.* Stanley; *Dist.* Moreton. *Ref.* Q.M.

6992. ——. *Assoc.with* Chalcedony and Quartz, in ferruginous clay. *Loc.* Railway Cutting, 400 yards N. of Tingalpa Cr., nr. Hemmant Rail. Stn., about 10 miles E.byN. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* B.D.

6993. ——. In gravel. Christmas Cr., nr. Beaudesert Rail. Stn. (South Coast line), 47 miles (by rail) S.byE. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.M.

6994. ——. Darlington Reserve, nr. Beaudesert Rail. Stn. (South Coast line) (*ante*). *Ref.* G.S.M.

6995. —— (resin). Tamborine Mountains, 10 miles S.S.E. of Logan Village Rail. Stn. (Beaudesert line). *Co.* Ward; *Dist.* Moreton. *Ref.* Q.M.

6995A.—— (pitch). As small veins in basalt. *Loc.* Point Danger, Tweed Heads, 69 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* B.D.

6996. ——. *Assoc.with* Tripolite, in basalt. *Loc.* Head of Nerang Cr., Beach Range, Spur of Macpherson Range, nr. border of N.S. Wales, 56 miles S.byE. of Brisbane. *Co.* Ward (*ante*). *Ref.* B.D.

6997. ——. Dinner Cr., trib. of Lion Cr., 5 miles N.W.byN. of Stanwell Rail. Stn., 21 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

6998. ——. Mt. Coffin, Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* G.S.M.

6998A.—— (white). *Assoc.with* Carnelian, Agate, and Quartz crystals, in decomposed basalt. *Loc.* 2½ miles N.W. of Cordalba Rail. Stn. (North Coast line), 50½ miles (by rail and road) N.W. of Maryborough. *Co.* Cook; *Dist.* Wide Bay. *Ref.* B.D.

6999. ——. North of Cooran Rail. Stn. (North Coast line), 16 miles S. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

7000. —— (Jaspopal). Cave Cr., nr. Scotland Hills, about 5 miles S. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* **Burnett.** *Ref.* L.C.B.

7001. ——. Por. (1098), Walla, 5 miles S.S.W. of Gin Gin Rail. Stn. (Bundaberg-Mt. Perry line), 34 miles (by rail and road) W. of Bundaberg. *Co.* Bowen; *Dist.* Wide Bay. *Ref.* L.C.B.

7002. —— (Wood). Boondooma Stn., Burnett R., 40 miles W. of Wondai Rail. Stn. (Kilkivan line), 141 miles S.W.byW. of Maryborough. *Co.* Boondooma; *Dist.* Burnett. *Ref.* B.D.

7003. Opal. In Tunnel. Just-in-Time Claim, Terraces, Russell Goldfield, 22 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 89, p. 2 (1893).

7004. ——. Near Miles-Taroom Road, 231 miles (by rail) W.N.W. of Brisbane. *Co.* Bulwer; *Dist.* **Darling Downs.**

7005. ——. Chinchilla Head Stn., 7 miles S.W. of Chinchilla Rail. Stn. (Western line). *Co.* Lytton; *Dist.* Darling Downs. *Ref.* P.R.S.Q., vol. 4, p. 64 (1887).

7006. ——. *Assoc.with* Common Opal, Cairngorm, and Cassiterite, in alluvial deposits, under basalt. *Loc.* Brewery Hill, Nigger Cr., br. of Wild R., 3 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

7007. ——. Deep Tin Lead, Herberton, 82 miles (by rail) S.W.byS. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 61 (1900).

7008. ——. Between Herberton and Bradlaugh Gully, Herberton. *Ref.* G.S.Q. Pub. 115 (1896).

7009. ——. Flat between Cooper's Cr. and Hail Cr., about 60 miles S.byW. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 54, p. 4 (1889).

7010. ——. Near Emerald, 165 miles (by rail) W. of Rockhampton (Central line). *Co.* Denison; *Dist.* Leichhardt. *Ref.* G.S.M.

——. *Var.* Diatomaceous Earth. *Syn.* Infusorial Earth, Keiselguhr. *See* Tripolite.

—— **Floatstone** (*Var.*). *Compo.*, Amorphous Silica. *Colour*, dull white. *Texture*, soft, earthy, rough. Floats in water.

7011. —— ——. Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.M.

—— **Hyalite** (*Var.*). (*Syn.* Müller's Glass). Colourless. Glassy. Occurs in pisolitic, botryoidal, and stalactitic masses in vesicular laves.

7012. —— ——. In basalt. Cumkillenbar Run, 7 miles N.E. of Dalby Rail. Stn. (Western line). *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* P.R.S.Q., vol. 4, p. 65 (1887).

7013. —— ——. Square Top Mt., 17 miles N.W. of Dalby Rail. Stn. *Co.* Aubigny (*ante*).

7014. —— ——. *Assoc.with* Gold, in trachyte. *Loc.* Minerva Cr., Springsure, 206 miles (by rail) W.S.W. of Rockhampton (Central line). *Co.* Denison; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 103, pp. 9, 10 (1895).

7015. —— ——. Mt. Boorambool, 3 miles W.byN. of Springsure Rail. Stn. *Co.* Denison (*ante*). *Ref.* G.S.Q. Pub. 94, p. 8 (1893).

7016. —— ——. Dawson River, Taroom, 90 miles N.byW. of Miles Rail. Stn. (Western line), 321 miles (by rail and road) N.W. of Brisbane. *Co.* Fortescue; *Dist.* Leichhardt.

7017. —— ——. In decomposed basalt. Nr. Balcomba Stn., Mackenzie R., 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* B.D.

7018. —— ——. Por. 126v, Whitestone, between Deort's Glen and Ribstone Gully, 20 miles S. of Gatton Rail. Stn. (Main line). *Co.* Churchill; *Dist.* **Moreton.** *Ref.* L.C.B.

7019. —— ——. 12 miles from Mt. Zahel, 30 miles from Gatton Rail. Stn. *Co.* Stanley; *Dist.* Moreton. *Ref.* G.S.M.

7020. —— ——. Kroombit, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* L.C.B.

7021. —— ——. North of Cooran Rail. Stn. (North Coast line), 16 miles S.byE. of Gympie. *Co.* March; *Dist.* **Wide Bay.** *Ref.* G.S.M., and A.R.D.M. pp. 7, 8 (1892).

7022. —— ——. *Assoc.with* Opal (common), in basalt. *Loc.* On ridge, Six-mile Cr., Cootharaba and Noosa Waters, 24 miles E. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 94, p. 7 (1893).

—— **Siliceous Sinter** (*Var.*). *Syn.* Fiorite, Geyserite. Occurs as light irregular masses around hot springs.

7023. —— ——. Innot Hot Springs, Nettle's Cr., br. of Herbert R., nr. Herberton, 8 miles W. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* B.D.

7023A. —— ——. Dobu Island, 256 miles E. of Port Moresby, **Brit. New Guinea.** *Analysis:* Silica = 87·16 per cent., Alumina = 2·20, Iron Protoxide = 2·66, Magnesia = trace, Lime = trace, Potash and Soda = 0·21, Loss on ignition = 7·87, Sulphur = trace. *Ref.* G.S.Q. Pub. 85, p. 32 (1892).

—— ——. *See also under* Quartz.

7024. —— **Spicular Earth** (*Var.*). A Tripolite made up of the spiculæ of sponges. In large quantities, extending over several acres of ground. *Loc. Por.* 10v, *Par.* Clarendon, *Co.* Cavendish, *Dist.* West Moreton.

—— **Tripolite** (*var.*). *Syn* Infusorial Earth, Diatomaceous Earth. Kieselguhr. A light, porous form of hydrous silica formed from the microscopic skeletons of diatoms or of sponge spiculæ.

7024A.—— ——. As a large deposit. On Tarong Estate, between Pim Pim bridge and Middle Creeks, running into Baramba Cr., trib. of Burnett R., about 60 miles N.W. of Cooyar, and about 20 miles S.W. of Nanango. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* O.R.

7025. —— ——. *Loc.* Occurs as a bed about 30 feet thick in well 2 miles W. of Spring Cr. Stn., 35 miles S. of Junction Cr. Telegraph Stn., Etheridge Gold and Mineral Field. *Co.* Copperfield; *Dist.* **Cook.** *Ref.* B.D.

7026. —— ——. Almaden, 121 miles (by rail) W.S.W. of Cairns, on Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook.

7027. —— ——. Atherton, 68 miles (by rail) S.W. of Cairns (on Cairns-Herberton line), Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

7028. —— ——. Killarney, 28 miles (by rail) E.S.E. of Warwick. *Co.* Merivale; *Dist.* **Darling Downs.**. *Ref.* Q.M.

7028A.—— ——. In Cliff 20 ft. or 30 ft. high. *Loc.* Emu Cr., 6 miles above Killarney Rail. line. *Co.* Merivale (*ante*).

7029. —— ——. Warwick, 169 miles (by rail) S.W. from Brisbane. *Co.* Merivale (*ante*). *Ref.* Q.M.

7029A.—— ——. In bed 3 ft. thick. Buff coloured. *Loc.* Creek near Homestead, Planet Downs, 18 miles E.S.E. of Rolleston, about 60 miles S.byE. of Comet Rail. Stn. (Central line). *Co.* Consuello; *Dist.* **Leichhardt.** *Analysis:* Moisture at 100° C. 7·8, loss on ignition 6·9, Silica (S_1O_2) 71·6, Alumina (Al_2O_3) 6·0, Iron Oxide (Fe_2O_3) 4·2, Lime (CaO) 0·3, Magnesia (MgO) 1·5—98·3 per cent. NOTE: Absorbs 130 per cent. of its own weight of water. *Ref.* G.S.M. and A.R., p. 237 (1910).

7029B.—— —— (white). No. 2 Well nr. Homestead, Planet Downs (*ante*). *Analysis:* Moisture at 100° C. 7·0, loss on ignition 6·8, Silica (S_1O_2) 77·9, Alumina (Al_2O_3) 4·5, Iron Oxide (Fe_2O_3) 1·7, Lime (CaO) 0·3, Magnesia (MgO) 1·7—99·9 per cent. Splits up into fragments when immersed in water. *Ref.* A.R., p. 237 (1910).

7030. —— ——. Woodbine, *viâ* Gatton, 61 miles (by rail) W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Analysis:* Silica (insoluble) = 76·0, Silica (soluble) = 7·8, Alumina = 5·1, Iron = trace, Magnesia = 0·6, Lime = nil, Loss at 115° C. = 5·5, further loss at red heat = 5·8—100·8 per cent *Absorption test:* Moisture and loss on ignition = 12·1, absorption by original sample = 82·7, absorptioned by calcined = 90·4 per cent. *Ref.* A.R., pp. 119, 138 (1907).

7030A.—— ——, in basalt country. Spur off Little Liverpool Range, 5 miles W. of Rosewood Rail. Stn. *Co.* Churchill; *Dist.* Moreton. *Ref.* B.D.

7030B.—— ——. *Loc.* Swan Creek, at head of Hellhole Coal Seam, 8½ miles S.W. of Helidon. *Co.* Churchill (*ante*).

7031. —— ——. Sel. (31), Meerchaum Mountain, Pine Cr., 14 miles E.S.E. of Beaudesert Rail. Stn. (South Coast line), 61 miles (by rail and road) S.E.byS. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Analysis:* Moisture and traces of organic matter = 10·31, Oxide of Iron and traces of alumina and lime = 0·59, Silica = 89·10 per cent. *Ref.* G.S.Q. Pub. 51, p. 3 (1889).

7032. —— ——. Vicinity of Canungra Cr., 10 miles E. of Beaudesert Rail. Stn. *Co.* Ward (*ante*). *Ref.* Q'land Nat. (1908).

7033. —— ——. Ten ft. thick, below basalt, above Trias-Jura Sandstone. *Loc.* Nr. head of Nerang Cr., E. side of Beach Range, spur of Macpherson Range, nr. border of N.S.W., 56 miles S.byE. of Brisbane. *Co.* Ward (*ante*). *Analysis:* Silica = 86·0 per cent.; Iron and Alumina = 5·2 per cent.; Lime = 0·5 per cent.; Moisture at 10°C. = 4·6 per cent.; Loss on ignition = 4·1 per cent. *Absorption test:* Moisture and loss of ignition = 25·8 per cent.; H_2O absorbed by sample before calcination = 55·2 per cent.; H_2O absorbed by sample after calcination = 96·7 per cent. *Ref.* A.R., p. 114 (1907).

7033A.—— ——. Horse Pocket Spur, E. of Beechmont, about 9 miles S.W. of Nerang, and 18 miles E.S.E of Beaudesert. *Co.* Ward (*ante*). *Ref.* O.R.

7033B.—— ——. On Govt. Reserve 362, Par. of Numinbah, about 10 miles S.W. of Nerang, and 17 miles E.S.E. of Beaudesert. *Co.* Ward (*ante*). *Ref.* O.R.

Opal Fields and Centres. *See* Fields *under* Opal.

Opal and Opal Mining in Western Queensland (Notes on). By J. B. Hickie. Ann. Rep. Mines Dept., 1895 (1896).

Opalton Mineral Field—

Situation: *See maps,* Pls. 18, 19, 20, 21. From 60 to 87 miles S.S.W. of Winton, and 96 miles W.byN. of Longreach Rail. Stns. *Cos.* Ayrshire, Binberrie, Brighton, Elderslie, Farrar, Mayne, Mowarra, Rosebrook, and Woodstock; *Dist.* Gregory North. *Cos.* Fermony, Musgrave, Vergemont and Warbreccan; *Dist.* Mitchell. *Lat.*, 23° to 25° S.; *Long.*, 142° to 144° E.

Population: Estimated at under 20.

Proclamation of Field: First (and only one) gazetted, 12th December, 1896, as follows:—Commencing at Jundah, on the left bank of the Thomson River, and bounded thence on the east by the Thomson River upwards to a point south of Vergemont Block No. 3; thence by a line north along the eastern boundaries of Vergemont No. 3, Alfred Downs, and Alfred Downs No. 9, the south-east and north-east boundaries of Archervale, the north-east boundary of Silsoe No. 4, the south-east and north-east boundaries of Silsoe No. 3, the south-east and north-east boundaries of Kurleea Kurleea Nos. 1 and 2, the eastern and northern boundaries of Bladensburg No. 10; on the north by the range forming the northern watershed of Vergemont Creek westerly and southerly to the east corner of Kell No. 3, by the north-east boundaries of Kell No. 3 and Cork No. 10, by the north-west boundaries of Cork Nos. 10 and 9, by the north-east boundaries of Cork No. 1, Cadell No. 1, the north-east and north-west boundaries of Cadell No. 2, and north-east boundary of Middleton No. 1; on the west by the north-west boundaries of Middleton No. 1, Brighton Downs No. 10, the south-west boundaries of Brighton Downs No. 10, the north-west, south-west, and south-east boundaries of Brighton Downs No. 8, the south-west boundaries of Cork No. 5, Kerry South, Cork No. 6, Killarney No. 1, Killarney No. 2 North, Killarney No. 2, and part of the south-west boundary of Killarney No. 2 South, the south-east and part of the south-west boundary of Snow, the west boundaries of Caulfield, Blackrock No. 2, Elvo No. 2, and Elvo No. 6, part of the north and west boundaries of Eden Valley, the north-west boundary of Laura, part of the north boundary of Curran, the west boundaries of Curran, Liverpool, and Complete, the south-west boundaries of Complete, Merabooka, Wombah No. 1, Henry Downs, Esmeralda West, Esmeralda, Cabul, Havre, and Gleg Clare; and on the south by the north-west and north boundaries of Centum, the north boundaries of Esmeralda Plains, Cashmere No. 1, Manilla No. 2, Tryeta No. 2, Carella No. 3, and Haughton Vale No. 1 to the Thomson River; and again on the east by that river upwards to Jundah, the point of commencement.

Area: 9,132,800 acres (14,270 sq. miles).

Principal Mining Centres: Jundah Opal Field, Opalton or Fermoy Opal Field, Horse Cr. Opal Mines, *which see.*

Mineral Statistics: Opal, *see tables,* Pls. 44, 46, 46a.

Mineral References: Opal (precious), *see* 6936a, 6940a, 6953, 6953a; Topaz, 7796; Gypsum, 4617.

Geological Note: The rocks comprise "Desert Sandstone" Formation resting on sandstones, etc., belonging to the "Rolling Downs" Formation. The opal occurs in the Desert Sandstone, the deposits being generally in a soft sandstone above a clay bottom, and sometimes in a ferruginous pipe.

Geological Publications: Report—No. 177 (1902). *See under* Geol. Surv. List for details.

Warden: Stationed at Longreach or Winton. Inspector of Mines: Stationed at Rockhampton.

Opalton (Fermoy) Opal Field. Within the Opalton Mineral Field, S.S.W. of Winton. Centre about *Lat.* 23° 15′ S.; Long. 142° 45′ E. Precious opal was discovered here in 1888. *Includes* Little Wonder, Brilliant, Bald Knob, and Conway's Opal Mines. *Min.Ref.* Gypsum, *see* 4618; Opal (black, precious), 6951; Topaz, 7796.

Opera Cr., 4 miles N. of Zillmanton Rail. Stn. (Chillagoe line). *Min.Ref.* Azurite, *see* 197; Cerussite, 1206, 1207; Chrysocolla, 1519; Clay, 1569; Cuprite, 2438; Fluorspar, 2665; Galena, 2805; Garnet, 3110; Ironstone, 5530; Malachite, 6235, 6236.

Ophir Block (Iguana Reef), Croydon Goldfield. *Min.Ref.* Galena, *see* 2707; Gold, 3491; Iron Pyrites, 4939.

Ora Cr., Gympie Goldfield. *Min.Ref.* Gold (alluvial), *see* 3415.

—— Reef, 7½ miles N. of Gympie. *Min.Ref.* Gold, *see* 4545.

Orchid and Orchid 1 N. Mines, Eungella Goldfield. *Min.Ref.* Copper Pyrites, *see* 2253; Gold, 4105, 4106; Malachite, 6322; Tile Ore, 2567.

Ord (California Cr.) Rail. Stn. (Mt. Garnet line, br. of Chillagoe line). *Lat.*, 17° 24′ S.; *Long.*, 145° E. *Railway Base* for California Cr. Tin Mines. *Min.Ref.* Fluorspar, *see* 2665B; Manganese-dioxide, 6412; Mispickel, 6704.

Ore-buyers—*List of, in Queensland, &c.*:—

Name.	Address.	Class of Ores chiefly dealt with.
Southern Division—		
A. Chandler	Stanthorpe...	Tin
G. Dodds...	Stanthorpe...	Tin
M. Allison	Stanthorpe...	Tin
W. Burbridge	Gympie	Various gold ores (small parcels)
Griffiths Bros.	Gympie	Various gold ores (small parcels)
Central Division—		
*Queensland Copper Co. (Smelting Works)	Mount Perry	Copper, copper-gold ores, and concentrates
* Electrolytic Refining and Smelting Co. (office, Bligh-street, Sydney; works, Port Kembla, N.S.W.	Mackay, Gladstone, Maryborough, and Charters Towers (agencies)	Copper, copper-gold, and other ores Copper, copper-gold, and other ores
Charters Towers, Ravenswood Divisions—		
*Sulphide Corporation (smelting works, Cockle Creek, N.S.W.)	Charters Towers (agency)	Silver, lead, gold ores and concentrates
Graham and Matheson, Ltd.	Charters Towers (and Ravenswood agency)	
*Queensland Copper Co. (works, Mount Perry)	Charters Towers (agency)	Copper-gold ores, gold concentrates, and copper ores
*Electrolytic Refining and Smelting Co.	Charters Towers (agency)	Copper-gold, gold concentrates, and other ores
Cloncurry Division—		
Graham and Matheson, Ltd.	Cloncurry (agency) ...	Copper and other ores
*English and Australian Copper Co.	Waratah, N.S.W. ...	Copper
Herberton-Chillagoe Division		
Irvinebank Mining Co.	Irvinebank. Agencies:—Kooboora, Ora, Wolfram, Mount Carbine, Hot Springs, Lancewood, Truxillo, Molloy, Gurrumba	Wolfram, Molybdenite, tin, silver, bismuth, lead, copper
W. and J. Lempriere (Sydney and Melbourne)	Herberton (agency); agencies at similar centres to Irvinebank Mining Co. above, also at Cooktown	Tin and other ores
Blackwell and Sons (Liverpool)	Wolfram Camp (agency)	Wolfram and copper ores
* The Chillagoe Company, Ltd.	Chillagoe	Copper, silver, lead, gold
Mount Molloy Mines (Smelting Works)	Mount Molloy	Copper
Croydon and Etheridge Division—		
* Sulphide Corporation.	Charters Towers (agency)	Silver-lead ores and gold concentrates
Sydney—		
Lohmann & Co.	7-11 Bridge Street, Sydney Charters Towers agency (Bray and Oaks)	All ores, concentrates, mattes, &c.
Melbourne—		
Australian Metal Co.	P.O. Box 221	All ores, includ. Tantalite, Vanadium, Uranium, and Wolfram

*Open to take ores from all districts. Write for Tariffs.

Ore-buying tariffs of Smelting Works. *See* Tariffs of Smelting Works.

Ore and Govatt's Bore. *See under* Artesian Bores. No. 234.

O'Regan's (D. C.) Bore. *See under* Artesian Bores. No. 154.

Orient Camp, Cumming's Cr., S.S.W. of Stannary Hills Rail. Stn. (Chillagoe Br. line). *Min.Ref.* Galena, *see* 2773A.

—— P.C., Lucky Downs Diggings. *Min.Ref.* Gold, *see* 3879A.

—— Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4523.

—— Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1109; Malachite, 6283; Talc, 7677.

Oriental Amethyst, Aquamarine, Cat's Eye, Chrysoberyl, Moonstone, and Peridot. *See* Sapphire, *under* Corundum. *Min.Ref.* 2339-2364.

Oriental 1 N. and Glanmire Mine, Gympie Goldfield. *Min.Ref.* Gold, *see* 4467.

—— Reef, Twelve-mile, Croydon Goldfield. *Min.Ref.* Galena, *see* 2711A; Gold, 3554; Iron Pyrites, 4964.

Orionio (Tate) River, Brit. New Guinea. *Min.Ref.* Lignite, *see* 1831.

Orion Downs Run, 20 miles S.E. of Springsure. *Min.Ref.* Coal, *see* 1676A.

Ornamental (Decorative) Minerals. *See also* Gemstones.

See under name of mineral for details.

Agate (banded). *See under* Chalcedony.
Asteria corundum. *See under* Corundum.
Alabaster (fibrous, silky). *See under* Gypsum.
Carnelian (red). *See under* Chalcedony.
Chalcedony varieties.
Chrysocolla (green).
Chrysoprase (green). *See under* Chalcedony.
Fluorspar (green, etc.).
Grass-stone. *See* Sagenite.
Jasper varieties.
Limestone. *See* Marble.
Lydianstone (black). *See under* Jasper.
Malachite (green).
Marble (white, blue, pink, grey, black, green, etc.). *See under* Calcite.
Onyx (banded). *See under* Chalcedony.
Opal in matrix. *See under* Opal.
Oriental moonstone. *See under* Corundum.
Prase (green). *See under* Chalcedony.
Rose quartz. *See under* Quartz.
Rhodochrosite (pink).
Rhodonite (pink).
Sagenite (hair lines in quartz).
Sard (red). *See under* Chalcedony.
Satin Spar. *See under* Gypsum.
Semi-Opal. *See under* Opal.
Turquoise (greenish blue).
Wood Opal. *See under* Opal.

Orphan M.L. (667), Cloncurry. *Min.Ref.* Malachite, *see* 6165; Redruthite, 7257.

Orrery Co. Warrego Dist. *See map*, Pl. 18.

Orthoclase. *Syn.* Potash Felspar. *Compo.*, Silicate of alumina and potash. *Colour*, usually whitish. *Lustre*, Vitreous. *H.* = 6 6·5. *Sp.gr.* = 2·5-2·62. *Contents* (*max.*), Potash 17 per cent.

7034. ——. *Assoc.with* Biotite and Hornblende, in granite. *Loc.* Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 43, p. 1 (1887).

7035. ——. *Assoc.with* Cassiterite and Tourmaline, in quartz and talc. *Loc.* Owen and Davidson's Tin Lease, Mt. Amos, 20 miles S.S.E. of Cooktown, Annan R. Tinfield. *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 35, p. 15 (1887).

7036. ——. *Assoc.with* Hornblende, in syenitic rock. *Loc.* Mt. Browning, nr. Mt. Amos, 20 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 8 (1891).

7037. ——. In granite. Mt. Hartley, about 4 miles E. of Rossville, 26 miles S.S.E. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 7 (1891).

7038. ——. *Assoc.with* Gold, Biotite, and Quartz, in pegmatite. *Loc.* Golden Treasure Mine, 2 miles W. of Tate Telegraph Stn., Tate R., 34 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.Q. Pub. 119, p. 4 (1897).

7039. —— (crystals), in decomposed rock. Telegraph Line, Newcastle Range, 8 miles E. of Georgetown. *Co.* Gilbert; *Dist.* Cook. *Ref.* B.D.

7040. ——. *Assoc.with* Copper Pyrites, Cassiterite, Mispickel, in quartz crystals. *Loc.* Gt. Western Tin Mine, Watsonville, 6 miles W. of Herberton, 7 miles E.S.E. of Stannary Hills Rail. Stn. (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 13, p. 27 (1883).

7041. ——. *Assoc.with* Cassiterite. *Loc.* Pinnacle Tin Lease, Emu Cr., 12 miles S.E.byE. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

7042. —— (crystals). Ballandean, 14 miles (by rail) S.S.W. of Stanthorpe, on Main line. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

7043. —— (crystals). *Assoc.with* Quartz. *Loc.* Railway Cutting, S. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* G.S.M.

7044. ——. *Assoc.with* Copper Pyrites, Mispickel, Cassiterite, Wolfram, Zinc Blende, Calcite, and Chlorite. *Loc.* Sundown Copper Mine, Sundown Cr., Severn R., 12 miles S.W. of Ballandean Rail. Stn. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 22 (1904), G.S.M., and B.D.

7045. —— (pink crystals). *Assoc.with* Cassiterite, Mispickel, Steatite, Chlorite, Biotite, and Hornblende, in lode. *Loc.* Gt. Northern Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Cairns-Herberton line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, pp. 62, 67 (1900).

7046. ——. Old Welcome Mine, Herberton (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 62 (1900).

7047. ——. *Assoc.with* Cassiterite, Wolfram, Steatite, Chlorite, and Serpentine, in quarz lode. *Loc.* Soggaorth Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883), and P.R.S.Q., vol. 4, p. 59 (1887).

7048. ——. Magnetic Is., Cleveland Bay, 5½ miles N. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 75, p. 3 (1892).

7049. ——. *Assoc.with* Gold, Copper Pyrites, Chalcanthite, and Calcite, in quartz. *Loc.* Red Streak Reef, Yatton Goldfield, 21 miles S.W. of St. Lawrence. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

7050. ——. *Assoc.with* Biotite and Hornblende, in granite. *Loc.* Norton (Milton) Goldfield, 23 miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 21, p. 5 (1885).

7051. —— (crystals). Dinner Cr., 5 miles N.W.byN. of Stanwell, 21 miles (by rail and road) S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 131, p. 21 (1898).

7052. ——. *Assoc.with* Copper Pyrites and Olivine. *Loc.* Sel. (1822), Filly Flat, Gigoomgan Run, 20 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 59, p. 8 (1890).

——.**Sanidine** (*var.*). *Syn.* Glassy Felspar. Occurs as vitreous, transparent crystals in acidic volcanic rocks.

7053. —— ——. In elvan rock. *Loc.* Watsonville, head of James's Cr., 7 miles E.S.E. of Stannary Hills Rail. Stn. (Chillagoe Br. line). *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 61 (1900).

7054. —— —— (crystals). In trachytic tuff. *Loc.* Finlayson Hills, 22 miles N.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 53, p. 3 (1889).

7055. —— ——. In trachytic dyke. *Loc.* Calliope, Raglan Road, 12 miles S.S.W. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 21, p. 1 (1885).

7056. —— —— (crystals). *Loc.* Alawaina (D'Entrecasteaux Islands), 260 miles E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 24 (1892).

Ortona Copper Mines, N.W. of Gilberton. *Discovery:* In 1899, by Prospectors Scardon and Smythe. *Min.Ref.* Azurite, *see* 202A; Malachite, 6246A; Redruthite, 7281A; Tile Ore, 2550A.

Ortt's Mine, Yorkey's Goldfield. *Min.Ref.* Copper Pyrites, *see* 2330; Epidote, 2609; Gold, 4411; Hematite, 4807; Iron Pyrites, 5454; Zinc Blende, 8213.

Oruba Mine, 2 miles E. of Zillmanton Rail. Stn. *Min.Ref.* Copper carbonate, *see* 1897; Hematite, 4720; Tenorite, 7724.

Osmiridium. *Syn.* Iridosmine. *Compo.*, Iridium, osmium, etc. *Colour*, tin-white. Malleable with difficulty. *H.* = 6-7. *Sp.gr.* = 19·3-21·12. *Contents* (*max.*), Iridium 43 to 77 per cent., Osmium 17 to 48 per cent.

MINERAL NOTE: Found with traces of platinum, gold, tin, and monazite, in the beach sands of Currumbin Beach, nr. Tweed Heads. The quantity of this mineral present in the sands is very small, and would not pay for extraction, but with gold, platinum and tin also present it has been considered worthy of the attention of miners. So far, however, all attempts to treat the beach sands have not been successful.

7057. ——. *Assoc.with* Platinum, in sand. Mouth of Tweed R., 69 miles (by rail) S.E. of Brisbane, on South Coast line. *Co.* Ward; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 196, p. 11 (1905).

7058. ——. Gira Goldfield, Mambare R., 96 miles N.N.E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.M.

Osmium (Os). *Atom.Wt.* = 190·9. *Sp.gr.* = 22·47. *Colour*, bluish-metallic. Hard. Very heavy. *See* Osmiridium.

USES: Chiefly used in the manufacture of incandescent electric light filament. It is also used, in the form of Osmiridium, the native alloy, in the tipping of gold pens.

Oswald Mine, 8 miles N.N.W. of Anakie. *Min.Ref.* Gold, *see* 4168; Limonite, 5895; Magnetite, 6028.

Otago N. Mine, Gympie Goldfield. *Min.Ref.* Gold, *see* 4468.

Other Goldfields. *See* list of Subsidiary Fields and Mining Centres, Plate 46, 46A.

MINERAL STATISTICS: Gold, *see tables and diagram*, Pls. 36, 46, 46A, 47.

STATISTICAL NOTE: Several of these goldfields have yielded large quantities of gold, but they are not individually mentioned in the Annual Reports of the Mines Department, and their yields cannot be separated from one another. The total yield of gold from these small fields to end of 1912 amounted to 782,704 fine oz., valued at £3,324,711. This is equal to 4·42 per cent. of the whole gold production of the State.

Otho Camp, 4 miles N.W. of Calcifer. *Min.Ref.* Cerussite, *see* 1194; Copper carbonate, 1898; Cuprite, 2432; Malachite, 6229; Redruthite, 7279; Silver, 7467.

—— Lease (32), Chillagoe. *Min.Ref.* Cerussite, *see* 1194; Malachite, 6229; Silver, 7467.

Otto's Claim, McMaster's (Top Camp), Clermont. *Min.Ref.* Gold (alluvial), *see* 3277; Iron Pyrites, 5316.

Ottrelite. *Compo.*, Hyd. silicate of alumina and iron. *Colour*, greyish, greenish-grey. Occurs as imbedded grains in slate. *H.* = 6-7. *Sp.gr.* = 3·3.

7059. ——. In slate. Mareeba, 46 miles (by rail) W.byS. of Cairns, Cairns Railway, Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* **Cook.** *Ref.* B.D.

Pakington Co. Port Curtis and Leichhardt Districts. *See maps*, Pls. 2, 10.

Palen (Par. of), Pors. 26V and 37, S.W. of Beaudesert. *Min.Ref.* Coal, *see* 1782A, 1782B.

Palgrave Goldfield—

Situation: *See maps*, Pls. 12, 13. The field is 21 miles W.S.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. Centre about *Lat.* 28° 10′ S.; *Long.* 151° 40′ E.

Proclamation of Field: First gazetted, 25th July, 1890; last alteration gazetted, 3rd July, 1897, as follows:—Commencing at the south-east corner of portion 4V, and bounded thence on the north by that portion and a line bearing west 329 chains; on the west by a line bearing south 106 chains and 88 links; on the south by a line bearing east about 301 chains and 51 links; and on the east by a road bearing 340 degrees 8 chains, 10 degrees 25 chains and 25 links, 28 degrees 6 chains and 40 links, 9 degrees 30 minutes 27 chains and 33 links, 45 degrees 21 chains and 4 links, 11 degrees 11 chains and 97 links, and 27 degrees 15 chains to the point of commencement.

Area: 3,226 acres (ab. 5 sq. miles).

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram.* Pls. 36, 46, 46A, 47.

Mineral References: Gold, *see* 3848, 3849.

Geological Note: No geological examination has been made of the field.

Geological Publications: *Nil.*

Warden: Stationed at Warwick. Inspector of Mines: Stationed at Gympie.

Palladium (Pd). *Atom.Wt.* = 106·7. *Sp.gr.* = 11·8. Occurs as a native alloy with Platinum.

Pallico Bore. *See under* Artesian Bores. No. 226.

Palm Creek (Colliery). *See* Tannymorel Colliery.

Palmer Co. Warrego Dist. *See map*, Pl. 18.

Palmer Goldfield—

Situation: *See maps*, Pls. 8, 9. The township of Maytown is 36 miles S. of Laura Rail. Stn. (Cooktown line), and 103 miles (by rail and road) S.byW. of Cooktown. *Cos.* Banks, Chelmsford, Dagmar, King, and Strathleven; *Dist.* Cook.

Population: 678 (census, 1911).

Discovery: Gold was discovered on the Palmer in August, 1872, by the Hann Exploring Expedition. J. Mulligan and party prospected the same field in 1873, and in that year found gold in payable quantities. In September, as a result of the discovery, a rush by thousands of poor inexperienced men took place with disastrous results, and the Government at that time found it necessary to guarantee the A.S.N. Co. (now the A.U.S.N. Co.) £1 10s. as fare for every person who desired to return by their steamers. Amongst those remaining were many experienced miners who prospected the Palmer more thoroughly, and in July, 1874, rich alluvial gold deposits were found, and when this became known another rush took place of greater magnitude than the first one. People from all parts of Australasia and New Zealand flocked to Cooktown, the port for the Palmer Goldfield, and in a few months over 30,000 Europeans had arrived by steamers and otherwise, and were soon on their way to the New Eldorado. Chinamen began to enter Cooktown about the end of 1874, and early in 1875 there were fully 15,000 in the district, this number increasing to 25,000 later on. Most of the Chinese were from Hongkong, but many came from the mines at the Expedition Range, near Clermont. Mr. Russell Dixon, who was an official at Cooktown during the Palmer rushes, and closely in touch with shipping companies, states that the Government estimate of the number of Europeans and Chinamen on the field in 1875—26,000—was much too small, the actual number being over 50,000.

Tin was discovered on the Palmer about 1879 at Cannibal Cr., the value of output prior to 1880 being estimated at £22,500.

Proclamation of Field: First gazetted, 27th November, 1873; last alteration gazetted, 2nd June, 1910, as follows:—Commencing at the confluence of the King River with the Palmer River, and bounded thence by the King River and Annie Creek upwards to the Great Dividing Range; thence by that range south-east and east to the west watershed of Brady and Shepherd Creeks (the heads of the Little Laura River), by that watershed northerly, and the north watershed of Shepherd Creek north-easterly to its junction with the Little Laura River; thence by the north and east watersheds of a small creek and the east watershed of Shepherd and Brady Creeks easterly and southerly to the Great Dividing Range; by that range in an easterly direction to the west watershed of the West Normanby River; by that watershed and the north-west watershed of Isabella Creek (a tributary of said river) north-easterly and easterly to the junction of the said creek with the West Normanby River; thence by the east watershed of the West Normanby River and tributaries above the junction of Isabella Creek easterly and southerly again to the Great Dividing Range; by that range south-east to north-west watershed of Spencer Creek (one of the heads of McLeod River); by that watershed south-west to the north-east corner of Crystal Springs Block; by that block west and south-west to North-west watershed of the McLeod River; by that watershed and the watershed between the St. George and Mitchell Rivers south-west and west to the Mitchell River at the junction of the said rivers; thence by the Mitchell River downwards to the west watershed of the Little Mitchell River; by that watershed north to the south watershed of the Palmer River; by that watershed west and the south-west watershed of Arabella Creek north-west to the point of commencement.

Area: 2,208,000 acres (3,450 sq. miles).

Palmer Goldfield—*continued*:

Leases: Gold-mining Leases and applications in force, 11; area, 70 acres. Miners' Homestead Leases and applications, 5; area, 90 acres (1912).

Principal Mining Centres: Gold—Maytown, Limestone, Palmerville, Jessop's Hill, etc. Tin—Cannibal Creek, Granite Creek, *which see*.

Mineral Statistics: Gold, *see tables and diagrams*, Pls. 36, 46, 46a, 47. Tin, *see tables*, Pls. 38, 46, 46a.

Gold, Average Values: *See under* Gold.

Statistical Note: Greatest recorded annual gold yield was in 1878, 116,759 fine oz., value £495,960. Smallest annual gold yield was in 1911, 214 fine oz., worth £909. Previous to the year 1878 (*i.e.*, from 1874 to 1877) the returns of gold from the Palmer were bunched, the four years' yield being estimated at 819,647 fine oz. From 1878 onward the gold yield of this field fluctuated, but generally became less and less every year.

The total yield of gold of this field to end of the year 1912 is estimated to be 1,327,016 fine oz., valued at £5,636,802. This is equal to 7·43 per cent. of the whole production of the State.

Mineral References: Gold (alluvial), *see* 3205-3207, (reef) 3670-3691; Lead (Anglesite), 16, (Massicot) 6531; Copper (Cuprite), 2426, 2427, (Malachite) 6212-6214, (Tile Ore) 2545; Tin (Cassiterite), 834; Scheelite, 7340; Manganese (Dioxide), 6403, (Psilomelane) 7083, 7084, (Pyrolusite) 7116; Rutile, 7326; Iron (Hematite), 4704, (Ilmenite) 4890, (Ironstone) 5518, 5519, (Mispickel) 6673-6675; Limestone, 633; Marble, 582. Other Minerals: Kaolin, 5675; Muscovite, 6889; Ruby, 2358.

Geological Note: Palaeozoic schists, slates, and quartzites outcrop over a portion of the field, and in places are capped with conglomerates and sandstones belonging to the Desert Sandstone Formation (Upper Cretaceous). Limestone outcrops are also to be seen, together with well-defined dolerite and diorite intrusions in the slates and schists. £5,000,000 worth of gold has been taken from the watercourses and alluvial flats on the Palmer, but no deep leads have so far been discovered. Reefs occur in the slates and schists, and are of a promising character, but have not received the attention they deserve. *See* G.S.Q. Pubs. 108, 123, 144 for details.

Geological Publications: Reports Nos. 41 (1888), 46 (1889), 108 (1896), 123 (1897), 144 (1899). Maps Nos. 109, 110, 111. *See under* Geol. Surv. Pub. List for title. *See also under* Govt. Ming. Jour., Report No. 28. *See also* A.R.D.M., pp. 81-88 (1887).

Paradise Bore. *See under* Artesian Bores. No. 229.

Paradise Goldfield—

Situation: *See maps*, Pls. 4, 5. Two miles below Yarrabil Cr., 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. Centre about *Lat.* 25° 25′ S.; *Long.* 152° 13′ E.

Discovery: In 1889, by Messrs. Allen and party.

Proclamation of Field: First and only one gazetted, 28th November, 1890, as follows:—Commencing on the right bank of the Burnett River at the crossing of the road from Mount Perry to Tawah Creek, and bounded thence on the north-east by a line bearing 135 degrees, three miles and a-half; on the south-east by a line bearing 225 degrees, four miles and three-quarters; on the south-west by a line bearing 315 degrees, one mile and a-half to the north-west boundary of the Chowey Run, by that boundary (being the south-eastern watershed of Yarrabil or Bin Bin Creek) northerly to the Burnett River; and thence by the Burnett River downwards to the point of commencement.

Area: 8,320 acres (13 sq. miles).

Mineral Statistics: Gold, *included in* "Other Goldfields" *in tables and diagram*, Pls. 36, 46, 46A, 47.

Statistical Notes: *See under* Other Goldfields.

Mineral References: Gold, *see* 3608-3620; Lead (Galena), 2725; Copper (Ore), 2024; Zinc Blende, 8070; Iron (Iron Pyrites) 5003, 5004, (Ironstone) 5515; Limestone, 627. Other Minerals—Magnesite, 5944.

Geological Note: The country rocks consist of siliceous slates, quartzites, limestones, and porphyry, the slates preponderating, but the relation of these rocks to one another are not understood. Quartz reefs traverse the slates, and have been worked to some extent, the gold in the reefs being finely disseminated, and troublesome to save. Alluvial deposits of gold are unknown. *See* G.S.Q. Pubs. Nos. 68 and 178 for details.

Geological Publications: Reports—Nos. 68, 173. *See under* Geol. Surv. Pub. List for titles.

Warden: Stationed at Maryborough. Inspector of Mines: Stationed at Rockhampton.

Paroo Mineral (Opal) Field—

Situation: *See maps,* Pls. 18, 19. About 75 to 95 miles W.N.W. to N.W. of Cunnamulla Rail. Stn. *Cos.* Bulloo, Humeburn, Norley, and Wellington; *Dist.* Warrego. Between *Lats.* 27° and 28° S.; *Longs.* 144° and 145° E.

Proclamation of Field: First (and only one) gazetted, 30th July, 1897, as follows:—Commencing on the left bank of the Coorni Paroo River at the south-west corner of Owthorpe No. 9 Block, and bounded thence on the south by the south boundaries of Owthorpe No. 9 and Down, by part of the east boundary of Down, by the north and part of the east boundary of Box Camp, the south boundary of Cecil Plains, part of the west and the south boundaries of Cecil Downs, by part of the west and the south boundaries of Retrae and Dundoo; on the east by the east boundaries of Dundoo and Marathon East, by part of the south boundary of Chevy, by the east boundaries of Chevy, Wanco, and Morton Plains; on the north by the north boundaries of Morton Plains, Wanco, Watoota, and Green to Beengala Creek; on the west by that creek downwards to the Coorni Paroo River; and thence by that river to the point of commencement.

Area: 987,520 acres (1,543 sq. miles).

Principal Mining Centres: Duck, Sheep Station, and Emu Creeks and Lushington Opal Mines, *which see.*

Mineral Statistics: Opal, *see stat. tables,* Pls. 44, 46, 46a.

Statistical Note: The Opal Mining Centres in the Paroo Mineral Field produced in the year 1895 opal to the value of £12,500, the previous year's product being valued at £12,000. In the years 1891 and 1892 the returns were equal, viz., £10,000 each, but since the year 1895 the results fluctuated and gradually dwindled until, in the year 1909, the value of the opal won was only £450. The total yield of opal to the end of 1912 equalled £73,805. This value is equal to 44·40 per cent. of the total production of opal in the State.

Mineral References: Precious Opal, *see* 6955-6961.

Geological Note: The rocks of the Paroo Mineral Field comprise "Desert Sandstone" (Upper Cretaceous), and "Rolling Downs" (Lower Cretaceous) Formations. The Opal is found under varying conditions, commonly in white, grey, or pink sandstone, and in ironstone bands, and sometimes in pipe-like or pencil-like formations.

Pentland, Cape R. Goldfield. *See maps*, Pls. 16, 17. *Lat.*, 20° 34′ S.; *Long.*, 145° 25′ E. *Includes* Hayward, Sarah Howson, Big, Just-in-Time, and Mystery Reefs, and Hughes' Leader.

Mineral Reference: Galena, *see* 2949; Gold (alluvial) 3272, (reef) 4053-4058; Iron Pyrites, 5264-5266; Ironstone, 5552. *See also under* Govt. Ming. Jour., Report No. 95

Geological Note: The drift above the "wash" is made up of pebbles of quartz, schist, granite, and quartzite. The wash is a "cement" containing quartz pebbles, and rests on a bedrock of decomposed schist. Near the source the lead is narrow, and the deposits are payable, but where the lead is deep and wide there is very little gold. *See* G.S.Q. Pub. 96 for details and map.

—— Deep Lead, Cape R. Goldfield. *Min.Ref.* Gold (alluvial), *see* 3272.

Penycoed Bore. *See under* Artesian Bores. No. 388.

Penzance Mine, 3 miles N.E. of Mungana (Chillagoe line). *Min.Ref.* Azurite, *see* 200; Cerussite, 1209; Copper (ore), 2033; Copper Pyrites, 2176; Cuprite, 2441; Galena, 2807, 2808; Garnet, 3112; Hematite, 4718; Iron Pyrites, 5077; Malachite, 6241; Minium, 6590; Pyrrhotite, 7157; Silver, 7466; Wollastonite, 8043; Zinc Blende, 8088.

Peppin and Webber's Opal Mine, Keeroongooloo Run. *Min.Ref.* Opal (precious), *see* 6946a.

Pera Co. Cook Dist. *See map*, Pl. 8.

Percy Co. Cook Dist. *See map*, Pl. 8.

—— Island (No. 2), N.E. of St. Lawrence. *Min.Ref.* Ironsand, *see* 5479; Magnetite, 6050.

Percy River, Etheridge Goldfield. *Min.Ref.* Agate, *see* 1371: Azurite, 202a; Bismutite, 400, 401; Cassiterite, 971; Copper carbonate, 1900; Corundum, 2368; Cuprite, 2442; Garnet, 3155; Gold (alluvial) 3236, (reef) 3831; Hematite, 4724; Limestone, 622; Malachite, 6246a; Redruthite, 7281a, 7282; Sapphire, 2345; Tile Ore, 2550a.

Percyville, Etheridge Goldfield.

GEOLOGICAL NOTE: The rocks consist of schists and intrusive masses of granite. Quartzites (of undetermined age) and outliers of Desert Sandstone (Upper Cretaceous) cap the hills in the district. Gold is obtained both in the reefs and alluvium. *See* G.S.Q. Pub. 151 for details and map.

MINERAL NOTE: 30,000 tons of stone crushed many years ago. Reef 2 ft. wide, carrying gold (7 oz.), copper (22 per cent.), and silver (7 oz.). Value of gold, 7s. 6d. per oz.

—— (about 4 miles below). *Min.Ref.* Corundum, *see* 2368; Sapphire, 2345.

Pericoota Bore. *See under* Artesian Bores. No. 356.

Peridot. *Syn.* (and *var.* of) Olivine, *which see.* Colour is a light or dark olive green

Perringunga Bore. *See under* Artesian Bores. No. 229.

Perry Goldfield—

SITUATION: *See maps*, Pls. 4, 5. St. Agnes Cr., Perry R., 15 miles S. of Gin Gin Rail. Stn., 44 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. Centre about *Lat.* 25° 10′ S.; *Long.* 151° 50′ E.

PROCLAMATION OF FIELD: First (and only one) gazetted, 13th April, 1904, as follows:—The whole catchment area of the Perry River from a north and south line passing along the west boundary of Agricultural Homestead Portion 12v to a point three miles up the said river.

DISCOVERY: In 1902.

AREA: 11,200 acres = 17½ sq. miles.

MINERAL STATISTICS: Gold, *included in* "Other Goldfields" *in tables and diagram*, Pls. 36, 46, 46A, 47.

STATISTICAL NOTES: *See under* "Other Goldfields." No separate records.

MINERAL REFERENCES: Gold, 3589; Copper (Azurite) 173, (Malachite) 6194, 6195; Molybdenite, 6816, 6817; Manganese (Psilomelane) 7080; Iron (Iron Pyrites) 4994, (Turgite) 7886.

GEOLOGICAL NOTE: The country rock of the whole field is a much-folded clay schist, in which there are several lenticular-shaped gold-bearing quartz veins. Small quantities of limestone occur in the schist, while the granite, whose relation to the schist is unknown, is present on the west side of the Perry River. *See* G.S.Q. Pub. 184 for details.

GEOLOGICAL PUBLICATIONS: Report—No. 184 (1903). *See under* Geol. Surv. Pub. List for title.

Phosphates—

Minerals: *See* Apatite (lime), Cacoxenite (iron), Chalcolite (copper-uranium), Guano (lime), Lazulite (alumina-iron-magnesia), Monazite (cerium-lanthanum-didymium), Pyromorphite (lead), Turquoise (alumina-vanadium), Vivianite (iron).

Uses: *See note under* Calcium.

Geological Note: The phosphatic deposits at Olsen's and Johansen's limestone caves, close to the Fitzroy River above Rockhampton, are of comparatively recent formation, and are exclusively the accumulation of bat guano. They were exploited to some extent a few years ago, but the investigations, although not exhaustive, were considered unsatisfactory, and the work was abandoned. *See* Q.G.M.J., Nov. 1903, p. 572. Recently other examinations have been made, but the results are not known.

Apatite occurs on several of the islands and on the mainland about Keppel Bay in the form of small veins, associated with Turquoise in quartzite and slate. The amount of phosphoric acid in the deposits which have been examined is too small to pay for extraction. *See* G.S.Q. Pub. No. 190 (1904).

Phosphorus (P.). *Atom.Wt.* = 31·04; *Sp.gr.* = 1·83—2·34, varying with the condition. *Colour*, yellowish. Semi-transparent.

Minerals: *See under* Phosphates.

Uses: Phosphorus is an important ingredient in some of the igniting compositions forming the heads of matches, and small quantities of the element are mixed with tin to form phosphor-tin and with copper to form phosphor-bronze. Some of its compounds are used as fertilizers, reference to which is made under Calcium.

Pialba. Cretaceous Coal Measures abound in this locality, and a few small coal seams have been exposed. Below these measures there exists a series of Cretaceous marine beds.

Pibald, nr. Dundee. *Min.Ref.* Manganese-dioxide, *see* 6479.

Piccadilly Goldfield—

Situation: *See maps*, Pls. 16, 17. The Field is about 60 miles N.W. of Ravenswood Junction. *Co.* Wilkie Gray; *Dist.* Kennedy North. Centre—about *Lat.* 19° 18′ S., *Long.* 145° 58′ E.

Population: (Included in Ravenswood returns).

Area: 3,840 acres (6 sq. miles).

Proclamation of Field: First (and only one) gazetted, 7th October, 1898, as follows:—On Smith's, Brook, and Hardwick Blocks, on Dotswood Station. The whole catchment area of the head branches of Piccadilly Creek down to a point bearing east from the north corner of Red Dyke Block.

Mineral Statistics: Gold, *included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46a, 47.

Statistical Note: *See under* "Other Goldfields."

Mineral References: Gold, *see* 4095.

Geological Note: No geological examination has been made.

Geological Publications: *Nil.*

Warden: Stationed at Ravenswood; Inspector of Mines: Stationed at Charters Towers.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Pie Creek, Gympie Goldfield. Manganese discovered here in 1908. *Min.Ref.* Manganese-dioxide, *see* 6494, 6494a; Psilomelane, 7105; Pyrolusite, 7134.

Pigments. Nearly all the minerals used in the preparation of paints and enamels are to be found in the State. No details are supplied regarding their paint-making qualities, but their occurrences are mentioned under separate mineral headings.

PIGMENTS,	MINERALS, METALS, ETC.
Bronzes	Copper, tin, zinc, aluminium, bismuth, mercury, mica.
Blue	Cobalt, copper, azurite, barytes, gypsum, lapis lazuli, kaolin, tripolite, sulphur.
Brown	Iron oxides.
Chromes—	
green	Chromium.
yellow	Chromium, lead, zinc.
lemon	Chromium, barium.
orange	Chromium, lead.
red	Chromium, lead.
Green	Chromium, barytes, gypsum, copper, lead, iron, arsenic, malachite, cobalt, green earth, phosphoric acid, boron, zinc.
Grey	Graphite.
Lake bases	Barytes, gypsum, kaolin, chalk, zinc oxide, tripolite.
Ochres	Red, yellow, and brown (Iron).
Orange	Cadmium, chromium, lead.
Red	Iron, lead, mercury, copper, barytes
White	Barytes, kaolin, gypsum, lead, zinc.
Yellow	Antimony, arsenic, barium, cobalt, chromium, mercury, iron, lead, strontium.

• Pike's Creek, Stanthorpe. Heads at Herries Range, flows west for about 7 miles, thence south 42 miles, entering the Dumaresq River, 34 miles S.W. byS. of Stanthorpe. Length about 50 miles. *Tribs.*, Ten-mile, Lighthouse, Oaky, Spring, Stockyard, Little Plains, and other Creeks. *Min.Ref.* Cassiterite, *see* 999; Hematite, 4725; Magnetite, 6001; Mispickel, 6717.

Pikedale (Ten-mile) Creek, Stanthorpe. *Min.Ref.* Cassiterite, *see* 997; Gold, 3840; Iron Pyrites, 5109; Mispickel, 6721: Molybdenite, 6854; Wolfram, 7989.

Pikedale Goldfield—

SITUATION: *See maps*, Pls. 12, 13. The Goldfield is about 20 miles N.W. byN. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. Centre—about *Lat.* 21° 27′ S., *Long.* 151° 50′ E.

POPULATION: Included in Stanthorpe returns.

DISCOVERY: In 1877.

AREA: 19,200 acres (30 sq. miles).

PROCLAMATION OF FIELD: First (and only one) gazetted, 2nd November, 1877, as follows:—Commencing at the Rosenthal Gate on the road from Warwick to Pikedale, where it crosses the watershed separating the Condamine River from the Barwon River, and bounded thence by a line bearing south-west six miles; then by a line north-west about six miles to the northern watershed of Pike's Creek; thence by that watershed north-easterly about four miles, and south-easterly about six miles to the point of commencement.

MINERAL STATISTICS: Gold. *Included in* "Other Goldfields" *in stat. tables and diagrams*, Pls. 36, 46, 46A, 47.

STATISTICAL NOTE: *See under* "Other Goldfields." No separate record.

MINERAL REFERENCES: Gold (alluvial), *see* 3246, (reef) 3834-3839; Lead (Galena), 2832; Manganese (Psilomelane), 7086; Iron (Iron Pyrites), 5110-5112, (Mispickel), 6719, 6720.

GEOLOGICAL NOTE: The country rocks are slate and greywackes (? Permo-Carboniferous), disturbed occasionally by intrusions of diorite, and traversed in numerous places by gold-bearing quartz veins.

GEOLOGICAL PUBLICATIONS: Reports Nos. 105 (1895), 120 (1898). *See under* Geol. Surv. Pub. List for title. *Also under* Supplementary Report List, Nos. 30, 116.

WARDEN: Stationed at Stanthorpe. INSPECTOR OF MINES: Stationed at Gympie and Ipswich.

Pirate Lease, Tate River. *Min.Ref.* Bornite, *see* 419.

Pitch. *Syn.* Asphaltum, *which see.*

Pitchblende. *Syn.* Uraninite. *Compo.*, Uranate of uranyl, lead, etc. *Colour and Streak*, velvet-black. *Lustre*, pitch-black. *H.* = 5·5. *Sp.gr.* = 9·0-9·7. *Contents* (*max.*), Oxides of Uranium 69 to 86 per cent.

MINERAL NOTE: Pitchblende, in association with Cassiterite and Chalcolite, has been found in traces in Northern Queensland. The conditions under which it is found in other countries often occur here on the tin and wolfram fields of Herberton and Chillagoe in Northern Queensland, and miners are always on the lookout for the mineral. A great number of inquiries have been made at the Geological Survey Office concerning it, but samples sent for examination have failed to show its presence. A common source of error is the confusion of the names Pitchstone and Pitchblende, miners often getting the impression that Pitchstone is the valuable radio-active mineral. *See* notes under Uranium and Radium.

7068. —— (traces). *Assoc.with* Cassiterite and Chalcolite. *Loc.* Gladstone Tin Mine, Eureka Cr., Stannary Hills, 93 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* B.D.

7069. —— (?). In quartz lode in granite (?). *Loc.* In mountainous country, right-hand branch of Sheep Station Cr. between Monsildale and Jimna, about 15 miles N.E.byN. of Linville Rail. Stn. (Brisbane-Valley line). *Co.* Canning; *Dist.* Moreton.

Platinum (Pt.). *Atom.Wt.* 195·2. *Sp.gr.* 21·5 (pure). *Colour,* bright silver-white.

MINERAL NOTE: Platinum has been found on the Russell River Goldfield and at Gympie, in association with alluvial gold deposits, and at the latter place also in gold-bearing quartz reefs. It also is found in the beach sands near the mouth of the Tweed River at Currumbin Beach, with osmiridium, monazite, gold, and tin. Many attempts have been made by individual miners to work the beach sands of the Tweed, but without satisfactory results. Increased demands and smaller production, and the consequent higher value, should stimulate the prospecting for this mineral.

USES: Crucibles, dishes, wire, foil, etc., used in chemical operations necessitating the employment of corrosive acids, are made of platinum. The metal is also used in the manufacture of surgical, physiological, and electrical appliances, and as a mount for diamond setting in the better class of jewellery. Compounds of platinum are used in photographic processes, and as chemical reagents. For most uses platinum is best alloyed with a small quantity of iridium, the two in combination forming a hard and tough alloy.

DISCOVERY: First found in 1869, at Brickfield Gully, Gympie Goldfield, several pieces up to 8 dwt. being found with alluvial gold.

Platinum (native). *Compo.,* Platinum, iron, iridium, etc. *Colour,* whitish. Metallic. Malleable. *H.* = 4-4·5. *Sp.gr.* = 14-19. *Contents (max.),* Platinum 51 to 86 per cent., with iridium, iron, etc.

7072. —— (in minute flakes). *Assoc.with* Gold, in alluvial deposits. *Loc.* Clarke and Joss's Claim, on terraces between Cooppooroo, Wairamba Creeks, Russell Goldfield, 21 miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 45, p, 3 (1888).

7073. ——. *Assoc.with* Gold, Silver, Tin, Monazite, and Osmiridium, in beach sands. *Loc.* At the mouth of the Tweed River and between Currumbin Creek and Point Danger, 69 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 198 (1905).

7074. —— (?). *Assoc.with* Gold, in alluvial deposits. *Loc.* Brickfield Gully, nr. Lady Mary Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* B.D.

7074A. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* In Warren Hastings Shaft, in Lady Mary and Alma Reefs (on 1st bed of slate), Gympie Goldfield (*ante*). *Ref.* B.D.

Pleasant Lode, Alma Cr., S.S.E. of Mt. Morgan. *Min.Ref.* Ilmenite, *see* 4912.

Poingdestre Bore. *See under* Artesian Bores. No. 297.

Point Danger (Tweed Heads). Nr. Currumbin Beach, 69 miles (by rail) S.S.E. of Brisbane. *Min.Ref.* Cassiterite, *see* 1174; Gold, 3370; Monazite, 6881; Platinum, 7073; Silver, 7511; Sphaerosiderite, 7422.

GEOLOGICAL NOTE: The rocks forming the headland consist of basalt. In some places the basalt has a columnar structure, but is generally massive or irregularly bedded. Common black opal occurs in the basalt, and is, apparently, an alteration product of tripolite, the latter mineral being frequently found in association with basalt in this district.

Police Cr., br. of Gregory R., S.S.W. of Burketown. *Min.Ref.* Hematite, *see* 4677; Hornstone, 1391; Ironstone, 5487; Manganese-dioxide, 6389; Pyrolusite, 7115; Yellow Ochre, 5933.

Port Clinton—

Situation: *See maps,* Pls. 2, 3. About 64 miles N.byE. of Rockhampton. *Co.* Palmerston; *Dist.* Port Curtis. *Lat.*, 22° 30′ S.; *Long.*, 150° 47′ E.

Harbourage: The entrance to the port is easy. Depth of water at wharf is 18 ft. at L.W.S.

Mineral Reference: Coal, *see* 1801, 1802.

Geological Note: Coal Measures belonging to the Trias-Jura System occur to the south, resting on granite and a series of quartzites and other sedimentary rocks belonging to the Devonian System. The coal is the brown variety (lignite), and contains 10 per cent. of moisture and 7½ per cent of ash. *See under* Coal Analyses.

Geological Survey Publications: Report No. 174. *See under* Geol. Surv. Pub. List for title.

—— —— Coal Measures. *See* Waterpark Creek.

Port Curtis District—

Situation, Etc.: *See maps,* Pls. 2, 3. On the Tropic of Capricorn. Between *Lat.* 21° and 25°; *Long.* 149° and 152°. Bounded on the east by the Pacific Ocean; on the south by the Districts of Wide Bay and Burnett; on the west by the District of Leichhardt; and on the north-west by the District of South Kennedy. The principal rivers, with their tribs., are—St. Lawrence, Styx, Fitzroy (tribs. Dee, Don, and Callide), Calliope, and Boyne (trib. Eastern Boyne).

Area (in sq. miles): 14,054. With islands included, 14,370.

Principal Mining Centres: Gold and Mineral Fields—Canoona, Cawarral, Morinish, Ridgelands, Rosewood, Stanwell, Mt. Morgan (late Crocodile), Mt. Rainbow, Barmundoo (Tableland), Ulam, Langmorn, Cania and Kroombit (principal part), Calliope, Boyne, Mt. Larcombe, Fig-tree, Maxwelton, Uncle Sam, Eastern Boyne, Milton (Norton), Monal, Glassford Cr., Bompa, Rosedale, and Iron Is., *which see.* Coal Fields—Styx, Callide Cr., *which see.*

Counties:

Clinton Co.

Barmundoo (Tableland) Goldfield (*in part—see also* Raglan Co.), Bompa Goldfield, Calliope Goldfield, Diglum Cr., Eastern Boyne Prov. Goldfield, Fig-tree Prov. Goldfield, Glassford Cr. Mineral Field (Many Peaks Copper Mines, Bompa Silver-Lead Mines), Langmorn Goldfield (*in part—see also* Deas Thomson Co.), Maxwelton Goldfield, Milton (Norton) Goldfield, Monal Goldfield (*see also under* Rawbelle Co., Burnett Dist.), Mt. Hector Copper Mine, Mt. Larcombe Prov. Goldfield, Uncle Sam Prov. Goldfield, Round Mountain, Sneaker's Gully (Gold).

Deas Thompson Co.

Langmorn Goldfield (*principal part—see also* Clinton Co.) (Raglan, Targinie), Ulam Goldfield.

Flinders Co.

Rodd Peninsula, Rosedale Mineral Field.

Liebeg Co.

Canoona Goldfield, Marlborough, Princhester, Woodville.

Livingstone Co.

Cawarral Goldfield (Mt. Chalmers, Mt. Warminster, Mt. Wheeler, New Zealand Gully), Morinish Goldfield, Mt. Morgan (late Crocodile Cr.) Goldfield (*in part—see also* Raglan Co.), Ridgelands Goldfield, Rockhampton (Broadmount, Datum Point, Emu Park, Gracemere, Keppel Is., Lake's Cr., Mackenzie Is.), Stanwell Goldfield (*principal part—see also* Pakington Co.), Yaamba, Yeppoon.

Murchison Co.

St. Lawrence (Broadsound), Styx R. Coalfield, Clairview (Copper).

Port Curtis District—*continued:*

Pakington Co. (*in part—see also* Leichhardt Dist.).

Boolburra, Edungalba, Gainsford, Gogango, Rannes, Rosewood Goldfield, Stanwell Goldfield (*in part—see also* Livingstone Co.), Westwood.

Palmerston Co.

Duke Group, Northumberland Isles (Bamborough, Hunter, Iron, Marble, Mortar, Tynemouth Islands).

Pelham Co.

Cania and Kroombit Goldfield (*see also under* Rawbelle Co., Burnett Dist.)

Raglan Co.

Barmundoo (Tableland) Goldfield (*in part—see also* Clinton Co.), Callide Cr. Coalfield, Dee R. (gold nuggets), Don R., Dundee, Mt. Morgan (late Crocodile Cr.) Goldfield (*principal part—see also* Livingstone Co.), Mt. Rainbow Goldfield.

MINERAL REFERENCES AND STATISTICS: *See under* names of Principal Mining Centres.

Port Douglas—

SITUATION: *See maps,* Pls. 8, 9, 22. About 1,104 miles N.W. of Brisbane. *Co.* Nares; *Dist.* Cook. *Lat.*, 16° 29′ S.; *Long.*, 145° 27′ E.

PORT for Mt. Spurgeon and other Tin Mines.

HARBOURAGE: Dickson's Inlet is the harbour for the port. The bar has been dredged to give a depth of 10 ft. at L.W.S. The wharf has 15 ft. at L.W.S. Spring tides vary from 7 ft. to 8 ft.; neaps, 2 ft. to 4 ft.

MINERAL STATISTICS: Tin, *see tables,* Pls. 38, 46, 46A; Copper, Pls. 39, 46, 46A; Wolfram, Pls. 42, 46, 46A.

GEOLOGICAL NOTE: The rocks in and around the Port are of Gympie Formation (Permo-Carboniferous).

GEOLOGICAL PUBLICATIONS: *Nil.*

WARDEN: Stationed at Port Douglas. INSPECTOR OF MINES: Stationed at Herberton.

Port Glasgow, Brit. New Guinea. *Min.Ref.* Limestone, *see* 709.

Port Moresby, Brit. New Guinea. *Min.Ref.* Chalcedony, *see* 1366; Chert, 1414; Hornstone, 1394; Iron Pyrites, 5474; Limonite, 5928, 5929.

Port Newry—

SITUATION: *See maps,* Pls. 14, 15. The Port is about 30 miles N.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Lat.*, 20° 50′ S.; *Long.*, 148° 55′ E.

HARBOURAGE: Port Newry affords a safe harbour for vessels, having a number of islands in the vicinity and an anchorage of over 5 fathoms. There is deep water close to the islands, but no wharf accommodation.

GEOLOGICAL NOTE: Permo-Carboniferous Coal Measures occur in the locality, although no seams of coal have been found in them.

Port Stewart—

SITUATION: *See maps,* Pls. 8, 9. 144 miles N.W. of Cooktown. *Co.* Sidmouth; *Dist.* Cook. *Lat.*, 14° 10′ S.; *Long.*, 143° 40′ E.

PORT for the Coen, Hamilton, and Rocky River Gold and Mineral Fields.

HARBOURAGE: Navigable for vessels of the smallest tonnage. Spring tides rise from 9 ft. to 10 ft.; neaps about 6 ft. Wharf is nearly dry at low water.

GEOLOGICAL NOTE: The casual examination made of this locality shows the prevailing rock to be granite.

Proclamations—

The following gold and mineral fields have been officially proclaimed in the *Queensland Government Gazette.* Details are given under separate heading :—

Agate Downs G.F.
Alice River (Philp) G.F.
Allandale G. and M.F.
Anakie M.F.
Balcooma G.F.
Barmundoo (Tableland) G.F.
Bompa G.F.
Boolboonda G. and M.F.
Bowden M.F.
Bower Bird G.F.
Burketown M.F.
Calliope G.F.
Canal Creek G.F.
Cania and Kroombit G.F.
Canoona G.F.
Cape River G.F.
Carrington G.F.
Cawarral G. and M.F.
Charters Towers G.F.
Chillagoe G. and M.F.
Chowey G.F.
Clermont G.F.
Cloncurry G. and M.F.
Coen G.F.
Cooktown M.F.
Croydon G.F.
Cunnamulla M.F.
Duchess G. and M.F.
Eidsvold G.F.
Eidsvold Extended G.F.
Enoggera G.F.
Etheridge G.F.
Eungella G.F.
Gaeta G.F.
Glassford Creek M.F.
Glastonbury G.F.
Grasstree G.F.
Green Hills G.F.
Gympie G.F.
Hamilton G.F.
Herberton G. and M.F.
Hodgkinson G.F.
Horn Island G.F.
Jimna G.F.
Jordan Creek G.F.
Kangaroo Hills M.F.
Kilkivan G. and M.F.
Langmorn G. and M.F.
Leyburn G.F.
Lucky Valley G.F.
Mareeba G.F.
Marodian G.F.
Maxwelton G.F.
Milton (Norton) G.F.
Monal G.F.
Morinish G.F.
Mt. Cannindah M.F.
Mt. Flora G. and M.F.
Mt. Morgan G.F.
Mt. Oxide G. and M.F.
Mt. Rainbow G.F.
Mt. Shamrock G. and M.F.
Mt. Spencer G. and M.F.
Mt. Wyatt G.F.
Mulgrave G.F.
Nanango G.F.
Nebo (Mt. Britton) G.F.
Normanby G.F.
Oaks G. and M.F.
Opalton M.F.
Palgrave G.F.
Palmer G.F.
Paradise G.F.
Paroo M.F.
Perry G.F.
Piccadilly G.F.
Pikedale G.F.
Ravenswood G.F.
Reid's Creek G.F.
Ridgelands G.F.
Rocky River G.F.
Rosedale M.F.
Rosewood G.F.
Russell G.F.
Russell Extended (Towalla) G.F.
Sellheim M.F.
Springs Rush Extd. G.F.
St. John's Cr. G.F.
Stanthorpe M.F.
Stanton-Harcourt G.F.
Stanwell G.F.
Star River (Argentine) M.F.
Starcke Nos. 1 and 2 G.F.
Strathalbyn G.F.
Talgai G.F.
Tenningering (Mt. Perry) G. and M.F.
Thane's Creek G.F.
Ulam G.F.
Windsor Extended G.F.
Woolgar G.F.
Yabba G.F.
Yatton G.F.

Prodigal Copper M.L. (490), Cloncurry. *Min.Ref.* Limonite, *see* 5863; Malachite, 6261; Tile Ore, 2555.

Proprietary Tin Mines, Smith's Cr., Nymbool. *Min.Ref.* Cassiterite, *see* 1142; Copper Pyrites, 2215; Zinc Blende, 8114. *See also under* Govt. Ming. Jour., Report No. 13.

7077A. **Prosopite.** *Compo.*, Hyd. fluoride of alumina and calcium. *Colour*, snowy-white. Translucent. Granular massive. *H.*, 4½. *Sp.gr.*, 2·7. *Analysis:* Fluorine, 31·6; Aluminium, 15·9; Calcium, 16·3; Sodium, trace; Silica, 11·9; H_2O at 100° C., trace; Combined H_2O, 13·0 per cent. *Note.*—Mineral evidently "partly kaolinised" (F. E. Connor). *Assoc.with* Green Fluorspar. *Loc.* Devon Mine, Coolgarra. *Co.* Cardwell; *Dist.* N. Kennedy. *Ref.* Dr. Edlinger.

Prospecting Coastal Coal Deposits. *See under* Supplementary Reports, No. 137.

Prospecting for Minerals in Queensland—

REQUIREMENTS: Beyond the actual tools for mining, a tent for sleeping in, and utensils for cooking purposes, very little is required. A geographical map of the district is useful, and may be obtained from the Lands Department in Brisbane. Geological and mineral reports on various localities are issued by the Geological Survey Office. A compass is also useful, but is seldom seen with prospectors, as they are accustomed to find their position by the sun or by characteristic features of the bush. In examining country, a prospector generally travels on foot, and carries his "swag." Sometimes he requisitions a barrow or hand truck, more frequently he has one or two horses, and at times a horse and dray.

TEXT-BOOK AND BLOWPIPE: A book about simple minerals and a small set of blowpipe appliances would be very useful to the prospector. Not one per cent. of those who are prospecting have any knowledge of how to test minerals, and yet the knowledge is very easily acquired. Queensland is so prolific in minerals that, without a knowledge of mineralogy, a prospector's chances of finding valuable deposits are very much less than they would be with that knowledge, and perhaps it would be no exaggeration to state that a prospector who is a mineralogist with a bush experience would be about equal to ten prospectors who know nothing about mineralogy. In an area where both would be prospecting the field mineralogist would discover valuable features which the other would pass over nine times out of ten.

GOLD PROSPECTING: In alluvial mining as well as in reef prospecting, to mate with a man of experience is the first desideratum. Tin dish, pick and shovel, and small pestle and mortar (dolly pot) are necessary, and when alluvial gold is found a "cradle" or a "wet-jigger" will be required, the latter being more commonly used in late years. Sluice boxes are also used where timber is available and water plentiful. When water is scarce, but other conditions being favourable—*i.e.*, the gold coarse wash not clayey, &c.—the Queensland miner sometimes uses a "dry blower," several types of which are on the market, or he may use a dry jigger made up of a frame of sieves of his own construction, on which the gold is caught, and which is cleaned by "dry washing," using the wind to separate the gold from impurities by dropping the dust from one dish to another, or throwing it up in the wind and catching it again in the same dish. In reef prospecting the pestle and mortar and dish are indispensable for crushing and reducing the samples, but the actual value of the stone, although thus gauged approximately, can only be accurately determined by carefully weighing the sample and the resulting concentrate of gold or gold-bearing mineral, an operation the prospector has no conveniences for doing. When stone is mineralized, and if the prospector is not expert at testing it, an average sample is sent to the Geological Survey Office. (*See* Assaying Samples for Prospectors.)

TIN PROSPECTING: *See* note above on Gold Prospecting, which generally apply to tin prospecting. The prospector uses a dish or shovel in testing a sample of wash-dirt for alluvial tin, and, if satisfied that the ore is present in payable quantities, he generally stacks the dirt in heaps until the "wet season" arrives, when the accumulation of months is cleaned up in a week or so. His appliances are roughly-made sluice boxes or "wet-jiggers." Tin prospecting in the "dry season" is carried on by "dry blowers," as with gold, although the arrangement for saving the mineral has to be varied. In lode tin-mining the pestle and mortar, or a flat-iron sheet (or shovel) and hammer, are used for crushing samples, and after cleaning with water, the amount of tin present can fairly well be determined. Complex ores are forwarded to the Geological Survey Office, Brisbane, for examination.

COPPER PROSPECTING: In this, as in all other classes of mineral prospecting, a study of the geological features of the country is useful, and a knowledge of copper-bearing minerals is a distinct advantage, while the possession of a rough method of approximately determining the percentage of copper, the details of which cannot be entered into here, enables a prospector to gauge the value of any discovery he makes.

Prospecting for Minerals in Queensland—*continued:*

WOLFRAM PROSPECTING: Those prospecting for tin also acquire a knowledge of the mode of occurrence of wolfram, as the two minerals are often found in the same class of country, and sometimes in the same lode. The novice should acquire specimens of wolfram and those minerals which closely resemble it, as some iron ores are easily mistaken for wolfram and very liable to mislead. Geological features are important to study, also minerals associated with wolfram, but after some experience in wolfram-bearing country, the prospector can identify the mineral very quickly, and pick out the lodes which are likely to contain it.

MOLYBDENITE PROSPECTING: Molybdenite is a common associate of wolfram, and once seen can always be identified afterwards. All prospectors look for molybdenite at the same time they are searching for wolfram.

SILVER AND SILVER-LEAD PROSPECTING: The general remarks about copper prospecting applies also to silver-lead. Indeed, a prospector in Queensland, to be well-equipped, wants to have a good general knowledge of all minerals of commercial value, as half a dozen valuable minerals might be found in the same locality, and even in the same mine. Many rich silver-bearing lodes give no surface indication of being valuable, and even experienced prospectors sometimes overlook such deposits. If in doubt the samples should be assayed.

SAPPHIRE PROSPECTING: Prospecting for sapphires is very much like prospecting for alluvial gold, both minerals being found under identical conditions, even the methods of treating the wash being much the same. Some classes of deposits permit of dry concentration by sieving, the sapphires being picked out by hand from the stones associated with them. "Sapphire Fields of Anakie" is a descriptive report of the only working mines in the Commonwealth. *See under* "Geological Survey Publications."

OPAL PROSPECTING: Geological features are to be closely studied by the prospector, and an examination of an opal mine in Western Queensland is about the only way to get a knowledge of the work. There are several kinds of opal deposits, but the mode of occurrence varies but little. A few chips of the various kinds of opal is useful for comparative purposes. The disposal of opal is effected by sending it under offer to recognised dealers in the cities of the Commonwealth, or by selling it direct to dealers or their agents visiting the field. The miners sometimes visit the cities, and there find buyers of the opal in small or large parcels. "The Opal Fields of Queensland" is a descriptive report on the Western Opal Fields. *See under* "Geological Survey Publications."

COAL PROSPECTING: Most of the important coal deposits have been discovered by accident, but some have been the result of careful search. The geological features of coal measures must be understood when looking for coal, and a geological map of the State, or portions of it, will be of advantage to him. The prospector should also have some knowledge of the effects of weathering agencies on coal, as good seams of coal may occur and yet give no indication of their quality on the outcrop. The Geological Survey Office can give him information about any district he desires to prospect, and also the local geological features he may expect to meet with. Samples carefully taken are tested by the Geological Survey Office free of cost to bonâ fide prospectors. *See further notes under* Coal.

LOW GRADE DEPOSITS: Some experience is required in estimating the values of large low-grade deposits of gold, tin, etc. In alluvial mining the general method is to test the ground by a preliminary sampling of the surface. Then quantities and values are determined by systematic boring, and by assays. In large lodes or formations of low-grade ore the installation of expensive plant is necessary for economic treatment, so the sampling and the determination of quantities have to be carried out most carefully. The prospector may find a low-grade deposit, but it is generally left to the geologist or mining engineer to determine its potentialities.

RARE METALS AND MINERALS: The Geological Survey Office furnishes prospectors with all information concerning rare metals and minerals, and frequently is able to supply him with small chips for reference purposes. The same office will supply him with the latest market quotations, and can generally place him in communication with dealers, agents, or buyers.

Prospecting for Minerals in Queensland—*continued:*

MINERAL LOCALITIES: Information concerning localities can be obtained from the text of this Index under the names of the minerals or of the localities, and also from a study of the accompanying maps. Some of the maps show the districts, counties, and other geographical features of the State; others give the details of the principal mining fields, together with geological and mineral notes. The publications of the Geological Survey Office may also be consulted, and information acquired since the publication of this work can be obtained from the officers. There are only a few fields in Queensland where the mining industry has reached its maximum development, or where operations have been discontinued on account of the ore deposits being exhausted. Many fields have been worked for a time, then abandoned, and perhaps after an interval of some years, have sprung into activity again. It is, therefore, difficult to know where operations might not be successful, even though undertaken on fields which have been worked previously. There is an immense number of localities, however, which have not been prospected at all, or only in a casual manner, and are available to those who desire to undertake the labour or entail the cost of examining them. For the individual miner the opal field of Western Queensland and the sapphire field of Anakie are available, both requiring less experience to become successful than any other class of mining in the State, with the additional inducement, to some, that nearly every man is his own master. The mineral fields of Chillagoe and Herberton are also areas where individual mining is carried on to a great extent, and where parties of a few men work together for years, and where discoveries are constantly being made by men who go out into parts of the bush not previously prospected. The country on the east side of Cape York Peninsula is very little known, but its general geological features indicate that discoveries of gold, tin, wolfram, copper, mercury, and coal may be anticipated. To prospect this part of the State, however, requires capital, as equipment and sustenance are necessary for, perhaps, twelve months at a time. In the Etheridge District, and in the country towards Croydon, vast areas of country carry copper, gold, and other minerals, but they have only been partly examined. A railway recently constructed across this area will considerably aid in its future development. The coal areas along the eastern coast, other than those at Ipswich and Burrum, have only been cursorily examined, and might develop into productive fields sooner or later. The Dawson-Mackenzie Coalfields of Central Queensland are as large in size as the whole of England, and contain thousands of square miles of splendid coal country waiting to be opened up. A railway to one of the coal areas is now under construction. Then there is the Burnett District, with its gold and copper-bearing deposits, Wide Bay its coal measures, and Mt. Bopple its beds of graphite, all waiting development, while further south are the coal beds about the Brisbane River and about Beaudesert, and the tripolite deposits near the southern border. Around Rockhampton deposits of chromite, asbestos, and phosphate of lime are to be found, the latter occurring as an impregnation in old quartzites on the coast, and as recent guano deposits in limestone caves. There is a large amount of investigation to be undertaken by the analytical chemist in connection with the classification of minerals and the identification of rare mineral species and varieties. This work cannot be taken in hand by the limited staff of the Geological Survey, and yet it ought to be done. Summarising the general prospects of Queensland from a mineral point of view, no hesitation is felt in stating that Queensland possesses great opportunities for the practical miner and for the speculator who finances prospecting work, besides offering a splendid field for the researches of the scientific observer.

Details of all the places where the search for minerals might be carried on cannot be mentioned here, but references are made under the various locality and mineral names.

PERMIT TO PROSPECT: This is required for all Crown lands. A "Miner's Right" and a copy of the Mining Act, and also any information about taking up ground for mining purposes, can be obtained from any warden's office, or direct from the head office of the Department of Mines.

REWARDS FOR DISCOVERIES: Rewards for the finding of new gold and mineral fields are provided for, the conditions of which are laid down in the "Mining Act and Regulations." *See also under* Rewards for Discovery of New Goldfields.

Prospecting for Minerals in Queensland—*continued:*

DISPUTES WITH OTHER PROSPECTORS: These matters are usually settled by the warden of the district where the mining operations are being carried on. *See under* name of locality for the address of the warden.

ACCIDENTS: In case of accidents, the Inspector of Mines belonging to the district is communicated with, who examines the mine, and finds out the cause of the accident. At the inquiry held afterwards the Warden of the district makes certain recommendations for the consideration of the Minister of Mines as to what action should next be taken. The Inspector also examines the mines periodically to see that all the conditions stipulated in the Mining Act concerning the safety of miners are fulfilled.

PRIVATE ASSISTANCE: Many prospectors receive monetary aid from men with capital, or receive rations from storekeepers or the owners of stations, and a large amount of good work has been accomplished by the assistance thus rendered. If the assisted prospector finds a payable deposit, the capitalist and the prospector participate, it may be equally, in the profits which may result from the sale of the mineral.

FLOTATION OF MINES: If the prospector, working with or without assistance, discovers a valuable lode, he communicates with speculators, and a sale or "float" is arranged on mutually satisfactory terms. Frequently the proceeds of the discovery will enable the miner to employ other men, and to place machinery on the mine to carry on the work without financial assistance, and in this way many gold or mineral mines have been developed.

On the other hand, a prospector, working by himself, or in conjunction with others, discovers a lode which requires a large amount of capital to economically work it, and if he knows of no one willing to take in hand the flotation of the mine, the Secretary of the Stock Exchange of the town nearest to him can give him the names of brokers who will undertake the work, provided the discovery, on the report of some one of authority, is found to be a valuable one. *See under* "Stock Exchanges of Queensland," and "Chambers of Commerce" for localities where these institutions are established.

GOVERNMENT ASSISTANCE: Provision is made every year by Parliament for assisting, by monetary grants, the opening up of mines in new localities or the deeper sinking of mines on established fields. Every assistance is given by the Government to encourage developments in the mining of coal, gold, tin, copper, or other well-known minerals, and also for the discovery of and working of rare metals and deposits of substances (such as asbestos or tripolite) which might be useful for industrial purposes. Up to June, 1912, £34,745 has been spent in assisting prospecting and £80,702 in deep-sinking. *See* details of this *under* "Subsidies."

Prospecting for Mineral Oil. General Notes. *See under* Supplementary Reports, No. 148.

Prospecting in the York Peninsula. (Tour of Mr. Dickie.) *See under* Govt. Ming. Jour., Report No. 111.

—— Samples. *See under* Assaying Mineral Samples.

Proustite. *Syn.* Ruby Silver Ore. *Compo.*, Arseno-sulphide of Silver. *Colour*, cochineal-red. *H.* = 2-2·5. *Sp.gr.* = 5·57-5·64. *Contents* (*max.*), Silver 6 per cent.

7078. ——. Muldiva Silver-Lead Mines, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* P.R.S.Q., vol. 15, p. 50 (1900).

7078A.—— (Ruby silver). Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs..** *Ref.* A.R.D.M., p. 109 (1902).

Providence Reef, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3753.

Psilomelane. *Compo.*, Hyd. oxide of manganese. *Colour*, iron-black. Dull. *H.* = 5-6; *Sp.gr.* = 3·7-4·7. *See notes under* Manganese for uses.

7079. —— As large isolated masses. *Loc.* Between Chinaman and Duck Creeks, about 28 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 10, p. 5 (1883). *Contents* (*average*), Manganese 55 per cent.

7080. ——. *Assoc.with* Azurite and Malachite, in gossan. M.L. No. 16, Perry Scrub, St. Agnes Cr., 15 miles S. of Gin Gin Rail. Stn. (Mt. Perry line), 34 miles (by rail and road) S.W. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 184, p. 13 (1903).

7081. ——. In reef 4 ft. wide, nr. Reid's Cr., 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* B.D.

7082. ——. Hawkwood, *viâ* Chinchilla, 48 miles W.S.W. of Gayndah Rail. Stn. *Co.* Newcastle; *Dist.* Burnett. *Ref.* B.D.

7083. ——. *Assoc.with* Pyrolusite. *Loc.* Laura R., Palmer Goldfield, 67 miles (by rail) W.byS. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Ref.* L.B. 2, p. 539 (1890).

7084. ——. Left-hand branch of Palmer R., 4 miles N.W.byW. of Maytown, Palmer Goldfield. *Co.* Chelmsford; *Dist.* Cook. *Ref.* O.R.

7085. ——. Hambleton Plantation, 7 miles S.S.W. of Cairns. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

7086. ——. Timber Reserve, Pikedale Goldfield, 20 miles N.W.byN. of Stanthorpe *Co.* Bentinck. *Dist.* **Darling Downs..** *Ref.* B.D.

7087. ——. *Assoc.with* Manganese-dioxide (as Wad), Pyrolusite and Limonite. *Loc.* S. of Pikedale Hotel, 11 miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

7088. ——. *Assoc.with* Pyrolusite. Mt. Gammie, Thane's Cr. Goldfield, 21 miles W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs.

7089. ——. *Assoc.with* Wad. *Loc.* Horse Cr., 50 miles S.S.W. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North..** *Ref.* P.R.S.Q., vol. 4, p. 62 (1887).

7090. ——. Greasy Bill's Reef, Pyramids or Seventy-mile Diggings, 3½ miles N.N.E. of Mt. Leyshon, 19½ miles (by road) S. of Charters Towers. *Co.* Davenport; *Dist.* **Kennedy North.** *Ref.* G.S.M.

7091. ——. *Assoc.with* Gold, Ironstone, Epsomite, and Marcasite, in alluvial deposits. *Loc.* Paterson's Claim, McMaster's (Top Camp), 14 miles N.W.byW. of Clermont. *Co.* Dickson; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 201, p. 63 (1906).

7092. ——*Assoc.with* Gold, in alluvial deposits. *Loc* Wild Cat Lead, 1 mile S. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 201, pp. 75-78 (1906).

7093. ——. Impregnating clay slate. Balcomba Range, 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 155 (1901).

7094.——. Nr. Pine Mountain, 7 miles (by rail) N.N.W. of Ipswich, and 31 miles (by rail) W.S.W. of Brisbane. *Co.* Churchill; *Dist.* **Moreton.** *Ref.* G.S.M.

7095. ——. In irregular masses. Mt. Crosby, 12 miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton. *Ref.* B.D.

7096. ——. Beenleigh, 24 miles (by rail) S.E. of Brisbane (South Coast line). *Co.* Ward; *Dist.* Moreton. *Ref.* P.R.S.Q., vol. 4, p. 6 (1887).

7097. ——. Auckland Point, Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.M.

7098. ——. Biondella Hill, 3½ miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 21, p. 1 (1885).

7099. —— (massive). Boat Creek Workings, between Targinie Cr. and Calliope R., 7 miles W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.M.

7100. ——. *Assoc.with* Pyrolusite. *Loc.* Mt. Millar Mine, 6 miles W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.M.

7101. ——. In quartzose slates. Round (One Tree Hill) Hill, 2 miles S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 21, p. 1 (1885).

7102. ——. Ridgelands Goldfield, 20 miles N.W. of Rochampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* O.R.

7103. ——. *Assoc.with* Rhodonite. Pors. (856, 917, 1033), Walla, 5 miles S.S.W. of Gin Gin Rail. Stn. (Mt. Perry line), 34 miles (by rail and road) W. of Bundaberg. *Co.* Bowen; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 189, p. 5 (1904).

7104. ——. Kholo Flat, Running Cr., 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.M.

7105. ——. *Assoc.with* Pyrolusite, in large lode. *Loc.* Pie Creek, W. of Por. 1335, Par. of Glastonbury, 10½ miles S.S.W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Assay:* Manganese-dioxide by available oxygen = 79·0 per cent.; total Manganese = 52·8 per cent.

7106. ——. Armstrong's Sel., Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.M.

7107. ——. *Assoc.with* Gold, Iron Pyrites, Hematite, and Limonite, in quartz reef. *Loc.* Caledonia Claim, Sudest Is., 448 miles E.S.E. of Port Moresby, Brit. New Guinea. *Ref.* G.S.Q. Pub. 85, p. 29 (1892).

——. *See also* Manganese-dioxide, Manganese Ore.

——. **Wad** (*var.*). Friable. Black. Dull. Formed from the other Manganese minerals.

7108. —— ——. *Assoc.with* Cuprite, Malachite, Ironstone, and other Manganese Ores, in lode. *Loc.* Mountain Home Copper Mine, Mt. Norma, 17 miles S.E. of Cloncurry. *Co.* Beaconsfield; *Dist.* **Burke.** *Ref.* P.R.S.Q., vol. 4, p. 62 (1887).

7109. —— ——. *Assoc.with* Pyrolusite, Psilomelane, and Limonite, in beds. *Loc.* S. of Pikedale Hotel, Pikedale, 11 miles W. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 95 (1898).

7110. —— ——. *Assoc.with* Psilomelane. *Loc.* Horse Creek, trib. of Cloncurry R., 5 miles S.S.W. of Cloncurry. *Co.* Merlin; *Dist.* **Gregory North.** *Ref.* P.R.S.Q., vol. 4, p. 62 (1887).

7111. —— ——. In small irregular deposits. *Loc.* Herberton, 12 miles S.S.W. of Atherton Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 58 (1904). *See also under* Manganese-dioxide.

Public Service Officers. *See* list of classified and unclassified officers, published annually. Contains list of all professional and clerical officers of the Departments with age, date of appointment, salaries, etc.

7129. ——. *Assoc.with* Ironstone, in quartz. *Loc.* Auckland Point, 1 mile N.W.byN. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 21, p. 1 (1883).

7130. ——. *Assoc.with* Psilomelane. *Loc.* Mt. Millar Mine, 6 miles W. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.M.

7131. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Hematite, Magnetite, Limonite, Göthite, and Satin Spar. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* and *Assays*) G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), and 132 (1898).

7132. ——. *Assoc.with* Psilomelane. *Loc.* Por. (917), Walla, 5 miles S.S.W. of Gin Gin Rail. Stn., 34 miles (by rail and road) W. of Bundaberg. *Co.* Bowen; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 189, pp. 7, 8 (1904).

7133. ——. *Loc.* Dryfesdale, Glastonbury, 17 miles W. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

7134. ——. *Assoc.with* Psilomelane, in large lode. Skyring's Mine, Pie Cr., W. of Por. 1335, Par. of Glastonbury, 10½ miles S.S.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Assay:* Manganese-dioxide by available oxygen = 91·3 per cent. Total Manganese = 58·3 per cent. *Ref.* A.R., p. 148 (1908).

——. *See also* Manganese-dioxide.

Pyromorphite. *Compo.*, Phosphate of lead. *Colour*, greenish, yellowish, brownish. *Streak*, white. *Lustre*, resinous. *H.* = 3·5-4. *Sp.gr.* = 6·5-7·1. *Contents* (*max.*), Lead 76 per cent.

7135. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Billy Brown Reef, Mark Twain Centre, 5 miles E.N.E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 118, p. 46 (1896).

7136. ——. *Assoc.with* Gold, Cerussite, and Ironstone, in quartz. *Loc.* Federation Reef, Tabletop, 9 miles N.N.E. of Croydon Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

7137. ——. *Assoc.with* Gold, Anglesite, and Massicot. *Loc.* Hope Reef, Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, p. 36 (1896).

7138. ——. *Assoc.with* Gold and Massicot. *Loc.* Mt. Morgan Reef, Tabletop (*ante*). *Ref.* G.S.Q. Pub. 118, p. 35 (1896).

7139. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Cerussite, and Massicot. *Loc.* Tabletop Reefs, 8 miles N.N.E. of Croydon Rail. Stn. (Normanton-Croydon line). *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 118, p. 34 (1896).

7140. ——. Aurora Reef, 8 miles S.W. of Georgetown, Etheridge Goldfield. *Co.* Gilbert; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 35, p. 5 (1887).

7141. ——. *Loc.* Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

7142. Pyromorphite. *Loc.* Calcifer, 132 miles (by rail) W.S.W. of Cairns (Cairns-Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.M.

7143. ——. *Loc.* Paisley Silver Mine, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

7143A. Pyromorphite. *Assoc.with* Wulfenite ? (tungsten-bearing) in a matrix of porous ironstone and quartz. *Loc.* Christmas Gift Mine, Chillagoe, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

7144. ——. *Loc.* Gilbert R., about 50 miles S.E. of Charleston, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 4, p. 71 (1887).

7145. ——. Coolgarra Tin Mines, 12 miles (by coach) N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

7146. ——. *Loc.* Newellton (Silver Valley), 10 miles S.E.E. of Irvinebank, 10 miles S.W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

7147. ——. *Loc.* Alice Shaft, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* G.S.M.

7148. ——. *Assoc.with* Galena, Cerussite, Minium, Anglesite, and Linarite, in lode. *Loc.* Alpha Silver-Lead Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) from Ravenswood Junction. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assay: See* 2981. *Ref.* G.S.Q. Pub. 26, p. 2 (1886).

7149. ——. Ruby Cr., 8 miles N.N.W. of Anakie Rail. Stn. (Central line). *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* P.R.S.Q., vol. 4, p. 71 (1887).

7150. ——. *Assoc.with* Cerussite and Altaite, in quartz. *Loc.* 5 miles from Maxwelton, 40 miles S.W of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* O.R.

7151. ——. St. Aignan (Misima) Is., Louisiade Archipelago, 379 miles E.byS. of Port Moresby, Brit. New Guinea.

Pyrope. *Var. of* Garnet, *which see.*

Pyrrhotite. *Syn.* Pyrrotine. Magnetic Pyrites. *Compo.*, Sulphide of iron. *Colour*, bronze-yellow, copper red. Metallic, magnetic. *H.* = 3·5-4·5. *Sp.gr.* = 4·58-4·64. *See note under* Nickel. *Contents* (*max.*), Iron 61 per cent.

7152. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Copper Pyrites, Cuprite, Malachite, Tenorite, Bismuthinite, Zinc Blende, Hematite, and Calcite, in quartz lode. *Loc.* Commonwealth Mine, Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), 207, pp. 14-19 (1907).

7153. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Zinc Blende, in quartz. *Loc.* Queenslander Mine, Charleston, 140 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, p. 13 (1909), and O.R.

7154. ——. *Assoc.with* Iron Pyrites and Copper Pyrites, in quartz. *Loc.* Havelock Mine, 5 miles S. of Charleston Rail. Stn., Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 219, p. 11 (1909), and O.R.

7154A. ——. *Assoc.with* Copper Pyrites, Garnet, Hornblende, and Calcite, in quartz. *Loc.* Einasleigh Copper Mine, 102 miles (by rail) S.S.W. of Almaden Rail. Stn. (Etheridge line). *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, pp. 21-26 (1911).

7155. ——. Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 56 (1900).

7156. ——. Watsonville, head of James Cr., br. of Walsh R., 7 miles E.S.E. of Stannary Hills Rail. Stn., 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 56 (1900).

7157. ——. Penzance Mine, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), 152 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook.

7158. ——. Herberton, 12 miles S.S.W. of Atherton Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 15, p. 56 (1900).

7159. ——. *Assoc.with* Ironstone, in the "Brownstone" of the Charters Towers Goldfield. *Ref.* P.R.S.Q., vol. 4, p. 50 (1887).

7160. ——. *Assoc.with* with Gold, Iron Pyrites, and Hematite, in quartz. *Loc.* Greasy Bill's Reef, Pyramids or Seventy-mile, 3½ miles N.N.E. of Mt. Leyshon. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 1, p. 19 (1879).

7161. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Zinc Blende. *Loc.* Mines on the Ravenswood Goldfield, 78 miles (by rail) S. of Townsville (Gt. Northern line). *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

7161A.——. *Assoc.with* Iron Pyrites, Hematite, Limonite, Magnetite, Copper Pyrites, Malachite, Azurite, in granite and slate. *Loc.* Rodger's Back Sel. (1430), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 228, pp. 41, 42 (1910).

7161B.——. *Assoc.with* Iron Pyrites, in graphitic schist and quartz. *Loc.* Tambourine Mt., 10 miles S.S.E. of Logan Village Rail. Stn. (Beaudesert Br. line). *Co.* Ward; *Dist.* **Moreton.** *Ref.* O.R. (1910).

7161C.——. *Assoc.with* Copper Pyrites. *Loc.* Many Peaks Copper Mine, Deception Cr., 58 miles (by rail) S. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* B.D.

7161D.——. Crow's Creek, Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* B.D.

7162. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and traces of Nickel, in quartz reef. *Loc.* Hector Mine, on Crocodile Cr. Rd., 6 miles S. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 27 (1897), and G.S.M.

7163. ——. Containing small quantities of Cobalt. Hunter's Gully, Morinish Goldfield, 29 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* B.D.

7164. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Redruthite, Mispickel, Galena, and Stibnite. *Loc.* Mariner's Reef, Black Snake Goldfield, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Assays:* *See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

7165. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* Motha Mt., nr. Gympie, 106 miles (by rail) N.byW. of Brisbane. *Co.* March; *Dist.* Wide Bay. *Ref.* A.R., p. 152 (1908).

Quambeytook Bore. *See under* Artesian Bores. No. 375.

Quambone East Sub-atresian Bore. *See under* Artesian Bores. No. 441.

Quarrell's Bore. *See under* Artesian Bores. No. 325.

Quarry, below Spring Bluff Rail. Stn. *Min.Ref.* Olivine, *see* 6929B.

—— Cr., nr. Stanwell. *Min.Ref.* Coal, *see* 1797. *See* Quarry Cr., and Petersen's Bores *under* Coal Bores.

—— Hill, nr. Clermont. *Min.Ref.* Coal Bands, *see* 1674.

—— Reserve, Toowoomba. *Min.Ref.* Sphærosiderite, *see* 7421.

Quart Pot Cr., Stanthorpe. *See* Pl. 30. *See maps,* Pls. 12, 13, 30. Heads at the Dividing Range, near Mt. Hume; flows N. for about 12 miles, where it is joined by Sugarloaf Cr., then south through Stanthorpe to form the Severn River. Length about 18 miles. Tribs., McLaughlin Cr., Paddock Swamp Cr., Mountain Stn. Cr., Sugarloaf Cr., Kettle Swamp Cr., Dolcoath or Ten Mile Cr.

—— —— —— and Severn R. (junction of), ½-mile N.W. of Stanthorpe. *Min.Ref.* Cassiterite, *see* 1013; Diamond, 2577; Sapphire, 2349.

—— —— —— and Kettle Swamp Cr. (junction of), Stanthorpe Township. *Min.Ref.* Chromite, *see* 1473.

Quart Pot Cr. Opal Field, Yerounghoola Run, Kyabra Opal Field. Centre—about *Lat.* 27° 25′ S., *Long.* 144° 29′ E. *Min.Ref.* Opal (precious), *see* 6944.

Geological Note: The rocks in which the opal occurs are of "Desert Sandstone" Formation (Upper Cretaceous). The opal is found in sandstone boulders, and in small irregular veins and pipes of silica (chalcedony) and oxide of iron (limonite). *See* G.S.Q. Pub. No. 177 for details.

Quartz. *Compo.*, Silica (silicon dioxide). *Colour*, white, yellowish, etc., sometimes colourless. *H.* = 7. *Sp.gr.* = 2·653-2·654. *Varieties*, Amethyst (purple), Cairngorm (yellowish and smoky), Rock Crystal (clear and colourless), Rose Quartz (pinkish white), Sinter.

Mineral Note: Large crystals of quartz occur at Croydon, some of the specimens being eight inches in diameter. They are, however, too discoloured for optical purposes. Amethyst is comparatively rare, but small crystals, one inch in diameter, are found near Bowen. Cairngorm is common at Stanthorpe, and is occasionally used for jewellery. Rock crystal is common, but stones sufficiently large for optical purposes are rare. Sagemite (Rutile needles in quartz) is not uncommon at Stanthorpe, and good specimens are much in demand for pendants and as curiosities.

7165a.——. **Amethyst** (*Var.*). *Assoc.with* Cassiterite, Ilmenite, Rutile, Topaz, and Zircon, in alluvial deposit. *Loc.* P.C. Workings, Rocky Cr., 5 miles above Brovinia Cr., br. of Cardarga Cr., 35½ miles S.S.W. of Gayndah, 60 miles (by road) *viâ* Cooranga Head Stn. *Co.* Newcastle; *Dist.* **Burnett.** *Ref.* Q.G.M.J., vol. 5, p. 62 (1904).

Queensland (State of). (*See under* Districts of Queensland for subdivisions.)

Boundaries: Commencing at Point Danger (28·8° S. Lat.), thence by Macpherson Range to the Dumaresq and Macintyre Rivers; thence by the 29th parallel to 141° E. Long.; thence northerly to the 26th parallel; thence westerly to the 138° E. Long.; and thence northerly to the Gulf of Carpentaria and Torres Strait (including all islands between Papua and Cape York Peninsula) to the Pacific Ocean; and thence southerly by the Great Barrier Reef to the point of commencement.

Population (1912): 636,425.

Area: The total area of the State, exclusive of islands, is 670,500 sq. miles (429,120,000 acres). With the islands included, the area is 673,040 sq. miles (430,745,600 acres). *See under* Districts of the State for details.

Radiated Pyrites. *Syn.* Marcasite, *which see.*

Radio-active Minerals. *See* Chalcolite, Monazite, Pitchblende.

Radium (R.). *Atom.wt.* = 226·5.

MINERALS: *See* Chalcolite, Pitchblende, and Monazite. The two former minerals have been found only in traces, but Monazite occurs in several mines on the tin and wolfram fields of Chillagoe and Herberton, in Northern Queensland.

GEOLOGICAL NOTE: Pitchblende, the main source of radium, has been found in small quantities in the State, and the conditions under which the mineral usually occurs are so pronounced that every encouragement can be given to prospect for it. About the Chillagoe, Herberton, and Fossilbrook Fields, and many other places in Northern Queensland, and also in the Burnett district and on the Southern border of the State, the country seems favourable for its occurrence. Other minerals slightly radio-active, more particularly Monazite, are found in numerous localities, and Chalcolite, the uran-mica, has also been recorded.

Rafter's Sel., 63 (Bromelton), 5 miles W. of Beaudesert. *Min.Ref.* Coal, *see* 1780.

Railways of the State. Four main trunk lines extend from the eastern coast to inland districts, the longest being from Brisbane to Cunnamulla, 604 miles, the three others being Townsville to Cloncurry, 480 miles, Rockhampton to Longreach, 428 miles, and Cairns to Charleston, 258 miles. Brisbane is connected with Gympie, Maryborough, Gladstone, and Rockhampton by a line 397 miles long, and extensions are contemplated to connect Mackay, Bowen, and Townsville with this coastal system. Altogether, there are 3,532 miles of line open for traffic, and 285 miles under construction. Most of the railways are owned by the State, but some are owned by private companies. Railway connections with mining centres are mentioned under name of locality or field, and details concerning fares, distances, etc., are given in the "Queensland Railway Guide," obtainable at all railway stations, or from the Booking Office, The City Block, Edward street, Brisbane.

Railway Freights. For coal, ore, explosives, and machinery freights, *write to* Traffic Manager, Railway Department, Brisbane. *Note.*—A specialist is employed to determine classification of goods, and to fix freight charges.

Rainbow Creek. Flows into Callide Cr., 50 miles S.W. of Gladstone. *Min.Ref.* Copper carbonate, *see* 1963; Magnetite, 6053.

—— M.L. (2454), Boomerang Group, Cloncurry. *Min.Ref.* Antimony, *see* 69; Copper Pyrites, 2074; Cuprite, 2394, 2395; Malachite, 6098, 6099; Stibnite, 7604; Tetrahedrite, 7754, 7755.

Ravenswood Goldfield—

Situation: *See maps*, Pls. 16, 17, 29. *Cos.* Davenport, Elphinstone, Murray, and Wilkie Gray; *Dist.* Kennedy North. Centre—about *Lat.* 20° 05′ S., *Long.* 146° 52′ E.

Discovery: Gold was found at Middle Camp in 1868 by Buchanan and party. A rush to the field took place from Mt. Wyatt in 1869, but the most important development occurred in 1870. Silver Lodes were found by King, at Totley's, in 1879. *See* History of Ravenswood, by F. Vaughan, in Ann. Rep. Mines Dep., 1891.

Population: 3,028 (estimated by Warden, 1912).

Proclamation of Field: First gazetted, 3rd November, 1870; last gazetted, 4th January, 1911, as follows:—Commencing on the north bank of the Burdekin River near a tree marked broad-arrow over B over 25 about two miles and twenty chains upstream from junction of Glenroy Creek and the Burdekin River, and bounded thence on the east by a line north to the Leichhardt Range, by that range north-westerly about twenty-two miles to a point due south from the south-west corner of Hillsborough Block; thence by a line bearing 340 degrees for about ten miles; thence by another line west to Hervey Range, by that range north-westerly to the eastern boundary of Warwick Block; thence by a line south-westerly to the road from Ravenswood Junction to the Star Silver Mines, by that road north-westerly to the southern boundary of Fanning River Holding, by that boundary to the eastern boundary of Arthur's Peak Block, by the eastern boundary of that block and Dotswood Block northerly to the north-east corner of a camping and water reserve R. 13, by the northern boundary of that reserve westerly to the western bank of Keelbottom Creek, by that creek upwards to the southern boundary of Watershed Block; thence westerly and northerly by part of the southern and western boundaries of that block, the western boundary of Watershed North Block, and a line north to the head of a creek north of Melon Creek, by that creek downwards to the Little Star River, by that river downwards to Dinner Creek; thence upwards along that creek and Jupiter Creek to a point north of the north-west corner of Dotswood Holding, portion B, by a line south thereto; thence south-easterly along the north-eastern boundary of that holding to Keelbottom Creek, by that creek upwards about two miles to the north of the south-west corner of camping and water reserve, R. 13; thence by a line south to the northern boundary of Burdekin Downs Block; thence easterly and southerly by part of the north and part of the east boundaries of that block to a point about sixty chains south from the north-east corner of same; thence by a line east to the eastern bank of the Fanning River, by that river downwards to the south-west corner of portion 2v, parish of Burdekin; thence by a line south to the southern boundary of portion 3v, same parish, by the southern boundary of that portion easterly to the south-western watershed of Pandanus Creek, by that watershed south-easterly to the north-western corner of Bosworth Block, by the western boundary of that block southerly to the Burdekin River, by that river downwards to the eastern boundary of same block; thence northerly to the south-western watershed of Pandanus Creek, by that watershed south-easterly to the confluence of Pandanus Creek and Burdekin River, by the Burdekin River downwards to a point north of the north-west corner of Dreghorn Block; thence by a line south passing along the western boundary of that block to the north-east corner of Cardigan No. 2 Block; thence westerly and southerly by the northern and western boundaries of that block to the south-east corner of Spring Creek No. 2 Block, by the southern boundaries of that block and Spring Creek No. 1 Block to the southern watershed of the Burdekin River; thence by that watershed south-easterly to the confluence of the Suttor and Burdekin Rivers; thence by a line east to the east bank of the Burdekin River, and by that river downwards to the point of commencement.

Ravenswood Goldfield—*continued:*

Area: 1,024,000 acres = 1,600 sq. miles.

Leases: Gold Mining Leases and Applications in force, 24; area, 486 acres. Mineral Leases and Applications, 4; area, 110 acres. Miners' Homestead Leases and Applications, 440; area, 2,414 acres (1912).

Principal Mining Centres: Ravenswood Township, Sandy Creek, Four-mile Creek, Hillsborough (Eight-mile), Donnybrook. Trieste, Fish Creek, Canton, Kirk Diggings, One-mile, *which see.*

Mineral Statistics:—

Gold,	*see tables and diagram,* Pls. 36, 46, 46A, 47.
Silver,	*see tables* Pls. 37, 46, 46A.
Antimony,	,, ,, ,, 40, 46, 46A.
Bismuth,	,, ,, ,, 40, 46, 46A.
Molybdenite,	,, ,, ,, 42, 46, 46A.

Statistcal Note: Greatest recorded annual gold yield was in 1905, being 42,465 fine oz., and valued at £180,380. Smallest recorded amount of gold yield was in 1882, being 6,973 fine oz., and valued at £29,619. To the end of 1877 the yield of gold from the Ravenswood Goldfield was returned at 154,094 fine oz. From 1878 to 1896 the returns of the field fluctuated considerably, varying between 8,000 oz. and 12,000 oz. During subsequent years the yields improved, the amount increasing to 35,806 fine oz. in 1908. Total yield of gold to the end of 1912 is 822,275 ozs., valued at £3,492,799. This is equal to 4·65 per cent of the whole gold production of the State.

Mineral References: Gold (alluvial) *see* 3262-3264, (reef) 4008, 4043, 4080; Silver 7484-7487, (Stephanite) 7603; Lead (Azurite) 214A, (Cerusite) 1227-1229, (Galena) 2924-2945; Copper (Chancanthite) 1332, (Copper Pyrites) 2222A-2234, (Malachite) 6288, 6288A, (Tenorite) 7730, (Tetrahedrite) 7771; Antimony (Stibnite), 7642-7645; Cadmium Blende, 440; Zinc Blende, 8138-8155; Iron (Hematite) 4743, (Iron Pyrites) 5235-5259, (Mispickel) 6745-6748, (Pyrrhotite) 7161; Other Minerals—Barytes, 274; Calcite, 503; Muscovite, 6894; Steatite, 7691.

Geological Note: The gold-bearing reefs are found in an area of normal and hornblende granites, while outside this area to the east of the town there are greywackes, slates, and altered sandstones. Dykes of felsite traverse the granites, and high quartz blows form conspicuous outcrops. *See* G.S.Q. Pub. No. 152 for details.

Geological Publications: Reports—Nos. 152 (1900), 156 (1901), 183 (1903). *See* Geol. Surv. Pub. List for titles; *also* Supplementary Report List, No. 142. For Plans of Leases, etc., in Ann. Reports, *see* List *under* Department of Mines.

Warden: Stationed at Ravenswood; Inspector of Mines: Stationed at Charters Towers.

Reports (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

—— Plains, nr. Ipswich Rail. line. Discovery—Coal found here by Mr. Andrew Petrie, in 1843. *Min.Ref.* Oil-bearing Shale, *see* 6915.

—— —— Bores (no record). *See note under* Ipswich Coalfield, *under* Coal Bores.

Redcap Creek. *See map*, Pls, 8, 9, 22. 3 miles N.E. of Mungana, *Min.Ref.* Azurite, *see* 200; Cerussite, 1209-1211; Chrysocolla, 1520; Copper Ore, 2032, 2033; Copper Pyrites, 2176; Cuprite, 2441; Galena, 2807-2809; Garnet, 3112; Hematite, 4718; Ironstone, 5531; Limestone, 640; Limonite, 5845 Lithomarge, 5709; Malachite, 6240-6243; Manganese-dioxide, 6411; Minium, 6590, 6591; Pyrolusite, 7119; Pyrrhotite, 7157; Siderite, 7407; Silver, 7465, 7466; Tetrahedrite, 7767; Wollastonite, 8043; Zinc Blende, 8088.

Redcliffe, Moreton Bay. *Min.Ref.* Chalcedony, *see* 1357.

Geological Note: The rocks comprise sandstone and ferruginous clays and shales belonging to the Ipswich Series (Trias-Jura). Coaly shales are said to occur somewhere along the shores of Deception Bay to the north.

—— Sub-artesian Bores. *See under* Artesian Bores. Nos. 376, 377.

Reddle. *Var.* of Hematite, *which see.*

Redhead Bore. *See under* Artesian Bores. No. 432.

Redland (Par. of), Por. 22. *Min.Ref.* Coal, *see* 1772.

Redruthite. *Syn.* Chalcocite, Copper Glance, Grey Copper Ore (*in part*). *Compo.*, Sulphide of copper. *Colour and Streak*, blackish, lead-grey. *Lustre*, metallic. *H.* = 2·5-3. *Sp.gr.* = 5·5-5·8. *Contents* (*max.*), Copper 79 per cent..

7201. ——. *Assoc.with* Copper Pyrites and Limonite. *Loc.* 4 miles W. of Blackeye Springs, McKinlay, 68 miles S.E.byE. of **Cloncurry.** *Co.* Allison; *Dist.* **Burke.** *Ref.* A.R., p. 107 (1907).

7202. ——. *Assoc.with* Copper carbonate, in lode. *Loc.* Argylla M.F. (3073), Argylla Cr., 40 miles W. of Cloncurry. *Co.* Argylla; *Dist.* Burke. *Assays:* Copper = 15·95 and 35·2 per cent. *Ref.* G.S.Q. Pub. 153, p. 8 (1900).

7203. ——. *Assoc.with* Gold. *Loc.* S. of Lease (61), Dugald R., 45 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 153, p. 8 (1900).

7204. ——. *Assoc.with* Azurite, Malachite, Ironstone, Ilmenite, Calcite, Biotite, and Chlorite, in granite, quartz felspar, and schist. *Loc.* Mavis M.L. (315), Longamundi Group, Cattle Cr., Dugald R., 38 miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 283, 284 (1908).

7204a. ——. *Assoc.with* Copper Pyrites, Malachite, Limonite, and Actinolite, in gossan and schist. *Loc.* Melba M.L. (319) (Melba Group), Corella R., 39 miles W.S.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 210 (1908).

7205. ——. *Assoc.with* Malachite and Limonite, in quartzite, schist, and gossan. *Loc.* Ruth M.L. (335) (Mt. Remarkable Group), Bullock Head Cr., Glenroy, Leichhardt R., 51 miles W.N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 291, 292 (1908).

7206. ——. *Assoc.with* Copper Pyrites and Chrysocolla, in quartz, slate, and schist, *Loc.* Native Companion P.C. (19) (Native Companion Group), Palm Tree Cr., 26½ miles N.W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 273 (1908).

7206a. ——. In lode. *Loc.* Sunset M.L. (267) (Sunset Group), 10 miles N.byW. of Spring's Camp, Corella R., 33 miles W. of Cloncurry. *Co.* Argylla (*ante*). *Ref.* G.S.Q. Pub. 215, p. 214 (1908).

7207. ——. *Assoc.with* Malachite, in quartz. *Loc.* Lady Mina M.L. (552) (Gt. Australia Group), 3 miles E. of Cloncurry. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 254 (1908).

7207a. ——. *Assoc.with* Bornite, Tile Ore, and Iron Pyrites, in quartz. *Loc.* Monakoff M.F. (15) (Monakoff Group), Courtenay Cr., Pumpkin Gully, 13½ miles E.N.E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 239 (1908).

7208. ——. *Assoc.with* Copper carbonate, Cuprite, Bornite, Chrysocolla, and Ironstone. *Loc.* Mt. Douglas or Pumpkin Gully Leases, 12 miles E. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 153, pp. 6, 7 (1900).

7208A. Redruthite. *Assoc.with* Cuprite, Tile Ore, Chrysocolla, Malachite, and Limonite, in quartz and quartzite. *Loc.* Rocklands Group of Copper Mines, between Butcher and Morris Crs., 9 miles W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 258-265 (1908).

7208B.——. *Assoc.with* Cuprite, Tile Ore, Malachite, and Limonite, in gossan and quartzite. *Loc.* Chum M.C. (329), Serpent Hill Group, Morris Cr., 4½ to 5½ miles W.S.W. of Cloncurry. *Co.* Beaconsfield (*ante*). *Ref.* G.S.Q. Pub. 215, p. 256 (1908).

7209. ——. *Assoc.with* Copper Pyrites, Tile Ore, and Limonte, in slate (?). *Loc.* Eclipse M.L. (571) (Eclipse Group), E. of Dromedary Range, 12 miles N.W. of Donaldson, 70 miles N.byW. of Cloncurry. *Co.* Granada; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 355, 356 (1908).

7210. ——. *Assoc.with* Tile Ore, Malachite, and Actinolite, in ironstone. *Loc.* Wanderer M.L. (622), Eclipse Group, N.W. of Donaldson (*ante*). *Ref.* G.S.Q. Pub. 215, p. 357 (1908).

7211. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Chrysocolla, Hematite, Limonite, and Turgite, in quartz, calcite, and gossan. Belfast M.L. (303) (Belfast Group), Cone Cr., 10 chains S.E. of Cloncury Road, 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

7212. ——. *Assoc.with* Malachite, Azurite, and Limonite, in quartz and schist. *Loc.* Boomerang M.C. (162) (Boomerang Group), W. side of Cone Cr., 2 miles N.N.W. of Mt. Start, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 99, 100 (1908).

7213. ——. *Assoc.with* Copper Pyrites, Tile Ore, Chrysocolla, Hematite, and Limonite, in quartz and ferro-calcite. *Loc.* Policeman M.C. (206), Boomerang Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 100, 101 (1908).

7214. ——. *Assoc.with* Tile Ore and Malachite, in quartz and quartzite. *Loc.* Columbiad M.L. (500) (Columbiad Group), 1¼ mile S.W. of Mt. Start, Duck Creek, 24½ miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 141, 142 (1908).

7215. ——. *Assoc.with* Malachite, Limonite, and Göthite and traces of Gold and Silver, in quartz and schist. *Loc.* Mountain Maid M.L. (526), Columbiad Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 140, 141 (1908).

7216. ——. *Assoc.with* Cuprite, Tile Ore, Malachite, and Limonite, in quartz and schist. *Loc.* Buttercup M.L. (496), Daisy Group, Duck Cr., nr. Mt. Start, 22 miles S.S.W. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 109, 110 (1908).

7217. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Tile Ore, Malachite, Limonite, Calcite, Actinolite, Chlorite, and Epidote, in quartz, chloritis schist, and calcareous tufa. *Loc.* Daisy United M.C (155), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 106-108 (1908).

7218. ——. *Assoc.with* Malachite, in quartz and chloritic schist. *Loc.* Meteor M.C. (145), Daisy Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 105, 106 (1908).

7219. ——. *Assoc.with* Tile Ore, Malachite, and Limonite, in quartz and chloritic schist. *Loc.* Balfour Extd. Claim (257) (Diagonal Group), Duck Cr., 1 mile W.S.W. of Mt. Start, 24 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Assay: See* No. 6112. *Ref.* G.S.Q. Pub. 215, pp. 138, 139 (1908).

7220. ——. *Assoc.with* Tile Ore and Malachite, in quartz and chloritic schist. *Loc.* Diagonal M.F. (2457), Diagonal Group, Duck Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 135, 136 (1908).

7221. ——. *Assoc.with* Gold, Copper Pyrites, Tile Ore, Azurite, Malachite, and Limonite, in chloritic schist. *Loc.* Pioneer M.L. (229) (Diagonal Group) (*ante*). *Assay: See* No. 2077. *Ref.* G.S.Q. Pub. 215, pp. 132-135 (1908).

7222. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in schist and quartz. *Loc.* Prospector's M.L. (182), Diagonal Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 136-138 (1908).

7223. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Azurite, and Chrysocolla, in gossan, quartz, and quartzite. *Loc.* Captain M.L., Eva Group, Duck Cr., 24 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 159, 159 (1908).

7224. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Chrysocolla, in quartz and calcite. *Loc.* Commonwealth M.C. (330), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 158 (1908).

7225. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, Iron Pyrites, Limonite, and Calcite, in quartz, slate, and schist. *Loc.* Eva M.L. (240), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 152-154 (1908).

7226. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Calcite, and Chlorite, in chloritic schist, gossan, and quartzite. *Loc.* Eva Extd. M.L. (283), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 155 (1908).

7227. ——. *Assoc.with* Tile Ore and Malachite, in chloritic schist. *Loc.* Phœnix M.C. (340), Eva Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 157 (1908).

7228. ——. *Assoc.with* Native Copper, Copper Pyrites, Malachite, Chrysocolla, Iron Pyrites, Limonite, Turgite, Ferro-Calcite, and Calcite. *Loc.* Florence R. Copper Mines, ½-mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

7229. ——. *Assoc.with* Cuprite, in kaolin lode. *Loc.* Hampden Copper Mine, Hampden Group, 40 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 153, p. 4 (1900).

7230. ——. *Assoc.with* Copper Pyrites, Cuprite, Tenorite, Malachite, Chrysocolla, Iron Pyrites, and Kaolin, in gossan, slate, and diorite. *Loc.* Hampden M.Ls. (244, 245, etc.), Hampden Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 49-60 (1908).

7231. ——. *Assoc.with* Cuprite, Malachite, and Limonite, in slate and gossan. *Loc.* Block (15), M.Ls. (246 and 409), Hampden Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 60, 61 (1908).

7232. ——. *Assoc.with* Copper Pyrites, Malachite, Limonite, Manganese-dioxide, and Calcite, in limestone, quartz, and schist. *Loc.* Hilda M.L. (242) (Hilda Group), Slaty Cr., 20 miles S.W.byS. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 183, 184 (1908).

7233. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Calcite, in schist and limestone. *Loc.* Mascotte Claim (319), Hilda Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 184, 185 (1908).

7234. ——. *Assoc.with* Tile Ore, Malachite, and Limonite, in ferruginous quartzite and schist. *Loc.* Just-in-Time M.L. (237) (Just-in-Time Group), 1 mile S. of Malbon R., 30 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 82, 83 (1908).

7235. ——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in quartzose schist. *Loc.* Just-in-Time 1 E. M.L. (473) (Just-in-Time Group) (*ante*). *Ref.* G.S.Q. Pub. 215, p. 84 (1908).

7236. ——. *Assoc.with* Cuprite, Tile Ore, Malachite, and Limonite, in quartz, quartzite, and slate. *Loc.* Malbon M.F. (2548), Just-in-Time Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 79-81 (1908).

7236A. ——. *Assoc.with* Malachite, Chrysocolla, and Limonite, in quartzite and schist. *Loc.* Lady Jenny M.L. (234) (Lady Group), Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 195 (1908).

7236B. ——. *Assoc.with* Tile Ore, Azurite, Malachite, and Limonite, in quartz and schist. *Loc.* Morning Star M.L. (306), Lady Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 199 (1908).

7237. ——. *Assoc.with* Native Copper, Cuprite, Malachite, Cyanochalcite, Limonite, Calcite, and Ferro-Calcite, in granular limestone. *Loc.* Dandy P.A. (297) (McPhail Group), 2 miles S. of Florence R., 33 miles S. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 76, 77 (1908).

7238. ——. *Assoc.with* Copper Pyrites, Malachite, Azurite, and Limonite. *Loc.* Erin-go-Bragh Extd. M.C. (372) (McPhail Group), 2 miles N. of Florence R., 31 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 77, 78 (1908).

7239. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, and Limonite, in gossan, quartzite, and schist. *Loc.* McPhail M.L. (474) (McPhail Group), Florence R., 33 miles S. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 70-72 (1908).

7240. ——. *Assoc.with* Malachite, Chrysocolla, Dioptase, Iron Pyrites, Turgite, and Limonite, in gossan and schist. *Loc.* Trump Extd. M.C. (368) (McPhail Group), Florence R., 34 miles S. of Cloncurry (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 73-76 (1908).

7241. ——. *Assoc.with* Tile Ore, Malachite, Azurite, and Limonite, in schist, quartzite, and slate. *Loc.* Monitor M.L. (419), ½-mile from Cloncurry R., 44 miles S. of Cloncurry, Monitor Group. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 65 (1908).

7241A. ——. *Assoc.with* Copper Pyrites, Native Copper, Cuprite, and Molybdenite, in lode formation. *Loc.* May Graham P.A., 4 miles W. of Soldier's Cap, about 33 miles (by road) S.E. of Cloncurry, Mt. Wheeler Group. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, p. 225 (1908).

7241A1. ——. *Assoc.with* Malachite, Iron Pyrites, and Limonite, in schist. *Loc.* Pearl M.C. (106) (Pearl Group), Corella R., 34 miles W.byS. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 188 (1908).

7241B. ——. *Assoc.with* Copper Pyrites, Tile Ore, Chrysocolla, Hematite, and Hypersthene, in slate and gossan. *Loc.* Spring's Peak M.L. (562), Pearl Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 189 (1908).

7242. Redruthite.. *Assoc.with* Tile Ore, in quartz and chloritic schist. *Loc.* Blue Bell Copper M.L. (609) (Pioneer Chief Group), W. of Cone Cr., ½-mile N. of Mt. Start, 23 miles S.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 131, 132 (1908).

7243. ——. *Assoc.with* Malachite, Turgite, Siderite, and traces of Gold and Silver, in quartz and chloritic schist. *Loc.* Noontide Copper M.L. (239), Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 129-131 (1905).

7244. ——. *Assoc.with* Native Copper, Copper Pyrites, Tile Ore, Malachite, Iron Pyrites, and Limonite, in slate. *Loc.* Pioneer Chief M.L. (231), Pioneer Chief Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 123, 124 (1908).

7245. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, Limonite, and Turgite, in quartz and slate. *Loc.* Highland Mary Copper M.L. (531) (Ready Rhino Group), Duck Cr., 22 miles S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

7246. ——. *Assoc.with* Cuprite, Malachite, and Limonite, in quartz and schist. *Loc.* Ready Rhino M.L. (320), Ready Rhino Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 93-95 (1908).

7246A.——. In lode. *Loc.* Spring's M.L. (411) (Spring's Group), Corella R., 1 mile N.W. of Spring's Camp, 36 miles W.S.W. of Cloncurry. *Co.* Selwyn; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 193 (1908).

7247. ——. *Assoc.with* Native Copper, Copper Pyrites, Tile Ore, Malachite, Chrysocolla, Iron Pyrites, and Limonite, in schist, slate, and quartzite. *Loc.* Banjo M.L. (590) (Tambourine Group), 3 miles N. of Duck Cr., Corella Road, 26 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 167, 168 (1908).

7248. ——. *Assoc.with* Copper Pyrites, Azurite, Malachite, Chrysocolla, Iron Pyrites, Limonite, and Tourmaline, in quartz, slate, and schist. *Loc.* Tambourine R.C. (286), Tambourine Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 166, 167 (1908).

7249. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, Limonite, and Turgite, in quartz and schist. *Loc.* Brilliant M.L. (588) (Tharsis Group), Cone Cr., 1½ mile N.W. of Mt. Start, 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 114, 115 (1908).

7250. ——. *Assoc.with* Tile Ore, Malachite, and Iron Pyrites, in quartz and schist. *Loc.* Tharsis Copper M. Lease (240) (Tharsis Group), Cone Cr., 20 miles S.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Assay:* 2,526. *Ref.* G.S.Q. Pub. 215, pp. 117-120 (1908).

7251. ——. *Assoc.with* Copper Pyrites and Limonite, in chloritic slate. *Loc.* Resurgam M.L. (399), Timberoo Group, Slaty Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 175-177 (1908).

7252. ——. *Assoc.with* Copper Pyrites, Bornite, Tile Ore, Malachite, Iron Pyrites, Hematite, Limonite, Calcite, and Muscovite, in quartz slate, and schist. *Loc.* Timberoo M.L. (716), Timberoo Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 172-175 (1908).

7253. ——. *Assoc.with* Tile Ore, Azurite, Malachite, and Limonite, in gossany quartz and schist. *Loc.* Wallaroo M.L. (592), Wee Macgregor Group, Corella R., 38 miles W.S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 202-205 (1908).

7254. ——. *Assoc.with* Gold, Iron Pyrites, Cerussite, Chalcotrichite, and Galena, in quartz. *Loc.* Mountain Maid Reef, 2¾ miles N.N.E. of Croydon Rail. Stn., 96¾ miles (by rail and road) S.E. of Normanton. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

7255. ——. *Assoc.with* Malachite and Limonite, in schist. *Loc.* Iguana M.C. (268), Bull Cr. Group, Coolullah Run, 74 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 349 (1908).

7256. ——. *Assoc.with* Native Copper, Cuprite, Tetrahedrite, Malachite, Iron Pyrites, Hematite, Magnetite, and Limonite, in quartz and schist. *Loc.* Crusader M.F. (2549), Crusader Group, Coolullah Run, E. of Coppermine Cr., 68½ miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Assay:* Copper = 5·3 per cent. *Ref.* G.S.Q. Pubs. 10, p. 8 (1885), 215, pp. 334, 335 (1908).

7257. ——. *Assoc.with* Malachite, in gossany quartz. *Loc.* Orphan M.F. (667) (Crusader Group), Coolullah Run, E. of Coppermine Cr. (*ante*). *Ref.* G.S.Q. Pub. 215, p. 336 (1908).

7258. ——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in quartz. *Loc.* Bauhinia M.C. (347) (Dobbyn Group), 3½ miles W.N.W. of Crusader Freeholds, Coolullah, 70½ miles N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 348 (1908).

7259. ——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in schist. *Loc.* Dobbyn No. 1 S. M.L. (662), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 341 (1908).

7260. ——. *Assoc.with* Tile Ore, Malachite, and Limonite, in gossany quartz. *Loc.* Flaneur M.L. (655), Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 655 (1908).

7261. ——. *Assoc.with* Copper Pyrites, Malachite, Limonite, Calcite, and Ferro-Calcite, in quartz. *Loc.* Glenferrie P.A. (300), nr. Old Man Cr., Dobbyn Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 344 (1908).

7262. ——. *Assoc.with* Copper Pyrites, Tile Ore, Azurite, Malachite, Chrysocolla, and Limonite, in schist, slate, and gossan. *Loc.* Mighty Atom M.L. (274), between 6-Mile and Coppermine Crs., Leichhardt R., 42 miles N.W.byW. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 304-306 (1908).

7263. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in gossan and quartz. *Loc.* Mt. Bornite M.L. (376), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 309, 310 (1908).

7264. ——. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Malachite, and Limonite, in slate, schist, and gossan. *Loc.* Mt. Millicent M.L. (663), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 307, 308 (1908).

7265. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in slate and kaolin. *Loc.* Mt. Millicent S. M.L. (664), Mighty Atom Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 308, 309 (1908).

7266. ——. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Malachite, Chrysocolla, and Limonite, in quartz, gossan, and schist. *Loc.* Mt. Cuthbert No. 1 N. M.L. (381) (Mt. Cuthbert Group), 6-Mile Cr., Leichhardt R., 19 miles S.W. of Coolullah H.S. *Co.* Tewinga (*ante*).

7267. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, Tenorite, Malachite, Iron Pyrites, and Limonite, in slate and gossan. *Loc.* Mt. Metallic R.C. (310) (Mt. Metallic Group), Prospector Cr., trib. of Leichhardt R., 52 miles W.N.W. of Cloncurry. *Co.* Tewinga (*ante*). *Assay: See* No. 2115. *Ref.* G.S.Q. Pub. 215, pp. 295-299 (1908).

7268. ——. *Assoc.with* Copper Pyrites, Malachite, Calcite, and Jasper, in quartz, gossan, and slate. *Loc.* Queenslander M.L. (436), Mt. Metallic Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 297-299 (1908).

7269. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in quartz, gossan, and slate. Chance P.O. (283), St. Paul's Cr. Group, Leichhardt R., Coolullah, 78 miles N.N.W. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, p. 353 (1908).

7270. ——. *Assoc.with* Copper Pyrites and Limonite, in kaolin. *Loc.* Queen Bee M.C. (278), St. Paul's Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 354 (1908).

7271. ——. *Assoc.with* Tile Ore and Malachite, in chloritic schist. *Loc.* Rosette M.L. (638), St. Paul's Cr. Group (*ante*). *Ref.* G.S.Q. Pub. 215, p. 351 (1908).

7272. ——. *Assoc.with* Copper Pyrites, Limonite, and Calcite, in quartz and schist. *Loc.* Hare's Excelsior M.L. (?), Von Bremen's Group, St. Paul's Cr., Leichhardt R., Coolullah, 70 miles N.W.byN. of Cloncurry. *Co.* Tewinga; *Dist.* Burke. *Ref.* G.S.Q. Pub. 215, pp. 327, 328 (1908).

7273. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite, in schist, gossan, and quartz. *Loc.* Isabella M.C. (360), Von Bremen's Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 325, 326 (1908).

——. *See* 7285, etc., for other Cloncurry references.

7274. ——. Mt. Perry, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

7275. ——. *Assoc.with* Gold, Silver, and Argentite. *Loc.* Commonwealth Mine, nr. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Average of 10 Assays:* Gold = 20 gr. per ton; Silver = 15 oz. 8 dwt. 12 gr. per ton; Copper = 3·3 per cent. *Ref.* A.R., p. 58 (1906).

7276. ——. *Assoc.with* Galena and Limonite, in lode. *Loc.* Girl-I-Left-Behind-Me Mine, Stanton-Harcourt Diggings, 11 miles N. of Degilbo Rail. Stn.(Gayndah line), 69 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 168, p. 3 (1901).

7276A.——. *Assoc.with* Malachite, Azurite, Ironstone, Barytes, and Calcite. *Loc.* Burnett Range, nr. Gaeta, about 23 miles N.byW. of Mt. Perry Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* A.R. 263 (1910).

7277. ——. *Assoc.with* Gold, Anglesite, Zinc Blende, and Iron Pyrites, in quartz reef. *Loc.* Victory United Lease (33), Augusta Maid of Erin Shaft, Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol (*ante*).

7278. Redruthite. Mt. Molloy Copper Mine, 20 miles (by rail) N.N.W. of Biboohra Rail. Stn. (Cairns line), **Walsh and Tinaroo Mineral Fields.** *Co.* Dagmar; *Dist.* **Cook.** *Ref.* G.S.M.

7278A. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, Mispickel, and Zinc Blende, in quartz lode. *Loc.* Nil Desperandum Mine, Charleston, 140 miles (by rail) S.W. of Almaden Rail. Stn., Etheridge Goldfield. *Co.* Gilbert; *Dist.* Cook. *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), 151, p. 11 (1900), and 219, p. 14 (1909).

7279. ——. *Assoc.with* Copper carbonate, in quartz. *Loc.* P.P.A. No. 2, Otho Camp, 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), 137 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 10 (1898).

7280. ——. *Assoc.with* Copper Pyrites, Cuprite, Malachite, Azurite, Chrysocolla, Garnet, and Fluorspar, in felspathic rock. *Loc.* Dorothy Mine, Opera Cr., 1½ mile S.E. of Mungana Rail. Stn. (Chillagoe line), 149 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 2 (1891), and P.R.S.Q., vol. 15, p. 51 (1900).

7280A. ——. *Assoc.with* Copper Pyrites, Bornite, Malachite, Azurite, Hematite, Limonite, Cinnabar, and Jasper, in quartz and calcite. *Loc.* St. George Copper and Coal Mines, Little R., 31 miles S.W.byW. of Laura Rail. Stn. (Cooktown line). *Co.* Mosman; *Dist.* Cook. *Ref.* G.S.Q. Pub. 222, pp. 21-32 (1910).

7281. ——. *Assoc.with* Copper carbonate and Cerussite, in basalt and gneiss. Between Brookland No. 2 and No. 3, Junction Cr., Einasleigh R., 30 miles S. of Fossilbrook. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 20 (1898).

7281A. ——. *Assoc.with* Tile Ore, Malachite, and Azurite, in quartz lode. *Loc.* Ortona Copper Mines, S. bank of Percy R., 13 miles N.W. of Gilberton, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.Q. Pub. 219, pp. 17-19 (1909).

7282. ——. *Assoc.with* Gold, Cuprite, and Copper carbonate, in lode. *Loc.* Percy R., above its junction with Gilbert R., 41 miles S. of Charleston Rail. Stn. (Etheridge line). *Co.* Victor; *Dist.* Cook. *Assay:* Copper = 59 per cent. and 54 per cent. *Ref.* G.S.Q. Pub. 151, p. 13 (1900).

7283. ——. *Assoc.with* Copper Pyrites, Copper carbonate, Galena, Zinc Blende, Ironstone, Manganese-dioxide, in lode. *Loc.* Pikedale Silver Mine, Woolshed Gully, Pikedale Hd. Stn., 20 miles W.byS. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

7284. ——. *Assoc.with* Galena, Cerussite, Anglesite, and Copper carbonate, in gossan. *Loc.* Silver King Mine, 3 miles N. of Silver Spur, nr. Texas, 46 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 120, p. 94 (1898).

7285. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, Limonite, Calcite, and Epsomite, in quartz lode in schist and quartzite. *Loc.* Duchess M.L. (275), (Duchess Group), Jack's Creek, Burke R., 61 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* **Gregory North.** *Ref.* G.S.Q. Pub. 215, pp. 18-22 (1908).

7286. ——. *Assoc.with* Native Copper, Copper Pyrites, Tile Ore, Malachite, and Limonite, in kaolinised rock, quartz, and schist. *Loc.* Italian Copper M.L. (689), Lady Fanny Group, Wills R., 60 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 34, 35 (1908).

7287. ——. *Assoc.with* Malachite. *Loc.* Monastery M.L. (467) (Mt. Birnie Group), 5 miles W. of Mt. Birnie, 79 miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, p. 28 (1908).

7288. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, Cuprite, Limonite, Malachite, and Chrysocolla, in hornblendic schist. *Loc.* Mt. Birnie M.L. (686, etc.) (Mt. Birnie Group) Mines, Burke R., 74½ miles S.S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 27, 367 (1908).

7289. ——. *Assoc.with* Native Copper, Copper Pyrites, Cuprite, Tile Ore, Malachite, Atacamite, Limonite, and Calcite, in quartz and chloritic schist. *Loc.* Blue Jacket M.L. (632), Mt. Hope Group, 53½ miles S.W. of Cloncurry. *Co.* Chatsworth (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 43, 44 (1908).

7290. ——. *Assoc.with* Copper Pyrites, Malachite, and Limonite, in gossan, quartz, and slate. *Loc.* Little Beauty M.L. (568), nr. Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 44-47 (1908).

7291. ——. *Assoc.with* Copper Pyrites, Covelline (?), Tile Ore, Malachite, Iron Pyrites, Limonite, and Calcite, in chloritic schist. *Loc.* Monarch Senior M.C. (352), Mt. Hope Group (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 42, 43 (1908).

7292. ——. *Assoc.with* Copper carbonate, in quartz lode. *Loc.* Lease (54), Pilgrim's Cr., trib. of Burke R., 60 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Assay:* *See* No. 1907. *Ref.* G.S.Q. Pub. 153, p. 6 (1900).

7293. ——. *Assoc.with* Tile Ore, in quartz lode. *Loc.* Lease (55), Pilgrim's Cr., trib. of Burke R. (*ante*). *Assays: See* No. 2558. *Ref.* G.S.Q. Pub. 153, p. 6 (1900).

7294. ——. *Assoc.with* Copper carbonate, in lode. *Loc.* Lease (98), Pilgrim's Cr. (*ante*). *Assay: See* No. 1909. *Ref.* G.S.Q. Pub. 153, p. 6 (1900).

7295. ——. *Assoc.with* Copper Pyrites, Malachite, Chrysocolla, and Limonite, in quartz and kaolin. *Loc.* Trikelana M.L. (522) (Trikelana Group), Pilgrim Cr., 70 miles S.W. of Cloncurry. *Co.* Chatsworth; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215, p. 26 (1908).

7296. ——. *Assoc.with* Tile Ore, Tenorite, Iron Pyrites, and Limonite, in kaolinised slate and gossan. *Loc.* Labour Victory R.C. (29) (Agate Downs Group), 53 miles S. of Cloncurry. *Co.* Merlin; *Dist.* Gregory North. *Ref.* G.S.Q. Pub. 215. pp. 12-14 (1908).

——. *See* 7201, etc., for other Cloncurry occurrences.

7297. ——. *Assoc.with* Gold, Silver, Copper carbonate, Galena, and Iron Pyrites. in quartz. *Loc.* Main's Reef. Old Homestead Diggings, 46 miles (by rail) W.S.W. of Charters Towers. *Co.* Griffith; *Dist.* **Kennedy North.** *Ref.* (and *Assays*) G.S.Q. Pub. 73, p. 11 (1891).

7297A. ——. *Assoc.with* Copper Pyrites, Tile Ore, Malachite, and Limonite. *Loc.* Mare's Nest Cr., Andromache R., 44 miles S.S.E. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* A.R., p. 271 (1910).

7298. ——. *Assoc.with* Cuprite and Copper carbonate, in garnet, quartz, kaolin, and gossan. *Loc.* Day Dawn Tin Lease (170), Alice Shaft, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Assay:* Silver = 265 oz. 4 dwt. 20 gr. per ton; Copper = 21·6 per cent.; Lead = trace. *Ref.* G.S.Q. Pub. 82, p. 4 (1892).

7299. ——. *Assoc.with* Galena and Zinc Blende. *Loc.* Macaulay Copper and Silver Lodes, Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 167, pp. 9, 10 (1901).

7299A. ——. *Assoc.with* Malachite, in granite. *Loc.* Dalrymple M.F. (1865), Mt. Flora Gold and Mineral Field, 70 miles S.W. of Mackay. *Co.* Killarney; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 228, p. 22 (1910).

7299B. ——. *Assoc.with* Malachite, Azurite, Iron Pyrites, Hematite, and Limonite, in granite. *Loc.* Monarch P.P.A. (116, etc.), Mt. Flora Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 228, pp. 36-38 (1910).

7300. ——. *Assoc.with* Tenorite and Copper carbonate, in slate country. *Loc.* Balcomba Range, 24 miles N. of Duaringa Rail. Stn. (Central line), 90 miles (by rail and road) W. of Rockhampton. *Co.* Leura; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 159, p. 20 (1901).

7301. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Azurite, Malachite, Zinc Blende, Mispickel, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assay: See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

7302. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Galena, and Zinc Blende, in quartz. *Loc.* Goody's (Carmichael's) Reef, Norton Goldfield (*ante*). *Assay: See* 4277. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

7303. ——. *Assoc.with* Gold and Tenorite, in quartz. *Loc.* Alliance Gold Mine, Morinish Goldfield, 29 miles N.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 10 (1882).

7304. ——. Disseminated through granite. *Loc.* Moonmera Copper Mines, nr. Moonmera Rail. Stn., 20 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 143, p. 27, and B.D.

7305. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Mispickel, Pyrrhotite, Galena, and Stibnite. *Loc.* Mariner's Reef, Black Snake, 10 miles S. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* **Wide Bay.** *Analysis of Ore: See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

7306. ——. *Assoc.with* Copper Pyrites, Tenorite, Cuprite, Azurite, Malachite, Iron Pyrites, Hematite, and Limonite in lodes in syenitic granite. *Loc.* Calgoa Copper Mines, Thunder Cr., Calgoa Cr., 15 miles N.byW. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 207, pp. 5-11 (1907).

7307. ——. *Assoc.with* Copper Pyrites. *Loc.* Marari Cr., nr. Eel Cr., 10½ miles S.S.W. of Gympie. *Co.* Lennox (*ante*). *Ref.* O.R.

7308. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Cuprite, Malachite, Bismuthinite, Magnetite, and Limonite. *Loc.* Kabonga Mine, Kilkivan, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897), and G.S.M.

7309. ——. *Assoc.with* Malachite. *Loc.* Sunnyside, Mudloo, 5 miles N.N.W. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* L.C.B.

7310. Redruthite. *Assoc.with* Copper Pyrites, Cuprite, Tile Ore, Azurite, and Malachite in quartz. *Loc.* Teebar Copper Lode, N. of Munna Cr., nr. Clfton Stn., 2 miles S. of Boompa Rail. Stn. (Gayndah line), 44 miles (by rail and road) W. of Maryborough. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 7 (1890).

7311. ——. *Assoc.with* Cuprite. *Loc.* Warirata Road, 20 miles E.N.E. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.M.

Reid's Creek Goldfield—

Situation: Pls. 4, 5. The goldfield is 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* Burnett.

Discovery: Gold discovered in 1879.

Population: Less than 10.

Proclamation of Field: First gazetted, 17th April, 1886; last gazetted, 24th January, 1902, as follows:—Commencing at a point on the left bank of Reid's Creek bearing west from the north-west corner of the Reid's Creek Gold Field (proclaimed in *Government Gazette*, 1886, vol. 1, page 1626), and bounded thence by a line bearing east about five miles and a-half to a point north from the west corner of portion 5v, parish of Grosvenor; thence by a line south to that corner; thence by the western boundaries of portions 5v, 6v, 7v, 8v, 9v, 10v, 11v, and 12v southerly to the south-west corner of portion 12v; thence by the south boundary of the proclaimed Reid's Creek Gold Field bearing west about six miles and a-half to the left bank of Reid's Creek; and thence by that creek upwards northerly to the point of commencement.

Area: 26,000 acres (25 sq. miles).

Mineral Statistics: Gold, *included in* "Other Goldfields" *in tables and diagram*, Pls. 36, 46, 46A, 47.

Mineral References: Gold, *see* 3590-3594; Silver, 7432; Lead (Galena), 2719, 2721A, 2722; Copper (Bornite), 417; Antimony (Stibnite) 7605, 7606; Manganese (Psilomelane), 7081; Zinc Blende, 8064, 8065; Iron (Iron Pyrites), 4991-4994, (Mispickel) 6650-6654.

Geological Note: The rocks at Reid's Creek are made up of a fine-grained micaceous granite, and evidently are connected with the granite in which the Mt. Perry Copper Lode occurs. Gold-bearing reefs occur in the granite, the gangue being made up of quartz and felspar, the ore consisting of arsenical pyrites (mispickel), with iron pyrites, zinc blende, and a little galena. *See* G.S.Q. Pub. No. 21 for details.

Geological Publications: Reports—Nos. 21 (1885), 48 (1888). *See* Geol Surv. Pub. List for title.

Warden: Stationed at Mt. Perry. Inspector of Mines: Stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Reward for Discovery of New Goldfields:—

For the discovery of a goldfield distant more than twenty miles from the nearest place where payable gold has previously been obtained, and on which there shall be employed, four months after the report of the discovery, not less than two hundred miners, a sum not exceeding £500 shall be awarded by the Crown. If five hundred miners are employed for not less than six months, the reward shall be not more than £1,000 (Reg. 165). In the Mining Act, however, provision is made for the sum of £10,000 to be paid to the actual discoverers of any new goldfield (Section 8), and in 1867 the Crown offered £3,000 for the discovery of a goldfield 20 miles distant from any existing field, which, it was necessary to prove, had supported 3,000 persons for six months after its discovery.

Note.—Rewards have been paid for gold discoveries, but the information concerning these payments is so fragmentary and unreliable that it is considered inadvisable to make a list of them. Possibly by searching old Departmental Records and Parliamentary Proceedings reliable data could be obtained.

Situation: Twenty miles N.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. Centre—about *Lat.* 23° 15′ S., *Long.* 150° 18′ E.

Discovery: Gold discovered here at end of 1866 by Messrs. Hosking and Bird. The field was opened in February, 1867, and gold to the value of £14,000 was obtained in a few months. *Ref.* A.R.D.M., 1887, p. 46, and "Early History of Rockhampton," by J. T. S. Bird, 1904.

Proclamation of Field: First gazetted, 4th November, 1871; last gazetted, 22nd February, 1888, as follows:—Commencing at a point bearing north 45 degrees west and distant about two hundred and twelve chains from the junction of Deep Creek with the Fitzroy River, and bounded thence on the east by a line bearing south four miles; on the south by a line bearing west four miles; on the west by a line bearing north four miles; and on the north by a line bearing east four miles to the point of commencement.

Area: 10,240 acres (16 sq. miles).

Mineral Statistics: Gold, *included in* Rockhampton, *in stat. tables*, Pls. 36, 46, 46a, 47.

Mineral References: Gold, 4340, 4341; Manganese (Psilomelane), 7102; Iron (Limonite) 5912a, (Iron Pyrites) 5407b.

Geological Note: The country about this region consists of micaceous talcose and chloritic schists, with slates, quartzites, sandstones, grits, conglomerates and limestones belonging to the Permo-Carboniferous System.

Geological Publications: Report—No. 31 (1886). *See under* Geol. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Rockhampton—

Situation: *See maps,* Pls. 2, 3. 393 miles (by rail) N.N.W. of Brisbane, 26 miles (by Fitzroy River or rail) from Broadmount. *Co.* Livingstone; *Dist.* Port Curtis. *Lat.*, 23° 22′ S.; *Long.*, 150° 30′ E.

Port for the Goldfields of Cawarral, Clermont, Ridgelands, Rosewood, Stanwell, Mt. Morgan (Crocodile Cr.), Ulam, Canoona, Morinish; the Dawson-Mackenzie Coalfields; Tolmie's Coalfield; Stanwell Coal Measures; Blair Athol (Clermont) Coalfield; the Peak Downs (Copperfield) Copper Mines at Clermont; the Great Fitzroy Copper Mine at Mt. Chalmers; Anakie Sapphire Fields; Jundah Opal Fields, etc., etc.

Harbourage: Broadmount Basin is 8 miles up from the entrance of the Fitroy River, and is connected by rail and river with Rockhampton. The wharf has a depth of 23 ft. at L.W.S. Port Alma on the opposite (south) side of the river is nearer Keppel Bay, and is also connected by rail with the town. The wharf here has a depth of 23 ft. at L.W.S., and a good anchorage off the wharf in 5 fathoms. One part of the river, from Broadmount to the town, has been dredged to 12 ft., L.W.S., the lower portion to 14 ft. At the town wharves average spring tides rise 9 ft., the deepwater wharf having a depth of 20 ft. at L.W.S.

Population: 15,456 (Census, 1911).

Rainfall: *See under* separate heading.

Leases (in mining centres). Mineral leases in force and applications, 32; area, 5,656 acres. Miners' homesteads and applications, 300; area, 2,499 acres. Gold-mining leases and applications, 3; area 45 acres (1912).

Principal Mining Centres: Mt. Morgan, Mt. Chalmers (Gt. Fitzroy).

1904	147,508	590,573
1905	147,626	590,439
1906	143,754	572,569
1907	150,315	571,622
Totals (oz.)	3,881,293	£15,566,046

Statistical Notes (Rockhampton and Mt. Morgan Fields): Greatest annual gold yield (1889), 314,356 fine oz. ; value, £1,335,299. Smallest annual gold yield recorded (1883), 3,209 fine oz.; value, £13,631, previous to which there are no official return. Total yield of gold to end of 1912. 4,023,364 fine oz.; value, £17,090,154. Most of this is the production of the Mt. Morgan mine, and is equal to 22·72 per cent. of the total gold production of Queensland since the commencement of mining. From 1887 to 1889 the gold yield rose from 82,338 oz. to 314,356 oz., but since 1890 there has been but little fluctuation in the production, seldom being less than 120,000 oz. or more than 170,000 oz. Coal output (Bluff Mines) has increased about 3,000 tons on each previous year's return since 1905, when the development of the mine took place. In copper the district (including Mt. Morgan) has produced 23·76 per cent. of the whole production of the State, as against 23·97 per cent. produced by the old Peak Downs Copper Mine. *See tables* on Pls. 36, 39, 43, 46, 46a, 47.

Crushing Mills: Batteries, 5 (30 Stamps). Charges, 15s. per ton.

Mineral Reference: Analcime, *see* 12.

Geological Note: The rocks comprise shale, greywacke, sandstone, quartzite, tuff, etc., belonging to the Gympie Formation (Permo-Carboniferous Systems). They form high ranges near the town, and are also the base of a large area of recent alluvium which has been deposited on the flats of the Fitzroy River. These alluvial deposits contain porous sand beds, and absorb a large quantity of water, and from which large supplies of fresh water have been pumped in times of drought.

Geological Publications (of fields, etc., near Rockhampton): Reports—Nos. 92 (1892), 131 (1898), 132 (1898), 190 (1904), 199 (1905), 205 (1906), 215 (1907.) *See under* name of locality or field mentioned below for other reports. Rocky River Goldfield—

Situation: *See maps*, Pls. 8, 9. The field is about 26 miles N.E. of Coen, 71 miles N.N.W. of Port Stewart, and 215 miles N.W. of Cooktown. *Co.* Sidmouth; *Dist.* Cook. Centre—about *Lat.* 13° 45′ S., *Long.* 143° 30′ E.

Proclamation of Field: First (and only one) gazetted, August 25th, 1897, as follows:—The whole of the area comprised within the northern, western, and southern watersheds of the Chester and Rocky Rivers.

Area: 114,560 acres = 179 sq. miles.

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46A, 47; Wolfram, *see under* Coen and Rocky *in stat. tables*, Pls. 42, 46, 46A.

Mineral References: Gold (alluvial) *see* 3238; Wolfram, 7977; Molybdenite, 6843; Iron (Ilmenite), 4895.

Geological Note: The country rock is granite, with quartzites and other sedimentary rocks some miles to the north-west.

Geological Publications: *Nil.*

Warden: Stationed at Cooktown. Inspector of Mines: Stationed at Croydon.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Rocky Tate R., br. of Tate R., at Fisherton. *Min.Ref.* Ruby, *see* 2359.

Rodd Peninsula, 25 miles E.S.E. of Gladstone. *Min.Ref.* Magnetite, *see* 6043.

Geological Note: The Peninsula is made up of granite, with gneiss and sandstone in places. Elvan and basic dykes intrude the granite and gneiss, while the sandstones (Burrum Formation) occupy small areas at the north-west end. Gympie slates (Permo-Carboniferous) form the Munro Range to the south-east, with large areas of alluvium on either side. *See* G.S.Q. Pub. No. 130 for details and map.

Rodger's Back Sel. M.F. (1430), Mt. Flora G. and M. Field. *Min.Ref.* Azurite, *see* 235N; Copper Pyrites, 2269G; Hematite, 4769G; Iron Pyrites, 5327H; Limonite, 5895C; Magnetite, 6029A; Malachite, 6339Q; Pyrrhotite, 7161A.

—— and Simpson's Bore (Stewart's Creek). *See* Simpson *under* Coal Bores.

—— Downs Run Bore. *See under* Artesian Bores. No 383.

Roger's Co. Darling Downs Dist. *See map*, Pl. 12.

—— Mine, Bompa Goldfield. *Min.Ref.* Copper Pyrites, *see* 2283; Gold, 4249; Iron Pyrites, 5361; Mispickel, 6786; Zinc Blende, 8182.

—— No. 1 Golden Gate, Croydon Goldfield. *Min.Ref.* Calcite, *see* 467, (*var.* Argentine) 565, (*var.* Nailhead Spar) 604; Halite, 4650; Iron Pyrites, 4949A; Vivianite, 7920.

—— Millchester Block, Charters Towers. *Min.Ref.* Galena, *see* 2910; Gold, 3933; Iron Pyrites, 5204.

Rolleston (Pors. 1847, 2110, 2188), Pittsworth. *Min.Ref.* Göthite, *see* 4565, 4566; Limonite, 5850-5852; Magnetite, 5999; Olivine, 6925; Turgite, 7894, 7895.

—— (Par. of) (Sub. 2, Por. 1862), Pittsworth. *Min.Ref.* Asbolane, *see* 119; Manganese-dioxide, 6415.

Roma. *See maps*, Pls. 12, 13. The town is 318 miles (by rail) W.byN. of Brisbane. *Lat.*, 26° 35′; *Long.*, 148° 40′. *Min.Ref.* Coal, *see* 1707A; Natural Gas, 6904; *see also under* Govt. Ming. Jour., Reports 53, 89A, 89B, 107, 149, and G.S.Q.P. 175, p. 4 (1902).

Geological Note: The rocks on the surface about Roma are Desert Sandstone Formation (Upper Cretaceous), Rolling Downs Formation (Lower Cretaceous), and Basalt, the Desert Sandstone and Basalt forming cappings to the Rolling Downs. Below the surface there exists a series of calcareous and arenaceous sandstones, more or less porous, both containing water and coal-bearing strata, and probably further down there are Dawson and Mackenzie Coal Measures. A bore for water revealed the presence of an inflammable gas the origin of which has not been determined.

Gas Analysis: Carbon dioxide 1.5 per cent.; carbon monoxide, 5.8 per cent.; Benzine series, 5 per cent.; Olefin series, 1.5 per cent.; Paraffin series (including 9.8 per cent. of ethane), 82.4 per cent.; nitrogen and residual gas, 3.4 per cent.; Oxygen, 0.0 per cent.; Hydrogen, 0.0 per cent. Gov. Analyst, 1901).

Rosedale Mineral Field—

SITUATION: *See maps,* Pls. 2, 3. The field is about 34 miles (by rail) N.W. of Bundaberg. *Co.* Flinders; *Dist.* Port Curtis. Centre—about *Lat.* 24° 38′ S., *Long.* 151° 52′ E.

PROCLAMATION OF FIELD: First (and only one) gazetted, 16th July, 1906, as follows:—Commencing on the right bank of Murray Creek at the north-west corner of the Reserve for Mining Purposes, proclaimed *Government Gazette,* 1904, volume 2, page 1488, and bounded thence on the north by a line bearing east about forty-eight chains; thence by the east side of a three-chain road northerly about ten chains; thence by the south boundary of portion 134 easterly forty chains, and by the south boundary of portion 136 south-easterly about fifty-five chains, and easterly two hundred and sixty chains to the Watalgan Range, by that range south-westerly about four miles and twenty chains to an angle thirty chains south-westerly from the north-west corner of portion 74v, Monduran; on the south by a line bearing about 283 degrees 20 minutes two hundred chains to the south-east corner of portion 557 on Murphy Creek; thence by that creek downwards to the south boundary of portion 139, by that boundary east about eighty chains to the east boundaries of portions 139 and 138 north about eighty-five chains; thence by the north boundary of portion 138 west to Murray Creek; and thence by that creek downwards to the point of commencement.

AREA: 6,400 acres (10 sq. miles).

MINERAL STATISTICS: Wolfram, *see under* "Bundaberg," *in stat. tables,* Pls. 42, 46, 46A.

MINERAL REFERENCES: Bismuth (Native), 352; Bismutite, 411; Wolfram, 8040; Tungstite, 7880; Molybdenite, 6864; Manganese-dioxide, 6474; Limestone, 680, 681; Marble, 595, 596.

GEOLOGICAL NOTE: The prevailing rocks are granite, porphyry, and greisen, with limestone in the vicinity. Wolfram, molybdenite, and other minerals occur in quartz lodes in the greisen, close to the granite.

GEOLOGICAL PUBLICATIONS: *Nil.*

WARDEN: Stationed at Gladstone. INSPECTOR OF MINES: Stationed at Rockhampton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Rosella Cr. Heads at Mt. Leslie, 65 miles S.byW. of Bowen, flows northerly into Bowen R., 60 miles S.W. of Bowen. Length, about 30 miles. *Min.Ref.* Asphaltum, *see* 125; Calcite, 510; Natrolite, 6898A.

Rosewood Goldfield—

Situation : *See maps*, Pls. 2, 3. The field is about 32 miles W.byN. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. Centre about *Lat.* 27° 38′ S.; *Long.* 152° 38′ E.

Discovery : Gold discovered here in 1867. Several nuggets were found, a few being about 100 oz. in weight, while 10-oz. to 40-oz. pieces were not uncommon. *See* A.R.D.M. (1887), p. 47, and "Early History of Rockhampton" (1904).

Proclamation of Field : First (and only one) gazetted, 2nd Sep., 1898, as follows :—Commencing at a point bearing east 17 degrees south and distant one hundred and sixty chains from the confluence of Rosewood Creek with the Fitzroy River, and bounded thence on the west by a line bearing south six miles and twenty chains; on the south by portions 5v, 4v, and 3v bearing east four miles; on the east by a line bearing north six miles and twenty chains; on the north by a line bearing west four miles to the point of commencement;—exclusive of 640 acres included in Grazing Farm No. 310.

Area : 17,120 acres (26¾ sq. miles).

Mineral Statistics : Gold, *included in* "Rockhampton," *in stat. tables and diagram*, Pls. 36, 46, 46A, 47.

Mineral References : Gold (alluvial), *see* 3397A, (reef) 4350-4354; Copper (Chalcotrichite) 2491, (Oxidised ore) 2054, Copper Pyrites, 2301; Iron (Iron Pyrites) 5412. Other Minerals—Calcite, 545; Chlorite, 1467; Gismondite, 3170.

Geological Note : The country rock is quartzite, in which there are reefs associated with a dyke of altered diorite. The reefs are mostly made up of quartz and chlorite, but the gold often occurs in rich bunches of ore in calcite and chlorite. *See* G.S.Q. Pub. No. 92 for details.

Geological Publications : *Nil. See under* Supplementary Report List, No. 17.

Warden and Inspector of Mines : Both stationed at Rockhampton.

Rubellite. *Var. of* Tourmaline. *which see.*

Ruby. *Var. of* Corundum, *which see.*

MINERAL NOTE: Oriental rubies are common in the alluvial gold leads of Jordan Cr. and other goldfields, and occasionally are met with in the sapphire drifts at Anakie, and the tin drifts of Stanthorpe. Those found at Jordan Cr. are inclined to be purple, the colour not being attractive, but specimens found with the sapphire at Anakie, although small, are of fine lustre and of a pinkish tint. Some of the blue sapphires at Anakie contain bright ruby bands, the colour lying along the prism or pyramid faces of the crystals. *See* G.S.Q. Pub. No. 172 for Anakie notes.

DISCOVERY: Rubies were found at Anakie about the year 1878.

Ruby Cr., Anakie. Rises in the Anakie Range, and flows for about 10 miles N.E. into Retreat Cr. 8 miles N.N.W. of Anakie Rail. Stn. (Central line). *Min.Ref.* Azurite, *see* 234A, 238; Ironstone, 5598, 5600; Malachite, 6341; Pyromorphite, 7149; Tetrahedrite, 7776.

Situation: *See maps*, Pls. 8, 9, 22. Fifteen to twenty miles W.N.W. of Geraldton. *Co.* Nares; *Dist.* Cook. Centre about *Lat.* 17° 25′ S.; *Long.* 145° 30′ E.

Discovery: In 1887.

Proclamation of Field: First gazetted, 22nd September, 1887; now included in Russell Extended Goldfield by proclamation of 29th September, 1905, *which see.*

Russell Extd. Goldfield—

Situation, Etc. : *See* Russell Goldfield.

Population : under 20.

Proclamation of Field : First gazetted, 15th August, 1889 ; last alteration, 29th September, 1905, as follows :—Commencing on the apex of Mount Bartle Frere, and bounded thence on the east by a line bearing south about eleven miles and a-quarter to the north branch of the Johnstone River ; by that river upwards to its head in the Coast Range ; and by that range south-easterly to the point of commencement.

Leases : Miners' Homesteads in force (1910), 3 ; area, 15 acres. None in 1912, but some might be included in Herberton returns.

Area : 92,160 acres (644 sq. miles).

Principal Mining Centre : Towalla.

Mineral Statistics : Gold. *Included in* "Other Goldfields," *in stat. tables*, Pls. 36, 46, 46a, 47.

Gold, Average Values : *See under* Gold.

Mineral References : Gold (alluvial), 3222-3233, (reef) 3779-3791 ; Lead (Galena), 2810 ; Platinum, 7072 ; Tin (Cassiterite), 963-4 ; Iron (Hematite) 4722, (Iron Pyrites) 5082-5, (Ironstone) 5532-3, (Mispickel) 6706, (Limonite) 5847 ; Coal (Lignite), 1617a ; Olivine, 6934 ; Opal (wood), 7003 ; Sapphire, 2344.

Geological Note : Granite, schist, slate, quartzite, greywacke, etc., of indefinite age, together with basalt and alluvial gold deposits of Tertiary Age. The alluvial deposits, in places, are covered with flows of basalt, the granite, slate, etc., being traversed by gold-bearing quartz reefs.

Geological Publications : Reports—Nos. 45 (1888), 48 (1888), 89 (1893), 97 (1894). *See under* Geol. Surv. List for title. *See also under* Gov. Ming. Jour., Report No. 40.

Warden and Inspector of Mines : Both stationed at Herberton.

Reports : (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour. ; annually in A.R.D.M.

—— Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4528.

Ruth M.L. (335), Mt. Remarkable Group, Cloncurry. *Min.Ref.* Limonite, *see* 5745 ; Malachite, 6076 ; Redruthite, 7205.

Ruthenium (Ru). *Atom. Wt.* = 101·7. *Sp.gr.* = 12·26. Occurs alloyed with Osmiridium.

Rutherford's Bores. *See under* Artesian Bores. Nos. 357, 415.

Ruthven Bores. *See under* Artesian Bores. Nos. 324, 387.

—— Co. Mitchell Dist. *See map*, Pl. 18.

Rutile. *Compo.*, Titanium dioxide. *Colour*, reddish brown, black. *Streak*, brownish. *H.* = 6-6·5. *Sp.gr.* = 4·18-4·25. *Var.* Sagenite. *Contents* (*max.*), Titanic acid 90 to 100 per cent. (=Titanium 54 to 60 per cent.).

Geological Note : Common in drift deposits of gold and tin in association with Amethyst, Cairngorm, Chalcedony, Diamond, Garnet, Ilmenite, Jasper, Rock Crystal, Sapphire, Spinel, Topaz, Tourmaline, Zircon, etc., etc. It occurs with wolfram and tin in the Chillagoe and Herberton Mineral Fields, and is found as inclusions in basalt associated with Sapphires, Tourmaline, Ilmenite, etc., near Anakie. It forms needle-like inclusions in Rock Crystal and Cairngorm at Stanthorpe, and is known as Sagenite or "Grasstone." Many tons of rutile could be gathered at the tin mines on the Herberton Fields, but at present very little demand exists for it. *See* note *under* Titanium.

Uses : Rutile is used for the production of ferro-titanium, an alloy applied to the manufacture of titanium steel. It is also used for colouring pottery, leather, and fabric, and as electrodes in "magnetite" are lamps.

Müeller (Soda), 16 miles N.E. of Aramac.

Salt Manufacture. At various times saltworks have been established in the State, but they only produced salt in small quantities, and were only in operation for a short time. These works were at Burketown, Mackay, Casuarina Island near Rockhampton, Port Curtis near Gladstone, and Redland Bay near Brisbane, all of which, except those at Casuarina, ceased operations many years ago. The Casuarina works were built about five years ago to treat brine from a local well, but they closed down after being in operation for about a year. The max. solid contents of this brine is made up of 60 per cent. of chlorine and 39 per cent. of sodium.

The necessary conditions for the manufacture of salt include an area of several square miles of flat coastal land, covered only by high tides, and having a surface of clay impervious to water. Such places are to be found around Moreton Bay, Kepple Bay, and Port Curtis. The Port Alma salt pans, near the mouth of the Fitzroy River, are made up of a tenaceous clay, and the locality appears to be a very suitable site for saltworks. Other places near Brisbane, Gladstone, Broadsound, Mackay, and further north also offer facilities for the establishment of the industry.

In comparison with other parts of Eastern Australia, in addition to the large areas of low coastal country which she possesses, Queensland should also be very suitable because of its climatic conditions. The Commonwealth Meteorologist has estimated that the annual evaporation of sea water at Melbourne is 38 inches, at Brisbane 51 inches, at Rockhampton 58 inches, and at Cooktown 75 inches, so that the annual precipitation of salt in Queensland would be much greater than at places on the southern end of the continent. On the other hand, the rainfall must be a very great factor in fixing the sites for establishing works. The average rainfall at Brisbane is 47 inches, at Rockhampton 41 inches, and at Cooktown 67 inches. (See other statistics under Rainfall.)

In Western Queensland there are several shallow salt lakes, some of which become dry every year. The salt deposits in these lakes are said to be very extensive, but have always been considered to be of no commercial value, on account of their distance from the coast and the cost of transit to markets. In times of drought, when transit has been difficult, the salt of these lakes, which is as white as snow, has been utilised by the people of Western Queensland.

Salt water is sometimes met with in large quantities in artesian bores, but no use is made of it, as the bores are sunk for the purpose of tapping supplies of fresh water, and any salt water met with is cased off.

A description of some salt deposits is given by Dr. J. V. Danes, in the Proceedings of the Geographical Society (Q'land Br.), vol. xxv., p. 83, under the title of "Report on a Tour along the Dividing Range, from Aramac to Pentland."

For salt in artesian bores, *see under* Artesian Bores and Notes. Nos. 24 (1), 27 (1), 305, 325 (9), 333 (1c), 385, 451. *See also* notes under Sodium.

Saltbush Bores. *See under* Artesian Bores. Nos. 190, 413.

Saltpetre. Deposits of this mineral are unknown in the State.

Scheelite. *Compo.*, Tungstate of lime. *Colour*, whitish, yellowish, brownish. *Lustre*, vitreous. *Streak*, white. *H.* = 4·5-5. *Sp.gr.* = 5·9-6·1. *Contents* (*max.*), Tungstic acid 80 per cent. (=Tungsten 64 per cent.).

Mineral Note: Found occasionally in association with mispickel, monazite, and wolfram, and with bismuth, copper, gold, and tin ores. The gangues are commonly quartz, chlorite, and muscovite, the country rocks being either greisen, granite, slate, or diorite. The deposits at Parada, on the Chillagoe Railway line, have yielded most of the scheelite produced in Queensland, the mineral occurring there as small veins in association with copper ores. *See* note under Tungsten.

School of Mines, Charters Towers. Established 1900. Director—H. J. McGillivray, M.A. (Melb.). (Past Directors—W. A. McLeod, B.Sc., A.D.S.M., appointed 1-10-1900; W. Poole, B.E., appointed 22-6-1904). Mr. McGillivray was appointed 1913.

SUBJECTS: Instruction is given in the following subjects, commencing on the last Monday of February of each year:—

Mining and Ore Dressing	E. C. B. HEDER, B.A., B.E., &c.
Surveying	
Drawing	
Geology, Mining Geology, Mineralogy, and Petrology	H. J. McGILLIVRAY, M.A. (Hons.), Melb.
Theoretical Chemistry, Metallurgy ...	J. A. HUGHES.
Practical Chemistry (2), Assaying ...	W. BOWATER, F.C.S.
Practical Chemistry (1)	P. HARVEY, A.C.T.S.M.
Physics	A. R. WIGHT, F.S.A.S.M.
Materials and Structure	
Mechanics: Steam, Oil, and Gas Engines	
Mathematics	G. F. CLINTON, A.C.T.S.M.

DIPLOMAS AND CERTIFICATES—

A. Associateship in Mining.
B. Associateship in Metallurgy.
C. Certificate as Metallurgical Chemist and Assayer.
Candidates prepared for Mine Manager's Examination.

FEES: Scale of Fees—15s. per class per term (three terms of three months each per year), or £2 per class per year. A full course of six or more classes for £10 10s. per annum. Full particulars on application to the Director.

EXHIBITIONS, BURSARIES, AND MEDALS—

Three Entrance Exhibitions, £50 per year and remission of fees, tenable for three years, on results of Senior Public Examinations held in Queensland by Sydney University.

Six Bursaries, £5 and remission of fees, tenable for one year, on results of Annual Examinations at the School of Mines.

Browne Memorial Medal. Bronze medal and prize to value of £5 to best student in Mining Associate Course, and the same to the best student in Metallurgical Course.

SYLLABUS OF SCHOOL: Contains all information concerning subjects, courses, lectures, certificates, exhibitions, medals, fees, examinations, etc. Copy obtainable at School of Mines, Charters Towers.

School Reserve, Upper Kholo, 3 miles N. of Ipswich. *Min.Ref.* Iron Pyrites, *see* 5348; Turgite, 7902.

Schorl. *Var. of* Tourmaline, *which see.*

Schuffler's Dam, McMaster's, Clermont Goldfield. *Min.Ref.* Gold (alluvial), *see* 3280.

Scolecite. *Syn.* Lime Mesotype. *Compo.*, Hyd. silicate of alumina and lime. A Zeolite. *Colour*, white. *Lustre*, vitreous, silky when fibrous. *H.* = 5-5·5. *Sp.gr.* = 2·16-2·4.

7359. —— (?). *Assoc.with* Calcite, in granite. *Loc.* Mary Mine, Charters Towers Goldfield, 82 miles (by rail) S.W.byS. of Townsville. *Co.* Davenport; *Dist.* Kennedy North. *Analysis:* S_1O_2 = 49·04, Al_2O_3 = 26·64, CaO = 12·24, H_2O (by ignition) = 13·30, Fe_2O_3 = traces—101·22. *Ref.* P.R.S.Q., vol. 4, p. 110 (1887).

7360. —— (?). *Assoc.with* Calcite, in granite. *Loc.* Mexican Mine, Charters Towers Goldfield (*ante*). *Analysis:* S_1O_2 = 47·24, Al_2O_3 = 26·64, CaO = 12·95, H_2O = 14·20, FeO_3 traces. *Ref.* P.R.S.Q., vol. 4, p. 110 (1887).

7361. —— (?). *Assoc.with* Calcite, in granite. *Loc.* Queen Block Extd. Mine, Charters Towers Goldfield (*ante*). *Analysis:* Silica = 46·25, Alumina = 27·35, Iron = traces, Lime = 13·95, water (by ignition) = 13·47. *Ref.* P.R.S.Q., vol. 4, p. 109 (1887).

Scorodite. *Compo.*, Arsenate of iron. *Colour*, pale greenish or brownish. *Streak*, white. *Lustre*, vitreous. *H.* = 3·5-4. *Sp.gr.* = 3·1-3·3.

7362. ——. On surface above Biggenden Bismuth Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., Gayndah line, 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* **Burnett.** *Ref.* G.S.M.

7363. ——. *Assoc.with* Copper carbonate, in quartz. *Loc.* Arbouin Leases, 18 miles W. of Mungana Rail. Stn., Chillagoe line, Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* (and *Assays*) A.R.D.M., pp. 94, 95 (1898).

7364. ——. *Assoc.with* Wolfram, Cassiterite, Molybdenite, Bismuth (native), Bismutite, and Mispickel, with traces of Copper Pyrites, Cuprite, Tenorite, Azurite, Malachite, Iron Pyrites, Hematite, etc., in irregular masses of quartz and greisen in granite. *Loc.* Boonmoo, 81 miles (by rail) S.W. of Cairns, Cairns-Chillagoe line, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* B.D.

7365. ——. Silver Star Mine, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 57 (1900).

7366. ——. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismutite, Bismuthinite, Scheelite, Mispickel, Cassiterite, and Manganese-dioxide, in irregular masses of quartz, in greisen belt. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7367. ——. *Assoc.with* Wolfram, Molybdenite, Native Bismuth, Bismutite, Scheelite, Molybdite, and Mispickel, with traces of Copper Pyrites, Tenorite, Chrysocolla. Iron Pyrites, etc., in irregular quartz masses in greisen. Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

7367A.——. *Assoc.with* Wolfram, in quartz. Mark Tapley Mine, Mungana, 149 miles (by rail) W.S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 234 (1910).

7368. ——. England and Party's Mine, Horn Is. Goldfield, 3 miles S.E. of Thursday Is., Torres Straits. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.M.

7369. ——. *Assoc.with* Mispickel and Iron Pyrites, in quartz. Gummo's Reefing Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 150. p. 13 (1900).

7369A.——. Burnt Hut, Severn R., about 6 miles W.byS. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.M.

7370. ——. *Assoc.with* Iron Pyrites, Mispickel, Cassiterite, Wolfram, and Molybdenite, in quartz. P.A.. Sluicing Claim, Severn R., 6 miles W. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

7371. ——. *Assoc.with* Cassiterite, Iron Pyrites, Mispickel, Zinc Blende, and Hornblende, in slate. *Loc.* Beacroft's Workings, nr. Sundown Cr., 23 miles S.W. of Stanthorpe Rail. Stn. (Main line). *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

7372. ——. *Assoc.with* Mispickel. Lady Jane Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* O.R.

7373. ——. Peak Vale Stn., 18 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.M.

7374. ——. *Assoc.with* Iron Pyrites, Cerussite, Massicot, Mispickel, and Wolfram. *Loc.* Plant's Leasehold, 4 miles E. of Crow's Nest Rail. Stn., 38 miles (by rail and road) N.N.E. of Toowoomba. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* A.R., pp. 148, 149 (1908).

7375. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Bald Hills Reef, Norton Goldfield, 33 miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assays:* *See* No. 4266. *Ref.* G.S.Q. Pub. 208, p. 14 (1901).

7376. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, Redruthite, Azurite, Malachite, Mispickel, and Zinc Blende, in quartz. Chandler's Reef, Norton Goldfield (*ante*). *Assay:* *See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

7377. ——. *Assoc.with* Mispickel. *Loc.* Grey Dawn, Cordalba, nr. Childers, 48 miles (by rail) N.W. of Maryborough (North Coast line). *Co.* Cook; *Dist.* **Wide Bay.** *Ref.* G.S.M.

Scorpion Reef, Norton Goldfield. *Min.Ref.* Gold, *see* 4289.

Scotchman Opal Mine, Keeroongooloo Run. *Min.Ref.* Opal (precious), *see* 6946A.

Scotland Hills, 5 miles S. of Gayndah Rail. Stn. *Min.Ref.* Jaspopal, *see* 7000; Limonite, 5832; Turgite, 7888. *See also under* Gov. Min. Jour., Report No. 35.

Scotsman Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1115.

Scotstown Bore. *See under* Artesian Bores. No. 393.

Scottish Gympie Gold Mines, Gympie Goldfield. *Min.Ref.* Gold, *see* 4481. *See also under* Gov. Min. Jour., Report No. 54.

Scrub Paddock Diggings (Gympie Copper Mines), 30 miles S. of Kilkivan Rail. Stn. *Include* German's or Dry Gully, White's or Manaramby Cr. *Min.Ref.* Azurite, *see* 242; Calcite, 481; Copper, 1841B; Copper Pyrites, 2137-2139; Galena, 2728-2730; Gold (alluvial) 3195, 3196, (reef) 3625, 3626; Hematite, 4700; Iron Pyrites, 5007-5012; Magnetite, 5983; Marcasite, 6500; Mispickel, 6661; Tenorite, 7716.

Geological Note: The rocks are described as "greenstone" in association with hornblendic slates and granite. Gold has been found only in alluvial deposits in the gullies. Quartz reefs occur in the "greenstone," but they have not been proved to be auriferous. *See* G.S.Q. Pub. No. 92, p. 111.

Scrubby Cr., nr. Kingston Rail. Stn. (Beaudesert line). *Min.Ref.* Coal, *see* 1777C. *See also under* Coal Bores.

—— ——, Por. 266, Par. of Yeerongpilly. *Min.Ref.* Coal, *see* 1776.

Sellheim (P.F.). Once Under Secretary for Mines. Term of Office, 1891 to 1899.

Sellheim Bismuth Mines, Eukalunda. *See* Sellheim Mineral Field for other details.

GEOLOGICAL NOTE: The country rock is syenite. The matrix of the bismuth is ironstone, the bismuth, together with copper, being in the form of carbonate. *See* G.S.Q. Pub. No. 57 for notes.

—— Co. *See* Kennedy South Dist. *See map,* Pl. 14.

Sellheim Mineral (Silver) Field—

SITUATION: *See maps,* Pls. 14, 15. Ninety-two miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. Centre about *Lat.* 21° 4′ S.; *Long.* 147° 29′ E.

POPULATION: 60 (?) (1912).

PROCLAMATION OF FIELD: First gazetted, 21st May, 1885; last alteration, 10th January, 1887, as follows:—Commencing at the confluence of the Sellheim and Suttor Rivers, and bounded thence by the northern, eastern, and southern watershed of the Sellheim River easterly, southerly, and westerly; thence by the southern watershed of Charley's Creek westerly to the Suttor River; and by that river downwards to the point of commencement.

AREA: 380,160 acres (594 sq. miles).

PRINCIPAL MINING CENTRE: Ukalunda.

MINERAL STATISTICS:

Silver,	*see tables,*	Pls. 37, 46, 46A.
Bismuth,	,,	Pls. 40, 46, 46A.

STATISTICAL NOTE: Silver (including Lead) and Bismuth are the two most important minerals of the Sellheim Mineral Field. The production of Silver up to the year 1912 was, approximately, 506,679 oz., valued at £68,513; that of Bismuth being 202 tons, valued at £22,793. The quantity of Silver and Bismuth mined on this field, compared to the whole Silver and Bismuth production of the State, is respectively 3·76 and 29·00 per cent.

MINERAL REFERENCES: Gold (aluvial), 3292-3295, (reef) 4145-4147; Silver, 7501-7503, (native) 7561, (Silver Ore) 7564; Lead (Anglesite) 60, (Cerussite) 1288-1293, (Galena) 3012-3022, (Lead) 5726, (Minium) 6633-6639; Copper (Azurite), 231A, 232, (Copper Ore) 2040, (Copper Pyrites) 2266-2268, (Cuprite) 2467, 2468, (Malachite) 6329-6331; Bismuth (Bismite), 314, 315, (Bismuth, native) 350, (Bismuth Ores) 356, (Bismuthinite) 373, 374, (Bismutite) 406-408; Wolfram, 8034B; Manganese (dioxide), 6446, 6447; Zinc Blende, 8169-8172; Iron (Hematite), 4762, 4763, (Iron Pyrites) 5317-5320, (Ironstone) 5591-5593; (Limonite) 5888, (Mispickel) 6768, 6769, (Scorodite) 7372. Other Minerals: Calcite, 511; Clay, 1575, 1576; Gypsum, 4627.

Sellheim Mineral (Silver) Field—*continued:*

GEOLOGICAL NOTE: The prevailing rocks are shales and sandstones of Gympie Formation (Permo-Carboniferous), and dolerite, the latter forming intrusions in the sedimentary rocks. Silver-lead lodes are present in the shales and sandstones, the ore consisting of galena with some zinc blende and iron pyrites. Hornblende granite occurs in the district in contact with the Gympie rocks, and "Desert Sandstone" forms tablelands on the adjacent mountains. *See* G.S.Q. Pub. No. 57 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 48, 57. *See under* Geol. Surv. List for title.

WARDEN: Stationed at Bowen. INSPECTOR OF MINES: Stationed at Charters Towers.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Serpent Hill Group of Copper Mines, Morris Cr., Cloncurry. *Includes* Serpent Hill Mining Freeholds (5, 6, 7, 8, and 9), and Chum M.C. (329). *Min.Ref.* Cuprite, *see* 2392B; Limonite, 5748B; Malachite, 6087B; Redruthite, 7208B; Tile Ore, 2493B.

Serpentine. *Compo.,* Hyd. silicate of magnesia. *Colour,* green shades. *Streak,* white. *Lustre,* sub-resinous to greasy. *H.* = 2·5-4. *Sp.gr.* = 2·50-2·65.

MINERAL NOTE: Serpentine is commonly the gangue of chromite and asbestos, and is frequently associated with deposits of gold, tin, copper, and wolfram. Usually it occurs as irregular masses or as large ill-defined "belts," but is sometimes interbedded with slate or other altered sedimentary rock. Serpentine has not been used for ornamental work, although deposits exist in numerous localities which could furnish very good material for this purpose. At Canoona a large mass of serpentine has been found to contain traces of gold very finely disseminated through it, and at Kandanga, south-west of Gympie, a large belt of serpentine, extending for many miles, has been proved to contain asbestos of good quality. The serpentine belt to the north-east of Rockhampton seems to be specially favourable for the occurrence of chromite, of which there are several known occurrences in the country about Cawarral.

7378. ——. *Assoc.with* Calcite, Fluorspar, and Siderite, in granite. *Loc.* Golden Gate, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 202, p. 10 (1905).

Siliceous Sinter. *Var. of* Opal, *which see.*

Silicon (Si). *Atom.Wt.* = 28·3. *Sp.gr.* = 2·49. *Colour,* steel-blue. *See under* Quartz and Opal. *See also under* Silicates.

USES: As an elementary substance silicon has no industrial uses, but its oxide, silica, in the form of quartz, chalcedony, and opal is of universal application. Combined with other oxides it is found in a large number of minerals, a list of which is given above. Crystalline silicon is of a greyish-white metallic colour, and is chiefly used as a deoxidiser in the refining of steel, and in the manufacture of ferro-carbon alloys. Pure silica sand, with the addition of coke, salt, and sawdust is used in the production of carborundum, now largely replacing emery as an abrasive.

Sillimanite. *Syn.* Fibrolite. *Compo.*, Silicate of alumina. *Colour,* brownish, greyish. *Lustre,* vitreous. *Streak,* whitish. *H.* =6-7. *Sp.gr.* =3·23-3·24.

7423. ——. In schist. *Loc.* In gully S. of Hospital Hill, Ebagoolah, Hamilton Goldfield, 33 miles (by road) W. of Port Stewart, 173 miles N.W.byW. of Cooktown. *Co.* Coen; *Dist.* Cook. *Ref.* L.C.B.

Silsoe, 25 miles S.E. of Fermoy, nr. eastern boundary of the Opalton Mineral Field. *Min.Ref.* Precious Opal, *see* 6951A.

Simpson and Rodger's Bore (Stewart's Cr). *See under* Coal Bores.

Silver (Ag). *Atom. Wt.* = 107·88. *Sp.gr.* = 10·1—11·1, varying with its condition.

MINERALS: *See* Argentite, Cerargyrite, Hessite, Native Silver, Proustite, Pyrargyrite, Stephanite.

MINERAL AND GEOLOGICAL NOTE: The associated minerals include bismuth, copper, gold, silver, iron, lead, manganese, and zinc ores, also mispickel, molybdenite, and stibnite—the two common associates of silver being gold in native gold-silver alloys and lead in galena. The gangues include Calcite, Epidote, Garnet, Kaolin, Mica, Quartz, Steatite, and Wollastonite, the first named being of common occurrence. These minerals occur either as veins, lodes, or irregular formations in slate, schist, limestone, garnet-rock, granite, etc. The age of the silver-bearing deposits are Palaeozoic, the limestone, slates, and schists belonging to the Permo-Carboniferous, Devonian, or Silurian, the garnet-rock and granite probably being of earlier formation.

DISCOVERY: First recorded discovery of silver was made in 1879 at Ravenswood; other discoveries being reported in 1881 at Argentine and Newelton, and in 1884 at Montalbion.

STATISTICAL NOTES: The world's production of silver during 1910 is valued, approximately, at £24,904,154, of which amount Australia is credited with £1,606,488, and Queensland with £92,685, the latter representing 5·77 per cent. of the Australian production, and 0·37 per cent. of that of the world.

The total quantity of silver recovered from all sources in Queensland up to the end of 1912 amounted to 13,497,125 oz., the value being £1,722,319. This represents 1·65 per cent of the value of the whole mineral production of the State, which, to the end of 1912, is valued at £104,009,087.

The year 1908 was the most productive in silver, the total quantity being 1,162,276 oz., the total value £117,889. This is equivalent to 8·61 per cent. of the total *quantity*, and 6·85 per cent. of the total *value* of the whole silver yield of the State.

The Herberton and Chillagoe Gold and Mineral Fields have produced 53·34 per cent. of the whole silver yield of the State, the quantity being approximately 7,199,910 oz., the production taking place between 1883 (the first year of record) and 1912. Then comes the Stanthorpe Mineral Field with a total silver yield of 2,061,345 oz. for the same period, equal to 15.27 per cent. of the whole State's production.

The Ravenswood Goldfield during the four years, 1883 to 1887, yielded silver averaging in value £23,000 per annum, but since 1887 the field has produced very little silver.

See Statistical Tables and Diagrams, Pls. 37, 45, 46, 46A, 48 for further details.

VALUES. *See table under* Metal Values in London for maximum and minimum prices for all years since 1882.

SILVER-LEAD FIELDS AND MINING CENTRES. Silver was once an important product of the Sellheim Mineral Field, where several mines were worked many years ago. Ravenswood, also, was an important centre, very rich lodes being worked there in 1879. Several silver-lead deposits have been opened at Texas and Sundown, in the Stanthorpe Mineral Field, at Lawn Hills in the Burketown Mineral Field, and at Chillagoe. At Lawn Hills large lodes of silver-lead ore exist which will be worked extensively as soon as railway communication is established with the Gulf of Carpentaria. The principal fields are as follows:—

Argentine (Star R.) (nr. Townsville). *See* maps, Pls. 16, 17.
Dry R. (nr. Herberton). *See maps*, Pls. 16, 17, 22.
Emu Plains (nr. Bowen). *See maps*, Pls. 14, 15.
Lawn Hills (nr. Burketown). *See maps*, Pls. 20, 21.
One-mile (nr. Ravenswood). *See maps*, Pls. 16, 17, 29.
Ravenswood. *See maps*, Pls. 16, 17, 29.
Sellheim (nr. Bowen). *See maps*, Pls. 14, 15.
Silverfield (nr. Montalbion). *See maps*, Pls. 8, 9, 22.
Stanthorpe. *See maps*, Pls. 12, 13, 30. Pikedale, Ballandean, Jibbinbar.
Star R. (Argentine), nr. Townsville. *See maps*, Pls. 16, 17.
Texas. *See maps*, Pls. 12, 13, 30. Silver Crown Mine, Silver King Mine, Silver Spur Mine.

See further references under names of fields.

Silver—*continued:*

Smelting Works: *See under* separate heading "Smelting Works in Queensland."

7424. Silver. *Assoc.with* Antimony, Native Copper, Cuprite, Massicot, Copper Carbonate, Graphite (traces), and Calcite, in talcose and silicious shales. *Loc.* Dugald Mine, Dugald R., 45 miles N.W of Cloncurry. *Co.* Argylla; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 10, p. 3 (1885).

7424a.——. *Assoc.with* Gold and Ironstone, in quartz. *Loc.* King Edward VII. Claim, Bishop's Cr. *Co.* Beaconsfield; *Dist.* Burke. *Ref.* A.R., p. 282 (1910).

7424b.——. *Assoc.with* Galena and Cerussite, in lode. Lawn Hills Silver-Lead Mines, 92 miles S.W. of Burke. *Co.* Gregory; *Dist.* Burke. *Yield: See* No. 8052. *Ref.* G.S.Q. Pub. 138, p. 2 (1900), 232, p. 45 (1911).

7425. ——. *Assoc.with* Gold and Graphite, in quartz reef. *Loc.* Black Snake P.C., 1 mile E. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 125, p. 37 (1897).

7426. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Waratah Mine, Queen of the Croydon Reef, 1½ mile E.byS. of Croydon Rail. Stn. (*ante*). *Assay:* Gold = 10 oz. 15 dwt. 4 gr. per ton; Silver = 40 oz. 6 dwt. 6 gr. per ton. *Ref.* G.S.Q. Pub. 118, p. 17 (1896), and G.S.M.

7427. ——. *Assoc.with* Gold, Galena, and Copper, in lodes. *Loc.* Woolgar Goldfield, 97 miles (by coach) N. of Richmond Rail. Stn., 404 miles (by rail and road) W.byS. of Townsville. *Co.* Woolgar; *Dist.* Burke. *Ref.* A.R. D.M., p. 42 (1886).

7428. ——. *Assoc.with* Gold. *Loc.* All Nations Reef, Boolboonda Hill, 12 miles N.E. of Mt. Perry Rail. Stn. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.Q. Pub. 21, p. 13 (1885).

7429. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Gaeta Goldfield, 30 miles N. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Assay: See* No. 3574. *Ref.* A.R., p. 36 (1907).

7430. ——. *Assoc.with* Gold and Carbonate of Copper. *Loc.* Harper's Hill, Mt. Drain, nr. Mt. Perry. *Co.* Bowen (*ante*). *Yields:* Silver = 44 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 27 (1897).

7431. ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Three miles S. of Mt. Perry, on Eidsvold Road. *Co.* Bowen (*ante*). *Ref.* A.R., p. 158 (1908).

7432. ——. *Assoc.with* Galena. *Loc.* Reid's Cr., 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* B.D.

7433. ——. *Assoc.with* Gold, Molybdenite, and Copper Pyrites, in quartz veins. *Loc.* Globe Copper Mine, Wolca, 6 miles N. of Mt. Perry Rail. Stn. *Co* Bowen (*ante*). *Assay: See* No. 2130. *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and B.D.

7434. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Zinc Blende. *Loc.* Allendale Silver Mine, 6 miles N.W. of Chowey Rail. Stn. (Gayndah line), 68 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Assay: See* No. 3567. *Ref.* G.S.Q. Pub. 25, p. 3 (1886), and P.R.S.Q., vol. 4, p. 39 (1887).

7435. ——. *Assoc.with* Gold, Lead, Iron Pyrites, and Magnetite, in lode. *Loc.* Hannan's Silver-Lead Mine, N.E. of Allendale Mine, Chowey Rail. Stn. (*ante*). *Contents: See* No. 3568. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

7436. ——. *Assoc.with* Gold, Copper Pyrites, Cuprite, Tenorite, Malachite, Iron Pyrites, Mispickel, Hematite, Bismuthinite, Pyrrhotite, Zinc Blende, and Calcite, in lode. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook; *Dist.* Burnett. *Ref.* G.S.Q. Pubs. 185, p. 6 (1903), 207, pp. 14-19 (1907).

7437. Silver. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Mispickel, Native Bismuth, Bismuthinite, Magnetite. and Ironstone, in lode. *Loc.* Don Jon Bismuth Mine, ¼-mile S. of Mt. Havilah, 2¼ miles S.S.W. of Degilbo Rail. Stn. (*ante*). *Ref.* G.S.Q. Pubs. 173, p. 4 (1902), 207, pp. 13, 14 (1907).

7438. ——. *Assoc.with* Gold, in lode. *Loc.* Near Bin Bin Range, to the S. of Mt. Shamrock, 12 miles S.E. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Assays: See* No. 3628. *Ref.* G.S.Q. Pub. 60. p. 6 (1890).

7439 ——. *Assoc.with* Gold, in quartz reef. *Loc.* British Empire Mine, between Murderers and Bennett's Gullies, 14 miles W.byS. of Gayndah Rail. Stn., 104 miles (by rail and road) W. of Maryborough. *Co.* Mackenzie (*ante*). *Ref.* A.R., p. 120 (1907).

7440. ——. *Assoc.with* Lead Ores, nr. Wigton Head Stn., Wooroon, 21 miles S. of Gayndah Rail. Stn. *Co.* Mackenzie (*ante*). *Ref.* O.M.

7441. ——. *Assoc.with* Galena and Massicot. *Loc.* St. John's Cr. Goldfield, Burnett R., 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* Burnett. *Ref.* G.S.M.

7442. ——. *Assoc.with* Gold, in alluvial deposits. *Loc.* St. John's Cr. Goldfield, Burnett R. (*ante*). *Ref.* A.R., p. 59 (1906).

7443. ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in quartz. *Loc.* Apple-tree Lease, Cabbage-tree Cr., Mt. Cannindah, 40 miles S.W. of Miriam Vale Rail. Stn. (North Coast line). *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 113, p. 9 (1896).

7444. ——. *Assoc.with* Gold, in quartz. *Loc.* Little Wonder Lease, Mt. Cannindah (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 113, p. 9 (1896).

7445. ——. *Assoc.with* Gold, Native Copper, Cuprite, Tenorite, Azurite, and Malachite, in lode. *Loc.* Mt. Cannindah Mine, Mt. Cannindah (*ante*). *Ref.* G.S.Q. Pubs. 105, pp. 6, 7, and 113, p. 7 (1896).

7446. ——. *Assoc.with* Galena and Anglesite. *Loc.* Yarrol Stn., Dawes Range, 25 miles N.W. of Mt. Perry Rail. Stn., 92 miles (by rail and road) W. of Bundaberg. *Co.* Yarrol (*ante*). *Ref.* G.S.M.

7447. ——. *Assoc.with* Gold, in quartz. *Loc.* Gladstone Reef, 4 miles N. of Munburra, Starcke Goldfield, 44 miles N.N.W. of Cooktown. *Co.* Banks; *Dist.* **Cook.** *Ref.* G.S.Q. Pubs. 209, p. 10 (1907), 223, p. 27 (1909), and A.R., p. 63 (1906).

7448. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Last Hit Reef, Munburra, Starcke Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 209, p. 9 (1907), 210, pp. 31-36 (1909), and A.R. 63 (1906).

7449. ——. *Assoc.with* Mica. *Loc.* Mines at the head of Wandoo Cr., 10 miles N.W. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Bolwarra; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 16 (1898).

7449A.——. *Assoc.with* Anglesite and Cerussite, in lode. *Loc.* Mt. Dee Vall Claim, Castleton, 5 miles S.S.E. of Charleston Rail. Stn., **Etheridge Goldfield.** *Co.* Gilbert; *Dist.* Cook. *Ref.* A.R., p. 200 (1909).

7449B ——. *Assoc.with* Copper Pyrites, Cerussite, Galena, and Limonite, in lode. *Loc.* Mt. Dee Vall Claim, Charleston, 144 miles (by rail) S.W. of Almaden Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* O.R.

7449C.——. *Assoc.with* Galena, Anglesite, Cerussite, and Malachite, in quartz lode. *Loc.* Wright's Leader, Donnyville, 4½ miles S. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* A.R., p. 228 (1910).

7450. ——. *Assoc.with* Gold and Lead Ore. *Loc.* Grand Junction P.C., Glenrowan Cr., 20 miles S.byW. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pub. 125, p. 49 (1897).

7450A.——. *Assoc.with* Gold, Copper Pyrites, Chalcanthite, and Copper carbonate, in quartz reef. *Loc.* Elektron Silver Mine, Caledonia Cr., trib. of Goldsmiths Cr., 24 miles S.S.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 6 (1887).

7450B.——. *Assoc.with* Galena, Massicot, and Limonite, in quartz. *Loc.* M.L. 64, Mosquito Cr., about 10 miles S.W.byS. of Charleston Rail. Stn. (Etheridge line), Etheridge Goldfield. *Co.* Gilbert (*ante*). *Assays: See* No. 2756B. *Ref.* A.R., p. 268 (1910).

7450C.——. *Assoc.with* Gold, Galena, Massicot, Anglesite, and Cerussite, in lode. *Loc.* One mile N. of International Mine, Rocky Sandy Cr., 6 miles S.W.byS. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Assays: See* No. 2757A. *Ref.* A.R., p. 228 (1910).

7450D.——. *Assoc.with* Galena, in quartz. *Loc.* Stockman Mine, between Talbot and Machine Crs., 10 miles S.E.byS. of Georgetown. *Co.* Gilbert (*ante*). *Ref.* A.R., p. 254 (1910).

7451. ——. In gossan ore. *Loc.* Blue Bell Mine, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe Br. line), **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

7452. ——. *Assoc.with* Galena and Anglesite. *Loc.* Lady Jane Mine, Montalbion (*ante*). *Contents:* Silver = 408 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

7452A.——. *Assoc.with* Tetrahedrite, in pipe vein. *Loc.* Lady Jane Mine, Montalbion (*ante*). *Ref.* G.S.Q. Pub. 119, p. 29 (1897).

7453. ——. *Assoc.with* Galena and Anglesite. *Loc.* North Queensland Silver Mine, Montalbion (*ante*). *Ref.* G.S.Q. Pub. 125, p. 31 (1897).

7454. ——. *Assoc.with* Galena. *Loc.* Star No. 1 Silver Mine, Montalbion (*ante*). *Estimated Contents:* Silver = 46 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

7455. ——. *Assoc.with* Lead Ore. *Loc.* Mountain Maid Mine, 5 miles S. of Montalbion, 12 miles S.S.W. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

7456. ——. In gossan ore. *Loc.* Albion Silver Mine, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn. (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Contents:* Silver = 146 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

7457. ——. *Assoc.with* Galena, Argentite, and Stibnite.. *Loc.* Cumnor Lease, Silverfield (*ante*). *Assay:* Silver = 1,400 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 46 (1887).

7458. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, Mispickel, and Zinc Blende. *Loc.* Tornado Claim, Silverfield (*ante*). *Analysis: See* No. 2155. *Ref.* P.R.S.Q., vol. 4, pp. 48, 52 (1887).

7459. ——. *Assoc.with* Galena. *Loc.* Torphy's Silver-Lead Mine, Crooked Cr., br. of Walsh R., 3½ miles E.N.E. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Assay: See* No. 2792. *Ref.* A.R., p. 123 (1907), and A.R.D.M., (1904), p. 149.

7460. ——. *Assoc.with* Copper Ores. *Loc.* Combination Copper Mine, Halpin's Cr., br. of California Cr., S. of Lappa Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 49 (1900).

7461. ——. *Assoc.with* Galena and Cassiterite. *Loc.* Tennyson Tin and Silver Mine, Koorboora, 108 miles (by rail and road) S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay: See* No. 2799.

7462. ——. *Assoc.with* Lead Ore. *Loc.* Better Luck Mine, Lappa Junction (Chillagoe-Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, pp. 33, 50 (1897).

7463. ——. *Assoc.with* Calcite and Zinc Blende, in lode. *Loc.* Paisley Silver Mine, Muldiva, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 35 (1897).

7464. ——. *Assoc.with* Galena. *Loc.* Lady Jane Mine, 1 mile S.E. of Mungana Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*).

7465. ——. *Assoc.with* Copper Ore. *Loc.* McIlwraith Lease, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 33 (1897).

7466. ——. *Assoc.with* Copper and Galena. *Loc.* Penzance Mine, Redcap Cr. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 51 (1897).

7467. ——. *Assoc.with* Cerussite and Malachite, in quartz. *Loc.* Ortho Lease, Ortho Camp, 4 miles N.W. of Calcifer Rail. Stn. (Chillagoe line), 137 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Co.* Lynd; *Dist.* Cook. *Assay:* Silver = 100 oz. per ton. *Ref.* G.S.Q. Pub. 133, p. 10 (1898).

——. For other Walsh and Tinaroo localities, *see* Nos. 7449, 7478, etc.

7468. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Wise's Shaft, Wise's Knob, Oaks Goldfield, 45 miles E.S.E. of Charleston Rail. Stn. *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 164 (1908).

7468A.——. *Assoc.with* Gold, in quartz. *Loc.* Pyramid Hill, Banks (Moa) Island, Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* A.R., p. 311 (1911).

7468A1.——. *Assoc.with* Gold, in quartz. *Loc.* About 5 miles from Hayes's Cr. Prov. Goldfield, and about 195 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* Cook. *Ref.* A.R., p. 287 (1910).

7468B.——. *Assoc.with* Gold, in quartz. *Loc.* Valley of Hills, 6 miles N. of Hayes's Cr. Prov. Goldfield, Cape York Peninsula. *Co.* Weymouth (*ante*). *Ref.* A.R., p. 286 (1910).

7469. ——. *Assoc.with* Iron Pyrites. *Loc.* Border Chief Silver Mine, Jibbinbar, 20½ miles S.byW. of **Stanthorpe** Rail. Stn. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

7470. Silver. *Assoc.with* Gold, Copper Pyrites, and Mispickel, in quartz reef. *Loc.* Fletcher's Sel. (29), Jibbinbar (*ante*). *Assays: See* 3832. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

7471. ——. *Assoc.with* Galena, Iron Pyrites, Mispickel, and Zinc Blende. *Loc.* Jibbinbar Silver Mine, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

7472. ——. *Assoc.with* Copper Pyrites, Malachite, and Mispickel, in lode. Min. Area (26), Jibbinbar (*ante*). *Assay:* Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 87, p. 11 (1892).

7473. ——. Pikedale Silver Mine, Woolshed Gully, 20 miles N.W.byN. of Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* O.R.

7474. ——. *Assoc.with* Mispickel, in quartz reef. *Loc.* Sel. (23), Sundown Cr., Severn R., 11 miles W.S.W. of Ballandean Rail. Stn., 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assays:* (1) Silver = 70 oz. per ton. (2) Gold = 2 dwt. 4 gr., Silver = 11 dwt. 23 gr. per ton. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

7475. ——. *Assoc.with* Gold, Iron Pyrites, and Copper carbonate, in quartz reef. *Loc.* Sel. 24, Sundown Cr., Severn R. (*ante*). *Assay:* Gold = 18 dwt., Silver = 16 oz. per ton. *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

7476. ——. *Assoc.with* Galena, Anglesite, and Massicot. *Loc.* Silvery Wave Mine, Stanthorpe, 38 miles (by rail) S. of Warwick. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

7476A. ——. *Assoc.with* Galena and Cerussite. *Loc.* Macdonald Goldfield, 31 miles W.byS. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* O.R.

7477. ——. *Assoc.with* Galena, Copper Pyrites, and Iron Pyrites. *Loc.* Silver Spur Mine, nr. **Texas,** 43 miles W.S.W. of Stanthorpe. *Co.* Clive (*ante*). *Assay:* (1) Silver = 25 oz. per ton. (2) Silver = 70 oz. per ton. *Ref.* G.S.M. and G.S.Q. Pub. 125, p. 51 (1897).

7477A. ——. *Assoc.with* Copper Pyrites, Galena, and Zinc Blende. *Loc.* Claim on Lucky Valley Goldfield, 12 miles S.S.E. of Warwick *Co.* Merivale; *Dist.* Darling Downs. *Ref.* A.R., p. 223 (1910).

7478. ——. *Assoc.with* Galena, Anglesite, Minium, and Malachite. *Loc.* Koh-i-noor Mine, Coolgarra, 12 miles N.E.byN. of Mt. Garnet Rail. Stn. **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Yield:* Silver = 90 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

7479. ——. *Assoc.with* Gold, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Iron Pyrites, Mispickel, Hematite, Magnetite, Cerussite, Minium, and Zinc Blende, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mines, Return Cr., 136 miles (by rail) S.W. of Carins, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

7480. ——. *Assoc.with* Copper and Lead Ore. *Loc.* Schlumacher's Mine, 9 miles S.W. of Herberton, 10 miles S.E.byS. of Stannary Hills (Stannary Hills tram., br. of Chillagoe line). Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 125, p. 32 (1897).

——. For other Walsh and Tinaroo localities, *see* No. 7451, etc.

7480A. ——. *Assoc.with* Gold, Anglesite, Massicot, and Cerussite, in lode. *Loc.* Nr. Bluff Stn., 9 miles S.E. of Mt. Leyshon, 22 miles S.S.E. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* A.R., p. 260 (1910).

7480B. ——. *Assoc.with* Galena and Cerussite. *Loc.* Nr. Chinaman's Gully, about 2½ miles E. of Mt. Leyshon, about 16 miles S.byE. of Charters Towers. *Co.* Davenport (*ante*). *Assay:* Silver = 72 oz.; Lead = 65·2 per cent. *Ref.* A.R., p. 223 (1910).

7480C. ——. *Assoc.with* Gold, Galena, Cerussite, and Limonite, in lode. *Loc.* ¾-mile E. of Mt. Leyshon, 16 miles S. of Charters Towers. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

7480D. ——. *Assoc.with* Gold, Galena, Anglesite, Massicot, and Cerussite, in lode. *Loc.* Right-hand br. of One-mile Gully, 1½ mile S.E. of Mt. Leyshon. *Co.* Davenport (*ante*). *Ref.* A.R., p. 259 (1910).

7481. ——. *Assoc.with* Gold, in quartz. *Loc.* Pyramid or 70-Mile Diggings, 19 miles (by road) S. of Charters Towers. *Co.* Davenport (*ante*). *Assay:* Gold = 6 oz. per ton; Silver = 16 oz. per ton. *Ref.* G.S.M.

7482. ——. *Assoc.with* Gold, in lode 36 ft. wide. *Loc.* Lease (278), Mt. Success, 15 miles N.N.W. of Ravenswood Junction. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 125, p. 58 (1897).

7483. ——. *Assoc.with* Gold, in lode 75 ft. wide. *Loc.* Lease (280), Mt. Success (*ante*). *Assay:* Gold = 1 oz. per ton; Silver = 10 oz. per ton. *Ref.* G.S.Q. Pub. 125, p. 58 (1897).

7484. ——. *Assoc.with* Gold and Galena, in lead ochre. *Loc.* Comstock Silver Mine, near Plumtree Cr., 3½ miles S.E.byE. of **Ravenswood** Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Assays:* Silver = 81¾ oz. and 19 oz. per ton; Lead = 73·5 and 14½ per cent; Gold = 1 oz. 13 dwt. per ton. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

7485. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, Stibnite, and Zinc Blende, in lode. *Loc.* King's Silver Lode, 1 mile N. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 11 (1897).

7486. ——. *Assoc.with* Gold, Galena, and Cerussite, in quartz. Ravenswood Silver Mg. Co.'s Mine, about 1¼ mile N. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Assay:* Silver = 350 to 400 oz., Gold = 2 oz. per ton. *Ref.* P.R.S.Q., vol. 4, p. 47 (1887), and G.S.Q. Pub. 125, p. 34 (1897).

7487. ——. *Assoc.with* Galena. *Loc.* Sandy Cr., 3 miles E.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Assay:* Silver = 259 oz. per ton; Lead = 65 per cent. *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

7488. ——. *Assoc.with* Gold, and with traces of Copper, Lead, and Bismuth. *Loc.* Paddy's Gully, Mt. Remarkable, Cape R. Goldfield, 66 miles (by rail) S.W.byS. of Charters Towers. *Co.* Griffith; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 37 (1898).

7489. ——. *Assoc.with* Wire Gold and Calcite, and with traces of Copper and Lead, in quartz reef. *Loc.* Upper Cape Diggings, 17 miles W.byN. of Cape R. Rail. Stn., Cape R. Goldfield, 77 miles (by rail and road) W.S.W. of Charters Towers. *Co.* Griffith (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 28 (1887).

7490. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Azurite, and Malachite, in quartz reef. *Loc.* Venture Reef, Marengo Goldfield, 24 miles S.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Assay:* Gold = 1 oz. 6 dwt. 3 gr. per ton; Silver = 6 oz. 12 dwt. 0 gr. per ton. *Ref.* G.S.Q. Pub. 5, p. 11 (1879).

7491. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Bowden and Co.'s Sel. (147), **Star R.** (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

7492. ——. North Star Silver Mine, on br. of Little Star R., Star. R. (Argentine) Mineral Field (*ante*). *Ref.* O.R.

7493. ——. *Assoc.with* Galena, Azurite, and Barytes. *Loc.* Star R. (Argentine) Silver Field (*ante*). *Ref.* L.B. 1, p. 479 (1883).

7494. ——. *Assoc.with* Lead. *Loc.* Andromache R., 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* A.R.D.M., pp. 14, 110 (1896).

7495. ——. *Assoc.with* Gold, in quartz. *Loc.* Junction P.C., Bee Cr. Diggings, 60 miles W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South *Ref.* G.S.Q. Pub. 54, p. 3 (1889).

7496. ——. *Assoc.with* Copper Ore. *Loc.* Emu Plains Silver Field, Bowen R., 50 miles S. of Bowen. *Co.* Carlisle (*ante*). *Assay:* Silver = 2,299 oz. per ton. *Ref.* L.B. 2, p. 231 (1889).

7496A.——. *Assoc.with* Tetrahedrite. *Loc.* Emu Plains Silver Field, Bowen R. (*ante*). *Ref.* G.S.Q. Pub. 54, p. 5 (1889).

7497. ——. *Assoc.with* Gold, in lode. *Loc.* Block (6), Eungella Run, Broken R., 30 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* O.M.

7498. ——. *Assoc.with* Gold, Copper Pyrites, Bismutite, Mispickel, and Hematite, in quartz veins. *Loc.* Gold Workings, Mine Cr., nr. Black Waterhole Cr., 2 miles N.E. of Hazeldean, 37 miles (by rail and road) S.W. of Mackay, Mt. Spencer Gold and Mineral Field. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 164, pp. 10-12 (1901).

7499. ——. *Assoc.with* Gold and Copper. *Loc.* Pine Vale Cr. Copper Mines, 9 miles S.byE. of Eton Rail. Stn., 22 miles (by rail and road) S.byW. of Mackay, Mt. Spencer Gold and Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 164, pp. 10-12 (1901).

7499A.——. *Assoc.with* Gold, in quartz. *Loc.* Albion Reef, Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 5, p. 7 (1879).

7500. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Perseverance Mine, Normanby Goldfield (*ante*). *Ref.* A.R., p. 161 (1908).

7500A.——. *Assoc.with* Malachite, Azurite, and Limonite, in lode. *Loc.* Nr. Finch Hatton Rail. Stn. (Mackay line), 38 miles W.S.W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* A.R., p. 280 (1910)

7500B.——. *Assoc.with* Galena, Anglesite, and Cerussite, in lode. *Loc.* Black Cr., br. of Police Cr., about 30 miles S.byE. of Mt. Wyatt Goldfield. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* A.R., p. 221 (1910).

7501. Silver. *Assoc.with* Galena, Cerussite, Minium, Zinc Blende, Iron Pyrites, and Ironstone, in lode. *Loc.* Rob Roy Silver Mine, Eukalunda, **Sellheim** Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Assays: See* No. 3017. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

7502. ——. *Assoc.with* Galena, Cerussite, and Minium, in lode. *Loc.* Silver King Mine, Sellheim Mineral Field (*ante*). *Assay: See* No. 1293 *Ref.* G.S.Q. Pub. 57, p. 7 (1889).

7503. ——. *Assoc.with* Lead. *Loc.* Sellheim Silver Field Mines, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 57, pp. 2-7 (1889).

7504. ——. *Assoc.with* Gold, Malachite, and Mispickel, in quartz. *Loc.* Ironbark Mine, Miner's Cr., Sandy Cr., Collaroy, 25 miles N.W. of St. Lawrence. *Co.* Killarney; *Dist.* **Leichhardt.** *Assay: See* No. 4181. *Ref.* G.S.Q. Pub. 141, p. 4 (1898).

7505. ——. *Assoc.with* Gold (traces), Copper carbonate, Tile Ore, and Minium, in quartz and steatite. *Loc.* Reef or Lode, 4 miles N.W. of junction of Tierawoomba and Boothill Crs., 50 miles S.S.W. of Mackay. *Co.* Wodehouse; *Dist.* Leichhardt. *Assay:* Silver = 25 oz. per ton; Gold = trace. *Ref.* G.S.Q. Pub. 39, p. 7 (1887).

7505A.——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Tally Ho Claim, Mt. Spencer Run, about 10 miles S. of Eton Rail. Stn. (Mackay line). *Co.* Wodehouse (*ante*). *Ref.* A.R., pp. 284, (1910), 317 (1911).

7506. ——. *Assoc.with* Gold, Galena, Iron Pyrites, Mispickel, and Zinc Blende. *Loc.* Monsildale Silver Mine, Por. 46, Par. of Monsildale, 35 miles N.byW. of Esk Rail. Stn. (Brisbane Valley Br.), 102 miles (by rail and road) N.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Assays: See* No. 4205. *Ref.* A.R., p. 169, pp. 1-4 (1901).

7507. ——. *Assoc.with* Gold, Lead, and Bismuth, in clay. *Loc.* Mt. Langan, nr. Blackall, 32 miles N.W. of Esk Rail. Stn., 71 miles (by rail and road) of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Average of 7 Assays:* Gold = 9 gr. per ton; Silver = 7 oz. 12 dwt. 16 gr. per ton. *Ref.* A.R., pp. 64, 65 (1906).

7507A.——. *Assoc.with* Gold, Galena, and Zinc Blende, in lode. *Loc.* Langan's Mine, Mt. Langan (*ante*). *Ref.* A.R., p. 213 (1910).

7508. ——. *Assoc.with* Gold and Copper. *Loc.* Taromeo, 20 miles N.N.W. of Kannangur Rail. Stn. (Brisbane Valley line), 103 miles (by rail and road) N.W. of Brisbane. *Co.* Cavendish (*ante*). *Assays: See* No. 4205. *Ref.* A.R., p. 71 (1906).

7508A.——. *Assoc.with* Gold and Hematite. *Loc.* Dundas, 16 miles N.N.W. of Ipswich. *Co.* Stanley; *Dist.* Moreton. *Ref.* A.R., p. 316 (1911).

7509. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and slate. *Loc.* Samson Cr., Samford, 8 miles W.N.W. of Enoggera Rail. Stn. *Co.* Stanley (*ante*). *Ref.* O.R.

7509A.——. *Assoc.with* Gold, in quartz. *Loc.* 2 miles S. of Kingston Rail. Stn. (Beaudesert line), 19 miles S.E.byS. of Brisbane. *Co.* Stanley (*ante*). *Ref.* A.R., p. 275 (1910).

7510. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Bethania Junction (South Coast line), 21 miles (by rail) S.S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Assay: See* 4216. *Ref.* A.R., p. 51 (1906).

7510A.——. *Assoc.with* Gold, in quartz. *Loc.* Por. 158, Par. of Boyd, 4 miles S. of Beenleigh. *Co.* Ward (*ante*). *Ref.* (and *Assays*) Q.G.M.J., vol. 11, p. 418 (1910).

7511. ——. *Assoc.with* Gold, Cassiterite, Platinum, and Monazite, in beach deposits. *Loc.* Currumbin Cr. to Pt. Danger, Tweed Heads, 69 miles (by rail) S.S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* (and *Analyses*) G.S.Q. Pub. 198 (1905).

7512. ——. *Assoc.with* Gold. *Loc.* 4 miles S. of Nerang Rail. Stn., South Coast line, 53 miles (by rail and road) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 83 (1907).

7513. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Tunnel, nr. Southport, 50 miles (by rail) S.E. of Brisbane. *Co.* Ward (*ante*). *Ref.* A.R., p. 150 (1908).

7514. ——. *Assoc.with* Galena. *Loc.* Silver Queen Mine, Barmundoo Goldfield, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.M.

7515. ——. *Assoc.with* Gold (traces), Ironstone, Wollastonite, Epidote, and traces of Copper carbonate, in limestone, garnet rock, and granite. *Loc.* P. Area (49), Diglum Cr., Barmundoo, 28 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, pp. 6, 9 (1901).

7516. ——. *Assoc.with* Gold, Azurite, Malachite, and Mispickel, in quartz, ironstone, and clay. *Loc.* P. Area (56), Diglum Cr., Barmundoo, 28 miles S.byW. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 162, p. 9 (1901).

7517. ——. *Assoc.with* Gold, Galena, Cerussite, Anglesite, Massicot, Minium, Hematite, and Limonite. *Loc.* Bompa Silver-Lead Mines, **Glassford Cr.,** 2 miles W.byS. of Littlemore Rail. Stn. (Boyne-Valley line), 53 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 159, pp 7, 8 (1901).

7518. ——. *Assoc.with* Gold, Iron Pyrites, Zinc Blende, and Galena, in quartz and calcite. *Loc.* All-Nations' Reef, **Norton Goldfield,** 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pub. 208, p. 13 (1907).

7519. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Zinc Blende, and Malachite, in quartz. *Loc.* Brigham Young (Todman's Tapautohounga) Mine, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, pp. 15, 16 (1907).

7520. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Redruthite, Azurite, Malachite, Mispickel, Zinc Blende, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assay: See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

7521. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Mispickel, and Zinc Blende, in quartz. *Loc.* Conran's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 58, p. 8 (1890).

7522. ——. *Assoc.with* Gold, in quartz. *Loc.* Dent's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 19 (1907).

7523. ——. *Assoc.with* Gold, Galena, Iron Pyrites, Copper Pyrites, and Zinc Blende, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay: See* No. 3048. *Ref.* G.S.Q. Pub. 208, pp. 22-24 (1907).

7524. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Galena, Zinc Blende, and Redruthite, in quartz. *Loc.* Goody's (Carmichael's) Reef, Norton Goldfield (*ante*). *Assay:* Gold = 19 dwt. per ton; Silver = 16 oz. 8 dwt. per ton. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

7525. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Mispickel, and Zinc Blende, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay: See* No. 4280. *Ref.* G.S.Q. Pubs. 21, p. 7 (1885), 208, p. 29 (1907).

7526. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz and calcite. *Loc.* Marodian Reef, Norton Goldfield. *Ref.* G.S.Q. Pub. 208, p. 32 (1907).

7527. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Zinc Blende, and Galena, in quartz and calcite. *Loc.* Who'd-Ha'-Thought-It Reef, Norton Goldfield. *Assay: See* No. 4294. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), and 208, p. 39 (1907).

7527A. ——. *Assoc.with* Gold and Hematite, in quartz. *Loc.* Found-at-Last Mine, One Tree Hill, 1 mile S. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J., vol. 3, pp. 606, 607 (1902).

7527B. ——. *Assoc.with* Gold and Mispickel, in quartz. *Loc.* Archer Reef, Targinie Goldfield, 4 miles N.N.W. of Yarwun Rail. Stn. (North Coast line). *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* (and *Assays*) Q.G.M.J. vol. 2, pp. 529-530 (1901).

7527C. ——. *Assoc.with* Gold, in quartz. *Loc.* Targinie Reefs, Targinie Goldfield (*ante*). *Ref.* Q.G.M.J., vol. 2, pp. 529-530 (1901).

7527D. ——. *Assoc.with* Gold, Galena, Zinc Blende, and Copper Pyrites, in quartz reef in diorite country. *Loc.* Britannia Mine, N. of Lake Learmouth, Canoona Goldfield, 35 miles N.byW. of Rockhampton. *Co.* Liebeg; *Dist.* Port Curtis. *Assay: See* No. 3058A. *Ref.* B.D.

7528. ——. *Assoc.with* Gold and Copper Pyrites. *Loc.* about ¼-mile from Baree Rail. Stn., 1 mile N. of Mt. Morgan Rail. Stn., 23 miles (by rail) S.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Assay: See* No. 2296. *Ref.* A.R., p. 47 (1906).

7529. ——. *Assoc.with* Gold, in quartz. *Loc.* Coolcoora, 14 miles (by rail) E.N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* A.R., p. 47 (1906).

7530. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, with traces of Zinc Blende, Galena, Azurite, Malachite, Witherite, Barytes, Earthy Hematite, and Red Jasper, in massive lode in quartzite, ironstone, and shale. *Loc.* Gt. Fitzroy Copper and Gold Mine, Mt. Chalmers, 19 miles (by rail) N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Average Assays:* Gold = 3½ dwt., Silver = 1 oz. per ton; Copper = 4½ per cent. *Ref.* G.S.Q. Pub. 216 (1907).

7531. ——. *Assoc.with* Cuprite, Tenorite, Malachite, Cerussite, Iron Pyrites, Zinc Blende, and Barytes, in serpentinous shales, etc. *Loc.* Mt. Warminster Copper-Lead Mine, 20 miles (by rail) N.E. of Rockhampton, Cawarral Goldfield. *Co.* Livingstone (*ante*). *Ref.* B.D.

7531A. Silver. *Assoc.with* Telluride of Gold, Iron Pyrites, and Zinc Blende, in calcite and quartz. *Loc.* Anglo Saxon Mine, Mt. Usher, 6 miles N.E. of Mt. Morgan Rail. Stn., 30 miles (by rail) S.S.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* O.R.

7532. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Hematite, Magnetite, Limonite, Göthite, and Pyrolusite, in vesicular quartz, quartzite, kaolin, and ironstone. *Loc.* Mt. Morgan Mine, 24 miles (by rail) S.S.W. of Rockhamptan. *Co.* Raglan; *Dist.* Port Curtis. *Refs.* (and *Assays*) G.S.Q. Pubs. 17 (1884), 47 (1888), 83 (1892), and 132 (1898).

7533. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Black Snake Reef, Black Snake Goldfield, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* **Wide Bay.** *Ref.* G.S.Q. Pub. 28, p. 5 (1886), and G.S M.

7534. ——. *Assoc.with* Gold, in quartz. *Loc.* Homeward Bound Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.M.

7535. ——. *Assoc.with* Gold and Copper Ores. *Loc.* Kilkivan Gold Mine, Black Snake (*ante*). *Ref.* G.S.Q. Pub. 125, p. 36 (1897).

7536. ——. *Assoc.with* Gold, Copper Pyrites, Redruthite, Pyrrhotite, Mispickel, Galena, and Stibnite. *Loc.* Mariner's Reef, Black Snake Goldfield. *Assays and Analyses: See* No. 2318. *Ref.* G.S.Q. Pub. 28, p. 6 (1886).

7537. ——. *Assoc.with* Gold, Native Copper, Copper carbonate, and Galena, in lode. *Loc.* Mt. Terrible Lode, Black Snake Goldfield (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

7538. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, Mispickel, Zinc Blende, and Schorl, in quartz. *Loc.* Victoria Reef, Black Snake Goldfield (*ante*). *Ref.* G.S.M., G.S.Q. Pub. 28, p. 7 (1886).

7539. ——. *Assoc.with* Gold, Iron Pyrites, and Tenorite, in quartz. *Loc.* Stoney Ridge, Black Snake Goldfield (*ante*). *Ref.* G.S.M.

7540. ——. *Assoc.with* Gold and Copper Pyrites. *Loc.* Blue Bell P. Area, 32 miles from Gympie. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* B.D.

7541. ——. *Assoc.with* Gold. *Loc.* Chinaman's Cr., trib. of Mary R., Mt. Ubi, Blackall Range, 15 miles W. of Palmwoods Rail. Stn., North Coast line. *Co.* Lennox (*ante*). *Ref.* A.R., p. 83 (1907).

7542. ——. *Assoc.with* Gold, in quartz. *Loc.* Chinaman's Cr., trib. of Mary R. (*ante*). *Ref.* A.R., pp. 95, 96 (1907).

7543. ——. *Assoc.with* Gold, in quartz. *Loc.* S.E. of Devil's Mountain, 17 miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Assay: See* No. 4549. *Ref.* A.R., p. 160 (1908).

7544. ——. *Assoc.with* Galena. Fat Hen Cr. Mine, Gympie Goldfield (*ante*). *Assay: See* No. 3081. *Ref.* G.S.Q. Pub. 125, p. 52 (1897).

Silver (native). *Compo.*, Silver, with some gold, copper, etc. *Colour and Streak*, silver-white; often with a blackish tarnish. *H.* = 2·5-3; *Sp.gr.* = 10·1-11·1.

7545. ——. *Assoc.with* Cerargyrite. *Loc.* Croydon Queen No. 2 S. Mine, 1 mile N. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist* **Burke.** *Ref.* G.S.M.

7545A. ——. *Assoc.with* Gold and Limonite, in quartz. *Loc* Miner's Right Lease (Queen of Croydon Reef), about 1 mile E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*).

7546. ——. *Assoc.with* Gold, in quartz. *Loc.* Golden Gate, and other Reefs on the Croydon Goldfield (*ante*). *Ref.* B.D.

7547. ——. *Assoc.with* Ironstone. *Loc.* True Blue Reef, 1¾ mile N.W.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Assay:* Gold = 4 oz, Silver = 200 oz. per ton. *Ref.* B.D.

7548. ——. *Loc.* Waratah Reef, 1½ mile E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.M.

7549. ——. *Loc.* Nannan Mine, Montalbion, 7 miles S.W. of Stannary Hills Rail. Stn., Chillagoe Br. line, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.M.

7550. ——. *Assoc.with* Copper Ores. *Loc.* Nelly Mine, Chillagoe, 139 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd (*ante*). *Ref.* G.S.Q. Pub. 125, p. 34 (1897).

7551. ——. *Assoc.with* Cassiterite. *Loc.* Mine adjoining the Tennyson, Koorboora, 108 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*).

7552. ——. *Assoc.with* Malachite and Azurite, in slate. *Loc.* Muldiva Mines, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7553. ——. *Assoc.with* Gold and Native Copper. *Loc.* Noble Island, 74 miles W.byN. of Cooktown. *Co.* Melville; *Dist.* Cook. *Assay:* Gold = 3 dwt. per ton; Silver = 240 oz. per ton. *Ref.* Q.G.M.J., p. 263 (1908).

7554. ——. In quartz. *Loc.* Chandie Chank Lode, Gilberton, 24 miles S.byE. of Charleston Rail. Stn., Etheridge line, Etheridge Goldfield. *Co.* Victor; *Dist.* Cook. *Ref.* G.S.M.

7555. ——. In copper stained gossan. *Loc.* Silver Spur Mine, nr. Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 191, p. 28 (1904).

7556. ——. *Assoc.with* Galena, Cerussite, Malachite, Chrysocolla, Mispickel, Zinc Blende, Manganese-dioxide, and Hematite, in kaolin lode. *Loc.* Hidden Treasure Lease (165), Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* **Kennedy North.** *Assays: See* No. 1241. *Ref.* G.S.Q. Pub. 82, p. 7 (1892), and 71, p. 8 (1891).

7557. ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Copper carbonate, and Galena, in lode. *Loc.* True Blue Lease (161), Kangaroo Hills Mineral Field (*ante*). *Assays: See* No. 427. *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

7558. ——. *Loc.* Hero Silver Mine, Star R. (Argentine) Mineral Field, 50 miles (by coach) N.W. of Ravenswood Junction, Great Northern line, 104 miles (by rail and road) W.S.W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

7559. ——. *Assoc.with* Barytes. *Loc.* King Solomon II. Mine, Emu Plains Silver Field, E. bank of Bowen R., 3½ miles N.E. of Emu Plains Stn. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.M.

7560. ——. *Assoc.with* Tetrahedrite and Bornite, in quartz. *Loc.* Silver King Copper Mine, Eungella Range, 10 miles W. of Finch Hatton Rail Stn. (Mackay line) *Co.* Carlisle (*ante*). *Ref.* O.R

7561. ——. *Assoc.with* Galena and Copper Ore. *Loc.* Sunbeam Silver Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* W.E.C

7562. ——. *Assoc.with* Native Copper and Malachite, in lode. *Loc.* Red Queen Mine, nr. Taromeo, 68 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.Q. Pub. 159, p. 25 (1901).

7563. —— (Ore). *Loc.* Comstock Silver Mine, Lappa Junction Rail. Stn. and Mines (Chillagoe-Mt. Garnet line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 125, p. 50 (1897).

7564. ——. *Loc.* Sunbeam Mine, Eukalunda, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* **Kennedy South.** *Ref.* G.S.M.

7565. ——. *Assoc.with* Native Bismuth and Gold Ores. Emu Cr., about 10 miles N.W. of Cressbrook. *Co.* Cavendish; *Dist.* **Moreton.**

7566. ——. *Loc.* Carmilla Mine, 30 miles N. of St. Lawrence. *Co.* Murchison; *Dist.* Port Curtis. *Contents:* Silver = 25 oz. per ton. *Ref.* B.D.

Silver Spur Mine—

Situation : *See maps,* Pls. 12, 13. Eight miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Lat.*, 28° 56′ S.; *Long.*, 151° 22′ E. Discovered in 1890 by John White.

Mineral Statistics : *Included in* Stanthorpe Returns.

Mineral References : Gold, 3843; Silver, 7477, (native) 7555, (Pyrargyrite) 7114; Lead (Cerussite), 1218, (Galena) 2840; Copper (Azurite) 204A, (Copper Pyrites) 2195, (Cuprite) 2446, (Malachite) 6252, (Tile Ore) 2551; Antimony (Cervantite), 1307, (Stibnite) 7637; Zinc (Calamine) 441, (Smithsonite) 7569, (Zinc Blende) 8106; Iron (Iron Pyrites) 5117, 5118, (Ironstone) 5541, 5542; Graphite, 4595. Other Minerals: Ankerite, 66; Calcite, 491; Mineral Water, 6569; Proustite, 7078A; Selenite, 4640.

Geological Note : The country rocks around the Silver Spur Mine are clay shales, with occasional beds of sandstone, grit, conglomerate, and limestone. These rocks have been disturbed more or less by faults and by intrusive diorite dykes. The ore deposits are in the form of bunches, and closely connected with the faults, one of which, more strongly developed than the others, is referred to as the main fissure. *See* G.S.Q. Pub. Nos. 191 and 119 for details.

Discovery : Copper was discovered at Silver Spur by Mr. John White in 1890.

Geological Publications : Reports—Nos. 120 (1898), 150 (1899), 191 (1904). *See under* Geol. Surv. Pub. List for title.

Warden : Stationed at Stanthorpe. Inspector of Mines : Stationed at Gympie.

Smelting Works : *See under* Smelting Works in Queensland.

—— —— —— (3 miles N.W. of), W.S.W. of Stanthorpe. *Min.Ref.* Galena, *see* 2841; Malachite, 6254.

—— —— —— (6 miles N. of), Texas, Stanthorpe. *Min.Ref.* Manganese-dioxide, *see* 6420; Turgite, 7896.

—— —— —— (5 miles from), W.S.W. of Stanthorpe. *Min.Ref.* Stibnite, *see* 7638A.

—— Star Mine, Montalbion. *Min.Ref.* Scorodite, *see* 7365.

—— Streak Mine, Dry R., 12 miles S.S.W. of Herberton. *Min.Ref.* Cerussite, *see* 1220; Copper carbonate, 1911; Galena, 2855; Ironstone, 5546; Massicot, 6535.

Smelting Works in Queensland—*See* Note following.

Name, Locality, &c.	Ore Treated.	Furnaces, Approx. Cap. per Day,	Remarks.
Aldershot (Maryborough)	Silver, lead, copper, gold	100 tons ...	Works dismantled.
Carrington United Mine (Charters Towers)	Copper ...	Reverberatory, 60 tons	Closed.
Carrington 1 and 2 East	Copper ...	Rev., 10 tons	Closed.
Chillagoe	Copper ...	Blast, 150 tons	Smelt for Chillagoe Co., Ores purchased.
	Silver-lead ...	Blast, 300 tons	
Klondyke	Copper ..	Blast, 50 tons	Smelt Mungana ores.
Duck Creek (Marraba, Cloncurry)	Copper ..	Blast, 80 tons	Intended for mines of The Willcocks's Cloncurry Syn., but never used.
Einasleigh Mine (Etheridge District)	Copper ...	Blast, 80 tons	Closed. Formerly smelting New Einasleigh F.H. ores.
Glassford Cr. (Boyne Valley)	Copper ...	Blast, 100 tons	Closed.
Great Australian Mine (Cloncurry)	Copper ...	Rev., 18 tons Blast, 80 tons	Closed.
Great Fitzroy Mine (Rockhampton)	Copper ...	Blast, 300 tons	Smelt ores of Fitzroy Mine.
Hampden	Copper ...	Blast, 250 tons	Smelt ores of Hampden and Duchess Mines. 100 tons blast furnace closed down.
Irvinebank	Tin	Rev., 50 tons Blast, 80 tons	Smelting for Irvinebank Co. Not working. Originally intended for reducing tin slags.
Mammoth (Cardross), Chillagoe	Copper-gold	Blast, 80 tons	Ores from own and Klondyke Mines.
Mt. Cannindah (Glad.)	Copper ...	Rev., 20 tons	Dismantled.
Mount Garnet	Copper ...	Blast, 300 tons	Closed. Partly dismantled.
Mt. Elliott (Selwyn, Cloncurry)	Copper ...	Blast, 147 tons	Smelt ores of Mt. Elliott Mine.
Mt. Hector (Boyne Valley)	Copper ...	Blast, 50 tons	Closed.
Mount Morgan	Copper-gold	Blast, 1500 tons Rev., 225 tons	Smelt ores of Mt. Morgan Mine.
Mount Molloy	Copper ...	Blast, 80 tons	Not working.
Mount Orange (Mackay)	Copper ...	Reverberatory, 15 tons	Rented to different companies from time to time.
Mount Perry	Copper, and gold	Blast, 60 tons Rev., 20 tons	Treat ores for Co.'s mines.
Norton (Gladstone) ...	Gold ...	Blast, 24 tons	Closed.
O.K. Syndicate	Copper ...	Blast, 60 tons	Closed. Treated O.K. ores.
Peak Downs (Clermont)	Copper ...	Blast, 100 tons	Closed.
Pinnacles (Ravenswood)	Copper ...	Rev., 10 tons	Smelt Pinnacle Mine ores.
Pikedale Copper Mines	Copper ...	Reverberatory, 10 tons	Closed. Treated ores from Pikedale and Commodore.
Silver Spur Mine (Texas)	Silver-lead .	Rev., 50 tons	Smelt ores of Silver Spur Mine. Ores purchased.
Société Française des Métaux Rares	Wol., Bis., & Molyb.	Blast, 100 tons Wet and mag. separation	Ores purchased.
Sundown P. C. (Stanthorpe)	Copper ...	Reverberatory, 12 tons	Closed.
The Gorge (Longara, Cloncurry)	Copper ...	Reverberatory, 8 tons	Dismantled.
United Reefs Mine (Kilkivan)	Copper ...	10 tons ...	Closed. Treated ores from United Reefs.
Warroo Mines (Stanthorpe)	Copper ...	Reverberatory, 10 tons	Closed. Partly dismantled.

Smelting Works. *Note.*—For further details concerning smelting works *see* Report on the Establishment of State Smelting Works in Queensland, by C. F. V. Jackson, State Mining Engineer. Published by Mines Department, 1909.

Snake Cr. Bore. *See under* Artesian Bores. No. 161.

Sneakaway Gully, heading from Mt. Courtenay, Cape R. Goldfield. *Min.Ref.* Gold, *see* 3561.

Sneaker's Gully. *See* Mt. Larcombe.

Snide. A miner's term for opal of little or no value. The term is sometimes applied by sapphire miners to unsaleable corundum.

Snowdrop P.A., Mt. Langan. *Min.Ref.* Bismuth, *see* 321; Calcite, 524; Cassiterite, 1171; Cerussite, 1295; Gold, 4197; Iron Pyrites, 5337; Massicot, 6548.

Soap-making Material. Kaolin, Talc, and Tripolite when finely ground are used in the adulteration of cheap soaps. Iron, lime, zinc, mercury, and arsenic are also used in soap-making for medicinal and other purposes. All of these mineral substances are obtainable in the State.

Soap-Spur Gold Mine, Woolgar Goldfield. *Min.Ref.* Galena, *see* 2713, 2714; Gold, 3562.

Soapstone. *See* Talc, *var.* Steatite.

Soda Creek, Coolullah, Cloncurry. *Min.Ref.* Cuprite, *see* 2411A; Malachite, 6173.

——-and-acid Creek, trib. of Coen R., Coen Goldfield. *Min.Ref.* Gold (alluvial), *see* 3208.

Soda Deposits. There are no deposits in the State containing soda in commercial quantities, the natural conditions not being favourable for their formation or accumulation, although Lake Müeller, 16 miles N.E. of Aramac, is said to be a soda lake. A bore put down near the railway line at Maria Creek, 133 miles W. of Rockhampton, yields an intermittent flow of water highly charged with soda carbonate, and presents some attractions from a commercial point of view. *See under* Water Analyses, No. 66; Q.G.M.J., vol. 1, p. 2 (1900); and G.S.Q. Pub. No. 155, p. 16 (1901).

—— Water Cr., Ravenswood Goldfield. *Min.Ref.* Azurite, *see* 214A; Copper Pyrites, 2234; Malachite, 6288A.

Sodium (Na.). *Atom. Wt.* 23·0. *Sp.gr.* 0·97. *Colour,* silver-white.

Minerals: *See* Albite, Halite, Natrolite, Nepheline, and Oligoclase. Of these minerals Halite (Salt) is the only one of common occurrence.

Uses: Sodium in its metallic form is a powerful reducing agent, and, in consequence, has many industrial uses. It is employed in many chemical and metallurgical processes, and combined with mercury forms sodium amalgam—a very useful reagent in gold amalgamation. The chloride (Halite, or common salt) occurs in the lakes of the western districts, but the deposits are not utilised for any purpose, being considered too remote from railway communication. The soda water bore at Maria Creek is referred to above. *See under* Mineral Water, No. 6571, for analyses. *See also note under* Salt Manufacture.

—— chloride. *See* Halite.

—— silicates. *See under* Silicates.

Soggoath Tin Claim, Herberton. *Min.Ref.* Cassiterite, *see* 1117; Chlorite, 1454; Orthoclase, 7047; Serpentine, 7387; Steatite, 7687; Wolfram, 8025.

Soldier's Cap Diggings, Cloncurry. *Min.Ref.* Chalcedony, *see* 1337; Gold. 3472-3474A; Ironstone, 5491; Limonite, 5788, 5798A; Malachite, 6159A; Tile Ore, 2529B.

Southerness Bore. *See under* Artesian Bores. No. 410.

Southport, 50 miles (by rail) S.E. of Brisbane (S. Coast line). *See maps*, Pls. 6, 7. *Lat.*, 27° 57′ S.; *Long.*, 153° 27′ E. *Min.Ref.* Clay, *see* 1582; Emery, 2374; Fulgurites, 2687; Gold, 4231; Iron Pyrites, 5352; Silver, 7513. *See also* Supplementary Report List, No. 136, for further reference.

Rainfall: *See under* separate heading.

Geological Note: The country about Southport is made up of slate, shale, schist, and other old sedimentary strata, all of which are covered in places by recent alluvial deposits brought down by the Nerang River. North of Southport the old rocks are obscured by sandstone, this formation being an extension of the Mesozoic Coal Measures about the shores of Moreton Bay. The coal measures near Southport have not been tested for coal seams, but further north the same class of country has been proved to be coal-bearing.

Springrush Extd. Goldfield—

SITUATION: *See* Pls. 10, 11. The Field is about 11 miles N.N.W. of Clermont. *Co.* Clermont; *Dist.* Leichhardt.

PROCLAMATION OF FIELD: First and only one, 8th August, 1879, as follows: Commencing on Gowrie (or Spring Creek) at a point one mile and a-half above the junction of Tea-tree Creek, and bounded thence on the south-east by a line bearing south-westerly to the watershed separating Gowrie Creek from Apsley Creek; thence by said watershed westerly and northerly to the Drummond Range by that range to the watershed separating Gowrie Creek from Tea-tree Creek; by that watershed south-easterly, and by a line bearing south-west to the point of commencement.

AREA: 5,120 acres. (8 square miles).

MINERAL STATISTICS: Included in "Other Goldfields" *in statistical tables* and *diagram.* Pls. 36, 46, 46-46A, 47.

MINERAL REFERENCES: *See under* "The Springs."

GEOLOGICAL NOTE: *See under* Black Ridge.

GEOLOGICAL PUBLICATIONS: *See under* Clermont.

WARDEN: Stationed at Clermont. INSPECTOR OF MINES, at Rockhampton.

Springsure. *See maps,* Pls. 10, 11. Two hundred and six miles (by rail) W.S.W. of Rockhampton. *Lat.,* 24° 7′ S.; *Long.,* 148° 5′ E. *Discovery:* Opal in basalt discovered in 1872 by O'Brien. *Min.Ref.* Chalcedony, *see* 1351; Chert, 1412; Gold, 4172; Hornstone, 1392; Hyalite, 7015; Iron Jasper, 5645, 5654; Onyx, 1397; Opal (*precious* and *common*), 6949; Travertine, 749; Witherite, 7926.

GEOLOGICAL NOTE: The rocks in and about Springsure are made up of a number of volcanic lava flows, ranging in composition between normal basalt and augite andesite. Large quantities of hyalite and chalcedony fill cavities in both basic and acidic lavas, and common opal is occasionally to be seen. Precious opal has also been found, but the deposits are said to be exhausted. *See* G.S.Q. Pubs. Nos. 103 and 177, p. 9, for details.

Springvale (Boulia) Bore. *See under* Artesian Bores. No. 395.

Square Top Bores. *See under* Artesian Bores. Nos. 118, 240.

—— —— Mountain, 17 miles N.W. of Dalby Rail. Stn. *Min.Ref.* Hyalite, *see* 7013; Lithophyses, 1395.

Squirrel Creek, 20 miles N.byW. of Kannangur Rail. Stn. *Min.Ref.* Gold, *see* 3366B.

St. Aignan (Misima) Island, Brit. New Guinea. *Min.Ref.* Calcite, *see* 610; Copper carbonate, 1970; Copper Oxide, 2057; Copper Pyrites, 2333; Galena, 3093; Gold, 3426-3428; Iron Pyrites, 5475; Limestone, 712, 713, (Coralline) 731; Pyromorphite, 7151.

GEOLOGICAL NOTE: The rocks are schists and limestones with diorite (?) dykes. Quartz reefs occur, but only when they are small do they contain gold, and then 1 oz. to the ton is considered a good yield. Alluvial gold is found in watercourses, some of it being crystalline and some in the form of wire. The country is difficult to traverse as it is covered by dense jungle, the prospecting being confined to the S.E., S., and S.W. sides of the island. The north is very rugged, and a range in the centre of the island is 4,000 feet high.

—— Agnes Creek, Perry R., 15 miles S. of Gin Gin Rail. Stn. *Min.Ref.* Azurite, *see* 173; Gold, 3589; Iron Pyrites, 4994; Malachite, 6194, 6195; Molybdenite, 6816; Psilomelane, 7080; Turgite, 7886.

—— Alban's, near Fort Cooper. *Min.Ref.* Coal, *see* 1702A.

St. John's Cr. Goldfield—

SITUATION: *See maps*, Pls. 4, 5. The goldfield is 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* Burnett. Centre about *Lat.* 25° 30′ S.; *Long.* 150° 50′ E.

POPULATION: Under 20.

PROCLAMATION OF FIELD: First gazetted, 10th October, 1890; last alteration, 16th March, 1894, as follows:—Commencing on the right bank of Flat Creek, at a point forty-four chains west from the junction of that creek with St. John's Creek, and bounded thence on the north by Flat Creek

St. John's Cr. Goldfield—*continued:*

downwards to St. John's Creek; on the north and east by St. John's Creek downwards to the junction of Target Creek; on the south by Target Creek upwards to a point due south from the starting point; and on the west by a line bearing north to the point of commencement.

Area: 1,280 acres = 2 sq. miles.

Principal Mining Centre: Hungry Hill, *which see.*

Mineral Statistics: Gold and Antimony. *Included in* Eidsvold Returns, *in stat. tables,* Pls. 36, 46, 46A.

Mineral References: Gold (alluvial) 3198; Silver, 7441, 7442; Lead (Galena) 2732, (Massicot) 6524; Antimony (Cervantite) 1301, (Stibnite) 7609, (Valentinite) 7914. Other Minerals—Felspar, 2628; Tourmaline, 7825.

Geological Note: Granite is the prevailing rock about St. John's Creek and Hungry Hill. It is traversed by large quartz lodes carrying stibnite (antimony) and free gold.

Geological Publications: Reports, Nos. 160 (1901), 207 (1907). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Eidsvold; Inspector of Mines, at Rockhampton.

St. Joseph River, Brit New Guinea. *Min.Ref.* Gold (alluvial), *see* 3429; Magnetite, 6067; Olivine, 6933.

—— —— United Mine, Ulam Goldfield. *Min.Ref.* Gold, *see* 4307; Iron Pyrites, 5398; Ironstone, 5619.

—— Kilda Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4532.

St. Lawrence. *See maps,* Pls. 2, 3. Ninety-six miles N.W.byN. of Rockhampton. *Co.* Murchison; *Dist.* Port Curtis. *Lat.,* 22° 20′ S.; *Long.,* 149° 32′ E.

Port for the Yatton Goldfield, the Styx R. Coalfield, and the Collaroy and Carmilla Copper Workings.

Harbourage: The tides at Broadsound have an abnormal range, and ebb and flow with great velocity. Main channel has a depth of 10 ft. 6 in. at low water at the Middle Shoal. Another channel at North Point Passage is deeper, but dangerous. At Waverley Creek, now the only entrance to St. Lawrence, springs rise 18 ft. to 25 ft., neaps, 9 ft. to 17 ft., and wharves are dry at L.W.

Population: 857 (Census 1911).

Rainfall: Yearly average between 1903 and 1907 = 44·67 in. Yearly average of wet days between 1903 and 1907 is 71.

Geological Note: In the immediate vicinity of the town there are shales, conglomerates, and limestones of Gympie Formation (Permo-Carboniferous System) surrounded by a large area of recent alluvial deposits. The Styx Coal Measures belonging to the Ipswich Formation outcrop at about 9 miles to the south-east, and contain coal of good quality. *See* G.S.Q. Pub. No. 84 for details.

Geological Publications: Reports—Nos. 84 (1892), Styx River; 141 (1898), Collaroy and Carmilla. *See under* Geol. Surv. Pub. List for title.

Stanhills Tinfield—

SITUATION: *See maps*, Pls. 20, 21, 26. Croydon-Esmeralda Road, between 12 and 24 miles S.E. of Croydon Rail. Stn. *Co.* Esmeralda; *Dist.* Burke.

POPULATION: Included in Croydon Goldfield Returns.

MINERAL STATISTICS: Tin. *See under* Croydon *stat. tables*, Pls. 38, 46, 46A.

MINERAL REFERENCES: Gold (alluvial), 3173; Lead (Galena), 2689-2691; Copper (Azurite), 157, 158, (Copper Pyrites) 2067, 2068, (Malachite) 6089, 6090; Tin (Cassiterite), 753-770; Wolfram, 7927; Molybdenite, 6814; Zinc Blende, 8050, 8051; Iron (Pyrites), 4922; Graphite, 4571; Chlorite, 1419, 1420.

Stanhills Tinfield—*continued:*

GEOLOGICAL NOTE: A coarse-grained muscovite granite occurs throughout the district, with "Desert Sandstone" forming a flat cover to it on some of the hills and ridges. The granite contains tin lodes in association with greisen, the deposits being of great extent. The sandstones contain beds of tin-bearing gravels, while recent alluvial deposits of tin are present in nearly all the gullies. The district, beyond doubt, is very rich in tin, and although water is very scarce in all seasons, the development of these deposits must take place sooner or later. *See* G.S.Q. Pub. No. 211 for details.

GEOLOGICAL PUBLICATIONS: Report—No. 211. *See* Geol. Surv. Pub. List for title. *See also* Gov. Ming. Jour., Report—No. 89, *also* A.R.D.M. (1907), pp. 172-3.

WARDEN and INSPECTOR OF MINES: Both stationed at Croydon.

Stanley Co. Moreton Dist. *See map*, Pl. 6.

—— Coal Mine. Central Railway line. *Min.Ref.* 1689A.

—— Island, Flinders Group, N.W. of Cooktown. *Min.Ref.* Coal, *see* 1612B.

Stannary Hills—

SITUATION: *See maps*, Pls. 8, 9, 22. Ninety-three miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Lat.*, 17° 19′ S.; *Long.*, 145° 18′ E.

POPULATION: 466 (estimated 1910).

RAILWAY BASE for tin mines at Glen Linedale, Stannary Hills, Watsonville, and Irvinebank; also for Montalbion Silver-Lead and Tin Mines.

MINERAL STATISTICS: Tin. *See under* Herberton *in stat. tables*, Pls. 38, 46, 46A.

MINERAL REFERENCES: Tin (Cassiterite), 854; Bismuth (native), 333A, (Bismutite) 386; Wolfram, 7947; Molybdenite, 6832; Pitchblende, 7068; Chalcolite, 1405; Fluorspar, 2660, 2661.

GEOLOGICAL NOTE: The principal rocks are granite, greisen, aplite, slate, and greywacke. In these rocks, associated with chlorite, there are lodes of Tin, Wolfram, Bismuth, and other minerals, the principal deposits being the tin-bearing lodes of Stannary Hills. *See* G.S.Q. Pubs. 146, 192 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 146 (1900), 192 (1904). *See* Geol. Surv. Pub. List for title.

WARDEN and INSPECTOR OF MINES: Both stationed at Herberton.

Stannine. *Syn.* Stannite, *which see.*

Stannite. *Compo.*, Sulphide of tin, copper, etc. *Colour*, steel-grey. *Streak*, blackish. *H.* = 4; *Sp.gr.* = 4·3-4·52. *Contents* (*max.*), Tin 27 per cent., Copper 29 per cent.

Stanthorpe. Notes on Gems: *See under* Govt. Ming. Jour., Report No. 22.

Stanthorpe Mineral Field—

Situation: *See maps*, Pls. 12, 13, 30. The township of Stanthorpe is 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck; *Dist.* Darling Downs. Centre about *Lat.* 28° 35′ S.; *Long.* 152° E.

Discoveries: Alluvial tin was discovered by Mr. Greer in 1854, on Nundubbermere Run, but in 1853 a specimen was sent to England for examination. In February, 1872, Paddock Swamp, a branch of Quart Pot Creek, to the S.E. of Stanthorpe, and Four-mile Creek, to the N.N.E. of Stanthorpe, were discovered, and were the first alluvial claims to be worked, tin also being found in Broadwater Creek in June of the same year. The first tin-mining mineral selection officially recorded was taken up on Spring Creek on the 22nd April, 1872. Diamonds were first found in Spring Creek in 1872, and in the following year also in Kettle Swamp, near Blue Mountain Creek. At the latter place a diamond-washing plant was installed in 1873 by John Moffatt and party, but the venture proved a failure, only a few diamonds being found. *See also* History of Stanthorpe Tinfields, by P. Cardew, Ann. Rep. Dept. Mines, 1887.

Population: 2,485 (census 1911).

Railway Base: The town of Stanthorpe is the railway base for the silver-lead mines at Silver Spur, Silver King, Silver Crown, Silver Queen, and Pikedale; copper mines at Texas and Sundown; tin mines around Stanthorpe; and the gold mines of the Pikedale field.

Rainfall: Yearly average between 1902 and 1907, 31·94 inches. Wet days 83.

Proclamation of Field: First (and only one), 3rd January, 1883, as follows:—Commencing at the junction of Canal Cr. with the Broadwater, and bounded thence on the north by a line bearing east to the Condamine River upwards to the confluence of Clifton Creek; thence by the range dividing the waters of Clifton Cr. from those of Dalrymple Creek north-easterly to the Main Range; on the east of the Main Range southerly to the south boundary of the Colony of Queensland; on the south-east and south-west by that boundary westerly to the confluence of the Macintyre Brook with the Macintyre or Dumaresq River; on the west by a line north to the range dividing the waters of Macintyre Brook from those falling into Weir River; thence by that range north-easterly to Mount Domville or Wilmeran; thence by a spur to the junction of Broadwater with Canal Creek, the point of commencement.

Area: Not estimated.

Leases: Mineral Leases and Applications in force 26, area 334 acres; Miners' Homesteads in force 212; area 5,925 acres; Goldmining Leases, 1; area, 20 acres (1912).

Principal Mining Centres: Goldfields—Canal Cr., Leyburn, Lucky Valley, Palgrave, Pikedale, Talgai, Silver Spur, and Thane's Creek. Other mineral fields—Broadwater Creek, Jibbinbar, Macintyre Brook, Nundubbermere, Pike's Creek, Quart Pot Creek, Red Rock Creek, Severn River, Sundown Creek, Ballandean, etc.

Mineral Statistics:

Tin,	*see stat.*	*tables*,	Pls. 38, 46, 46A.
Silver,	,,	,,	Pls. 37, 46, 46A.
Lead,	,,	,,	Pls. 38, 46, 46A.
Limestone,	,,	,,	Pls. 41, 46, 46A.
Copper,	,,	,,	Pls. 39, 46, 46A.
Ironstone,	,,	,,	Pls. 41, 46, 46A.

Statistical Note: The yield of tin to end of 1912 was (approx.) 49,431 tons; of lead (Silver Spur Mine), 1,044¾ tons; of copper (Silver Spur), 1,144¾ tons; of silver (Silver Spur), 2,061,345 oz. This is equal to 36·72 per cent. of the State's total production of tin, 2·65 per cent. of lead, 0·58 per cent. of copper, and 15·27 per cent. of silver.

Stanthorpe Mineral Field—*continued:*

MINERAL REFERENCES: Gold (alluvial) 3247-3249, (reef) 3833A; Silver (Pyrargyrite) 7114, (Silver) 7469-7477; Lead (Anglesite) 37, (Galena) 2828-2841, (Massicot) 6532, (Minium) 6593; Copper (Azurite) 203, 204, (Chrysocolla) 1521, (Copper carbonate) 1902-1906, (Copper Ore) 2034, (Copper Pyrites) 2181-2196, (Cuprite) 2444, 2446, (Malachite) 6249-6254, (Redruthite) 7283, 7284, (Tile Ore) 2551; Tin (Cassiterite) 973-1036, (Stannite) 7598; Bismuth (Native Bismuth) 342, 343, (Bismuthinite) 371, (Bismutite) 402A, 402, 403; Wolfram, 7983-8005; Molybdenite, 6846-6854, (Molybdite) 6872, 6873; Antimony (Stibnite), 7634-7638; Manganese (dioxide), 6417-6420, (Psilomelane) 7087, (Pyrolusite) 7120; Zinc Blende, 8095-8106; Iron (Hematite) 4724A, 4725, (Iron Pyrites) 5103-5119, (Magnetite) 6,000, 6001, (Mispickel) 6708-6731. Other Minerals—Amethyst, 7167, 7168; Barklyite, 2365-2365A; Beryl, 292, 293; Cairngorm, 7176-7178; Calcite, 489-491; Corundum, 2370; Diamond, 2574-2578; Garnet, 3116-3119; Hornblende, 4831; Hyacinth, 8230-8233; Jasper, 5641; Kaolin, 5683; Monazite, 6878A; Orthoclase, 7043, 7044; Prase, 1399; Rock Crystal, 7189, 7190; Ruby, 2362-2364; Sagenite, 7337; Sapphire, 2347-2352; Spinel, 7577, 7578; Topaz, 7792-7795; Tourmaline, 7858, 7859; Zircon and Hyacinth (*var.*), 8230-8233.

GEOLOGICAL PUBLICATIONS: Reports, Nos. 12 (1882), 40 (1887), 120 (1898), 191 (1904). *See under* Geol. Surv. Pub. List for title; *see also under* Govt. Ming. Jour. Reports, Nos. 21, 22. *See also* Supplementary Report List, Nos. 1, 4, 14, 88.

GEOLOGICAL NOTE: The whole of the country is made up of granite and small areas of greisen and apatite, with tin occurring in greisen and quartz lodes, and in dyke masses. The great bulk of the tin produced has, however, been taken from alluvial deposits, and not from the lodes. *See* G.S.Q. Pub. No. 120 for details.

WARDEN: Stationed at Stanthorpe. INSPECTOR OF MINES: Stationed at Gympie.

SMELTING WORKS (Warro Mines): *See under* Smelting Works in Queensland.

TIN DREDGES. (See further notes in *Brisbane Courier* of 28-6-13).

Sugarloaf No. 1 *Dredge.* (Owner, Mrs. M. Allison). Situated on the Sugarloaf Creek, a tributary of Quart Pot Creek, about 8 miles E. of Stanthorpe. Consists of an 11-inch hydraulic sluicing plant on a barge.

Lode Creek Dredge. (Lode Cr. Tin Dredging Co., Ltd.). Situated about 2½ miles from Sugarloaf, on a trib. of Sugarloaf Creek and 7 miles E. of Stanthorpe. Type of Plant similar to Sugarloaf No. 1 Dredge.

Red Hill Dredge. Situated on range dividing Queensland from New South Wales, and about 1½ miles from Lode Creek. The plant consists of two portable engines, one gravel pump, one nozzle pump, and a pump for water supply.

Dalcoath Dredge. Situated about 4 miles from Stanthorpe in the direction of Red Hill. Type of Plant similar to that at Sugarloaf.

Stanthorpe Dredge. Situated on Blue Mountain Creek, about 2½ miles N.E. of Stanthorpe. Type of Plant somewhat similar to that at Red Hill.

Horseshoe Dredge. Situated on Spring Creek, about 7 miles S.W. of Stanthorpe. Type of Plant somewhat similar to that at Red Hill.

Rover Dredge. Situated on Four-mile Creek, 4½ miles N.E. of Stanthorpe. Type of Plant somewhat similar to that at Red Hill.

Beverley Dredge. Situated close to the railway, 3½ miles S. of Stanthorpe. Type of Plant similar to that at Red Hill.

Plate 30, a map of the Stanthorpe Mineral Field, shows the position of all the abovementioned creeks.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Stanton-Harcourt Goldfield—

SITUATION: *See maps*, Pls. 4, 5. The field is about 11 miles N. of Degilbo Rail. Stn., 17 miles S.S.W. of Childers Rail. Stn., and 69 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. Centre about *Lat.* 25° 20′ S.; *Long.* 152° 15′ E. *Discovery:* In 1885.

POPULATION: Under 10.

PROCLAMATION OF FIELD: First (and only one) gazetted, 13th March, 1907, as follows:—Commencing at the south corner of portion 155, and bounded thence on the north-west by that portion bearing 34 degrees about thirty-eight chains to the north bank of Ravine Creek; on the north by that creek upwards to the south boundary of portion 155, by that boundary easterly to the eastern corner of same; on the north-east by a line bearing about 164 degrees about one hundred and forty-five chains to a road three chains wide; on the south by that road westerly about twenty-five chains to a road two chains wide; and by that road westerly and north-westerly to the point of commencement.

AREA: 2,160 acres (3⅜ sq. miles).

MINERAL STATISTICS: Gold. *Included in* "Other Goldfields," *in stat. tables*, Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold (alluvial) 3193, (reef) 3621, 3622; Lead (Galena) 2726, 2727; Copper (Redruthite), 7276; Zinc Blende, 8071; Iron (Pyrites) 5005, (Limonite) 5831. Other Minerals—Ankerite, 65.

GEOLOGICAL NOTE: The country rock is slate, most of which has been covered by basic (doleritic) tuffs and flows of andesite, and all of which are intersected by dykes of trachyte. *See* G.S.Q. Pub. 168 for details.

GEOLOGICAL PUBLICATIONS: Report—No. 168 (1901). *See under* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Maryborough. INSPECTOR OF MINES: Stationed at Rockhampton.

Stanwell, N.W.byW. of Rockhampton. *Lat.*, 23° 32′ S.; *Long.*, 150° 20′ E. *Min.Ref.* Calcite, *see* 543; Chalcedony, 1363; Coal, 1796, 1797; Graphite, 4605; Magnesite, 5960; *also under* Supplementary Reports, Nos. 33, 100, 104, 145.

GEOLOGICAL NOTE: The rocks about Stanwell consist of shales, sandstones, and acidic volcanic tuffs belonging to the Walloon Series (Trias-Jura). Coal seams occur in the series, but, so far, have not proved to be of workable thickness or of good quality. To the south and north are rocks of Gympie Formation (Permo-Carboniferous), the Stanwell Measures resting unconformably in a depression of these older beds.

The Stanwell basin contains an artesian water supply, the intake beds being on the high country between Stanwell and Mount Morgan. *See* G.S.Q. Pub. No. 131 for details.

—— Bore. *See under* Artesian Bores. No. 65.

—— Coal Bore (Subsidised). Sel. 5A, Sandy Creek. Southerly from Stanwell Rail. Stn. *Record:* Shales and sandstones throughout, with coal bands in several places. No workable seam of coal discovered. Dept, 818 feet, bottom being in a grey volcanic ash similar to that at Mt. Hay and Stewart's Cr. *Ref.* B.D. (1913).

—— —— ——. *See also* Bushley Bore; Mt. Morgan Co.'s Bores (Stony Cr.); Petersen's Bore (Quarry Cr.); Quarry Creek Syndicate's Bore; Sanderson's (Stony Creek) Bore; Woodend Coal Bore; Warren Coal Bore; *all under* Coal Bores.

Stanwell Goldfield—

SITUATION: *See maps.* Pls. 2, 3. Sixteen miles (by rail) S.W.byS. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. Centre about *Lat.* 23° 32′ S.; *Long.* 150° 20′ E.

POPULATION: Under 20.

PROCLAMATION OF FIELD: First (and only one) gazetted, 5th September, 1889, as follows:—Commencing on the left bank of Neerkol Creek at a point bearing east from the north-east corner of portion 208, parish of Playfair, and bounded thence on the south by a line bearing west four and a-half miles, crossing Black Mountain Range; on the west by a line bearing north four miles; on the north by a line bearing east eight miles; on the east by a line bearing south three and a-half miles, again on the south by a line bearing west to the north corner of a reserve on Neerkol Creek, by the north-west and south-west boundaries of that reserve to Neerkol Creek; and thence by that upwards to the point of commencement.

Stanwell Goldfield—*continued:*

Area: 19,520 acres (30½ sq. miles).

Mineral Statistics: Gold. *Included in* "Other Goldfields," *in stat. tables,* Pls. 36, 46, 46a, 47.

Mineral References: Gold, *see* 4342-4344; Iron Pyrites, 5408.

Geological Publications: *Nil.*

Warden and Inspector of Mines: Both stationed at Rockhampton.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Star River (Argentine) Mineral Field—

Situation: *See maps,* Pls. 16, 17. Fifty miles (by coach) N.W. of Ravenswood Junction, 104 miles (by rail and road) W.S.W. of Townsville. *Cos.* Elphinstone and Wilkie Gray; *Dist.* Kennedy North. Centre about *Lat.* 19° 25′ S.; *Long.* 146° 15′ E.

Discovery: 1881.

Population: (Included in Ravenswood Returns.)

Proclamation of Field: First gazetted, 7th February, 1883; last alteration, 31st May, 1893, as follows:—Commencing on the north bank of the Burdekin River where it passes through the Gorge in the Coast Range, and bounded thence by a line north to said range; thence following that range, being the eastern watershed of the Burdekin River, northerly to a point south from the south-west corner of portion 594, parish of Halifax, situated on Bluewater Creek; thence by a line north about eight miles to that corner; thence by a line north-west to the south-west corner of portion 474 on Clerks Creek, by Clerks Creek downwards about one mile and a-quarter to the south corner of a reserve; thence by a line north-west to the south-west corner of portion 478; thence by the south-west boundary of Cairo Lease north-westerly and northerly to the trial survey of the railway from Townsville to Ingham, by that survey westerly to the east boundary of portion 474, parish of Waterview, by the east and south boundaries of that portion to the south-west corner; thence by a line south to the range, by that range to the junction of Coane Range or the southern watershed of the Running River and its tributaries, by the Coane Range westerly to the Burdekin River at the confluence of that river with Running River, and by the Burdekin River downwards southerly to the point of commencement;—exclusive of the Ravenswood Gold Field.

Leases: Mineral Leases and Applications in force, 4; area, 45 acres.

Area: 1,373,440 acres (2,146 sq. miles).

Star River (Argentine) Mineral Field—*continued:*

MINERAL STATISTICS:

Silver,	*see stat.*	*tables,*	Pls. 37, 46, 46A.

Wolfram,	,,	,,	Pls. 42, 46, 46A.
Bismuth,	,,	,,	Pls. 40, 46, 46A.
Molybdenite,	,,	,,	Pls. 42, 46, 46A.

MINERAL REFERENCES: Gold (reef), 4087-4094; Silver (Cerargyrite), 1184, (Silver) 7491-7493, (Silver, native) 7558; Lead (Anglesite), 44-59, (Cerussite) 1259-1285, (Galena) 2981-3002, (Lead Gossan) 5729, (Lead Ochre) 5730-5732, (Linarite) 5940, (Massicot) 6539-6543, (Matlockite) 6550, (Minium) 6603-6631, (Pyromorphite) 7148; Copper (Azurite), 224, 225, (Copper Pyrites) 2250, (Malachite) 6311-6314, (Tenorite) 7732; Bismuth (native), 348; Antimony (Stibnite), 7648; Manganese (dioxide), 6445, (Pyrolusite) 7125; Zinc Blende, 8163-8165; Iron (Hematite), 4753-4755, (Iron Ochre) 4915, 4916, (Iron Pyrites) 5282-5288, (Ironstone) 5568-5582, (Mispickel) 6756-6758, (Siderite) 7410, 7411. Other Minerals: Barytes, 275; Topaz, 7805; Tourmaline, 7862.

GEOLOGICAL NOTE: The country rocks are granite, gneiss, schist, slate, sandstone, grit, and conglomerate, the three latter belonging to the Star Formation (Permo-Carboniferous), and resting unconformably on the granite and slate. On the surface the lodes are of ironstone gossan, quartz, and lead oxides, with galena and mispickel some distance below, all carrying varying amounts of silver. *See* G.S.Q. Pub. No. 26 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 26 (1886), 48 (1888). *See under* Geol. Surv. Pub. List for title. *See also* List of Maps *under* Department of Mines Publications.

WARDEN: Stationed at Ravenswood. INSPECTOR OF MINES: Stationed at Charters Towers.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Starcke Nos. 1 and 2 Goldfields—

SITUATION: *See maps,* Pls. 8, 9. The goldfields are situated about 40 miles N.N.W. of Cooktown. *Cos.* Melville and Banks; *Dist.* Cook.

DISCOVERY: In 1890 by Messrs. Cairns and Bowden.

POPULATION: Less than 20.

PROCLAMATION OF FIELDS: Starcke No. 1, first (and only one) gazetted, 22nd February, 1895, as follows:—Commencing at a point on the Starcke River 12 miles upwards from its mouth, and bounded thence on the north by a line west about nine miles to the western watershed of the Starcke River; by that watershed southerly and easterly to the western watershed of the Morgan and McIvor Rivers; by that watershed southerly to the southern watershed of the McIvor River; by that watershed easterly to the south-eastern watershed of Cocoa Creek; and by that watershed to its confluence with the McIvor River; thence by a line north to the eastern watershed of the Starcke River; by the north-eastern watershed of that river north-westerly to the point of commencement.

Starcke No. 2, first (and only one) gazetted, 1st September, 1898, as follows:—Commencing at the mouth of the Starcke River, and bounded thence by that river upward about 12 miles; thence by a range forming the north-eastern watershed of the Starcke River, south-easterly to a point north from the confluence of Cocoa Creek with McIvor River, and west from the north-west corner of portion 189; thence by a line bearing east passing along portions 189 and 202 to the eastern boundary of the parish of Tupia; thence by that eastern boundary northerly to the shore of the Pacific Ocean, and by the shore westerly to the point of commencement.

AREA: Starcke No. 1, 96,640 acres (151 sq. miles); Starcke No. 2, 97,200 acres (155 sq. miles).

LEASES: Gold-mining leases and applications in force, 4; area, 55 acres. Miners' homestead leases in force, nil (1912).

Starcke Nos. 1 and 2 Goldfields—*continued:*

PRINCIPAL MINING CENTRES: Cocoa Creek and Munburra, *which see.*

MINERAL STATISTICS: Gold, *included in* "Other Goldfields" *in stat. tables and diagram,* Pls. 36, 46-46A, 47. Antimony, *see under* Cooktown, *stat. tables,* Pls. 40, 46-46A.

MINERAL REFERENCES: Gold (alluvial), *see* 3200A, 3200B, 3201, (reef) 3662-3667G; Silver, 7447, 7448; Antimony (Cervantite) 1302-1304, (Stibnite) 7613-7615, 7617; Iron (Iron Pyrites) 5026, 5026A, (Mispickel) 6672, 6672A.

GEOLOGICAL NOTE: The Munburra reefs on Starcke No. 2 Goldfield occur in altered sedimentary rocks, made up of slates, quartz-schists, and quartzites. The rocks at Cocoa Creek, on Starcke No. 1, are slates and quartzites, the reefs carrying both gold and antimony. *See* G.S.Q. Pubs. 91 and 209 for details.

GEOLOGICAL PUBLICATIONS: Reports—Nos. 91 (1893), 209 (1907), and 223 (1909). *See under* Geol. Surv. Pub. List. for title.

WARDEN: Stationed at Cooktown. INSPECTOR OF MINES: Stationed at Croydon.

—— —— Opal Mine, Keeroongooloo Run. *Min.Ref.* Precious Opal, *see* 6946A.

—— Ridge, Black Snake Goldfield. *Min.Ref.* Gold, *see* 4393; Iron Pyrites, 5444; Silver, 7539; Tenorite, 7743.

—— Warianna Bore. *See under* Artesian Bores. No. 134.

Storm King Block (589), 5 miles S.E. of Stanthorpe. *Min.Ref.* Cassiterite, *see* 1007; Wolfram, 7991.

Stradbroke Island, Moreton Bay. *Min.Ref.* Fulgurites, *see* 2685; Göthite, 4568.

Geological Note: The rocks belong to the Ipswich Formation (Trias-Jura), and large areas of blown sand exist in various parts of the island. Large lagoons of fresh water are common, whose importance warranted a scheme being formulated, although not adopted, to utilise the water for the main Brisbane supply.

Strathalbyn Goldfield—

Situation: *See maps,* Pls. 16, 17. The field is about 30 miles E.byS. of Ravenswood. *Co.* Gladstone; *Dist.* Kennedy North. Centre—about *Lat.* 20° 11′ S., *Long.* 147° 15′ E.

Proclamation of Field: First gazetted, 10th June, 1880. Last alteration, 9th July, 1885, as follows:—Commencing one mile south from the southern base of a hill known as MacGregor's Bonnet, and bounded thence on the south by a line bearing east one mile; and on the east by a line bearing north five miles; and on the north by a line bearing west five miles; on the west by a line bearing south five miles; and on the south by a line bearing east four miles to the point of commencement.

Area: 16,000 acres (25 sq. miles).

Mineral Statistics: *Included in* "Other Goldfields" in *stat. tables and diagram,* Pls. 36, 46, 46A, 47.

Mineral References: Gold, *see* 4044; Copper (Copper Pyrites) 2235, (Chalcanthite) 1333.

Geological Publications: *Nil.*

Warden: Stationed at Ravenswood. Inspector of Mines: Stationed at Charters Towers.

Strickland River, trib. of Fly R., Brit. New Guinea. *Min.Ref.* Coal, *var.* Lignite, *see* 1833.

Strontianite. *Compo.*, Carbonate of strontia. *Colour*, yellowish, whitish. *Lustre*, vitreous. *Streak*, white. *H.* = 3-3·5; *Sp.gr.* = 6·46-6·57. *See note under* Strontium. *Contents* (*max.*), Strontia 70 per cent.

7665. ——. Old Bowen Crossing, Pioneer R., nr. Mirani Rail. Stn., 22 miles W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Ref.* G.S.Q. Pub. 164, p. 16 (1901).

7666. ——. Eastern Boyne R., 26½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis.

Strontiano-Calcite, *var of* Calcite, *which see.*

Strontium (Sr.). *Atom. Wt.* 87·63 *Sp.gr.* 2·5. *Colour*, Yellowish-white metallic.

MINERALS: Celestine, Strontianite, and Strontiano-Calcite.

USES: Strontium, in its metallic form, has no commercial uses. The carbonate is used in clarifying sugar, and the nitrate, mixed with other chemicals, produces the bright red fire in pyrotechnical displays. Both Strontianite and Celestine, carbonate and sulphate respectively, are found in the State. A lode of Strontianite near the Old Bowen Crossing, on the Pioneer River, W. of Mackay, is large and well-defined, but nothing has been done to utilise the mineral.

Strontium carbonate. *See* Strontianite.

Strontium sulphate. *See* Celestine.

Strover's Mine, Mt. Morgan Goldfield. *Min.Ref.* Gold, *see* 4380.

Strüber's Tin Mine, Watsonville. *Min.Ref.* Cassiterite, *see* 916; Chlorite, 1440; Garnet, 3104.

Struck Oil Lease (186), Mt. Morgan Goldfield. *Min.Ref.* Copper Pyrites, *see* 2316A; Gold, 4381; Iron Pyrites, 5435; Stibnite, 7651; Tetradymite, 7748.

GEOLOGICAL NOTE: The country rocks comprise quartzites, slates, and greywackes, of Gympie Formation (Permo-Carboniferous), with intrusive diorite and granite in the vicinity. Gold occurs in quartz reefs, associated with iron pyrites, serpentine, and calcite. *See* G.S.Q. Pub. 103 for details.

—— —— Silver Mine, Argentine Silver Field. *Min.Ref.* Anglesite, *see* 54; Cerargyrite, 1184; Cerussite, 1281A; Galena, 2995; Gold, 4092; Hematite, 4754; Iron Pyrites, 5286; Ironstone, 5581; Minium, 6627; Pyrolusite, 7125; Siderite, 7410.

Sturt Co. Gregory North Dist. *See map*, Pl. 20.

Stutchbury (Samuel), once Government Geologist for New South Wales.

REPORTS:—

(11th) [Portions of the Dividing Range between Queensland and New South Wales. With Geological Map]. 1853.

(12th) [On the Basalts of the Condamine River, and on portion of Ipswich Coalfield. With Geological Map]. 1854.

(13th) [On the Ipswich Coal Measures]. 1854.

(14th) [On the Country from the North Pine River, *via* Caboolture to Durundur]. 1854.

(15th) [On the Country from Colinton to Gladstone. With Geological Map]. 1855.

(16th) [On part of the Coast District between the Boyne and Fitzroy Rivers. With Geological Map]. Last Report, 1855.

Note.—These reports were published as Parl. Papers, Sydney; also in "Further Papers Relative to the Discovery of Gold in Australia." Lond. By Auth. 1855.

Styx River Coalfield. *See maps*, Pls. 2, 3. The Coalfield is about 12 miles S.E. of St. Lawrence. Centre—about *Lat.* 22° 32′ S., *Long.* 149° 40′ E. *Discovery:* Coal found in 1887. *Min.Ref.* Coal, *see* 1800; Calcite, 544; Kaolin, 5703.

Geological Note: The rock formations about the Styx Rixer are Recent Alluvium (?), Post Tertiary Conglomerate, Coal Measures belonging to the Ipswich Formation (Trias-Jura) and sedimentary rocks belonging to the Permo-Carboniferous and Devonian systems. The Coal Measures contain good coal seams, and are now being developed. *See* G.S.Q. Pub. No. 84 for details and map.

Sub-artesian Bores. *See* Artesian Bores.

7667. —— Water. Racecourse Bore, Eagle Farm, 6 miles N. of Brisbane. *Co.* Stanley; *Dist.* **Moreton.** *Analysis: See under* Artesian Water Analyses, No. 9. *Ref.* G.S.Q. Pub. 58, p. 2 (1890).

Sugar Bag Sub-artesian Bore. *See under* Artesian Bores. No. 161.

Sugarloaf Cr., trib. of Quart Pot Cr., heads at Block (728) on the Dividing Range, nr. Sugarloaf Mt., and flows with a general W.N.W. trend to join Quart Pot Cr., about 2 miles E. of Stanthorpe. *Length*, about 5 miles. *Tribs.*—Tea Tree Cr., Lode Cr., Roger's Gully, Brown's Gully.

Mineral References: Amethyst, *see* 7168; Beryl, 293; Cairngorm, 7176; Cassiterite, 985, 1025-1028; Copper Pyrites, 2191; Diamond, 2575; Galena, 2837; Garnet, 3117; Hyacinth, 8233; Iron Pyrites, 5116; Rock Crystal, 7189; Sapphire, 2348; Spinel, 7578; Topaz, 7793; Tourmaline, 7858; Wolfram, 8000; Zircon, 8233.

—— Mountain, Stanthorpe. *Min.Ref.* Cassiterite, *see* 978; Wolfram, 7999.

Sullivan and Party's Tin Claim, Mt. Amos, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 799; Tourmaline, 7836.

Sulph-Antimonides; copper, *see* Tetrahedrite; silver, *see* Pyrargyrite.

Sulph-Arsenides; iron, *see* Mispickel; silver, *see* Proustite.

Sulphate of Lead and Copper. *See* Linarite.

Sulphates: alumina, *see* Alunogen, Kalinite, Websterite; copper, *see* Chalcanthite; iron, *see* Copperas; lead, *see* Anglesite; lead and copper, *see* Linarite; lime, *see* Gypsum; magnesia, *see* Epsomite; strontium, *see* Celestine; zinc, *see* Goslarite.

Sulphide Reef, Norton Goldfield. *Min.Ref.* Copper Pyrites, *see* 2294; Gold, 4292; Iron Pyrites, 5388; Mispickel, 6798; Zinc Blende, 8199.

Sulphides; antimony, *see* Stibnite; bismuth, *see* Bismuthinite; cadmium, *see* Cadmium-blende; copper, *see* Bornite, Redruthite, Copper Pyrites, Covelite; iron, *see* Iron Pyrites, Marcasite, Mispickel, Pyrrhotite; lead, *see* Galena; mercury, *see* Cinnabar; molybdenum, *see* Molybdenite; silver, *see* Argentite; tin, *see* Stannite; zinc, *see* Zinc Blende.

Sulphur (S.). *Atom.Wt.* = 32·07; *Sp.gr.* 1·92—2·5 (varies with condition).

GEOLOGICAL NOTE: There are no deposits of native sulphur known in the State, but large bodies of ore, made up of sulphides of iron, copper, zinc, etc., exist in many localities, none of which, however, are utilised for the production of sulphur.

Sulphur (native). *Compo.*, Pure Sulphur. *Colour and Streak*, sulphur yellow. *Lustre*, resinous. *H.* = 1·5-2·5; *Sp.gr.* = 2·05. *See* note above.

7668. ——. Curtis Island, between Port Curtis and Keppel Bay, 5 miles N. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* G.S.M.

7668A. ——. In coal bands. *Loc.* Bellert's Coal Mine, 2½ miles N.E. of Torbanlea Rail. Stn. (North Coast line), Burrum Coalfield. *Co.* Cook; *Dist.* **Wide Bay.** *Ref.* B.D.

7669. ——. *Loc.* Dobu (Goulvain) Island, D'Entrecasteaux Group, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 85, p. 31 (1892), and G.S.M.

7670. ——. *Loc.* Seymour Bay, Fergusson (Moratau) Is., D'Entrecasteaux Group, 231 miles E. of Port Moresby (*ante*). *Ref.* G.S.Q. Pub. 85, p. 31 (1892).

Sultan 1 N. Mine, Gympie Goldfield. *Min.Ref.* Gold, *see* 4487.

—— Reef, Clermont Goldfield. *Min.Ref.* Gold, *see* 4155.

—— and Lucknow Lease (864), Gympie Goldfield. *Min.Ref.* Gold, *see* 4488.

—— and Taylor Reef, Darkey Flat, Talgai Goldfield. Discovered in 1864 by a miner named Taylor. *Min.Ref.* Gold, *see* 3855.

Summer Hills Bore. *See under* Artesian Bores. No. 199.

Summerville Bore. *See under* Artesian Bores. No. 187.

Sunbeam M.F. (2417), Mt. Flora G. and M. Field. *Min.Ref.* Azurite, *see* 235B; Malachite, 6339A.

—— Silver Lease (254), Sellheim Mineral Field. *Min.Ref.* Copper (ore), *see* 2040; Galena, 3020; Silver (native), 7561; Silver (ore), 7564.

Sunburst P.C., Charters Towers Goldfield. *Min.Ref.* Galena, *see* 2914; Gold, 3939; Iron Pyrites, 5209; Zinc Blende, 8133.

—— 2 E. Mine, Charters Towers Goldfield. *Min.Ref.* Actinolite, *see* 4863.

—— Reef, Jessop's Hill, Palmer Goldfield. *Min.Ref.* Gold, *see* 3671.

Sunday Gully, Leichhardt R., N.W. of Cloncurry. *Min.Ref.* Limestone, *see* 617.

Sundown Copper Mine, Sundown Cr., 12 miles S.W.byW. of Ballandean. *Min.Ref.* Calcite, *see* 490; Cassiterite, 1031; Chlorite, 1445; Copper Pyrites, 2192; Mispickel, 6727; Orthoclase, 7044; Wolfram, 8004; Zinc Blende, 8104; *also* Supplementary Report List, No. 117.

Sundown Creek, trib. of Severn R., Stanthorpe. Rises in the Par. of Ballandean, nr. N.S.W. border, and flows N.W. into the Severn R. about 23 miles S.W. of Stanthorpe. Length, about 3 miles.

MINERAL REFERENCES: Azurite, *see* 204; Calcite, 490; Cassiterite, 1029-1031; Chlorite, 1445; Copper carbonate, 1905; Copper Pyrites, 2192, 2193; Cuprite, 2444; Gold, 3842; Hornblende, 4831; Iron Pyrites, 5115, 5119; Malachite, 6250; Mispickel, 6727-6730; Orthoclase, 7044; Scorodite, 7371; Silver, 7474, 7475; Wolfram, 8004, 8005; Zinc Blende. 8102-8104.

Talc. *Compo.*, Hyd.-silicate of Magnesia. *Colour*, whitish, greenish, etc. *Streak*, white. *Lustre*, Pearly. Sectile. Feels greasy. *H.* = 1-1·5; *Sp.gr.* = 2·7-2·8. *Contents* (*max.*), Magnesia 31 per cent.

Mineral Note: Commonly associated with ores of tin, iron, manganese, zinc, copper, lead, gold, and silver, and also with Wolfram, Molybdenite, Serpentine, Chlorite, Garnet, Felspar, etc. Large deposits of Talc are unknown, but small masses have been met with at Mt. Warminster of very pure quality and in fine flakes.

Uses: Slabs of this mineral are used as firebricks, and as electrical insulators. Powdered talc is used in the manufacture of paper, toilet powders, lubricants, soaps, fire-proof paints, etc. Being a non-conductor of heat or cold, it is useful as boiler coverings and as linings in cold storage chambers.

Talgai Goldfield—

Situation: *See maps*, Pls. 12, 13. 3 miles W .of Pratten, 21 miles W.N.W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. Centre—about *Lat.* 28° 10′ S., *Long.* 151° 45′ E.

Discovery: In 1863. Population: Under 20.

Proclamation of Field: First gazetted, 23rd October, 1863. Last alteration, 17th June, 1902, as follows:—Commencing on the left bank of the Condamine River at the eastern extremity of the northern boundary of portion 82, parish of Pratten, and bounded thence by that river downwards to the south-east corner of portion 170, by the south-east and south boundaries of that portion, by the south and south-east boundaries of portion 36v to the east boundary of Talgai Goldfield, proclaimed in *Government Gazette,* 1882, volume 2, folio 200, by the west, north, and west boundaries of portion 36v, the west boundary of portion LIV., the south boundary of portion LV., the west boundary of portion LV., the south boundary of portion LVI., the south boundaries of portions 55v and 50v, the east, the north, the west, and part of the south boundaries of the reserve for public purposes and a line east to the north-east corner of portion 42v, by the east and south boundaries of that portion south and west to portion 577, by the east and south boundaries of that portion south and west to portion LXVIII., by the east boundaries of that portion and portion LXX., south to portion 32v, by the north-east and south boundaries of portion 32v, by the east and south boundaries of portion 33v southerly and westerly to Thane's Creek, by that creek upwards to the western extremity of the northern boundary line of portion 2339, by the north-west, north-east, and south-east boundaries of that portion to Thane's Creek, by that creek upwards to the west corner of portion 1555, by the north-west and north-east boundaries of that portion, by the north-west boundary of portion 1355, by the north-east boundaries of that portion and portion 1356, by the north-west and north-east boundaries of portion 1362 and the north boundary of portion 1558 easterly to portion 1091, by the west boundaries of portion 1091, the west and north boundaries of portion 1121, the north boundary of portion 1060 easterly of portion 72, by the west boundaries of portions 72, 71, 68, 1323, and 806, north to portion 1110, by the south boundary of portion 1110, by the south and west boundaries of portion 1127, a line north, the south and west boundaries of portions 43 and 42, the south boundaries of portions 419, 163, and 427, by the west boundary of portion 427, the north boundaries of portions 427 and 163, to the north-east corner of the lastnamed portion, by a line north to the north-west corner of portion 83; and thence by a line east to the point of commencement;—exclusive of all alienated lands within these limits.

Area: 49,220 acres (nearly 77 sq. miles).

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46a, 47. No separate records.

Mineral References: Gold (alluvial), *see* 3252-3254, (nugget) 3439-3441, (reef) 3850-3863; Lead (Galena), 2842; Copper Pyrites, 2198; Manganese (Dioxide), 6425, 6426; Iron (Iron Pyrites) 5121-5125, (Limonite) 5856-5859, (Mispickel) 6732. Other Minerals—Ferro Calcite, 577.

Geological Note: The rocks on the field form two series, *i.e.*, the Lower Bowen Formation (Permo-Carboniferous) and the Walloon Formation (Trias-Jura). The former consists of slates, shales, sandstones, and grits, traversed by dykes of basalt and by gold-bearing quartz reefs, on which patches of the shales and sandstones of the Walloon Formation rest unconformably. Alluvial deposits containing gold exist in all the gullies, and tin is frequently found in association with the gold in the drifts. *See* G.S.Q. Pub. No. 120.

Geological Publications: Reports—Nos. 40 (1887), 120 (1898), 129 (1898), 186 (1903), 205 (1906). *See* Geol. Surv. Pub. List for title of Reports; *also* Supplementary Report List, Nos. 28, 38, 106.

Warden: Stationed at Warwick. Inspector of Mines: Stationed at Gympie.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

M.L., and Banjo M.L. *Min.Ref.* Chrysocolla, *see* 1508, 1509; Copper (native), 1982; Copper Pyrites, 2096; Iron Pyrites, 4928, 4929; Limonite, 5789, 5790; Malachite, 6149, 6150; Redruthite, 7247, 7248; Tile Ore, 2525; Tourmaline, 7815.

—— R.C. (286), Tambourine Group, Cloncurry. *Min.Ref.* Azurite, *see* 170; Chrysocolla, 1509; Copper Pyrites, 2096; Iron Pyrites, 4929; Limonite, 5790; Malachite, 6150; Redruthite, 7248; Tourmaline, 7815.

Tamborine Mountain, S. of Logan Village, between Beaudesert and South Coast Railway line. Rail. line under construction from Logan Village will reach to the foot of the Tableland, which is 9 miles long. *Lat.*, 27° 53′ S.; *Long.*, 153° 10′ E. *Min.Ref.* Chalcedony, *see* 1395A; Iron Pyrites, 5352A; Olivine, 6930; Opal (resin), 6995; Pyrrhotite, 7161B. *Geological Note.*—Basalt prevails on the Tableland, the base being of Trias-Jura rocks.

Tamworth Run Bore. *See under* Artesian Bores. No. 404.

Tanbar Co. Gregory South Dist. *See map*, Pl. 18.

Tangalooma Point, Moreton Is., N.E. of Brisbane. *Min.Ref.* Fulgurites, *see* 2686A.

Tangorin Bore. *See under* Artesian Bores. No. 405.

Tannymorel. *See maps*, Pls. 12, 13. Situated 23 miles E.S.E. of Warwick, on Killarney Branch line. *Min.Ref.* Coal, *see* 1634, 1635. *See also* Supplementary Report List, No. 27.

Geological Note: The coal measures in this locality belong to the Walloon Formation (Trias-Jura), and contain coal seams of good quality and of workable thickness.

Discovery: Coal was found here in 1882 by Moryatt. Systematic work only started in 1897, when the Tannymorel Coal Mining Co. took over the mine.

Tantalate of iron, *see* Tantalite.

Tantalite. *Compo.*, Tantalate of iron. Graduates into Columbite, the niobate. Part of the iron replaced by manganese, and when in excess forms the variety known as mangano-tantalite. *Colour*, Iron-black, brownish-black. Brittle. *H.* 6. *Sp.gr.* 5·3-7.3. *Contents* (*max.*), Tantalic oxide 86 per cent.

7697. ——. In Beach Sand. Johnstone River, Geraldton, 130 miles N.W. of Townsville. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. No. 196, pp. 13, 14 (1905).

Mineral Note: The minerals associated with Tantalite in the beach sands include Gold, Tin, Monazite, Platinum, Ilmenite, Magnetite, Zircon, Garnet, and Quartz. In the Walsh and Tinaroo District a Tantalite lode is said to occur, but there is no official record of its occurrence.

Tantalum (Ta.) *Atom.Wt.* = 181·5; *Sp.gr.* = 16·64. *Colour*, steel-grey.

Mineral: *See* Tantalite and Columbite.

Uses: The metal is used in the preparation of ferro-tantalum, an alloy having the property of imparting great hardness and tensile strength to steel when added in certain small proportions. It is also used in the manufacture of incandescent electric light filaments.

Targinie Head Stn. (½-mile S.S.E. of), 9 miles W. of Gladstone. *Min.Ref.* Epidote, *see* 2602; Garnet, 3142; Hematite, 4788; Magnetite, 6042.

Targinie Township, N.W.byW. of Gladstone. *Lat.*, 23° 50′ S.; *Long.*, 150° 8′ E. *Min.Ref.* Azurite, *see* 248; Copper Pyrites, 2295; Gold, 4311; Malachite, 6360, 6361. *Discovery.*—Gold was first found here on 18th December, 1900.

Geological Note: The country rocks are granite, slate, and garnetiferous-epidote rock, the latter occurring between the granite and the slate. Gold, with copper, occurs in ironstone and manganese ore associated with garnet rock, and without copper in quartz reefs some distance from garnet rock.

—— Reef, 4 miles N.N.W. of Yarwun Rail. Stn. *Min.Ref.* Gold, *see* 4297b; Silver, 7527c. *See also under* Govt. Ming. Jour., Special Report No. 10.

Tariff of Commonwealth Customs. *See under* Customs Duties.

Tariff of Smelting Works (Summary)—

Electrolytic Refining and Smelting Co. of Australia, Limited. (Office: Bridge st., Sydney; Works: Pt. Kembla, N.S.W.):—

Gold and Silver—£4 per oz. for gold; payment in full if over 2 dwt. per ton. Standard quotations for silver; payment in full if over 5 oz. per ton. Smelting charges, 25s. per ton for 10 tons and over, 30s. for less than 10 tons. No other charges on gold and silver ores.

Copper—Spot quotation for standard copper on day of sampling, less 2s. 6d. per unit. Pay on result of wet assay, less 1 unit up to 15 per cent.; less 1·3 units over 15 per cent. Smelting charge on ores containing over 20 per cent. copper, *nil*; on ores between 20 per cent. and 9 per cent., from 5s. to 15s. per ton. Returning charge on ores is from 2s. 2½d. to 3s. 2d. per unit of nett copper contents, according to grade of ore. These terms are applicable to ores from which first-class copper can be made, very rich refractory ores or other material being subject to special terms. Special tariff for copper ores and mattes free from gold and silver.

Payments—On agreement of assays.

Tariff of Smelting Works (Summary)—*continued:*

Queensland Copper Co., Limited (Mt. Perry, Queensland):—

Gold and Silver—Gold, £4 per oz. Silver, quoted London price for bar silver during week of sale. On gold ores assaying under 10 dwt. per ton, 93 per cent. of assay value paid; over 10 dwt., 94 per cent.; over 1 oz., 95 per cent. On silver ores, 90 per cent. is paid, less 3 oz. per ton.

Copper—Price paid is current quotation for standard copper, on wet assay less 1·3 units. Smelting charge varies according to composition, and for ores containing 30 per cent. of silica, and enough iron to balance it, 35s. per ton is charged, with an increase of 6d. for every additional unit of silica. Special terms for low-grade basic copper ores. Returning charge is £14 per ton off current London quotation, and balance divided by 100 gives price per unit of copper on which consignment note is made out.

Payments—On agreement of assays.

Sampling—Charge of £1 when under 10 tons; over 10 tons, free

Queensland Exploration Co., Limited (Cloncurry, Queensland):—

Copper—Price paid is London quotation for standard, 3 months, on wet assay less 2 units. Returning charge is 5s. per unit when standard copper is £55 per ton, with 9d. per unit added for every £5 rise, and 1s. deducted for every £5 fall. Smelting costs are provided for in the above terms.

Payments—On agreement of assays.

Note—Bismuth and antimony ores not accepted.

Chillagoe Company, Limited (Chillagoe, Queensland):—

Gold—£4 per oz., less 5 per cent. in copper or lead ores.

Silver—Standard quotations, less 5 per cent. in copper or lead ores.

Copper—Pay on result of wet assay less 1·3 units, less realization charge, which is, with copper between £40 and £50, 2s. 11d. per unit; between £50 and £60, 3s. per unit; and one penny increase for every £10. Smelting charge varies from £1 to £1 10s. per ton.

Lead—Pay on wet assay, less 15 per cent. on current price of soft Spanish lead, less fixed realization charge of £4 10s. per ton, plus 4¾ per cent. of current price. Smelting charge is generally from 30s to 40s. per ton, and sometimes higher if objectionable impurities are present. Bismuth in lead ores are penalized at the rate of 2s. 10d. per lb.

Payments—On agreement of assays.

Note—The Company quotes the above terms for small parcels of ore, but a fixed tariff is out of the question, as the ores treated are so variable in recoverable metals and in composition

Sulphide Corporation, Limited (Cockle Creek, N.S.W.):—

Gold—£4 per oz., full fire assay less 1 dwt.

Silver—London standard quotations, full fire assay less 5 per cent., with minimum deduction of 1 oz. per ton.

Lead—London quotation for soft lead, less 50s. per ton. One unit deducted from full wet assay, and 90 per cent. of balance is paid for. Minimum paid for, 1 unit. Smelting charge varies from a nominal sum for specially clean fluxing ores, with penalties for impurities. No returning charges.

Penalties—Zinc and antimony, 1s per ton for every unit over 5 per cent. Sulphur, 1s. per ton for every unit over 5 per cent., with maximum penalty of 12s. per ton. Arsenic, 1s. per ton for every unit over 2 per cent., with maximum penalty of 12s. per ton. Bismuth and other ores as arranged.

Premium—Excess of iron (calculated as metallic over insoluble) in basic ores is allowed for at 3d. per unit.

Sampling—A charge of £1 when under 10 tons; over 10 tons free.

Note: Special terms are in nearly all cases quoted for large regular consignments, or for ores which, on account of their composition, may be specially valuable to the smelters. The right to refuse certain classes of ores is also reserved by the smelting companies.

Taringa, 4 miles (by rail) S.S.W. of Brisbane. *Min.Ref.* Halloysite, *see* 4664.

Tate Goldfield, 32 miles W. of Almaden Rail. Stn. (Chillagoe line). *Min.Ref.* Gold (alluvial), *see* 3203. *Statistics: Included in* "Other Goldfields."

GEOLOGICAL NOTE: The country is made up of schistose sandstones and mica schist, with diorite and pegmatite dykes. Several quartz reefs occur on the field, mostly barren, but occasionally very rich in gold. *See* G.S.Q. Pub. No. 119 for details and map.

Tate River. Heads in the country between Koorboora and Ord Rail. Stn. (Chillagoe and Mt. Garnet lines), and flows westerly to join the Lynd River. Principal tributaries—Rocky Tate R., Sandy Tate R., and California Cr. Length, about 80 miles. Fisherton is the mining centre of the Tate River, *which see.* The rocks about Fisherton are quartzites and schists, in which there are lode deposits containing tin and wolfram.

Technical Colleges in Queensland (those in which mining subjects are taught).

SUBJECTS.

BUNDABERG—Inorganic Chemistry, Machine Drawing and Design.

CENTRAL (BRISBANE)—Inorganic Chemistry, Metallurgy, Assaying, Geology, Mineralogy, Machine Drawing and Design, Mechanics, Steam and Heat Engines, Engineering Shop Practice, Blacksmithing, Boilers and Boiler-making, Woodturning, Pattern-making, Engine Driving.

CHARTERS TOWERS—Machine Drawing and Design, Mechanics, Steam and Heat Engines, Engineering Shop Practice, Woodturning, Engine Driving.

GYMPIE—Machine Drawing and Design.

IPSWICH—Inorganic Chemistry, Geology, Mineralogy, Coal Mining, Machine Drawing and Design, Steam and Heat Engines, Engineering Shop Practice, Blacksmithing.

MACKAY—Inorganic Chemistry.

MARYBOROUGH—Inorganic Chemistry, Machine Drawing and Design, Steam and Heat Engines.

MOUNT MORGAN—Inorganic Chemistry, Assaying, Machine Drawing and Design, Mechanics, Steam and Heat Engines, Engineering Shop Practice, Blacksmithing, Engine Driving.

ROCKHAMPTON—Inorganic Chemistry, Assaying, Metallurgy, Machine Drawing and Design, Engine Driving.

TOOWOOMBA—Machine Drawing and Design.

TOWNSVILLE—Machine Drawing and Design, Engine Driving, Engineering Shop Practice.

WARWICK—Inorganic Chemistry, Geology.

7702. —— of Gold and Silver. *Loc.* Morris and Colley's Claim, Gilberton Leaders, Gilberton, 48 miles S.byE. of Charleston Rail. Stn. (Etheridge line). *Co.* Victor (*ante*). *Analysis:* (by G. E. Jewell)—

Silicon	24·19 per cent.	Sulphur	1·25 per cent.
Lead	24·31 ,,	Carbon	1·17 ,,
Oxygen...	37·38 ,,	Silver	2·01 ,,
Zinc	2·50 ,,	Gold	0·97 ,,
Iron	3·16 ,,	Hydrogen } as H_2O { ...	·03 ,,
Aluminium	·32 ,,	Oxygen } as H_2O { ...	·20 ,,
Tellurium	2·47 ,,		
		Total	99·96 per cent.

Probable Compo.: (by G. E. Jewell)—$(SiO_2)_3$ $(Al_2O_3)_2$ Singulo-silicate of Aluminium. PbS—Galena. Ag_4AuTe_4—Gold-silver Telluride. ZnS—Zinc Blende. FeS_2—Iron Pyrites.

Ref.:—Mining Record, Croydon, 21-8-1903.

7702A. —— —— ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in calcite and quartz. *Loc.* Anglo-Saxon Mine, Mt. Usher, 6 miles N.E. of Mt. Morgan Rail. Stn., 30 miles S.S.W. of Rockhampton. *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* O.R.

7703. —— (?) Ore. *Assoc.with* Native Copper, Cuprite, and Ironstone, in schist. *Loc.* Stanage Point, 37 miles E.N.E. of St. Lawrence. *Co.* Palmerston; *Dist.* Port Curtis. *Ref.* B.D.

7704. —— —— (as Hessite and Altaite). Contains Gold, Silver, and Lead. *Loc.* Gt. Eastern 2 S. Mine, Gympie Goldfield, 106 miles (by rail) N.byW. of Brisbane (North Coast line). *Co.* March; *Dist.* **Wide Bay.** *Assay:* Gold = 130 oz. 16 dwt. per ton, Silver = 3,339 oz. 3 dwt. 8 gr. per ton, Tellurium = 5·26 per cent. *Ref.* G.S.Q. Pubs. 175 (1902), 196 (1905), and G.S.M.

7705. —— —— (grey). Contains Gold, in quartz reef. *Loc.* Gt. New Zealand 1 N. Lease (849), Gympie Goldfield. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 100, p. 16 (1894).

Tellurides. *See* Joseïte, Tetradymite (bismuth); Calaverite (gold); "Telluride of Gold and Silver"; Altaite (lead); Hessite (Silver). *See under* Tellurium for notes.

Tellurium (Te.). *Atom. Wt.* = 127·5; *Sp.gr.* = 6·26. *Colour,* white-metallic.

Minerals: *See* "Telluride of Gold," "Telluride Ore," Altaite, Calaverite, Hessite, Joseïte, Tetradymite.

Mineral Note: Associated minerals include Mispickel, Zinc Blende, Copper Pyrites, Native Bismuth, Bismuthinite, Iron Pyrites, etc., the most interesting occurrence being Joseïte at the Mt. Shamrock Gold Mine, in association with Native Bismuth and Native Bismuth-Gold.

Geological Note: The telluride of bismuth, Joseïte, at Mt. Shamrock, occurs in veins of Mispickel, Bismuthinite, and Iron Pyrites, with Calcite (Quartz being absent), the associated rocks being mudrock, felsite, diorite, and volcanic breccia belonging to the Gympie Formation (Permo-Carboniferous).

Uses: The metal tellurium has no commercial uses, and its presence is undesirable in ores which are to be treated for gold and silver. Bullion contaminated with it has a tendency to become granulated in cupelling operations.

7706. —— (scales). *Assoc.with* Gold, in quartz vein. *Loc.* Lucky Valley Goldfield, 10 miles S.E. of Warwick. *Co.* Merivale; *Dist.* **Darling Downs.** *Ref.* D.H.A.

Tenningering (Mt. Perry) **Gold and Mineral Field**—

SITUATION: Mt. Perry is 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* Burnett. Centre about *Lat.* 25° 14′ S.; *Long.* 151° 41′ E.

POPULATION: 2,240 (estimated by Warden, 1912).

PROCLAMATION OF FIELD: First (and only one) gazetted, 19th April, 1883, as follows:—Starting from the north-west corner of Tenningering Suburban Area; thence north-westerly by the western boundary of that portion of Tenningering Town Reserve proclaimed 2nd November, 1874, *Government Gazette,* 1874, folio 2133, about five miles; thence westerly by part of the north boundary of the present Tenningering Town Reserve to its termination at north-west corner, about two miles; thence south by the western boundary of present Town Reserve, six and a-half miles; thence easterly to the north-west corner of Normanby Goldfield, two miles; thence by northern boundary of said goldfield to top of Normanby Range, four miles; thence by the watershed of said range to the point of commencement, about four miles.

AREA: 22,720 acres = 35½ square miles.

LEASES: Gold-mining Leases and Applications in force, 2; area, 50 acres. Mineral Leases and Applications, 5; area, 250 acres. Miners' Homesteads and Applications, 36; 327 acres (1912).

PRINCIPAL MINING CENTRES: Boolboonda, Gaeta, and Reid's Creek Goldfields; Harper's Hill, Mount Perry, and Normanby, *which see.*

MINERAL STATISTICS: *Included in* Mt. Perry returns.

MINERAL REFERENCES: Gold, 3585; Silver, 7430-7433; Cinnabar, 1541; Lead (Galena), 2718-2723; Copper (Atacamite) 128, (Azurite) 174-176, (Bornite) 416, (Chalcotrichite) 2489, Native Copper, 1989, (Copper Ore) 2021-2023, (Copper Pyrites) 2124-2130, (Cuprite) 2417-2419, (Malachite) 6190-6194, (Redruthite) 7274, (Tenorite) 7713, 7714, (Tetrahedrite) 7759, (Tile Ore) 2544; Molybdenite, 6818; Manganese (Psilomelane), 7081; Zinc Blende, 8062-8065; Iron (Ilmenite) 4883, (Iron Pyrites) 4985-4993A, (Magnetite) 5974, (Mispickel) 6650-6654, (Siderite) 7405. Other Minerals—Calcite, 471-473; Clay, 1568; Jasper, 5663; Lithomarge, 5708; Tourmaline, 7819-7821.

GEOLOGICAL NOTE: A belt of granite some miles in extent exists in this region, in association with gneiss, schist, slate, and intrusive masses of felsite, etc. At Mt. Perry a mass of felsite sends out veins into the schist, etc., and is itself intruded by diorite. Several gold-bearing reefs and copper lodes occur in the granite, of which the most noted is the Mt. Perry copper lode. *See* G.S.Q. Pub. No. 21 for details.

GEOLOGICAL PUBLICATIONS: Report No. 21 (1885). *See under* Geol. Surv. Pub. List for title.

WARDEN: Stationed at Mt. Perry; INSPECTOR OF MINES: Stationed at Rockhampton.

Teviot Brook, 2½ miles E.N.E. of Boonah. *Min.Ref.* Clay Ironstone, *see* 1590.

Tewantin (9 miles from) (on Tewantin-Gympie Road). *Min.Ref.* Coal, *see* 1829A.
Rainfall: *See under* separate heading.

Tewinga Co. Burke Dist. *See map,* Pl. 20

Texas, Severn R., Stanthorpe. *See maps,* Pls. 12, 13, 30. *Lat.,* 28° 50′ S.; *Long.,* 151° 10′ E. *Min.Ref.* Anglesite, *see* 38; Calcite, 491; Cerussite. 1217, 1218; Cervantite, 1307; Clay, 1570, 1585; Copper carbonate, 1906; Copper Pyrites, 2195; Cuprite, 2446; Galena, 2838-2841; Gold, 3843; Graphite, 4595; Iron Pyrites. 5117; Ironstone, 5541, 5542; Malachite, 6252-6254; Manganese-dioxide, 6420; Mineral Water, 6569; Pyrargyrite, 7114; Redruthite, 7284; Silver, 7476, (native) 7555; Smithsonite, 7569; Stibnite, 7637; Tile Ore, 2551; Zinc Blende, 8105. *Geological Note.*—Slates of Lower Bowen Formation (Permo-Carboniferous) occur about the town, with interbedded fossiliferous limestones to the north and south. The slates contain lodes carrying gold, silver, lead, and copper.

—— Copper Mine, 2 miles N.W. of Silver Spur, Texas. *Min.Ref.* Copper Pyrites. *see* 2196; Malachite, 6253.

Thargomindah—

Geological Note: The surface rocks in this locality are made up of strata belonging to the Rolling Downs Formation (Lower Cretaceous). Artesian water supplies are obtained by tapping the strata with bores.

Thane's Cr. Goldfield—

Situation: *See maps,* Pls. 12, 13. The field is about 24 miles W. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. Centre about *Lat.* 28° 12′ S.; *Long.,* 151° 50′ E.

Discovery: Alluvial gold was worked here in 1869. The first reef was discovered in 1879.

Population: Under 20.

Proclamation of Field: First gazetted, 9th September, 1864; last alteration gazetted, 25th January, 1882, as follows:—Commencing on the left bank of Thane's Creek where it is intersected by the northern boundary of Rosenthal Run, and bounded thence on the east by that creek upwards five miles in a direct line; thence by a line west to the watershed separating Thane's Creek from Canal Creek; thence by that watershed northerly to the spur ridge forming the northern boundary of the run; and on the north by that northern boundary south-easterly to the point of commencement;—exclusive of all reserved, selected, and alienated land.

Area: 11,000 acres (17 3/16 sq. miles).

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagrams,* Pls. 26, 46, 46a, 47.

Mineral References: Gold, *see* 3864-3872; Lead (Galena), 2843; Manganese (Psilomelane). 7088, (Pyrolusite) 7122; Iron (Hematite), 4727, (Iron Pyrites) 5126-5130, (Ironstone) 5543, 5544, (Mispickel) 6733.

Geological Note: The rocks of the field consist mostly of altered slates and quartzites, and contain well-defined gold-bearing quartz reefs. It is many years ago since the reefs were worked.

Geological Publications: Reports Nos. 40 (1887), 120 (1898), 186 (1903), 205 (1906). *See under* Geol. Surv. Pub. List for title; *also under* Supplementary Report List, Nos. 29, 107.

Warden: Stationed at Warwick. Inspector of Mines: Stationed at Gympie.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

The Meadow Bore. *See under* Artesian Bores. No. 142.

The Narrows. At 18 miles N.N.W. of Gladstone. *Min.Ref.* Oil-bearing Shale, *see* 6916.

Harbourage: The Narrows are navigable for small steamers during high tide, but some places are almost dry at low tide. Opposite Monte Christo the Narrows are fordable during low tide. Spring tides rise 12 ft. to 15 ft.; neaps, 8 ft. to 11 ft.

Geological Note: Recent alluvial deposits have accumulated in several localities in the channel. The oldest rocks are Devonian quartzites and slates, and over these have been formed small areas of shales and sandstones which are probably a Tertiary formation. *See* G.S.Q. Pub. No. 190, p. 27 (1904).

The Plain Bore. *See under* Artesian Bores. No. 242.

Thorium-cerium-lanthanum phosphate. *See* Monazite.

Thorium (Th.). *Atom.Wt.* = 232·4; *Sp.gr.* = 11·0. *Colour*, grey-metallic.

USES: In its metallic form Thorium has no industrial application, but the oxide is an important constituent in the composition of several kinds of incandescent gas mantles. Monazite contains a few per cent. of Thorium and is the source from which the earth is commonly obtained, although occurring in greater proportions in other rarer minerals. *See* notes under Monazite.

Thornborough. *See maps,* Pls. 8, 9, 22. Hodgkinson Goldfield. *Lat.,* 16° 58′ S.; *Long.,* 144° 57′ E. *Min.Ref.* Galena, *see* 2763, 2764; Gold, 3749-3753A; Graphite, 4592; Limestone (coralline), 718; Stibnite, 7623, 7624.

Thursday Island—

Situation: *See maps,* Pls. 8, 9. Thirty miles N.W. of Cape York, 1,577 miles N.W.byW. of Brisbane. *Co.* Torres; *Dist.* Cook. *Lat.,* 10° 35′ S.; *Long.,* 142° 13′ E.

Port: The transhipping port of Burketown and Normanton, and of Horn and Possession Islands. An Imperial Naval Coaling Station is situated at Goode Island, 5 miles distant.

Harbourage: Available for vessels of large size, the jetty having 22 ft. at low water. Rise and fall of tides vary from 2 ft. to 10 ft. Sometimes only one tide in 24 hours.

Population: 1,534.

Rainfall: Yearly average between 1903-1907, 68·01 in. Yearly average of wet days between 1903-1907, 107.

Geological Note: The rocks are slates of undetermined age.

Geological Publications: *Nil.*

Warden: Stationed at Thursday Island. Inspector of Mines: Stationed at Croydon.

Tiaro. *See maps,* Pls. 4, 5. Thirty-nine miles (by rail) N. of Gympie. *Co.* March; *Dist.* Wide Bay. *Lat.,* 25° 44′ S.; *Long.,* 152° 37′ E.

Geological Note: Rocks of the district are divided into (1) Trias-Jura Coal Measures; (2) Gympie Formation (Permo-Carboniferous); and (3) Granite. The Coal Measures are much disturbed and rest on the Gympie Formation, both series being intruded by the granite.

Coal Measures: *See* Mt. Bopple, Gunalda, and Gundiah.

Timburn Falls, Amby Cr., nr. Kilmorey Stn. *Min.Ref.* Calcite, *see* 580.

Tin (Sn.). *Atom.Wt.* = 119·0. *Sp.gr.* = 7·2. *Colour*, white-metallic. *Note.*—The metal is soft, malleable, and ductile, and is largely used in the plating of iron and in the manufacture of alloys. The principal alloys are those containing copper, such as bronze, gun metal, bell metal, and speculum metal, other important compounds being with lead to form pewter, Britannia metal, and plumbers' solder. The chief compounds are stannous and stannic chlorides, used in dyeing and calico printing, and stannic sulphide, which in the fine crystalline form known as mosaic gold, is used as a paint to produce an imitation of bronze. Stannic oxide makes a good polishing powder, and is used in the manufacture of enamel and plate glass.

Minerals: *See* Cassiterite and Stannite. The latter is very rare in the State.

Mineral and Geological Note: Commonly associated with Cassiterite, the oxide, are the following lode minerals:—Bismuthinite, Copper Pyrites, Galena, Iron Pyrites, Marcasite, Mispickel, Molybdenite, Monazite, Wolfram, Zinc Blende; the gangues are usually one or more of the following:—Calcite, Chlorite, Felspar, Fluorspar, Kaolin, Mica, Quartz, Talc. Other associated minerals include Garnet, Hornblende, Ilmenite, Siderite, Serpentine, Stannite, Steatite, Topaz, Tourmaline. In alluvial deposits there are to be found Beryl, Corundum, Diamond, Cairngorm, Garnet, Ruby, Spinel, Topaz, Zircon, Gold, etc., etc. Country rocks containing lode tin deposits include greisen, granite, aplite, porphyry, slate, shale, chlorite, quartzite, and diorite, the first four being common.

Geographical Note: There are four fields in Queensland where tin is the exclusive or principal mineral product, viz., Annan River, Bloomfield River, Kangaroo Hills, and Stanthorpe. It, however, occurs in large quantities throughout Northern Queensland, notably in the Herberton Gold and Mineral Field, where the deposits are very extensive. *See under* names of Fields and Mining Centres for descriptions and details. *See also maps*, Pls. 9, 13, 17.

Discoveries: First found in 1852 at Stanthorpe, but not worked until 1872. Kangaroo Hills was opened in 1875, Herberton in 1879, Coolgarra in 1881, Annan River 1885, and Smith's Cr. in 1901. For other localities *see under* heading Discoveries.

Statistical Note: The world's production of tin and tin ore for the year 1910 was 104,073 tons, Australia's contribution being 4,563 tons; of this quantity 2.953 tons came from Queensland, this being 2·83 per cent. of the world's production, and 64·72 per cent. of that of Australia.

The world's yield of tin from 1901 to 1910 (10 years) was 1,001,961 tons, the amount produced by Australia for the same period being 50,141 tons, Queensland's contribution to which amounted to 36,388 tons, this representing 3·63 per cent. of the world's output, and 72·57 per cent. of that of Australia. Of the total quantity of tin produced in Queensland, the Chillagoe and Herberton Gold and Mineral Fields (Walsh and Tinaroo) have supplied the largest amount, the total yield for those fields to end of 1912 being 66,782 tons, equal to 49·62 per cent. of the whole production

Tin—*continued :*

of the State. Stanthorpe has also been a large producer, its quota for the same period amounting to 49,431 tons, equivalent to 36·72 per cent. of the whole production.

The largest quantity of tin produced in one year in the State amounted to 8,938 tons, having a value of £606,184. the year being 1873. All of this year's output was from the Stanthorpe district, and represents 6·64 per cent. of the total quantity, and 7·39 per cent. of the total value of the State's production up to the end of 1912. In value the tin recovered from all sources in the State amounts, approximately, to £8,199,391, this being equal to 7·89 per cent. of the whole of Queensland's mineral production up to the end of 1912. *See stat. tables and diagram,* Pls. 38, 45, 46, 46A, 50.

VALUES : *See* Table under Metal Values in London for maximum and minimum prices for all years since 1892.

Titanite. *Syn.* Sphene, *which see.*

Titanium (Ti). *Atom.Wt.* = 48·1. *Sp.gr.* = 3·5 amorphous, 4·87 crystalline. *Colour*, grey. Metallic.

Minerals: *See* Rutile, Ilmenite, and Sphene.

Uses: In its simple metallic condition no use has been found for Titanium, but the alloy, ferro-titanium, produces strength and hardness if added to steel in certain proportions. It has uses in dentistry, electrical work, and in pottery manufacture. Its presence in ores of other metals is not desirable, as it requires, like silica, a basic flux to form a slag.

Mineral Note: Occurrences of Rutile and Ilmenite are quite common, and, if a market could be found for titanium-bearing minerals, no doubt supplies would be forthcoming from the alluvial deposits in the tin-mining districts of Northern Queensland.

Toko Co. Gregory North Dist. *See map*, Pl. 20.

Tolmies, 129 miles W.byS. of Rockhampton (Central line). *See* Pl. 34. *Lat.*, 23° 33′ S.; *Long.*, 148° 43′ E. *Railway Base* for Tolmies Coal Mines. *Min. Ref.* Coal, *see* 1690. *See also under* Coal Bores.

Geological Note: The rocks in this locality and in the surrounding country belong to the Tolmies-Clermont Series of the Permo-Carboniferous System, and consist of sandstones, shales, volcanic tuffs, and small coal seams. The coal seams have been exploited in one locality, but have been found to contain rather too much ash to be of any great commercial value. The coal has a remarkable caking quality, although it will not form an adherent coke. *See* G.S.Q. Pub. No. 155 for details.

Tomahawk Creek (Anakie). Flows N.N.E. into Theresa Cr., 20 miles S. of Clermont. *Min.Ref.* Amethyst, *see* 7170; Cairngorm, 7181; Chalcedony, 1350A; Gold, 3361; Hornblende, 4838; Hyacinth, 8236; Ilmenite, 4902; Jasper, 5643; Magnesite, 5951; Magnetite, 6029; Rutile, 7335; Sapphire, 2355; Spinel, 7581; Topaz, 7806; Tourmaline, 7864; Zircon, 8236.

Toorbul Point, 28 miles N. of Brisbane. *Min.Ref.* Coal, *see* 1714A. *See also under* Coal Bores.

Toowoomba. *See maps*, Pls. 12, 13. 101 miles (by rail) W.byS. of Brisbane. *Lat.*, 27° 33′ S.; *Long.*, 151° 58′ E. *Min.Ref.* Magnesite, *see* 5953; Oil-bearing Shale, 6912; Olivine, 6929; Sphaerosiderite, 7421. *See also under* Govt. Mining Jour., Special Report No. 120.

Population: 19,777 (Census, 1911).

Geological Note: The rocks of Toowoomba consist of a number of varieties of basalt. Volcanic cones are to be seen in sections in the quarries near the town, and are of great interest to geological students. The basalt overlies shales, sandstones, and tuffs, of Walloon Formation, sections of which are exposed in the railway cuttings about Harlaxton and Spring Bluff, to the north. The basalts frequently contain olivine, some of which has a high commercial value for gem-making. Between Spring Bluff and Harlaxton a vesicular volcanic tuff is exposed in a railway cutting, from which very beautiful zeolite crystals have been obtained.

Coal Mines: *See under* King's Siding, Kingsthorpe, and Oakey.

Rainfall: Yearly average, 1902-1907, 36·78 inches; wet days, 89.

Chamber of Commerce: Sec., G. A. Leichney.

Technical College: For mining subjects taught *see under* "Technical Colleges."

—— Gin Sub-artesian Bore. *See under* Artesian Bores. No. 403.

Topaz. *Compo.*, Silicate of alumina and fluoride of silicon. *Colour*, bluish, colourless, rarely yellowish. *Lustre*, vitreous. *H.* = 8; *Sp.gr.* = 3·4-3·65.

MINERAL AND GEOLOGICAL NOTES: Topaz is frequently associated with tin and wolfram in lode deposits in Northern Queensland, and of itself forms lodes in granite and other kinds of country where tin, wolfram, and molydbenite deposits are to be found. It is also of common occurrence with tin, sapphires, and gold in nearly all the drift deposits of the eastern half of the State. Transparent colourless specimens in sizes large enough to be cut into gems are common, and sometimes pieces are picked up in the tin gravels of Stanthorpe or the Tate River several inches in diameter, and absolutely flawless. Pale green and blue stones are also common, and make very beautiful gems when properly cut, but yellow stones are seldom, if ever, met with. The rocks associated with Topaz include greisen, granite, aplite, schists, gneiss, and altered sedimentary rocks.

7784A.——. *Assoc.with* Cassiterite, Ilmenite, Rutile, Zircon, and Amethyst, in alluvial deposits. *Loc.* P.C. Workings, Rocky Cr., 5 miles above Brovinia Cr., br. of Cadarga Cr., 35½ miles S.S.W. of Gayndah, 60 miles (by road) *viâ* Cooranga Head Stn. *Co.* Newcastle; *Dist.* **Burnett.** *Ref.* Q.G.M.J., vol. 5, p. 62 (1904).

7842A.——. *Assoc.with* Cassiterite and Iron Pyrites, in quartzite. *Loc.* Lease (96), Mulligan's Gully, E. side of Mt. Leswell, 1½ mile S.S.W. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891).

7843. ——. *Assoc.with* Cassiterite, in lode. *Loc.* Mt. Harbord Tin Mine, S.E. of Mt. Leswell, 1½ mile W.S.W. of Rossville, 26 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 66, p. 4 (1891).

7844. ——. *Assoc.with* Cassiterite, in felspar. *Loc.* Richmond Claim, Jones's Creek, E. side of Mt. Leswell, 1½ mile W.S.W. of Rossville (*ante*). *Ref.* G.S.Q. Pub. 66, p. 5 (1891)

7845. ——. *Assoc.with* Cassiterite, in lode. *Loc.* Wheal Davey Mine, Lease (58), S.E. of Mt. Leswell, 1½ mile W.S.W. of Rossville (*ante*). *Assay:* Metallic Tin = 6·8 per cent. *Ref.* G.S.Q. Pub. 66, p. 3 (1891).

7846. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Mt. Romeo alluvial Tin Mines, 5 miles S.S.W. of Rossville, 28 miles S. of Cooktown, Annan Tinfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 16 (1887), and 210, pp. 21, 22 (1907).

7847. ——. *Assoc.with* Cassiterite, in porphyry. *Loc.* Lion's Den Tin Mines, on Mungamby Cr., 22 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Assays:* Metallic Tin = 5·4 and 11·4 per cent. *Ref.* G.S.Q. Pub. 66, p. 6 (1891).

7848. ——. *Assoc.with* Cassiterite, Felspar, Mica, and Mispickel. *Loc.* Harris and Party's Tin Mine, Rossville, 25 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 16 (1889).

7849. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Native Youth Tin Mine, Wallaby Cr., Rossville, 28 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Yield:* Tin = 70·8 per cent. *Ref.* G.S.Q. Pub. 91, p. 5 (1893).

7850. Tourmaline. *Assoc.with* Wolfram, in quartz reef. *Loc.* Rossville Tin Mines, 25 miles S. of Cooktown, Annan R. Tinfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 16 (1889).

7851 ——. *Assoc.with* Cassiterite and Garnet. *Loc.* Bakerville Mine, 4 miles W. of Watsonville, **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 125, p. 42 (1897).

7852. —— *Assoc.with* Cassiterite. *Loc.* Day Dawn Tin Mine. Irvinebank, 10 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 59 (1887), and G.S.M.

7853. —— (as crystals). *Assoc.with* Cassiterite and Garnet, in porphyry. *Loc.* Baal-Gammon Tin Mine, Watsonville, 7 miles E.S.E. of Stannary Hills Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 119, p. 12 (1897).

7854. ——. Calcifer, 132 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q., vol. 15, p. 63 (1900).

7855. ——. As needles, in quartz vein. *Loc.* Lappa Lappa, 102 miles S.W. of Cairns (Cairns-Chillagoe, Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*).

7856. ——. *Assoc.with* Garnet, Corundum, Sapphire, Ruby, Zircon, and Topaz, in alluvial deposits. *Loc.* Jordan Cr. Goldfield, 22 miles W.S.W. of Geraldton, *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 157, p. 6 (1901).

7857. ——. Lizard Island, nr. Cooktown. *Dist.* Cook. *Ref.* G.S.M.

7858. ——. *Assoc.with* Diamond, Sapphire, Spinel, Beryl, Zircon, Garnet, Topaz, Amethyst, Cairngorm, Cassiterite, Rock Crystal, and traces of Gold, in alluvial deposits. *Loc.* Hunt's, Quart Pot, Sugarloaf, Lode, Arbouin's, Cannon, and Kettle Swamp Creeks, and Severn River, Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 120 (1898).

7859. ——. *Assoc.with* Cairngorm, Rock Crystal, Zircon, Sapphire and Cassiterite, in alluvial deposits. *Loc.* Camp Reserve, Spring Cr., 6 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

7860. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Day Dawn Tin Mine, Herberton, 12 miles S.S.W. of Atherton Rail. line (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 4, pp. 59, 67 (1889).

7861. —— (fibrous). *Assoc.with* Gold, in quartz vein. *Loc.* Morris River, nr. Euri Cr., 18 miles W.S.W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* B.D.

7862. ——. In quartz. Star R., br. of Burdekin R., 50 miles W. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Ref.* G.S.M.

7863. ——. *Assoc.with* Iron Pyrites, in porphyry. *Loc.* Normanby Range, 46 miles S. of Bowen. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 5, p. 1 (1879).

7864. ——. *Assoc.with* Gold, Sapphire, Spinel, Garnet, Zircon, Amethyst, Cairngorm, Chalcedony, Jasper, Rutile, Topaz, Diamond, Magnetite, Ilmenite, Magnesite, and Hornblende, in alluvial deposits. *Loc.* Retreat, Sheep Station, Policeman, Tomahawk, and Central Creeks, Anakie Sapphire Field, 193 miles (by rail) W. of Rockhampton. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), 172, p. 20 (1902).

7865. ——. Peak Vale Stn., 18 miles S.S.W. of Clermont. *Co.* Clermont; *Dist.* Leichhardt. *Ref.* B.D.

7866. ——. *Assoc.with* Gold, Garnet, Zircon, and Magnetite, in alluvial deposits below basalt. *Loc.* Basalt Hill Diggings, 3 miles N. of Borilla Rail. Stn., 7 miles W. of Anakie. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 172, p. 7 (1902).

7866A. ——. In quartz. Crow's Nest, 34 miles (by rail) N. of Toowoomba. *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* G.S.M.

7867. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz reefs. *Loc.* Seven-mile Diggings, 7 miles S.E. of Nanango Goldfield, 123 miles N.W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* L.C.B.

7868. ——. In pegmatite dykes. Seven-mile Diggings, 7 miles S.E. of Nanango Goldfield (*ante*). *Ref.* L.C.B.

7869. ——. Macpherson Range, 64 miles S. of Brisbane, nr. N.S.W. border. *Co.* Ward; *Dist.* Moreton. *Ref.* Q.M.

7870. ——. *Assoc.with* Gold, Iron Pyrites, and Calcite, in quartz reef. *Loc.* Union Gold Mine, Cawarral Goldfield, 15 miles N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* **Port Curtis.** *Ref.* P.R.S.Q., vol. 4, p. 67 (1887).

7871. ——. In quartz reef. *Loc.* About 3 miles S. of Westwood, 34 miles (by rail and road) S.W. of Rockhampton. *Co.* Pakington; *Dist.* Port Curtis. *Ref.* B.D.

7872. ——. *Assoc.with* Gold, Iron Pyrites, and Calcite. *Loc.* Union Gold Mine, Mt. Morgan (Crocodile) Goldfield, 24 miles (by rail) S.S.W. of Rockhampton. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* P.R.S.Q., vol. 4, p. 51 (1882).

7873. ——. *Assoc.with* Copper Pyrites. *Loc.* United Gold Reefs, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox; *Dist.* **Wide Bay.**

7874. ——. Woolooga Estate, Par. of Brooyar, 36 miles (by rail) N.W.byW. of Gympie (on Kilkivan Br. line). *Co.* Lennox (*ante*). *Ref.* G.S.M.

7875. ——. **Rubellite** (*var.*). *Colour*, red. In pipe veins in decomposed granite. *Loc.* Anakie, 193 miles (by rail) W. of Rockhampton. *Co.* Plantagenet; *Dist.* Leichhardt.

7876. ——. **Schorl** (*var.*). *Assoc.with* Gold and Iron Pyrites, in calcite. *Loc.* Union G.M. Co.'s Lease, Mt. Morgan (Crocodile) Goldfield, 24 miles S.S.W. of Rockhampton (Mt. Morgan Br. Rail.). *Co.* Raglan; *Dist.* Port Curtis *Ref.* P.R.S.Q., vol. 4, pp. 40, 67 (1887).

7877. —— ——. *Assoc.with* Gold, Silver, Copper Pyrites, Iron Pyrites, Mispickel Galena, and Zinc Blende, in quartz. *Loc.* Victoria Reef, Black Snake Goldfield, 10 miles S. of Kilkivan. *Co.* Lennox; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

Townsville—

SITUATION: *See maps*, Pls. 16, 17. 858 miles N.W. of Brisbane. *Co.* Elphinstone; *Dist.* Kennedy North. *Lat.*, 19° 17′ S.; *Long.*, 146° 52′ E. The principal city of Northern Queensland. *Port* for the Goldfields of Charters Towers, Ravenswood, Strathalbyn, Piccadilly, Cape R., Cloncurry, Agate Downs, and Bower Bird; the Fanning and Far Fanning Gold Diggings; the Argentine (Star R.) Silver Field; the Cloncurry Mineral Field; and the Kynuna and Opalton Opal Fields.

HARBOURAGE: The construction of breakwaters, and the dredging of channels has made this a harbourage for the largest ships. Spring tides vary from 8 ft. to 12 ft.; neaps, 4 ft. to 8 ft. Depth of water at Eastern Pier varies from 20 ft. to 24 ft. at L.W.S.; at Ross Creek depth varies from 3 ft. to 12 ft. at L.W.S.

POPULATION: 19,777 (Census 1911).

RAINFALL: *See under* separate heading.

MINERAL REFERENCES: Asbestos, *see* No. 107; Coal, 1642A; Gold, 4007.

GEOLOGICAL NOTE: The rocks in and about Townsville consist of felspar porphyry, quartz porphyry, and diorite, the latter breaking through the porphyries in large massive dykes.

GEOLOGICAL PUBLICATIONS: There are no reports dealing specially with Townsville. *See under* Charters Towers, Cape River, Agate Downs, Bower Bird, Ravenswood, Cloncurry, and Star River for reports on district. *See also under* Govt. Ming. Jour. Special Reports, No. 66; *also under* Supplementary Report List, Nos. 3, 36.

WARDEN: Stationed at Townsville. INSPECTOR OF MINES: Stationed at Charters Towers.

CHAMBER OF COMMERCE: Sec., H. B. Marks.

TECHNICAL COLLEGE: For mining subjects taught *see under* "Technical Colleges."

GENERAL INFORMATION: Consult *Pugh's Almanac, Queensland Post Office Directory; Post and Telegraph Guide.* Newspapers: *Townsville Bulletin, North Queensland Herald, Evening Star, Federal.* Journal: *Queensland Government Mining Journal* (Brisbane).

Tripolite. *Var. of* Hydrous Silica, *see under* Opal. Mineral references, Nos. 7024-7033B.

USES: Tripolite, because of its abrading power, is commonly used as a polishing powder by lapidaries, and forms part of several powders used for polishing metals. It was frequently mixed with common toilet soap, principally to give it body, but its use for this purpose is now prohibited, and is considered an adulterant. It is a good non-conductor of heat, and is, therefore, well adapted to cold storage—with or without refrigeration—and for boiler coverings and firebricks, the two latter also because of its infusibility. Being soluble in alkalies, it can be made into water glass, also being utilised in the manufacture of paints, and as a light material with which to load up rubber goods. In the manufacture of explosives, on account of its power of absorption of liquids, it is used as a base or carrier for nitro-glycerine, but for this purpose it must be free of impurities. Generally considered, the value of Tripolite depends on its power of absorption, low specific gravity, infusibility, freedom from colour and impurities, and in being a non-conductor of heat. The impurities which would affect its value are clay, iron stains, and organic matter, whilst an incipient change from a porous to an opaline condition would also reduce its power of absorption, and render it valueless. Tripolite of good quality should absorb its own weight of water, and this may be taken as a safe gauge of its power of absorption.

GEOLOGICAL NOTE: A large flat-bedded deposit occurs between flows of basalt on the MacPherson Range, close to the south-eastern border of the State. In this locality there are innumerable outcrops of the mineral on the sides of the spur ranges, and the deposits cover an area of many square miles at an elevation of about 1,000 feet above sea level. The quality of the tripolite is irregular, sometimes being heavy, very impure, and dark with organic matter, but usually very light and porous, and ranging in colour from white to whitish grey. At places the deposit, which is frequently ten feet thick, has been altered into common opal, the change to opal taking place from the outside to the interior, often leaving a kernel of unaltered Tripolite in the centre of a mass. A section on one of the roads on the range is made through this opal, and is known as the Glass Cutting.

Serpentine occurs in association with this Formation, and contains small deposits of Chromite.

Tungstates. Iron and manganese, *see* Wolfram; lime, *see* Scheelite.

Tungsten (W). *Atom. Wt.* = 184·0. *Sp.gr.* = 19·13. *Colour,* white-metallic. Brittle. Heavy.

Minerals: *See* Scheelite, Tungstite, and Wolfram.

Uses: The metal is an important one, and in combination with iron, as ferro-tungsten, forms an alloy of great utility in the manufacture of hard, tough steel, the metal also being used to some extent in the manufacture of electric light filaments. Wolfram, Hubnerite, and Scheelite are the minerals commonly used for the extraction of the metal. First-class ore should contain not less than 60 per cent. tungstic acid, not more than 0·01 per cent. of sulphur and 0·25 per cent. of phosphorous.

Tungsten Oxide. *See* Tungstite.

Tungstite. *Syn.* Tungstic Ochre. *Compo.,* Oxide of tungsten. *Colour,* bright yellow. Earthy. *Sp.gr.* Varies with degrees of impurity. *Contents* (*max.*), Tungsten 79 per cent.

Turgite. *Syn.* Hydrohematite. *Compo.,* Hyd. sesquioxide of iron. *Colour,* reddish black. *Lustre,* Sub-metallic, also dull, earthy. *Streak,* red. *H.* = 5-6. *Sp.gr.* = 4·29-4·49. *Contents* (*max.*), Iron 66 per cent.

7881. ——. *Assoc.with* Copper Pyrites, Redruthite, Tile Ore, Malachite, Chrysocolla, Hematite, and Limonite, in quartz, calcite, and gossan. *Loc.* Belfast M.L. (303), 10 chains S.E. of Cloncurry Road, 2 miles N.N.E. of Mt. Start, 21 miles S.S.W. of Cloncurry, Belfast Group. *Co.* Selwyn; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 215, pp. 120-122 (1908).

7881A. ——. *Assoc.with* Gold, Native Copper, Copper Pyrites, Malachite, Atacamite, Chrysocolla, Dioptase, Iron Pyrites, Limonite, Göthite, Ironstone, Calcite, Chlorite, and Selenite, in quartzite, slate, and limestone. *Loc.* Mt. Wheeler M.L. (351, etc.), Mt. Wheeler Group, Soldier's Cap, 25½ miles S.E. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 219-224 (1908).

7882. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, and Chrysocolla, and Limonite, in schist and quartz. *Loc.* Brilliant Copper M.L. (588) (Tharsis Group), Duck Cr., 1½ mile N.W. of Mt. Start, 18 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 114, 115 (1908).

7883. ——. *Assoc.with* Redruthite, Malachite, Siderite, with traces of Gold and Silver, in chloritic schist and quartz. *Loc.* Noontide Copper M.L. (239), Pioneer Chief Group, W. of Cone Cr., ½-mile N. of Duck Cr., nr. Mt. Start, 27 miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 129, 130 (1908).

7884. ——. *Assoc.with* Copper Pyrites, Redruthite, Malachite, Chrysocolla, and Limonite, in slate and quartz. *Loc.* Highland Mary Copper M.L. (531), Ready Rhino Group, Duck Cr., 23½ miles S.W. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 91-93 (1908).

7885. ——. *Assoc.with* Native Copper, Copper Pyrites, Redruthite, Malachite, Chrysocolla, Iron Pyrites, Limonite, Calcite, and Ferro-Calcite, in quartz, quartzite, and limestone. *Loc.* Florence R. Copper Leases, ½-mile W. of Hampden Rd., 33 miles S. of Cloncurry. *Co.* Selwyn (*ante*). *Ref.* G.S.Q. Pub. 215, pp. 69-78 (1908).

7886. ——. *Assoc.with* Malachite. *Loc.* Flori's Copper Lode, Perry Scrub, 15 miles S. of Gin Gin, Bundaberg-Mt. Perry Rail. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* L.C.B.

7887. ——. *Assoc.with* Magnetite. *Loc.* Seabrook's, Oaky Cr., nr. Degilbo, 54 miles W. of Maryborough, Gayndah Br. Rail. *Co.* Cook; *Dist.* Burnett.

7888. ——. *Assoc.with* Limonite. *Loc.* Scotland Hills, 5 miles S. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Analysis:* Iron = 33·4, Silica and insoluble = 35·7, Phosphorus = 0·1 per cent. *Ref.* G.S.Q. Pub. 194, p. 50 (1904).

7889. ——. *Assoc.with* Chlorite. *Loc.* On hill, 1 mile N.E. of junction of Cadarga and Auburn Rivers. *Co.* Newcastle; *Dist.* Burnett.

7890. ——. On ridge N. of Coochee Cr., Cooranga Stn., 20 miles W.S.W. of Gayndah, 110 miles (by rail and road) W. of Maryborough, Gayndah Br. Rail. *Co.* Newcastle (*ante*). *Ref.* L.C.B.

7891. ——. *Assoc.with* Cassiterite and Chlorite. *Loc.* Black Rock Tin Mine, Eureka Cr., nr. Stannary Hills (br. of Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 125, p. 39 (1897).

7892. ——. *Assoc.with* Cassiterite. *Loc.* Comet Tin Mine, Irvinebank, 10 miles S.W. of Stannary Hills, 12 miles W.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 58 (1887).

7893. ——. *Assoc.with* Calcite. *Loc.* Por. 4064, North Branch, Pittsworth, 36 miles (by rail) S.W.byS. of Toowoomba (Pittsworth Br. Rail.). *Co.* Aubigny; *Dist.* **Darling Downs.** *Ref.* L.C.B.

7894. ——. *Assoc.with* Göthite and Limonite, in basalt. *Loc.* Por. 1847, Rolleston, 3 miles N.E. of Pittsworth Rail. Stn., 39 miles (by rail and road) S.W.byS. of Toowoomba. *Co.* Aubigny (*ante*). *Analysis:* Iron = 49·9 per cent. *Ref.* G.S.Q. Pub. 194, pp. 62, 63 (1904).

7894A.——. *Assoc.with* Limonite, in basalt. *Loc.* Por. 2110, Rolleston, few chains W. of Green Hills Rail. Stn. (Pittsworth Br. line), 32 miles (by rail) S.W.byS. of Toowoomba. *Co.* Aubigny (*ante*). *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

7895. ——. *Assoc.with* Limonite and Göthite, in basalt. *Loc.* Por. 2188, Rolleston, 1 mile S.S.E. of Green Hills Rail. Stn. (Pittsworth Br. line), 36 miles (by rail and road) S.W.byS. of Toowoomba. *Co.* Aubigny (*ante*). *Analysis: See* Limonite. *Ref.* G.S.Q. Pub. 194, p. 63 (1904).

7896. ——. *Loc.* 6 miles N. of Silver Spur, Texas, 49 miles W.S.W. of Stanthorpe. *Co.* Clive; *Dist.* Darling Downs. *Ref.* L.C.B

7897. —— (massive). *Loc.* Pors. 773 and 14v, Robinson, Mt. Sturt, 2 miles N.N.W. of Yangan, Killarney Br. Rail. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 186, p. 20 (1903).

7898. ——. *Assoc.with* Cassiterite. *Loc.* Blair's Claim, Coolgarra, 12 miles (by coach) N.E.byN. of Mt. Garnet, Chillagoe Br. Rail., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 4, p. 59 (1887).

7898A.——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Limonite, Ironstone, and Galena, in quartz. *Loc.* Broken R. Gold and Silver Co.'s Mine, Bee Cr. Diggings, Eungella Goldfield, 10 miles W. of Finch Hatton Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pubs. 54, pp. 2, 3 (1889), 229, pp. 31, 32 (1910).

7899. ——. *Assoc.with* Coal. *Loc.* Federal Colliery, Blair Athol, 11½ miles N.W. of Clermont. *Co.* Clermont; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pub. 201, p. 55 (1906).

7900. —— (siliceous). *Loc.* Pors. (293 and 333), Par. of Brassal, Pine Mt., 7 miles (by rail) N.N.W. of Ipswich (Brisbane-Valley line). *Co.* Churchill; *Dist.* **Moreton.**

7901. Turgite. *Assoc.with* Calcite. *Loc.* Por. (1), Dugandan, 59 miles S.S.W. of Brisbane Fassifern Br. Rail. *Co.* Churchill (*ante*). *Ref.* L.C.B.

7902. ——. *As pseudomorph after* Iron Pyrites, in altered sedimentary rocks. *Loc.* School Reserve, Upper Kholo, 3 miles N. of Ipswich. *Co.* Stanley; *Dist.* Moreton. *Ref.* L.C.B.

Turkey's Nest, Gowrie Cr., Clermont Goldfield. *Min.Ref.* Gold (alluvial), *see* 3312.

Turquoise. *Compo.*, Hyd. phosphate of alumina. *Colour*, blue, green, bluish-green. *Lustre*, somewhat waxy. *Streak*, white or greenish. *H.* = 6. *Sp.gr.* = 2·6-2·83.

Mineral Note: Blue Turquoise is rare, but the green variety, which has been proved to contain vanadium, is common. On exposure the blue variety generally becomes greenish, and the green is inclined to become greyish and yellowish. Analyses show that the percentages (omitting silica present as an impurity) are as follows:—Moisture, 16·7; Phosphoric Acid, 30·6; Alumina, 26·7; Ferrous Oxide, 2·2; Copper, nil; Vanadium, trace. The mineral principally occurs as small veins and patches in association with Apatite and Quartz in a belt of quartzites and shales exposed about the shores and islands of Keppel Bay, near Rockhampton, the belt passing through Curtis Island and other islands in the vicinity to the mainland about Emu Park. Traces are also to be seen in some of the road cuttings about Brisbane. All the occurrences at Brisbane, Curtis Island, Keppel Bay, and Emu Park being in strata belonging to the Devonian System.

Uses: Very little of the Turquoise found in the State is of value, being generally too discoloured for gem-making. Blue Turquoise, although occasionally of good quality, is usually irregular in colour, and becomes greenish with wear.

7902A. Turquoise (green). In small veinlets in Carbonaceous Slate. *Loc.* 92-mile Cutting, on Gayndah-Mundubbera line (under construction). *Co.* Mackenzie; *Dist.* Burnett. *Ref.* B.D.

7903. ——(?) As small veins. *Assoc.with* Quartz, in slates. *Loc.* Road Cutting, under English Cathedral, Adelaide street, Brisbane North. *Co.* Stanley; *Dist.* **Moreton.** *Analysis* (Hall): Phosphoric acid = 48·25 per cent.; Alumina = 29·07 per cent.; Vanadium = trace; Loss on ignition (H_2O) = 23·61 per cent.—100·93 per cent. *Ref.* P.R.S.Q., vol. 10, p. 13 (1893), G.S.M. and Q.M.

7904. ——. Quoin Is., S. of Curtis Is., 3 miles N. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Ref.* G.S.Q. Pub. 190, p. 11 (1904).

7905. —— (bluish green). *Assoc.with* traces of Apatite, in quartzite and altered shales. *Loc.* Keppel Rocks, Keppel Bay, 17 miles N.E. of Broadmount Rail. Stn., 36 miles E. of Rockhampton. *Co.* Deas Thompson; *Dist.* Port Curtis. *Ref.* A.R., p. 140 (1908), and G.S.M. *See below* (No. 1) for analysis.

7906. —— (blue and green) (in matrix). *Assoc.with* traces of Apatite, in quartzites and altered shales. *Loc.* and *Ref.* (*ante*).

7907. —— (brown). *Assoc.with* traces of Apatite, in quartzites and altered shales. *Loc.* and *Ref.* (*ante*). *See below* (No. 2) for analysis.

7908. —— (greenish brown matrix). *Assoc.with* traces of Apatite, in quartzites and altered shales. *Loc.* and *Ref.* (*ante*). *See below* (No. 3) for analysis.

Ulam Goldfield—

SITUATION: *See maps*, Pls. 2, 3. The Goldfield is about 3 miles S. of Toonda Rail. Stn. (N. Coast line), 44 miles (by rail and road) W.N.W. of Gladstone. *Co.* Deas Thompson; *Dist.* Port Curtis. Centre about *Lat.* 23° 42′ S.; *Long.* 150° 42′ E.

DISCOVERY: About middle of 1893.

POPULATION: Included in Rockhampton returns.

PROCLAMATION OF FIELD: First gazetted, 22nd February, 1894; last alteration, 17th September, 1903, as follows:—Commencing at the north-west corner of portion 36V, parish of Ultimo, and bounded thence on the south by a line bearing east seven miles; on the east by a line bearing north to the Rockhampton-Gladstone Trial Survey line; on the north-east by that line north-westerly to the south boundary of portion 1649, parish of St. Jose, by the south and west boundaries of that portion and a line north to Inkerman Creek, by that creek westerly to a branch creek about three miles in a straight line, by that branch creek upwards to the south-east corner of portion D, by the south boundary of that portion north-westerly about sixty chains; and on the west by a line passing along the east boundaries of portions 20V, 19V, and 2134, south to the point of commencement.

AREA: 28,160 acres (44 sq. miles).

MINERAL STATISTICS: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46A, 47. No separate records.

MINERAL REFERENCES: Gold (alluvial) 3390, (nugget) 3445A, (reef) 4298, 4309; Lead (Galena), 3053-3058; Copper (carbonate), 1957; Manganese (dioxide), 6473; Iron (Iron Pyrites) 5391-5398, (Ironstone) 5618-5620, (Limonite) 5909.

GEOLOGICAL NOTE: The country rocks comprise slates, shales, and limestones of undetermined age, quartzites of probably Gympie Formation, and intrusive diorite, the quartzites resting unconformably on the other sedimentary rocks. The reefs, which traverse both sedimentary rocks and diorite, and usually strike north and south, are generally of quartz, but some are made up of a large felsitic formation poor in gold. *See* G.S.Q. Pub. No. 99 for details.

GEOLOGICAL PUBLICATIONS: Report No. 99 (1894). *See under* Geol. Surv. Pub. List for title.

WARDEN and INSPECTOR OF MINES: Both stationed at Rockhampton.

REPORTS: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

University of Queensland. Instruction in all classes is available at the University to all students, but degrees are not granted to students unless they have matriculated. There are two degrees open to geological and mining students—namely, Bachelor of (Mining) Engineering, and Bachelor of Science, the former being a four years' course, the latter a three years' course. The calendar of the University, containing all information about fees, subjects, terms, scholarships, exhibitions, etc., is obtainable from F. W. S. Cumbrae-Stewart, B.A., Registrar, University, Brisbane.

Uran-Mica. *Syn.* Chalcolite, *which see.*

Uranate of uranyl, lead, etc. *See* Pitchblende.

Uraninite. *Syn.* Pitchblende, *which see.*

Uranium (U.). *Atom.Wt.* = 238·5; *Sp.gr.* = 18·7.

MINERALS: *See* Chalcolite and Pitchblende.

USES: Metallic Uranium has no industrial application, but its compounds are used in photographic development and as reagents in chemical work. It is also used in enamelling processes, porcelain painting, and glass-staining, yellow being the principal colour produced. Pitchblende is the main source of Uranium, as it is of Radium, but only small quantities have been found in the State. There are, however, large areas where prospecting operations should be encouraged. *See* further note under Radium. Ten per cent. of uranium oxide in an ore would be considered to be a low percentage.

—— phosphate. *See* Chalcolite.

Vakuta Island (Trobriand Group), Brit. New Guinea. *Min.Ref.* Calcite (stalactitic), *see* 611.

Valdare Opal Mines, N.N.W. of Toompine. *Min.Ref.* Precious Opal, *see* 6943.

Valentine Creek, Port Clinton. *Min.Ref.* Coal, *see* 1801.

Valentinite. *Compo.*, Antimony trioxide. *Colour*, snow-white. *Lustre*, adamantine. *H.* = 2·5-3; *Sp.gr.* = 5·5. *Contents* (*max.*), Antimony 83 per cent.

7914. ——. *Assoc.with* Stibnite and Cervantite. *Loc.* St. John's Cr. Goldfield, 16 miles S.W. of Eidsvold. *Co.* Wicklow; *Dist.* Burnett. *Ref.* P.R.S.Q., vol. 4, p. 45 (1887).

Vanadium (V.). *Atom. Wt* = 51·06; *Sp.gr.* = 5·5. *Colour*, grey-metallic.

Notes: The alloy, ferro-vanadium, when added to steel in the procees of manufacture, produces a toughness and hardness which annealing does not destroy. It is specially useful in steels which require much bending, and high-carbon vanadium steel makes good saws, cutters, etc. Metavanadic acid has been used to some extent as a gold bronze, while vanadic chloride is used in fabric printing, and the trioxide in dyeing. The occurrence of vanadium in the clays around Brisbane is made apparent by the greenish and yellowish discoloration of the bricks and other ware made from them. The greenish colour appears soon after the bricks are taken from the kiln, and this in the course of a few months changes to a bright yellow. In about six months the discoloration entirely disappears. For commercial purposes vanadium ores require to contain more than 15 per cent. of vanadium pentoxide.

7915. ——. As the colouring substance in Turquoise (?). Adelaide Street Cutting, Brisbane North. *Co.* Stanley; *Dist.* **Moreton.** *Ref.* B.D.

—— Creek, 10 miles W. of Nebo. *Min.Ref.* Coal, *see* 1704. *Geological Note:* Rocks are Bowen coal measures (P.C.) and contain anthracite seam 3 ft. 6 in. thick and of very good quality.

—— Gully, Gympie Goldfield. *Min.Ref.* Gold (alluvial), *see* 3417.

Walla (Par. of), Pors. 856, 917, 1033, 1098, 1187, 1230, 5 miles S.S.W. of Gin Gin Rail. Stn. *Min.Ref.* Jasper, *see* 5650; Jaspopal, 7001; Iron Pyrites, 5438; Kaolin, 5706; Limestone, 694; Manganese-dioxide, 6482-6485; Psilomelane, 7103; Pyrolusite, 7132; Rhodonite, 7321.

Wallaby Creek, br. of Annan R. Heads near Mt. Hartley, passes Rossville, and flows W.byN. into Annan R., about 1½ mile below Helenvale. *Min.Ref.* Cassiterite, *see* 801, 802, 804, 817-823; Chalcedony, 1340; Corundum, 2366; Mispickel, 6668A, 6672; Rock Crystal, 7184; Tourmaline, 7849; Wolfram, 7931, 7934.

—— Point, 1½ mile S. of Mt. Leyshon. *Min.Ref.* Gold, *see* 3982.

Wallace and Eldridge's Claim, Seven-mile Diggings, nr. Nanango. *Min.Ref.* Garnet, *see* 3137; Gold (alluvial), 3367; Ruby, 2364; Sapphire, 2357; Spinel, 7582; Topaz, 7808; Zircon, 8227.

—— Creek Crossing, 3 miles S. of Dugandan Rail. Stn. *Min.Ref.* Clay Ironstone, *see* 1592.

Wallal Bore. *See under* Artesian Bores. No. 205.

Wallaroo Coal Mines. *See maps*, Pls. 10, 11, 33. Three miles S. of Triphinia, Central Rail. line. *Min.Ref.* Coal, *see* 1694, 1695. *See also under* Coal Bores.

GEOLOGICAL NOTE: The rocks in this locality comprise Dawson-Mackenzie Coal Measures of Upper Bowen Formation (Permo-Carboniferous) in which coal seams have been reported to occur. *See* G.S.Q. Pub. No. 155 for position and map.

—— Lease (162), Kangaroo Hills Mineral Fields. *Min.Ref.* Bornite, *see* 428; Cerussite, 1257; Copper Pyrites, 2249; Galena, 2975; Hematite, 4752; Mispickel, 6755; Tile Ore, 2565.

—— M.L. (392), Wee Macgregor Group, Cloncurry. *Min.Ref.* Azurite, *see* 170A; Limonite, 5798; Malachite, 6158; Redruthite, 7253; Tile Ore, 2529.

—— M.F. (634), Mt. Flo. Gold and Mineral Field. *Min.Ref.* Azurite, *see* 235B; Malachite, 6339A.

Wallen Bore. *See under* Artesian Bores. No. 152.

Walli and Chinaman Creeks, nr. Mt. Ubi, W. of Blackall Range. *Min.Ref.* Gold, *see* 4418.

Wallis's Day Dawn Lease, Charters Towers Goldfield. *Min.Ref.* Galena, *see* 2921; Gold, 3947; Iron Pyrites, 5218.

Walloon Bores (no record). *See* Ipswich Coalfield *under* Coal Bores.

Walloon Coal Area, 31½ miles W.byS. of Brisbane. *Lat.*, 27° 37′ S.; *Long.*, 152° 39′ E. *See* Pl. 25. Collieries—Walloon and Caledonia. *Min.Ref.* Coal, *see* 1725-1727. *See* Geol. Note *under* Ipswich.

Wallumbilla Bore. *See under* Artesian Bores. Nos. 53, 106.

Walsh and Tinaroo Mineral Fields. (Now divided into Herberton Gold and Mineral Field and Chillagoe Gold and Mineral Field—by Proclamation, gazetted 13th October, 1909.)

SITUATION: *See maps*, Pls. 8, 9, 16, 17, 22. In Cook and North Kennedy Districts, between *Lat.* 16° and 19°, and *Long.* 143° and 145°.

POPULATION: Estimated (end of 1910), 12,049.

PROCLAMATION OF FIELD: First gazetted, 2nd January, 1882; last, 29th September, 1905. *See* Chillagoe Gold and Mineral Field, and Herberton Gold and Mineral Field for latest Proclamations.

Walsh and Tinaroo Mineral Fields—*continued:*

Area: 8,541,200 acres (13,345⅝ sq. miles).

Principal Mining Centres: Chillagoe, Coolgarra, Fossilbrook, Herberton, Irvinebank, Koorboora, Mt. Garnet, Montalbion, Mungana, Mt. Carbine, Mt. Molloy, Stannary Hills, Newellton (Silver Valley), Watsonville, Wolfram Camp, *which see.*

Other Mining Centres: Bakerville, Boonmoo, Bamford, California Creek, Emuford, Eureka Cr., Four-mile Mountain, Glen Atherton, Glen Linedale, Mareeba, Muldiva, Nettle's Cr., Nymbool, Reid's Cr., Tate R., Thompson Cr., Walsh R., *which see.*

Mineral References: **Gold** (alluvial) 3254, 3255, 3256, (reef) (3668-3677, 3775-3776; **Silver** 7451-7467, 7563, (Cerargyrite) 1178-1183, (Proustite) 7078, (Pyrargyrite) 7112, 7113, (Stephanite) 7602; **Lead** (Cerussite) 1189, 1191-1212, 1219-1225, (Galena) 2758, 2766-2809, 2827a, 2844-2864, (Linarite) 5937, 5938, (Massicot) 6526, 6530, 6533-6537, (Minium) 6580-6592, 6594-6598, (Pyromorphite) 7141-7143, 7145, 7146; **Copper** (Atacamite) 129-131, (Azurite) 186-202, 209-214, (Bornite) 418, 419, (Bournonite) 437, (Chalcanthite) 1318, 1320-1326, 1328-1330, (Chrysocolla) 1517-1520, (Copper) 1842, 1844-1845, (Copper carbonate) 1883, 1887-1898, 1910-1912, (Copper, native) 1991-1994, 1999-2000, (Copper Ores) 2026-2033, 2035-2036, (Copper Oxide) 2047-2048, (Copper Phosphate) 2058, 2059, (Copper Pyrites) 2143, 2153-2176, 2210, 2215a, (Cuprite) 2425, 2428-2441, 2443, 2443a, 2455-2457, (Dioptase) 2583-2584, (Malachite) 6211-6248, (Olivenite) 6917a, 6918 (Redruthite) 7278-7280 (Tenorite) 7720-7724, 7728-7729, (Tetrahedrite) 7760-7768, 7770, (Tile Ore) 2546-2550, 2562-2563; **Tin** (Cassiterite) 830-833, 839-957, 966-970, 1037-1148, (Stannite) 7593-7597; **Bismuth** (native) 329-341, 344-347, (Bismuthinite) 365-369, 372, (Bismutite) 382-395; **Wolfram** 7935-7971a, 7973-7976, 7978-7980, 8006-8030a, (Tungstite) 7878, 7879; **Molybdenite** 6825-6842, 6844, 6845, 6855-6857, (Molybdite) 6870-6871; Scheelite, 7339, 7341, 7343-7353; Antimony, 72-73, (Cervantite) 1306, (Stibnite) 7627-7632, 7639-7640; Manganese (Dioxide) 6407-6412, 6429-6430, (Pyrolusite) 7117-7119, (Rhodochrosite) 7315, (Wad) 7111; **Monazite,** 6874-6877a, 6879, 6880; Rutile, 7327, 7328, 7332; Chalcolite, 1405-1407; Columbite, 1838: Zinc (Goslarite) 4561, (Smithsonite) 7567-7568, (Willemite) 7925, (Zinc Blende) 8081-8090, 8107-8115; Iron (Göthite) 4567, (Hematite) 4709-4720, (Ilmenite) 4899, (Iron Pyrites) 5060-5077, (Ironstone) 5517, 5522-5526, 5528-5531, 5546-5548, (Limonite) 5842-5845, 5872-5874, (Magnetite) 5987-5994, 6005-6007, (Marcasite) 6502-6506, (Mispickel) 6687-6704, 6734-6741, (Ochre, red) 4811-4813 (Ochre, yellow) 5934, (Pyrrhotite) 7155-7158, (Scorodite) 7363-7367a, (Siderite) 7406-7408, (Turgite) 7898, (Vivianite) 7921-7922; Graphite, 4593, 4594, 4596, 4597; **Limestone,** 634-642. Other Minerals—Actinolite, 4859-4861; Amethyst, 7169; Barytes, 267-269, 271; Beryl, 299, 300; Biotite, 304-307; Bronzite, 438; Cairngorm, 7175, 7179-7180; Calcite and varieties, 434-485, 568, 573-574; Chert, 1410-1411; Chlorite, 1430-1443, 1446-1457; Clay, 1569; Corundum, 2371-2372: Dolomite, 2587; Felspar, 2633-2639; Fluorspar, 2657-2681; Garnet, 3099-3112; Gypsum, 4615; Halite, 4654-4656; Halloysite, 4660; Harmotome, 4665; Hornblende, 4832-4834; Hypersthene, 4877; Jasper, 5642; Kaolin, 5676-5679; Lepidolite, 5733; Lithium, 5941; Lithomarge, 5709; Magnesite, 5947: Mica, 6554-6559; Muscovite, 6880, 6890, 6893; Natrolite, 6896, 6898: Oligoclase, 6917; Olivine, 6926; Opal (common), 6976; Opal (wood), 7007, 7008; Orthoclase, 7038, 7045-7047; Ottrelite, 7059; Penninite, 7062-7064; Plagioclase, 7070; Pleonaste, 7585; Prase, 1398; Rock Crystal, 7185-7187; Ruby, 2359; Sanidine, 7053; Selenite, 4639; Serpentine, 7380-7388; Siliceous Sinter, 7023; Spinel, 7574-7575, 7580; Steatite, 7682-7684, 7686-7689: Staurolite, 7600; Talc, 7674-7675, 7677-7679; Topaz, 7786-7788, 7797-7803: Tourmaline, 7851-7855, 7860; Tremolite, 4874-4875; Tripolite, 7026, 7027; Viridite, 7919; Websterite, 7923; Zircon, 8221.

Mineral Statistics: *See under* Herberton, *in stat. tables*, Pls. 37, 38, 39, 40, 41, 42, 46, 46a.

Geological Publications: *See under* Chillagoe and Herberton, *also under* each Mining Centre.

Wardens and Inspectors of Mines: One of each stationed at Chillagoe and Herberton.

Walsh Co. Cook Dist. *See map*, Pl. 8.

Walsh River. Heads in the vicinity of Irvinebank and Watsonville; flows W.N.W. to join the Mitchell. Length, about 150 miles. Principal tributaries: Middle Walsh R., Third Walsh R. (Emu Cr.), Crooked Cr., Chillagoe Cr., Redcap Cr., Welcome Cr., Elizabeth Cr. *Min.Ref.* Azurite, *see* 189A, 189B; Cassiterite, 855, 879; Cuprite, 2428; Malachite, 6219; Scheelite, 7344; Stibnite, 7650; Tetrahedrite, 7760; Wolfram, 7946.

—— —— (North of), opposite junction of Rookwood Cr. *Min.Ref.* Limestone, *see* 641.

—— —— and Nondah Creek (between), Walsh and Tinaroo Mineral Fields. *Min.Ref. see under* Arbouin Copper Mines.

Walsh's Lease, Grasstree Goldfield. *Min.Ref.* Gold, *see* 4108.

Walter Hodgson Reef, Mulgrave Goldfield. *Min.Ref.* Gold, *see* 3778; Iron Pyrites, 5081.

Walton Extd. Lease (409), Gympie Goldfield. *Min.Ref.* Gold, *see* 4491.

—— Reef, Gympie Goldfield. *Min.Ref.* Gold, *see* 4538.

Wanderer M.L. (622), Eclipse Group, Cloncurry. *Min.Ref.* Actinolite, *see* 4851; Malachite, 6091; Redruthite 7210; Tile Ore, 2495.

—— Reef, Croydon Goldfield. *Min.Ref.* Gold, *see* 3504.

—— ——, Pikedale Goldfield. *Min.Ref.* Gold, *see* 3839.

Wandering Digger Mine, Coolgarra. *Min.Ref.* Cassiterite, *see* 1056.

Wando Bore. *See under* Artesian Bores. No. 442.

—— Creek, 10 miles N.W. of Mungana. *Min.Ref.* Apatite, *see* 77; Gold (alluvial), 3204; Mica, 6554; Muscovite, 6888; Silver, 7449.

—— Station, S.S.W. of Rockhampton. *Lat.*, 24° 22′ S.; *Long.*, 150° E. *Min.Ref.* Molybdenite, *see* 6860; Wolfram, 8035.

Wangaratta Rail. Stn. and Bowen (between). *Min.Ref.* Malachite, *see* 6297.

Waniola Bore. *See under* Artesian Bores. No. 308.

Waratah Lease (570), Croydon Goldfield. *Min.Ref.* Galena, *see* 2709; Gold, 3497; Iron Pyrites, 4944; Silver, 7426; Silver (native), 7548.

—— ——, Yorkey's Goldfield. *Min.Ref.* Calcite, *see* 558; Gold, 4413; Magnesite, 5964.

—— M.L. (127), Tharsis Group, Cloncurry. *Min.Ref.* Malachite, *see* 6153; Tile Ore, 2527.

Warbreccan Bore. Incrustation inside of casing. *Analysis:* Calc. carbonate, 89·5; Mag. carbonate, 4·06; Ferrous carbonate, 5·06; Alkalies, etc. (by dif.), 1·39.

—— Co. Mitchell Dist. *See map*, Pl. 18.

Warburton Co. Gregory North Dist. *See map*, Pl. 20.

Ward Co. Moreton Dist. *See map*, Pl. 6.

Wardsdale Bore. *See under* Artesian Bores. No. 433.

Warde (H. S.), Inspector of Mines.

Report on Ravenswood Mines. Q.G.M.J., vol. 2, p. 488 (1901).

Report on Maytown Mines, Palmer Goldfield. Q.G.M.J., p. 490 (1903).

On Gold Find Near Oaks Station, Central District. Q.G.M.J., vol. 5, p. 187 1904.

On Etheridge and York Peninsula Fields. Q.G.M.J., vol. 8, p. 492 (1907).

Mining Developments in the Central Gold and Mineral Fields. In A.R.D.M., pp. 103-109 (1904).

Wardens:

CONTROLLING OFFICER: The Under Secretary, Mines Dept., Brisbane.

DUTIES: The administration of the Acts relative to Mining on Goldfields and Mineral Fields, and all matters incidental thereto.

The furnishing of Monthly and Annual Reports to the Mines Department on the operations carried on in the various mines, supplying returns of stone crushed, yields of gold, dividends, calls paid, etc.

HEADQUARTERS (with proclaimed and unproclaimed Fields and Mining Centres supervised)—

Bowen: *Controls* Marengo, Normanby, and Mt. Wyatt Goldfields; Sellheim Mineral (Silver) Field.

Brisbane: *Controls* Enoggera (gold).

Bundaberg: *Controls* Littabella Cr. (Coal), Boolboonda, Eidsvold, Gaeta, Perry, Reid's Creek, Tenningering (Mount Perry), and St. John's Creek Gold and Mineral Fields.

Burketown: *Controls* Burketown Mineral (Silver-lead) Field.

Cairns: *Controls* Mulgrave Goldfield.

Charleville: *Controls* Charleville Mineral (Opal) Fields (Duck, Eromanga, and Station Creeks, and Yowah Mines).

Charters Towers: *Controls* Balcooma, Cape River, Carrington, Charters Towers, Newhaven, Homestead, and Windsor Goldfields.

Chillagoe: *Controls* Chillagoe Gold and Mineral Field, which includes Muldiva, Mungana, Chillagoe, Kooboora, Fossilbrook, Bakerville, Wolfram Camp, Bamford, Mount Mulligan, Thornborough, and Tate Mining Centres.

Clermont: *Controls* Clermont Goldfield and Coalfield, including Springs Rush Goldfield; Anakie Mineral (Sapphire) Field.

Cloncurry: *Controls* Agate Downs and Bower Bird Goldfields; Cloncurry Gold and Mineral (Copper and Gold) Field.

Cooktown: *Controls* Cook and Cape York Peninsula Fields, including Alice R., Archer R., Coen, Hamilton, Palmer, Starcke, and West Normanby Goldfields; Annan R. and Mt. Windsor Tinfields; Little River Coalfield; Bowden Mineral (Tin) Field; Noble Island (Wolfram) Field; Hayes Creek, Lockinvar, Potallah Creek, and Rocky River Goldfields.

Croydon: *Controls* Croydon Goldfield; Stanhills Tinfield.

Cunnamulla: *Controls* Cunnamulla Mineral (Opal) Field (Koroit and Yowah Mines); Paroo Mineral (Opal) Field.

Eidsvold: *Controls* Eidsvold Gold and Mineral Field, including St. John's Creek (Gold and Antimony) and Rawbelle (Copper) Mines.

Georgetown: *Controls* Etheridge, Woolgar, Green Hills, and Oaks Goldfields.

Geraldton: *Controls* Jordan Cr. Goldfield.

Gladstone: *Controls* Barmundoo, Calliope, Cania-Kroombit, Langmorn, Maxwelton, Monal, Mt. Jacob, Mt. Rainbow, and Norton (Milton) Goldfields; Glassford Creek (Copper), Many Peaks (Copper), Mt. Cannindah (Copper), Mt. Hector (Copper), and Rosedale (Wolfram) Mineral Fields; Bompa (Mount Jacob), Mount Larcombe, Eastern Boyne, Figtree, and Uncle Sam Goldfields.

Gympie: *Controls* Gympie, Glastonbury, Kilkivan, Marodian, and Yabba Gold and Mineral Fields; Gunalda (Coal).

Herberton: *Controls* Herberton Gold and Mineral Field, including Russell, Russell Extd. (Towalla), Mareeba, and Mulgrave Goldfields; Montalbion; Mt. Molloy, O.K. (Copper Fields); Mt. Garnet (Copper-Tin Fields); Herberton, Irvinebank, Newellton or Silver Valley, Smith Creek, Stannary Hills, Watsonville, Mt. Spurgeon (Tinfields); Coolgarra (Tin and Wolfram Fields); Jumna Cr., Garrumba.

Hughenden: *Controls* Hughenden Mineral Field.

Innisfail (Geraldton): *Controls* Jordan Goldfield.

Ingham: *Controls* Kangaroo Hills Mineral Field.

Wardens—*continued:*

Ipswich: *Controls* Ipswich Coalfield.

Longreach: *Controls* Opalton Mineral Field.

Mackay: *Controls* Eungella, Grasstree and Nebo Goldfields; Blackrock Cr. (Coal), Cattle Cr. (Copper), Mt. Flora (Copper), and Mt. Spencer (Silver, Copper) Mineral Fields, Alligator Creek (Gold).

Maryborough: *Controls* Stanton-Harcourt (Gold); Biggenden (Bismuth), Mt. Bopple (Graphite), Mt. Shamrock (Gold-Bismuth), Mt. Stedman (Gold), and Paradise (Gold) Mineral Fields; Chowey (Gold).

Mt. Morgan: *Controls* Mt. Morgan (Crocodile) Goldfield (Dee River, Moonmera, Mt. Morgan, Mt. Usher, Mt. Victoria).

Nanango: *Controls* Nanango Goldfield.

Ravenswood: *Controls* Piccadilly, Ravenswood, and Strathalbyn Goldfields; also Far Fanning, Golden Valley, and Mt. Success, Star River (Argentine) Mineral Field.

Rockhampton: *Controls* Canoona, Cawarral, Morinish, Oaks View, Ridgelands, Rosewood, Stanwell, and Ulam Goldfields; also Mt. Chalmers (Copper and Gold), and Mt. Warminster (Copper) in the Cawarral Goldfield.

Roma: *Controls* Roma Mineral Field.

St. Lawrence: *Controls* Yatton Goldfield.

Stanthorpe: *Controls* Macdonald and Pikedale Goldfields; Stanthorpe (Tin) Mineral Field; Texas (Silver, Lead) Mines, Ballandean (Silver, Lead, Copper, Tin) Mines.

Thargomindah: *Controls* Paroo (Opal) Mineral Field (Duck Creek, etc.).

Thursday Island: *Controls* Horn Is. and Possession Is. Goldfields.

Toowoomba: *Controls* Coal Mines at King's Creek, etc.

Townsville: *Controls* Star River Mineral Field (Wolfram).

Warwick: *Controls* Canal Cr., Leyburn, Lucky Valley, Palgrave, Talgai, and Thane's Cr. Goldfields.

Ware (Teste) Island, Brit. New Guinea. *Min.Ref.* Limestone, *see* 715.

Wareena Cr. Bore. *See under* Artesian Bores. No. 253.

Warenda Lease Bores. *See under* Artesian Bores. No. 432.

Warianna Sub-artesian Bore. *See under* Artesian Bores. No. 2

Warirata Road, Brit. New Guinea. *Min.Ref.* Cuprite, *see* 2487; Redruthite, 7311.

Warner Co. Cook Dist. *See map*, Pl. 8.

Waroo Tin Mine, 38 miles W. of Stanthorpe. *Min.Ref.* Cassiterite, *see* 1034; Mispickel, 6731.

Warooby Bore. 7¾ miles N.E. of Roma. *Min.Ref.* *see under* Oil.

Warra Bore. *See under* Artesian Bores. No. 432.

Warralto Cr., nr. Stanthorpe. *Min.Ref.* Cassiterite, *see* 1035.

Warreah, Gt. Northern Rail. (Blantyre Coal Shaft). *Min.Ref.* Coal, *see* 1709c. *See also under* Coal Bores.

Warreah Bores. *See under* Artesian Bores. Nos. 63, 311.

Warrego District—

SITUATION: *See maps*, Pls. 18, 19. *Lat.*, 25°–29°; *Long.*, 142°–148°. Bounded on the north by the Districts of Mitchell and Leichhardt; on the east by the District of Maranoa; on the south by the State of New South Wales; and on the west by the District of Gregory South.

AREA: 58,334 sq. miles.

PRINCIPAL RIVERS: Bulloo (*tribs.* several creeks), Paroo, Warrego (*tribs.* Langlo, Ward, Nive Rs., and Angellala Cr.).

PRINCIPAL MINING CENTRES: Mineral Fields—Paroo (including Duck Cr., Sheep Station Cr., Emu Cr., and Lushington Opal Workings); Cunnamulla (including Yowah and Koroit Opal Fields); *which see.*

Warrego District—*continued:*

Counties:

Bando Co., Cunnamulla Mineral Field (in part—*see also* Humeburn Co., Palmer Co., Wellington Co.).

Bulloo Co., Paroo Mineral Field (in part—*see also* Humeburn Co., Norley Co., Wellington Co.; Toompine).

Burenda Co., Burrandilla Co., Chesterton Co., Glanworth Co., Gowan Co.

Humeburn Co., Cunnamulla Mineral Field (in part—*see also* Bando Co.); Koroit Field, Paroo Mineral Field (in part—*see also* Bulloo Co.); Duck Cr. Field, Emu Cr. Mines, Goodman's Flat Mines, Lushington Mines, One-mile Workings, Pride of the Hills Mine, Sheep Station Cr. Mines (all Opal).

Kungie Co.; Kyrunda Co.; Langlo Co.; McKinlay, Adavale.

Munga Co.; Nickavilla Co.; Nive Co.; Noorama Co.

Norley Co., Paroo Mineral Field (in part—*see also* Bulloo Co.).

Numalla Co.

Orrery Co., Augathella, Charleville, Morven.

Palmer Co., Cunnamulla Mineral Field (in part—*see also* Bando Co.).

Paroo Co.; Pitteroo Co.; Ross Co.; Titheroo Co.

Wellington Co., Cunnamulla Mineral Field (in part—*see also* Bando Co.); Southern Cross Field, Yowah Field, Fiery Cross Field, Paroo Mineral Field (in part—*see also* Bulloo Co.), Thargomindah (all Opal).

Wyara Co.

Mineral References and Statistics: *See under* names of Principal Mining Centres.

Warren Coal Bore. Half-mile south of Warren Rail. Stn. (Central Rail. line). Mostly shales and sandstones, with one bed of basalt 50 feet thick met with at 120 feet, and another 74 feet thick, met with at 491 feet. No coal. Total depth, 565 feet. *Ref.* B.D. (1912).

Warren and Mt. Lion (between), 16 miles W. of Rockhampton. *Min.Ref.* Oolitic Limestone, *see* 745. *Also under* Supplementary Report List, No. 94, for further reference.

Warren Hastings Shaft, Gympie Goldfield. *Min.Ref.* Platinum, *see* 7074a.

Warrice Railway Siding Sub-artesian Bore. *See under* Artesian Bores. No 272.

Warrong Co. Maranoa Dist. *See map,* Pl. 12.

Warwick, 169 miles (by rail) S.W. of Brisbane. *Lat.,* 28° 12′ S.; *Long.,* 152° 3′ E.

Population: 5,536 (Census 1911).

Railway Base for the Canal Cr., Leyburn, Lucky Valley, Palgrave, Talgai, and Thane's Cr. Goldfields.

Leases: (Mining Centres). Miners' Homestead Leases in force, 148; area, 4,424 acres.

Mineral References: Clay, *see* 1572; Limestone, 648; Manganese-dioxide, 6427; Rhodochrosite, 7314; Rhodonite, 7319; Tripolite, 7029.

Geological Note: Rocks belonging to the Walloon Series (Trias-Jura) occur throughout the neighbourhood, probably resting on Gympie beds (Permo-Carboniferous), whose outcrops are seen some miles to the south-west. Basalt covers the Ipswich Formation in places.

Geological Publications (bearing on the District): (1) Eleventh Tri-monthly Report of the Geological Surveyor, by S. Stutchbury, Sydney (By Auth., 1853); (2) Report on the Auriferous Country of the Upper Condamine, by D. O'H. Aplin, Govt. Geologist, Southern Queensland (By Auth. Brisb. 1869.—Parl. Paper); (3) Queensland, Australia, by R. Daintree (By Auth. Lond. 1871); (4) Report on the West Moreton and Darling Downs District (By Auth. Brisb. 1876—Parl. Paper). (*All out of print.*) (5) *See also* G.S.Q. Pub. Nos. 41 (1887), 87 (1892), 186 (1903), 189 (1904).

Rainfall: Yearly average between 1902 and 1907, 29·12 inches. Wet Days, 83.

Chamber of Commerce: Secretary, J. Porter.

Technical College: For mining subjects taught, *see under* "Technical Colleges."

Warwick Bores. *See under* Artesian Bores. No. 434.

—— Castle Group, Cloncurry. *Includes* Warwick Castle, Evelyn, and Louisa M. Leases. *Min.Ref.* Malachite, *see* 6189; Tile Ore, 2543.

—— —— M.L. (314), Cloncurry. *Min.Ref.* Malachite, *see* 6189; Tile Ore, 2543.

—— Springs. *See* Water Analyses. No. 868B.

Washington 1 and 2 Mines, Star R. (Argentine) Silver Field. *Min.Ref.* Anglesite, *see* 58; Cerussite, 1285; Galena, 3001; Ironstone, 5582; Massicot, 6543; Minium, 6631.

Washpool Bores. *See under* Artesian Bores. Nos. 141, 403.

Water Analyses (Artesian, etc.). *See under* Artesian Bores for list. To obtain analyses of water from bores or wells, first write for directions and list of charges to Government Hydraulic Engineer, Water Supply Department, Brisbane. By arrangement, analyses will be made if application is made direct with Government Analyst.

Waterford Bore. *See* Tygum Bore, *under* Coal Bores.

Waterfall Creek, Annan R. Tinfield. *Min.Ref.* Cassiterite, *see* 827.

—— (Homeward Bound) Reef, Croydon Goldfield. *Min.Ref.* Gold, *see* 3528; Zinc Blende, 8059.

Waterpark Creek, Port Clinton. *Min.Ref.* Coal, *see* 1802.

Geological Note: Rocks consist of sandstone, shales, and several seams of brown coal belonging to the Walloon Series (Trias-Jura), some of the seams being 30 feet thick. To the north and south there are rocks belonging to the Devonian System, with granite to the west, and sand dunes to the east. *See* G.S.Q. Pub. No. 174 for details.

Water's Selection (120), 1½ mile N. of Beaudesert. *Min.Ref.* Coal, *see* 1781.

Waterstown Colliery, North Ipswich Coal Area. *Min.Ref.* Coal, *see* 1755, 1756.

Waterworks Road, Enoggera. *Min.Ref.* Hornblende, *see* 4842.

Watson's Mine, Lawn Hills. *Min.Ref.* Calcite, *see* 451; Lead Gossan, 5728; Zinc Blende, 8053.

Watsonville—

Situation: *See maps*, Pls. 8, 9, 22. Head of James Cr., br. of Walsh R., 7 miles S.E.byE. of Stannary Hills Rail. Stn., 6 miles W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Lat.*, 17° 22′ S.; *Long.*, 145° 20 E.

Population: 277 (estimated, 1910). No returns later than this, now included Herberton Gold and Mineral Field.

Mineral Statistics: Tin. *See under* Herberton, *in stat. tables*, Pls. 38, 46, 46A.

Mineral References: Lead (Galena), *see* 2783, 2784; Copper (Azurite) 190-193, (Chalcanthite) 1321-1326, (Copper carbonate) 1889-1891, (Copper, native) 1991, (Copper Ore) 2026, 2027, (Copper Oxide) 2047, (Copper Pyrites) 2156-2165, (Cuprite) 2429, 2430, (Malachite) 6220-6225, (Tenorite) 7720, (Tile Ore) 2546-2548; Tin (Cassiterite) 880-921, (Stannite) 7596, 7597; Bismuth (native), 334; Wolfram, 7948-7955; Scheelite, 7345; Antimony (Cervantite) 1306, (Stibnite) 7629, 7630; Chalcolite, 1406; Arsenolite, 104; Iron (Copperas), 2335, (Iron Pyrites) 5062-5068, (Ironstone) 5523-5526, (Limonite) 5841, 5841A, (Marcasite) 6504, 6505, (Mispickel) 6690-6697, (Ochre, red) 4811-4813, (Pyrrhotite) 7156, (Siderite) 7406, (Vivianite) 7921; Graphite, 4593. Other Minerals.—Chlorite, 1435-1441; Felspar, 2633-2638; Fluorspar, 2661, 2662; Garnet, 3100-3104; Kaolin, 5677, 5678; Mica, 6557; Muscovite, 6890; Orthoclase, 7040; Rock Crystal, 7186, 7187; Sanidine, 7053; Serpentine, 7380-7383; Steatite, 7682-7684; Talc, 7674; Tourmaline, 7853.

Geological Note: The country rocks are sandstones, greywackes, and shales belonging to the Gympie Formation (Permo-Carboniferous), in contact with granite, porphyry, and diorite. The granite occurs in a massive form, the porphyry and diorite as dykes. Tin ore occurs as impregnations close to faults in the greywackes. *See* G.S.Q. Pub. Nos. 119 and 192 for details and maps.

Geological Publications: Reports—Nos. 13 (1883), 119 (1897), 192 (1904). Map No. 220 (1909). *See under* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Herberton.

Watten Bore. *See under* Artesian Bores. No. 193.

Wattle and Cattle Creeks (granite ridges between), Norton Goldfield. *Min.Ref.* Gold, *see* 4295; Iron Pyrites, 5390; Mispickel, 6800.

Watt's Selection (55), 3 miles S.E. of Logan Village Rail. Stn. (South Coast line). *Min.Ref.* Coal, *see* 1787; Cacoxenite, 439; Limonite, 5903.

Waverley Bore. *See under* Artesian Bores. No. 413.

—— Co. Gregory North Dist. *See map*, Pl. 20.

—— Tin Leases, Kangaroo Hills Mineral Field. *Min.Ref.* Azurite, *see* 223; Cassiterite, 1162; Malachite, 6310.

Weary Bay, 31 miles S. of Cooktown. The Port for the produce of the Bloomfield River Alluvial Tin Workings.

Weatherly Creek and Reef, Soldier's Cap, Cloncurry. *Min.Ref.* Gold, *see* 3472-3474; Limonite, 5788.

Webb's Reef, Pikedale Goldfield. *Min.Ref.* Gold, *see* 3839.

Websterite. *Syn.* Aluminite. *Compo.*, Hyd. sulphate of alumina. *Colour*, dull whitish. Earthy. *H.* = 1-2. *Sp.gr.* = 1.6. *Contents* (*max.*), Alumina 29 per cent.

7923. ——. *Assoc.with* Cassiterite, Azurite, Malachite, Iron Pyrites, Hematite, Limonite, Göthite, Mispickel, Wolfram, Fluorspar, Chlorite, and Penninite, in quartz lode. *Loc.* Coolgarra Tin Mines, 12 miles (by road) N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

Whitehill (White's) Sub-artesian Bores. *See under* Artesian Bores. No. 318.

Whitewood Bores. *See under* Artesian Bores. Nos. 167, 324, 410.

Whitney Bore. *See under* Artesian Bores. No. 211.

Whitsunday Passage and Islands, about 32 miles E.byS. of Bowen. *Co.* Herbert; *Dist.* Kennedy North.

GEOLOGICAL NOTE: The rocks on the mainland are massive granite, with porphyry, felsite, diorite, and andesite dykes. The islands have not been geologically examined.

Whitwood Colliery, Bundamba Coal Area. *Min.Ref.* Coal, *see* 1757. *See also* Dinmore *under* Coal Bores.

Whitestone (Par. of) (Por. 126v). *Min.Ref.* Hyalite, *see* 7018.

Whitley's Shaft, Burrum Colliery, Burrum Coalfield. *Min.Ref.* Coal, *see* 1805.

Whitula Bores. *See under* Artesian Bores. No. 440.

Who'd-ha'-thought-it Reef, Norton Goldfield. *Min.Ref.* Calcite, *see* 534; Galena, 3052; Gold, 4294; Iron Pyrites, 5389; Mispickel, 6799; Silver, 7527; Zinc Blende, 8200.

Whyenbah Bore. *See under* Artesian Bores. No. 446.

Wick Bore. *See under* Artesian Bores. No. 193.

Wickham (Par. of) (Por. 11), 3½ miles S.E. of Logan Village. *Min.Ref.* Coal, *see* 1790.

Wicklow Co. Burnett Dist. *See map,* Pl. 4.

Wide Bay Cr. Heads at Main Coast Range, 16 miles S. of Kilkivan, and flows N.E. into Mary R. 15 miles N.W. of Gympie. Length, about 40 miles. *Min.Ref.* Gold, *see* 4419.

—— —— —— and Kilkivan (between the head of), S. of Kilkivan. *Min.Ref.* Cinnabar, *see* 1563.

Wide Bay District. *Includes* Fraser or Great Sandy Is.

SITUATION: *See maps,* Pls. 4 and 5. *Lat.*, 24°—27°; *Long.*, 151°—154°. It is bounded on the north partly by the Port Curtis District and Hervey Bay; on the east by the Pacific Ocean; on the south by the Moreton District; on the west by the Burnett District.

The principal rivers in the district are Kolan, Burnett (trib. Perry), Elliott, Burrum (tribs. Gregory, Isis, and Cherwell), Mary (tribs. Susan and Yabba Rs., Tinana and Munna Crs.), and Noosa.

AREA (in sq. miles): 8,125. With islands included, 8,791.

PRINCIPAL MINING CENTRES: Gold and Mineral Fields—Marodian, Kilkivan, Glastonbury, Mt. Bopple, Neerdie, Gympie, Yabba (Jimna), and Black Snake (including Mt. Cobalt, Mt. Coora, and Mt. Clara Cobalt Lodes), *which see.*

COUNTIES:

Bowen Co.

Cook Co., Bodalla; Booyar; Bundaberg. Burrum Coalfield, Howard, Childers; Cordalba. Fairymead; Huxley; New Caledonia Cable Station; Springfield; Wallace.

Fraser Co.

Lennox Co., Calgoa Copper Mines, Thunder Cr.; Gigoomgan; Glastonbury Goldfield, Gympie Goldfield (in part—*see also* March Co.). Kilkivan Gold and Mineral Field, Black Snake, Mt. Clara (Cobalt), Mt. Cobalt (Cobalt), Mt. Coora (Cobalt); Marodian Goldfield, Colo Mines (Gold), Mt. Colo (Manganese), Muldoo Mines (Copper), Yorkey's Goldfield; Munna Mines (Copper), Teebar Mines (Copper); Yabba (Jimna) Goldfield.

March Co., Gundiah; Gympie Goldfield (principal part—*see also* Lennox Co.); Kenilworth; Maryborough; Mt. Bopple (Graphite); Neerdie Mines (Stibnite); Noosa; Tewantin; Tiaro; Tinana; Traveston.

Yarrol Co. (partly—*see also under* Burnett Dist.).

Windsor Extended Goldfield—

Situation: *See maps*, Pls. 16, 17. Twenty-two miles S.S.W. of Charters Towers. *Co.* Davenport; *Dist.* Kennedy North. Centre—about *Lat.* 20° 15′ S.; *Long.*, 146° 5′ E.

Discovery: In 1894. Population: Under 20.

Proclamation of Field: First gazetted, 30th May, 1894; last alteration, 16th February, 1907, as follows:—Commencing at the south-east corner of Powlathanga Block No. 3, and bounded thence on the east by the Windsor Lease bearing south about five miles; on the south by a line bearing west about one mile and a-half to Oaky Creek; on the west by Oaky Creek upwards to the south boundary of Powlathanga Block No. 3; and on the north by that boundary bearing east about three miles to the point of commencement.

Area: 5,730 acres (nearly 9 sq. miles).

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46a, 47.

Mineral Reference: Gold, *see* 3988. Geological Publications: Nil.

Warden and Inspector of Mines: Both stationed at Charters Towers.

Windsor Mineral Field—

Situation: *See maps*, Pls. 20, 21. The field is about 86 miles W.byN. of Winton. *Cos.* Brighton, Kynuna, Woodstock, and Workingham; *Dist.* Gregory North. Centre—about *Lat.*, 21° 30′ and 23° S.; *Long.*, 141° and 143° E.

Proclamation of Field: First (and only one) gazetted, 27th January, 1897, as follows:—Commencing at the south-east corner of Bagworth Block near the confluence of Crescent Creek with the Diamantina River, and bounded thence on the east by the north and west boundaries of Wombat, the west and south boundaries of Diamantina No. 8, the east and south boundaries of Mountain Vale, the east boundaries of Hughenden Manor, part of the south boundary of Hughenden Manor, the east and south boundaries of Ada No. 7, the west boundaries of Roma No. 2, the east boundaries of Mirra Munda No. 1. and Ada No. 1; on the south by the north-east and part of the north-west boundaries of Cadell No. 2, the north-east boundaries of Middleton No. 1, the north-west boundaries of Brighton Downs No. 10; on the south-west by boundaries of Brighton Downs No. 11 and Varna, by the north-east boundaries of Brighton Downs No. 9 and Hawthorne No. 8; on the west by the east boundary of Tooleybuck No. 7, by part of the south boundary of Tooleybuck No. 9, by the south and east boundaries of Tooleybuck No. 15, by part of the south boundary of Bell east, by the east boundaries of Bell, Kirby, and Rangeview to the Diamantina River; and on the north by that river downwards to the point of commencement.

Windsor Mineral Field—*continued:*

Area: 1,898,240 acres (2,966 sq. miles).

Principal Mining Centres: Kynuna Opal Field, *which see.*

Mineral Statistics: Opal, *see stat. tables,* Pls. 44, 46, 46a.

Mineral Reference: Precious Opal, *see* 6940.

Geological Note: The rocks are "Desert Sandstone" (Upper Cretaceous) resting on "Rolling Downs" Formation (Lower Cretaceous). Opal is found at Kynuna in sandstone bands in the "Desert Sandstone." *See* G.S.Q. Pub. No. 177 for details.

Geological Publication: Report No. 177 (1902). *See* Geol. Surv. Pub. List for title of report.

Warden: At Charleville and at Thargomindah. Inspector of Mines: At Gympie.

Windsor Mine, Mt. Morgan (Crocodile) Goldfield. *Min.Ref.* Gold, *see* 4384; Iron Pyrites, 5437.

—— Gold Mines, and Block Mine, Windsor Goldfield. *Min.Ref.* Gold, *see* 3988.

Windula Co. Gregory South Dist. *See map,* Pl. 18.

Wingara Sub-artesian Bores. *See under* Artesian Bores. No. 427.

Winter Bore. *See under* Artesian Bores. No. 358.

Winton, 368 miles (by rail) S.W. of Townsville. *Lat.,* 22° 33′; *Long.,* 143° 7′.

Geological Note: The rocks in the vicinity belong to the Rolling Downs Formation, with occasional patches of Desert Sandstone forming an unconformable covering. The Rolling Downs Formation in this district contains artesian water in abundance, and coal seams have been passed through in several of the bores put down for water.

Railway Base for Opalton (Fermoy), Black Knob, and Horse Cr. Opal Mines, in the Opalton Mineral Field; and Kynuna Opal Mines, in the Windsor Mineral Field.

Mineral References: Alabaster, 4633; *see* Coal, 1640-1642; Gypsum, 4616, 4616a; Selenite, 4641.

Winton Bores. *See under* Artesian Bores. Nos. 57, 58, 60, 131, 442, 443. Recently (1913) a bore 500 feet deep was sunk for coal near the town, but failed to find the seam of coal reported to occur in one of the artesian bores.

Wolfang Run, 15 miles N.E. of Clermont. *Lat.*, 22° 32′ S.; *Long.*, 147° 55′ E. *Min.Ref.* Aragonite, *see* 90.

Wolfram. *Syn.* Wolframine. *Compo.*, Tungstate of iron and manganese. *Colour and Streak*, black, brownish black. *Lustre*, sub-metallic, shining or dull. *H.* = 5. *Sp.gr.* = 7·2-7·5. *Contents* (*max.*), Tungstic acid 76 per cent. (= Tungsten 60 per cent.).

MINERAL AND GEOLOGICAL NOTE: *Associated Minerals* comprise Molybdenite, Cassiterite, Mispickel, Bismuth (native), Bismuthinite, Monazite, Scheelite, Ilmenite, Copper Pyrites, Iron Pyrites, Galena, Iron Ores, Tourmaline, Topaz, Biotite, Muscovite, Garnet, Felspar, Fluorspar, etc., etc. *Gangues:* Quartz, mica, chlorite, felspar, and fluorspar. *Country Rocks:* Usually granite, greisen, aplite, quartz felsite, greywacke, slate, schist, diorite, and serpentine, or one or more of these rocks in association. For uses *see notes under* Tungsten.

GEOGRAPHICAL NOTE: The mineral is found in many places in the State, but principally at Wolfram Camp, Bamford, Coolgarra, Koorboora (Neville's Mine), Mt. Carbine, Fossilbrook, and Tate River, all in the Herberton and Chillagoe Gold and Mineral Fields, Northern Queensland. It also occurs, and has been mined to some extent, in the following localities:—Port Douglas district, Kangaroo Hills Mineral Field, Ollera Creek to the north of Townsville, Pascoe River, Rocky Goldfield, Noble Island, Rosedale Mineral Field, etc. The mines at Wolfram Camp, Bamford, and Koorboora, in the Chillagoe Field, have furnished the great bulk of Queensland's supply. *See under* names of Fields and Mining Centres for descriptions. *See also maps*, Pls. 3, 9, 17.

DISCOVERY: Wolfram deposits were first found at Wolfram Camp, on the Hodgkinson Goldfield, in 1894, the Bamford deposits being discovered soon after. Ollera Creek Wolfram Mines were discovered in 1899.

STATISTICAL NOTES: The largest yield of wolfram was in the year 1904, when over 1,538 tons were obtained, of an estimated value of £161,635, the percentage of which, to the total yield and value of wolfram to the end of the year 1912, is, in production, 18·42 per cent., in value, 21·97 per cent.

The wolfram mines, in the Herberton and Chillagoe Gold and Mineral Fields, between the years 1895 and 1912, furnished 4,940 tons; the wolfram mines on the Hodgkinson Goldfield yielded, from years 1894 (first recorded yield of wolfram) to 1912, 2,912 tons; the former production equals 59·16 per cent. and the latter 34·88 per cent. of Queensland's total yield of wolfram to the end of the year 1912.

The total output of wolfram from all sources in Queensland to the end of the year 1912 is estimated to be, approximately, 8,350·25 tons, of a value of £735,665; this is equal to ·70 per cent. of the total estimated value of all the minerals produced in the State.

Wolfram—*continued:*

7950. Wolfram. *Assoc.with* Cassiterite, Garnet, and Felspar, in quartz. *Loc.* Dreadnought Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 26 (1883).

7951. ——. *Assoc.with* Cassiterite, Iron Pyrites, Chalcanthite, Fluorspar, and Chlorite. *Loc.* Glencairn Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 23 (1883), and 125, p. 40 (1897).

7951A. ——. *Assoc.with* Cassiterite, Copper Pyrites, Mispickel, Galena, Garnet, and Chlorite, in greywacke. *Loc.* King of the Ranges Tin Mines, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 222, pp. 41-50 (1910).

7952. ——. *Assoc.with* Cassiterite and Ironstone, in quartz. *Loc.* Parnell Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 23 (1883).

7953. ——. *Assoc.with* Cassiterite, Copper Pyrites, Cuprite, Azurite, Malachite, Iron Pyrites, Mispickel, Stannine, Ironstone, Fluorspar, and Chlorite. *Loc.* Stewart's T. Claim, Watsonville (*ante*). *Ref.* G.S.Q. Pubs. 13, p. 26 (1883), and 119, p. 15 (1897).

7954. ——. *Assoc.with* Copper Pyrites, Copper carbonate, Chalcanthite, Mispickel, Marcasite, Iron Pyrites, Limonite, Cassiterite, and Red and Yellow Ochre. *Loc.* Try Again and Chance Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

7955. ——. *Assoc.with* Cassiterite and Mispickel, in quartz. *Loc.* Victoria Tin Mine, Watsonville (*ante*). *Ref.* G.S.Q. Pub. 13, p. 24 (1883).

7956. ——. *Assoc.with* Molybdenite, Native Bismuth, Bismutite, Scheelite, Cassiterite, Bismuthinite, Manganese-dioxide, Mispickel, and Scorodite, with traces of Iron Pyrites, Hematite, Limonite, Mispickel, etc. *Loc.* Wolfram Camp, 12 miles W.N.W. of Dimbullah (Chillagoe line), Walsh and Tinaroo Mineral Field. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* B.D.

7957. ——. *Assoc.with* Molybdenite, Native Bismuth, and Bismutite, in quartz and fluorspar. *Loc.* Schardon's Mine, 4 miles N. of Almaden Rail. Stn. (Chillagoe line), 124 miles (by rail and road) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* B.D.

7958. ——. *Assoc.with* Molybdenite, Native Bismuth, Bismutite, Scheelite, Molybdite, Mispickel, and Scorodite, in irregular quartz masses in greisen. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7959. ——. *Assoc.with* Cassiterite and Molybdenite, in veins of coarse mica and quartz in greisen. *Loc.* California Cr., nr. Ord Rail. Stn. (Mt. Garnet Br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7960. ——. *Assoc.with* Molybdenite, Cassiterite, Monazite, Mispickel, and Iron Pyrites, in quartz and mica in greisen country. *Loc.* California Cr. (*ante*). *Ref.* B.D.

7961. ——. *Assoc.with* Monazite and Cassiterite. *Loc.* Emerson's Wolfram Mine, nr. head of California Cr., 6 miles E. of Ord Rail. Stn. (Mt. Garnet line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7962. ——. *Assoc.with* Scheelite, in quartz. *Loc.* Desert Cr., br. of Lynd R., 9 miles S.S.W. of Fisherton, Tate R., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7963. ——. *Assoc.with* Molybdenite, Scheelite, Tungstite, Native Bismuth, and Bismutite, in quartz. *Loc.* Eight-mile Mt., 8 miles N.N.W. of Fossilbrook, 28 miles S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7964. ——. *Assoc.with* Native Bismuth, Bismuthinite, Bismite, and Cassiterite, in quartz, muscovite, fluorspar, etc. *Loc.* Emuford, Emu Cr., br. of Walsh R., 11 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7965. ——. *Assoc.with* Bismutite, in quartz. *Loc.* Fisherton, Tate R., 24 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7966. ——. *Assoc.with* Cassiterite, in quartz, fluorspar, etc. *Loc.* Garden Cr., 4 miles N. of Fisherton, Tate R., 20 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7967. ——. *Assoc.with* Cassiterite and Hematite. *Loc.* Gurrumba, Reid's Cr., Emu Cr., 2 miles S. of Emuford, 12 miles S.E. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Assay:* Tin Oxide = 72·8 per cent., Tungstic Acid = 4·8 per cent., Iron Oxide = 2·4 per cent. *Ref.* A.R., p. 47 (1906).

7968. ——. *Assoc.with* Cassiterite and Galena, in chlorite, muscovite, and fluorspar. *Loc.* Koorboora Mines, 108 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields *ante*). *Ref.* B.D.

7968A.——. *Loc.* Neville Mine, 1 mile S. of Koorboora (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7969. ——. *Assoc.with* Cassiterite, Molybdenite, Bismutite, Chalcolite, and Topaz, in small veins in a large quartz topaz lode in granite. *Loc.* Lappa Wolfram Lode, 2½ miles S.S.W. of Lappa Junction (Chillagoe-Mt. Garnet line), 102 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7970. ——. *Assoc.with* Native Bismuth. *Loc.* Lappa Wolfram Lode (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 50 (1900).

7971. ——. *Assoc.with* Cassiterite and Bismutite, in quartz, fluorspar, etc. *Loc.* McCord's Cr., 5 miles N.N.W. of Fisherton, Tate R., 20 miles W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7971A.——. *Assoc.with* Scorodite, in quartz. *Loc.* Mark Tapley Mine, Mungana, 149 miles (by rail) W.S.W. of Cairns (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* A.R., p. 234 (1910).

7971B.——. *Assoc.with* Molybdenite, in quartz. *Loc.* Wolfram Mine, ½-mile from eastern bank of Copperfield R., 12 miles S. of Kidston, Etheridge Goldfield. *Co.* Lyndhurst; *Dist.* Cook. *Ref.* G.S.Q. Pub. 234, p. 30 (1911).

7972. ——. In quartz leaders. *Loc.* Noble Island, Princess Charlotte Bay, about 74 miles W.byN. of Cooktown. *Co.* Melville; *Dist.* Cook. *Ref.* B.D.

7973. ——. *Assoc.with* Bismutite. *Loc.* Dead Finish Mine, Barron R., 5 miles from Tolga Rail. Stn., 69 miles (by rail and road) S.W.byS. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* B.D.

7974. ——. In defined quartz lodes in slate. *Loc.* Bower-Bird, 7 miles S.S.W. of Pt. Douglas, 9 miles N.N.E. of Mt. Molloy, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7975. ——. *Assoc.with* Molybdenite, Scheelite, and Cassiterite, with traces of Malachite, Azurite, and Iron Pyrites, in defined quartz lodes and leaders in granite. *Loc.* Glen Atherton (Tinaroo), 12 miles S.E. of Mareeba Rail. Stn., 18 miles S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7976. ——. *Assoc.with* Molybdenite, with traces of Bismuth, and Copper carbonate, in quartz. *Loc.* Leases 1988 and 1989, Tinaroo Cr., 14 miles S.S.E. of Mareeba, 6 miles N.N.E. of Tolga (Cairns Rail. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 188, pp. 12, 13 (1903).

7977. ——. Rocky Goldfield, 26 miles N.E. of Coen, 71 miles N.N.W. of Port Stewart. *Co.* Sidmouth; *Dist.* Cook. *Ref.* G.S.M.

7978. ——. *Assoc.with* Cassiterite and Molybdenite, in quartz and chlorite. *Loc.* Nightshade, Fossilbrook, 34 miles S.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook. *Ref.* B.D.

7979. ——. *Assoc.with* Cassiterite, Bismutite, and Molybdenite, in quartz, chlorite, and muscovite. *Loc.* Four-mile Mt., 4 miles N.W. of Fossilbrook, 35 miles S.W. of Almaden, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

7980. ——. *Assoc.with* Cassiterite, in quartz lodes. *Loc.* Red River, Walsh and Tinaroo Mineral Fields. *Dist.* Cook.

——. *See* other Walsh and Tinaroo References, No. 8006, etc.

7981. ——. *Assoc.with* Bismuth, in gneiss and mica schist. *Loc.* nr. Brookland Stn., Junction Cr., Einasleigh R., 30 miles S. of Fossilbrook. *Co.* Tate; *Dist.* Cook. *Ref.* G.S.Q. Pub. 134, p. 19 (1898).

7982. ——. Bowden Mineral Field, Pascoe R., Weymouth Bay, Cape York Peninsula, 240 miles N.W. of Cooktown. *Co.* Weymouth; *Dist.* Cook.

7983. ——. *Assoc.with* Cassiterite and Molybdenite, in quartz and greisen. *Loc.* Shannon's Reef (Block 459), Brown's Gully, nr. Sugarloaf Mt. 7½ miles E.byS. of Stanthorpe. *Co.* Bentinck. *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

7984. ——. *Assoc.with* Cassiterite, in quartz and greisen. *Loc.* Block (450). Dolcoath Cr., trib. of Quart Pot Cr., 3 miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 46 (1898).

7985. —— (in traces). *Assoc.with* Molybdenite, in small veins of quartz, with greisen and granite. *Loc.* On ranges W. of Dolcoath Cr., and 1 mile N. of Quart Pot Cr., 3 miles E.byS. of Stanthorpe (*ante*). *Ref.* B.D.

7986. ——. *Assoc.with* Cassiterite, Molybdenite, Copper Pyrites, in quartz vein, in greisen. *Loc.* Kettle Swamp Cr., trib. of Quart Pot Cr., Stanthorpe. *Co.* Bentinck; *Dist.* Darling Downs. *Ref.* G.S.Q. Pub. 125, p. 29 (1897), and G.S.M.

7986a. Wolfram. *Assoc.with* Cassiterite, in quartz and greisen. *Loc.* Lord Nolan's Claim, Stanthorpe (*ante*). *Ref.* A.R., pp. 326-328 (1911).

7987. ——. In quartz. *Loc.* Mt. Marlay, Lode Cr., 1¼ mile N.E.byE. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 125, p. 29 (1897).

7988. ——. *Assoc.with* Cassiterite and Molybdenite, in quartz and greisen. *Loc.* Noble and Lode Cr. Tin Mines, Blocks (351, 352), 6¼ miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 45 (1898), and G.S.M.

7989. ——. *Assoc.with* Cassiterite and Iron Pyrites. *Loc.* Brere's Claim, Pikedale Cr., 9 miles W.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub., 120, p. 47 (1898).

7990. ——. *Assoc.with* Gold, Cassiterite, Mispickel, and Molybdenite, in quartz and greisen. *Loc.* Pikedale Lode, Pikedale Cr., 70 miles W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 3840. *Ref.* G.S.Q. Pubs. 40 (1887), and 120 (1898).

7991. ——. *Assoc.with* Cassiterite, in stockwerks in granite. *Loc.* Storm King and Lady Normanby Claims, and Welsby's Shaft, Blocks 588, 589, 609, Quart Pot Cr., nr. Mountain Station Gully, 5 miles S.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, pp. 46, 47 (1898).

7992. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Quart Pot Cr. and its tributaries, Stanthorpe (*ante*). *Ref.* G.S.Q. Pub. 120, pp. 33-35 (1898).

7993. ——. *Assoc.with* Cassiterite, in quartz reefs. On ridges, left bank of Quart Pot Cr., Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 12, p. 2 (1882).

7994. ——. *Assoc.with* Cassiterite, Molybdenite, and Molybdite, in quartz and greisen. *Loc.* Burnt Hut, Severn R., 6 miles W.byS. of Ballandean, 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, P. 48 (1898).

7994a. ——. *Assoc.with* Bismutite and Cassiterite. *Loc.* Burnt Hut (*ante*). *Ref.* A.R., p. 173 (1909).

7995. ——. In quartz lode. *Loc.* Carpenter's Gully Tin Mines, nr. Severn R., 12 miles S.W. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

7996. ——. *Assoc.with* Molybdenite, Cassiterite, Iron Pyrites, Mispickel, and Scorodite, in quartz. *Loc.* P. Area 48, Sluicers' Claim, Severn R., 6 miles W. of Ballandean Rail. Stn., 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 10 (1904).

7997. ——. *Assoc.with* Cassiterite, Copper Pyrites, Chrysocolla, and Mispickel, in quartz. *Loc.* Great Eastern Tin Mine, Block 24, Red Rock Cr., Severn R., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 49 (1898).

7998. ——. *Assoc.with* Cassiterite and Copper Ores, in several quartz lodes in granite country. *Loc.* Severn R., 7 miles W. of Ballandean, 21 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

7999. ——. *Assoc.with* Cassiterite, in quartz and greisen. *Loc.* Between Blocks 248 and 443, Sugarloaf Mountain, 8 miles E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

8000. ——. In quartz. *Loc.* Christian Cr., Sugarloaf, about 4 miles E.byN. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

8001. ——. In quartz lode. *Loc.* Sel. 451W), McLeod's Gully, nr. Sugarloaf Mt., 7½ miles E.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

8002. ——. *Assoc.with* Cassiterite. *Loc.* S.W. of Trollope's Hill, nr. Sugarloaf Mt., 7½ miles E.byS. of Stanthorpe (*ante*). *Ref.* G.S.Q. Pub. 120, p. 44 (1898).

8003. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* 13-Mile Cr., trib. of Sugarloaf Cr., 4 miles E.S.E. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 4 (1898).

8004. ——. *Assoc.with* Copper Pyrites, Cassiterite, Zinc Blende, Mispickel, Calcite, Chlorite, and Orthoclase, in quartz lode. *Loc.*Sundown Copper Mine, Sundown Cr., 12 miles S.W. of Ballandean, 26 miles S.W.byS. of Stanthorpe Rail. Stn. *Co.* Bentinck (*ante*). *Assay: See* No. 2192. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), G.S.M., and B.D.

8005. ——. *Assoc.with* Mispickel and Cassiterite. *Loc.* Clare's Open Cut, nr. Sundown Mine, Sundown Cr. (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904)

8006. ——. In quartz. *Loc.* Beaconsfield Tin Mine, Coolgarra, 12 miles N.E.byN. of Mt. Garnet, Chillagoe and Mt. Garnet Rail. line, **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.Q. Pub. 72, p. 3. (1891).

8007. ——. Bismarck Mine, Coolgarra (*ante*). *Ref.* G.S.M.

8008. ——. *Assoc.with* Cuprite, Malachite, and Azurite, in quartz. *Loc.* Round Mountain, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 4 (1891).

8009. ——. *Assoc.with* Cassiterite, Azurite, Malachite, Websterite, Iron Pyrites, Mispickel, Göthite, Limonite, Hematite, Chlorite, Penninite, and Topaz, in irregular masses of quartz in slate. *Loc.* Tin Mines, Coolgarra (*ante*). *Ref.* G.S.Q. Pub. 72, p. 2 (1891).

8010 ——. *Assoc.with* Mispickel. *Loc.* Devon Wolfram Mine, 3 miles from Coolgarra, 15 miles N.E.byN. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

8011. ——. *Assoc.with* Stibnite. *Loc.* Birthday Mine, Dry R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

8012. ——. Woodleigh, Herbert R., 11 miles E. of Mt. Garnet, Chillagoe and Mt. Garnet Rail. line, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 58 (1900).

8013. ——. *Assoc.with* Cassiterite and Fluorspar, in chloritic rock. *Loc.* Bradlaugh Tin Mine, Herberton, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 13, p. 15 (1883).

8014. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Cornstalk Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 10 (1883).

8015. ——. *Assoc.with* Cassiterite, Ilmenite, Topaz, with traces of Gold, in alluvial deposits. *Loc.* Deep Lead, Herberton (*ante*). *Ref.* G.S.Q. Pub. 115, pp. 1-15 (1896).

8016. ——. *Assoc.with* Cassiterite and Fluorspar, in quartz lode. *Loc.* Defiance Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

8017. ——. Elephant Mine, 1½ mile S.S.E. of Herberton (*ante*).

8018. ——. *Assoc.with* Cassiterite, in serpentinous rock, and in quartz. *Loc.* Glanmire Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 12 (1883), and G.S.M.

8019. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Gt. Northern Tin Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 125, p. 43 (1897).

8020. ——. *Assoc.with* Cassiterite, Iron Pyrites, and Fluorspar, in quartz. *Loc.* Leviathan Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 14 (1883).

8021. ——. *Assoc.with* Cassiterite, in chloritic quartz. *Loc.* Ly-e-moon Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

8022. ——. *Assoc.with* Cassiterite and Mica. *Loc.* Nelly Grant Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 7 (1883).

8023. ——. *Assoc.with* Cassiterite and Fluorspar, in quartz lode. *Loc.* Nova Scotia Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 11 (1883), and G.S.M.

8024. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* Perseverance Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 19 (1883).

8025. ——. *Assoc.with* Cassiterite, Orthoclase, Steatite, Chlorite, and Serpentine, in quartz lode. *Loc.* Soggaorth Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 6 (1883), and P.R.S.Q., vol. 4, p. 59 (1887).

8026. ——. *Assoc.with* Cassiterite, in quartz. *Loc.* True Blue Mine, Herberton (*ante*) *Ref.* G.S.Q. Pub. 13, p. 16 (1883).

8027. ——. Wild Irishman Mine, 1 mile E. of Herberton (*ante*). *Ref.* G.S.M.

8028. ——. *Assoc.with* Cassiterite and Fluorspar, in lodes. *Loc.* Wild River Tin Mines, Herberton (*ante*). *Ref.* G.S.Q. Pub. 9, p. 8 (1881).

8029. ——. *Assoc.with* Cassiterite and Molybdenite, in diorite. *Loc.* Young American Mine, Herberton (*ante*). *Ref.* G.S.Q. Pub. 13, p. 9 (1883).

8030. ——. *Assoc.with* Cassiterite, Molybdenite, Wad, Scheelite, and Monazite, in irregular masses and defined lodes, in slates and greisen. *Loc.* Nettle's Creek, 4 miles E. and 3 miles S.E. of Coolgarra, and between 10 and 14 miles N.E. of Mt. Garnet, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* B.D.

8030a.——. Onion Swamp Mines, 4 miles N.N.E. of Nymbool Rail. Stn. (Mt. Garnet line), near Main Dividing Range, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* B.D.

——. *See* other Walsh and Tinaroo References, No. 7935, etc.

8031. ——. Fanning River, 28 miles (by road) N.W. of Ravenswood Junction. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

8031a.——. In quartz lode in granite country. Close to rail. line, 8½ miles W. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* B.D.

8031B. Wolfram. Mount Fox, 30 miles S.W. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* O.R.

8032. ——. In lode. Oaky Cr., opposite Waverley battery, Kangaroo Hills Mineral Field, 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Ref.* A.R.D.M., p. 162 (1906).

8032A.——. *Assoc.with* Fluorspar, in lode. Krumholz's Lease, Running R., Kangaroo Hills Mineral Field (*ante*).

8033. ——. Ollera Cr. Wolfram Mines, Spur of Sea View Range, 27 miles S.S.E. of Ingham, and 38 miles N.W.byW. of Townsville. *Co.* Wilkie Gray; *Dist.* Kennedy North.

8034. ——. *Assoc.with* Garnet, Mica, Hematite, and Stilbite, in lode. *Loc.* Eungella Station, 30 miles W. of Mirani Rail. Stn. (Mackay line). *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 39, p. 6 (1887).

8034A.——. In quartz. *Loc.* nr. Coolan's P.A., Mt. Wyatt Goldfield, about 60 miles S.S.E. of Ravenswood. *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* A.R., p. 235 (1910).

8034B.——. Coolan's Claim, Carmody Stn., Eukalunda, 92 miles S.W.byW. of Bowen. *Co.* Sellheim (*ante*).

8035. ——. *Assoc.with* Bismuth and Molybdenite. *Loc.* Wandoo and Bolingbroke Stations, 25 miles E.N.E. of Nebo, and about 40 miles S.S.W. of Mackay. *Co.* Ferguson; *Dist.* Leichhardt. *Ref.* L.C.B.

8036. ——. *Loc.* Cressbrook Creek, 3 miles N.E. of Toogoolawah Rail. Stn. (Esk line). *Co.* Cavendish; *Dist.* **Moreton.** *Ref.* L.C.B.

8037. ——. In quartz and greisen. *Loc.* Por. (1287), Crow's Nest, 34 miles (by rail) N.N.E. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* L.C.B.

8038. ——. *Assoc.with* Gold, Cassiterite, and Ilmenite, in quartz lode. *Loc.* Crow's Nest Tin Deposits, 3 miles E. of Crow's Nest Township, 37 miles (by rail and road) N. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 175, p. 4 (1902), and Q.G.M.J., vol. 4, pp. 527-529 (1903).

8039. ——. *Assoc.with* Scorodite, Iron Pyrites, Mispickel, Cerussite, and Massicot. *Loc.* Plant's Leasehold, 4 miles E. of Crow's Nest Rail. Stn., 38 miles (by rail and road) N.N.E. of Toowoomba. *Co.* Cavendish (*ante*). *Ref.* A.R., pp. 148, 149 (1908).

8040. ——. *Assoc.with* Molybdenite, Tungstite, Wad, Native Bismuth, and Bismutite, with traces of Copper Pyrites, Tenorite, Iron Pyrites, Hematite, etc., in defined quartz lodes in greisen and mudstone. *Loc.* Rosedale Wolfram Mine, nr. Rosedale Rail. Stn. (North Coast line), 34 miles (by rail) N.W. of Bundaberg. *Co.* Flinders; *Dist.* **Port Curtis.** *Assay:* Tungstic Acid = 70 per cent. *Ref.* B.D.

Wolfram Camp. (Lately named "Wolfram")—

Situation: *See map*, Pls. 8, 9, 22. The camp is about 12 miles W.N.W. of Dimbullah Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Hodgkinson; *Dist.* Cook. *Lat.*, 17° 10′ S.; *Long.*, 144° 59′ E. Wolfram was discovered here in 1894.

Population: Included in Chillagoe Returns.

Mineral Statistics: Bismuth, Wolfram, Molybdenite. *See under* Hodgkinson, *in stat. tables*, Pls. 40, 42, 46-46A.

Mineral References: Tin (Cassiterite), 922; Bismuth (native) 335, (Bismuthinite) 367, (Bismutite) 387, 388; Wolfram, 7956; Molybdenite, 6833; Molybdite, 6870; Scheelite, 7346; Manganese (dioxide), 6408; Iron (Mispickel) 6698, (Scorodite) 7366; Vanadium, 7916A; Galena, 2809A; Cairngorm, 7175.

Geological Note: The rocks consist principally of granite and quartz porphyry in association with masses of greisen. Wolfram, Bismuth, and Molybdenite, and other minerals occur in irregular lode formations in the greisen but close to the granite. This locality contains the richest Wolfram lodes in Queensland—perhaps in the world.

Geological Publication: Nos. 188 (1904), 196 (1905). *See* Geol. Surv. Pub. List for title of Reports.

Warden: Stationed at Thornborough; Inspector of Mines: Stationed at Herberton.

Wolfram in Queensland. *See under* Supplementary Report List, No. 109.

Woolgar Co. Burke Dist. *See map,* Pl. 20.

Woolgar Goldfield—

Situation: *See map,* Pls. 20, 21. The field is about 97 miles (by coach) N. of Richmond, 404 miles (by rail and road) W.byS. of Townsville. *Cos.* Chudleigh and Woolgar; *Dist.* Burke. Centre—about *Lat.,* 19° 43′ S.; *Long.,* 143° 35′ E.

Population: Included in Etheridge Returns.

Proclamation of Field: First gazetted, 24th August, 1882; last alteration, 3rd July, 1897, as follows:—Commencing on the Woolgar River at its intersection by the northern boundary line of Merton Ponds Run, and bounded thence on the south-east by the northern boundaries of Merton Ponds, Boree, and Boree No. 1 east about twenty-three miles; thence by the west boundary of Hampstead Occupation License south about eleven miles, by the south boundary of same east about eight miles, by the east boundary of same north about eight miles, by the north boundary of Glenloth east about two miles, by the west boundary of Glenloth No. 1 and a line north about eighteen miles to the eastern watershed of the Woolgar River; and thence by that watershed northerly to the southern watershed of the Etheridge and Gilbert Rivers, on the north by that watershed westerly about twenty-four miles, and on the west by the western watershed of the Woolgar River southerly and south-easterly to the point of commencement.

Area: 727,680 acres (1,137 square miles).

Mineral Statistics: Gold. *Included in* Etheridge returns.

Mineral References: Gold, *see* 3562, 3563a; Silver, 7427; Lead (Galena), 2713, 2714; Copper, 1840; Bismutite, 378; Other Minerals—Garnet, 3095.

Geological Note: The rocks consist of a series of schists and quartzites of undetermined age, capped in places with tablelands of basalt and Desert Sandstone, and penetrated by dykes of diorite, etc. They contain quartz reefs which have yielded many thousands of ounces of gold. *See* G.S.Q. Pub. No. 92, p. 28, for details.

Geological Publications: Reports No. 48 (1888) and 92 (1892). *See under* Geol. Surv. Pub. List for title.

Warden: Stationed at Georgetown; Inspector of Mines: Stationed at Croydon.

Yabba (Jimna) Goldfield—

Situation: *See maps*, Pls. 4, 5. The goldfield is 35 miles S. of Gympie. *Co.* Lennox; *Dist.* Wide Bay. Centre—about *Lat.*, 26° 40′ S.; *Long.*, 152° 35′ E.

Population: (Included in Gympie returns.)

Proclamation of Field: First (and only one) gazetted, 28th July, 1868, as follows:—Commencing at a spot one mile below the junction of Jimna Creek with Yabba Creek, and including all the country on the watershed of the Yabba Creek above that spot.

Area: 6,400 acres (10 sq. miles).

Leases: Gold-mining Leases, 3; area, 139 acres. Goldfields Miners' Homesteads in force, 9; area, 360 acres (1912).

Mineral Statistics: Gold. *Included in* "Other Goldfields" *in stat. tables and diagram*, Pls. 36, 46, 46A, 47.

Mineral References: Gold, *see* 4400; Lead (Galena), 3076; Iron (Iron Pyrites), 5447. Other Minerals: Ozokerite, 7060.

Geological Note: The rocks of this field are principally granite, slate, and sandstone. The reefs occurring in the granite contain very little quartz, and have not been productive for many years past. Much of the gold has been won from the extensive alluvial deposits of Jimna and Sandy Crs., where, in 1870, there were about 4,000 miners working. *See* G.S.Q. Pubs. 92, p. 18, and 169 for details.

Geological Publications: Reports Nos. 48 (1888) and 169 (1901). *See under* Geol. Surv. Pub. List for title.

Warden and Inspector of Mines: Both stationed at Gympie.

Reports: (Inspector's and Warden's) monthly (usually) in Q.G.M. Jour.; annually in A.R.D.M.

Yatton Goldfield—

SITUATION: *See maps,* Pls. 10, 11. The field is about 21 miles S.W.byW. of St. Lawrence. *Co.* Killarney; *Dist.* Leichhardt. Centre—about *Lat.*, 22° 23′ S.; *Long.*, 149° 18′ E.

DISCOVERY: Gold was discovered here not later than 1877, both in alluvial deposits and in reefs.

POPULATION: Under 20.

PROCLAMATION OF FIELD: First (and only one) gazetted, 12th May, 1887, as follows:—Commencing on the right bank of Lotus Creek at a point twenty chains below a tree marked broad-arrow over L over VI in a triangle, and bounded thence by a north line two miles twenty-eight chains; thence by a west line to Lotus Creek; thence by the right bank of that creek upwards to a point twenty-six chains above a tree marked broad-arrow over L over XII in triangle; thence by a south line crossing the creek three miles thirty-six chains; thence by an east line forty chains; thence by a south line five miles; thence by an east line four miles forty chains to a point south of starting point; and thence by a north line seven miles fifty-two chains to and across Lotus Creek to the point of commencement.

AREA: 31,360 acres (49 sq. miles).

MINERAL STATISTICS: Gold, *included in* "Other Goldfields" *in stat. tables and diagram,* Pls. 36, 46, 46A, 47.

MINERAL REFERENCES: Gold, *see* 4174-4180; Copper (Chalcanthite), 1336, (Copper Pyrites) 2270; Iron (Hematite), 4770, (Iron Pyrites) 5328, (Ironstone) 5599, (Siderite) 7417, 7418. Other Minerals: Calcite, 512-516; Felspar, 2645; Orthoclase, 7049; Steatite, 7693.

GEOLOGICAL NOTE: Diorite is the principal rock of the Yatton Goldfield, Felsite also occurring as intrusive masses. Some of the reefs are of the usual quartz type, others being made up of brecciated fragments of diorite, mixed with calcite and formation rock. *See* G.S.Q. Pub. 92, p. 111 for details.

GEOLOGICAL PUBLICATIONS: Reports Nos. 39 (1887), 48 (1888), 92 (1892). *See under* Geol. Surv. Pub. List for titles.

WARDEN: Stationed at St. Lawrence. INSPECTOR OF MINES: Stationed at Rockhampton.

Yeerongpilly (Par. of) (Pors. 58, 192, 266, 393), 4 miles S. of Brisbane. *Min.Ref.* Coal, *see* 1775-1777; Gold, 4222.

Yeppoon, 34 miles (by rail) N.E. of Rockhampton. *Lat.*, 23° 9′ S.; *Long.*, 150° 51′ E. *Min.Ref.* Apatite, *see* 82.

GEOLOGICAL NOTE: The rocks on the three headlands. Bluff Rock, Bluff Point, and Creek Rock, are made up of trachytic lavas, the form and structure of the masses indicating that they are the necks of old volcanic cones. In the surrounding country there are outcrops of quartzites, shales, etc., belonging to the Devonian System.

York Co. Cook Dist. *See map*, Pl. 8.

—— Peninsula. *See* Cape York Peninsula.

Yorkey's Hill, Marodian Goldfield. *Min.Ref.* Gold (alluvial), *see* 3408.

Yorkey's Prov. Goldfield—

SITUATION: *See maps*, Pls. 4, 5. The field is about 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox; *Dist.* Wide Bay. Centre—about *Lat.*, 25° 27′ S.; *Long.*, 15° 17′ E

DISCOVERY: 1892.

POPULATION: Under 20.

MINERAL STATISTICS: *Included in* Other Goldfields.

MINERAL REFERENCES: Gold, *see* 4409-4414; Lead (Galena), 3078, 3079; Copper (Copper Pyrites), 2330, (Tenorite) 7745; Scheelite, 7358; Antimony (Cervantite), 1310, (Stibnite) 7655, 7656; Zinc (Calamine), 445, (Zinc Blende) 8212, 8213; Iron (Copperas), 2338, (Hematite) 4806-4808, (Iron Pyrites) 5452-5456; Graphite, 4606. Other Minerals: Actinolite, 4870; Calcite, 557, 558; Epidote, 2609, 2610; Garnet, 3148, 3149; Magnesite, 5964.

GEOLOGICAL NOTE: Diorite is the principal rock on the goldfield, but slate and granite are also present. Reefs occur in both slate and diorite, but only in the latter have they proved payable to work. *See* G.S.Q. Pub. No. 179 for details.

GEOLOGICAL PUBLICATIONS: Report No. 179 (1902). *See under* Geol. Surv. Pub. List for title.

WARDEN and INSPECTOR OF MINES: Both stationed at Gympie.

Yorkey's Surprise G.M. Lease (Surprise-Zealandia Reef), Yorkey's Goldfield. *Min.Ref.* Actinolite, *see* 4870; Cervantite, 1310; Epidote, 2610; Garnet, 3149; Gold, 4414; Hematite, 4808; Iron Pyrites, 5456; Stibnite, 7656.

Yorkshire Downs Bore. *See under* Artesian Bores. No. 452.

—— East Reef, Gaeta Goldfield. *Min.Ref.* Gold, *see* 3574A; Iron Pyrites, 4975A.

You-Never-Can-Tell (or Wheel of Fortune) Reef, Hodgkinson Goldfield. *Min.Ref.* Gold, *see* 3761.

Young Australian Mine, Por. 53v, Woowoonga. *Min.Ref.* Gold, *see* 3623; Iron Pyrites, 5006.

—— Almanac Tunnel, Coolgarra. *Min.Ref.* Cassiterite, *see* 1058.

—— American Tin Mine, Herberton. *Min.Ref.* Cassiterite, *see* 1131; Molybdenite, 6857; Wolfram, 8029.

—— Britannia Mine, Canoona Goldfield. *Min.Ref.* Gold, *see* 4315, 4315B; Iron Pyrites, 5398B.

—— Wexford Mine, Etheridge Goldfield. *Min.Ref.* Galena, *see* 2756; Gold, 3732A; Iron Pyrites, 5052; Tenorite, 7719.

Younggrove Bore. *See under* Artesian Bores. No. 157.

Youranigh Co. Mitchell Dist. *See map*, Pl. 18.

Yowah Lease Bore. *See under* Artesian Bores. No. 453.

Yowah Opal Field, Cunnamulla Mineral Field. Centre—about *Lat.* 27° 59′ S.; *Long.* 144° 24′ E. *Includes* Great Extended, Old Flat, and Southern Cross Opal Mines, *which see*. *Min.Ref.* Precious Opal, *see* 6936C, 6963-6965.

GEOLOGICAL NOTE: The rock consists of "Desert Sandstone" (Upper Cretaceous) lying conformably on the "Rolling Downs" Formation (Lower Cretaceous). The opal occurs at the base of a pink sandstone ("Desert Sandstone"), the matrix being concretionary nodules or "kernels." *See* G.S.Q. Pub. No. 177 for details.

Yttrium (Y.). *Atom.Wt.* = 89·0. *Sp.gr.* Y_2O_3 = 5·046. *See* Monazite. of which it is a minor chemical constituent.

Yuleemza Leases Bores. *See under* Artesian Bores. No. 177.

Zara Sel. Bore. *See under* Artesian Bores. No. 197.

Zealandia Mine, Yorkey's Goldfield. *Min.Ref.* Cervantite, *see* 1310; Gold, 4414; Iron Pyrites, 5456; Stibnite, 7656.

Zelma Mine, Grasstree Goldfield. *Min.Ref.* Gold, *see* 4116.

Zeolites. *See* Analcime, Apophyllite, Chabazite, Harmotome, Laumonite, Mesolite, Natrolite, Scolecite, Thomsonite.

Zillmanton (Chillagoe Rail. line). *See maps*, Pls. 8, 9, 22. *Lat.*, 17° 13′ S.; *Long.*, 144° 28′ E. *Min.Ref.* Copper carbonate, *see* 1897; Hematite, 4720; Tenorite, 7724.

—— to George Creek. *Min.Ref.* Limestone, *see* 632.

Zinc (Zn). *Atom.Wt.* = 65·37. *Sp.gr.* = 6·9 to 7·2. *Colour*, bluish-white-metallic. *Note.*—Zinc is somewhat malleable, this property being more pronounced when the metal is heated. Its chief application is in the galvanising of iron, but it is also used in the manufacture of process engravings, and in electrical batteries. With copper it forms many important alloys, such as brass, Muntz metal, and bell metal. Its principal compounds are the oxide and sulphate, both of which are used in medicine, the former also being used as a pigment, the latter in dyeing and calico printing.

MINERALS: *See* Aurichalcite, Calamine, Goslarite, Smithsonite, Willemite, Zinc Blende.

MINERAL AND GEOLOGICAL NOTE: Commonly associated with ores of antimony, bismuth, copper, gold, iron, lead, and silver; also with Wolfram, Molybdenite, Mispickel, Cadmium Blende, Manganese, Garnet, Gypsum, and Barytes. Common gangue minerals include Calcite, Chlorite, Felspar, Fluorspar, and Quartz, while the country rocks are usually one or more of the following:—greisen, granite, slate, greywacke, altered volcanic tuff, quartzite, quartz porphyry, garnet rock, limestone, schist, diorite, and serpentine. Many large deposits of zinc blende are known in the State, some of which are now undergoing development.

STATISTICAL NOTE: There are no returns of zinc, as all deposits have been worked in conjunction with other metals, and the zinc has not been saved as a by-product.

VALUES OF SPELTER: *See* Table under Metal Values in London for maximum and minimum prices for all years since 1892.

Zinc Blende. *Syn.* Sphalerite, Black Jack. *Compo.*, Sulphide of zinc. *Colour*, usually brownish-black. *Streak*, reddish-brown. *Lustre*, resinous to adamantine. *H.* = 3·5-4. *Sp.gr.* = 3·9-4·1. *Contents* (*max.*), Zinc 67 per cent.

8050. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, and Cassiterite, in chloritic quartz and greisen. *Loc.* Brilliant P.C. Tin Mine, Stanhills Tinfields, 18 to 24 miles S.E. of Croydon. *Co.* Esmeralda; *Dist.* **Burke.** *Ref.* G.S.Q. Pub. 211, p. 6 (1907).

8051. ——. *Assoc.with* Galena, Cassiterite, Copper Pyrites, Azurite, and Malachite, in chlorite. *Loc.* Comet Mines, N. of Ten-mile Cr., nr. Esmeralda Rd., Stanhills Tinfield (*ante*). *Ref.* G.S.Q. Pub. 211, p. 9 (1907).

8052. ——. *Assoc.with* Galena and Cerussite, in lode. *Loc.* Mended Hill Mine, Lawn Hills, 92 miles S.W. of Burke. *Co.* Gregory; *Dist.* Burke. *Yield:* Silver = 29 to 34 oz. per ton; Lead = 69 to 76 per cent. *Ref.* G.S.Q. Pubs. 138, p. 2 (1900), 232, p. 45 (1911).

8053. ——. *Assoc.with* Lead, Gossan, and Calcite, in lodes in sandstone. *Loc.* Watson's Mine, Lawn Hills (*ante*). *Ref.* G.S.Q. Pubs. 138, p. 3 (1900), 232, p. 50 (1911).

8054. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Calcite. *Loc.* Golden Gate Reef, 4 miles N.W. of Croydon Rail. Stn., Croydon Goldfield. *Co.* Surrey; *Dist.* Burke. *Ref.* G.S.Q. Pub. 202, p. 15 (1905).

8055. ——. *Assoc.with* Gold, in quartz reef. *Loc.* Ironclad Mine, 4¼ miles N.E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.M.

8056. ——. *Assoc.with* Gold, Galena, and Iron Pyrites, in quartz reef. *Loc.* La Reine d'Or Lease ((554), 1 mile N. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 16 (1896).

8057. ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in quartz. *Loc.* Post Hole Reef, Croydon Township, Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 35, p. 8 (1889), 118, p. 21 (1896).

8058. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* St. Patrick Reef, 35 chains N.N.E. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1889).

8059. ——. *Assoc.with* Gold, in quartz. *Loc.* Waterfall Reef, 4½ miles N.E.byN. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 35, p. 10 (1889).

8060. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* C. D. Roe Reef, Flannagan's, 12 miles E.byS. of Croydon Rail. Stn., Croydon Goldfield (*ante*). *Ref.* G.S.Q. Pub. 118, p. 47 (1896).

8061. ——. In small quantities, in nearly all the reefs in the felsite country. *Loc.* Croydon Goldfield, 94 miles (by rail) S.E. of Normanton. *Co.* Surrey; *Dist.* Burke. *Ref.* B.D.

8062. ——. *Assoc.with* Gold, Copper Pyrites, Cuprite, Chalcotrichite, Tile Ore, Iron Pyrites, and Calcite. *Loc.* Mt. Perry Mine, 67 miles (by rail) S.W.byW. of Bundaberg. *Co.* Bowen; *Dist.* **Burnett.** *Ref.* G.S.M.

8063. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Galena, in quartz and barytes. *Loc.* Potosi Copper Lode, 3 miles W. of Mungai, 6 miles W.N.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 21, p. 12 (1885), and G.S.M.

8064. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Mispickel, in quartz. *Loc.* California Reef, Reid's Cr. Goldfield, 4½ miles S.W. of Mt. Perry Rail. Stn. *Co.* Bowen (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885), and G.S.M.

8065. ——. *Assoc.with* Gold, Mispickel, Iron Pyrites, and Galena, in quartz and felspar *Loc.* Reefs, Reid's Cr. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 21, p. 11 (1885).

8066. ——. *Assoc.with* Iron Pyrites, and Galena, with traces of gold and silver. *Loc.* Gt. Southern Mine, Mt. Biggenden, 4½ miles W. of Biggenden Rail. Stn., 58 miles (by rail and road) W. of Maryborough. *Co.* Cook; *Dist.* Burnett. *Ref.* O.R.

8067. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Galena, in lode. *Loc.* Allendale Silver Lode, 1½ mile up Chowey Cr., 6 miles N.W. of Chowey Rail. Stn., 68 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Assay: See* No. 3567. *Ref.* G.S.Q. Pub. 25, p. 3 (1886).

8068. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Cuprite, Tenorite, Iron Pyrites, Malachite, Mispickel, Hematite, Bismuthinite, Pyrrhotite, and Calcite. *Loc.* Commonwealth Mine, nr. Mt. Havilah, 2¾ miles S.S.W. of Degilbo (Gayndah line). *Co.* Cook (*ante*). *Assay:* Copper = 3·5, Bismuth = 1·1, and Zinc = 0·30 per cent.; Silver = 6 oz. 13 dwt. 8 gr., Gold = 16 gr. per ton. *Ref.* G.S.Q. Pubs. 185, p. 8 (1903), and 207, pp. 14-19 (1907).

8069. ——. *Assoc.with* Gold, Telluride of Gold, Copper Pyrites, Malachite, Native Bismuth, Bismuthinite, Joseite, Molybdenite, Mispickel, and Calcite. *Loc.* Mt. Shamrock Mine, Mt. Shamrock, 5½ miles W.N.W. of Degilbo Rail. Stn. (Gayndah line), 63 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pubs. 60, p. 6 (1890); 168, p. 48 (1901); 125 (1897).

8070. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Paradise P.C., Paradise Goldfield, 8 miles N.W. of Degilbo Rail. Stn. (Gayndah line). *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 68, p. 1 (1891).

8071. ——. *Assoc.with* Gold, Silver, Iron Pyrites, and Galena, in quartz and calcite. *Loc.* Stanton-Harcourt Diggings, Stony Cr., nr. Degilbo Run, 11 miles N. of Degilbo, 69 miles (by rail and road) W. of Maryborough. *Co.* Cook (*ante*). *Ref.* G.S.Q. Pub. 25, p. 4 (1886).

8071A. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, and Calcite, in ironstone lode. *Loc.* Ban Ban Stn., 12 miles S.E.byE. of Gayndah Rail. Stn. *Co.* Mackenzie; *Dist.* Burnett. *Ref.* A.R., p. 179 (1909).

8071B. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Galena. *Loc.* Ban Ban Zinc Lode, 20 miles S. of Biggenden, on W. side of Ban Ban Range. *Co.* Mackenzie (*ante*). *Assay:* Zinc = 11·4 per cent., Silver = 8 dwt. per ton, Gold = trace. *Ref.* A.R.D.M., p. 189 (1910), and A.R., 179 (1909).

8072. ——. *Assoc.with* Gold, Anglesite, Redruthite, and Iron Pyrites, in quartz. *Loc.* Augusta, Maid of Erin Shaft, in Victory United Lease (33), Eidsvold Goldfield, 35 miles N.W. of Gayndah Rail. Stn. *Co.* Yarrol; *Dist.* Burnett. *Ref.* G.S.Q. Pub. 102, p. 3 (1895).

8073. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel, in quartz. *Loc.* Mt. Rose P.C., Mt. Rose Reef, Eidsvold Goldfield (*ante*). *Ref.* G.S.M.

8074. ——. *Assoc.with* Gold and Iron Pyrites, in quartz and calcite. *Loc.* Mt. Rose 1 West Lease (41), Eidsvold Goldfield (*ante*). *Ref.* G.S.Q. Pub. 102, p. 2 (1895).

8075. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, Copper Pyrites, Redruthite, and Galena, in quartz reef. *Loc.* Nil Desperandum Mine, Charleston, 140 miles S.W. of Almaden (Chillagoe Rail. line), Etheridge Goldfield. *Co.* Gilbert; *Dist.* **Cook.** *Ref.* G.S.Q. Pubs. 35, p. 6 (1887), and 151, p. 11 (1900).

8076. ——. *Assoc.with* Gold, Iron Pyrites, Pyrrhotite, and Galena, in quartz. *Loc.* Queenslander Mine, Charleston (*ante*). *Ref.* O.R., and G.S.Q. Pub. 219, p. 13 (1909).

8077. —— *Assoc.with* Gold, Iron Pyrites, Galena, Copper Pyrites, and Mispickel, in quartz. *Loc.* Papa Reef, ½-mile N.E. of Georgetown, Etheridge Goldfield. *Co.* Gilbert (*ante*). *Ref.* G.S.Q. Pub. 35, p. 3 (1887).

8078. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Copper Pyrites, in quartz. *Loc.* International Reef, Rocky, Sandy Cr., 7 miles S.W.byS. of Georgetown, Etheridge Goldfield (*ante*). *Ref.* G.S.Q. Pubs. 151, p. 10 (1900), and 219, p. 9 (1909).

8079. ——. *Assoc.with* Gold and Iron Pyrites. *Loc.* Spero Meliora Reef, Sandy Cr. (*ante*). *Ref.* G.S.Q. Pub. 35, p. 4 (1887).

8080. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Mispickel. *Loc.* Union Reef, 3½ miles N.W.byN. of Woodville, 13 miles N.W. of Thornborough, Hodgkinson Goldfield. *Co.* Hodgkinson; *Dist.* Cook. *Ref.* G.S.Q. Pub. 16, p. 24 (1884), and P.R.S.Q., vol. 4, p. 47 (1887).

8081. ——*Assoc.with* Cassiterite, Copper Pyrites, and Mispickel, in quartz. *Loc.* Consolidated Tin Mine, 4½ miles N.E. of Montalbion, 11 miles (by rail and road) S.W. of Stannary Hills Rail. Stn., **Walsh and Tinaroo Mineral Fields.** *Co.* Hodgkinson (*ante*). *Ref.* G.S.M.

8081A. ——. *Assoc.with* Galena and Anglesite. *Loc.* Borossa Lease, Silverfield, 1 mile S. of Montalbion, 8 miles S.W. of Stannary Hills Rail. Stn. (Chillagoe Br. line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M., and G.S.Q. Pub. 119, p. 32 (1897).

8082. Zinc Blende. *Assoc.with* Silver, Copper Pyrites, Iron Pyrites, Mispickel, and Galena. *Loc.* Tornado Mine, Silverfield (*ante*). *Assay: See* No. 2155. *Ref.* P.R.S.Q., vol. 4, pp. 48, 152 (1887).

8083. ——. *Assoc.with* Galena and Iron Pyrites, in lode. *Loc.* Victoria Amalgamated Mine, Silverfield (*ante*). *Ref.* G.S.Q. Pub. 119, p. 32 (1893).

8084. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Galena, and Molybdenite. *Loc.* Bamford Wolfram Mines, 3 miles N.N.W. of Petford Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* A.R., p. 101 (1901).

8085. ——. *Assoc.with* Copper Pyrites, Galena, and Mispickel. *Loc.* Boomerang Mine, Calcifer, 132 miles (by rail) W.S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.M.

8086. ——. *Assoc.with* Galena, Tetrahedrite, and Malachite. *Loc.* Eclipse Mine, Muldiva, 7 miles W.S.W. of Almaden Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 69, p. 9 (1891).

8087. ——. *Assoc.with* Silver, in calcite. *Loc.* Paisley Mine, Muldiva (*ante*). *Ref.* G.S.Q. Pub. 119, p. 35 (1897).

8088. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Malachite, Galena, Cerussite, Minium, Garnet, and Hematite, in gossan. *Loc.* Penzance Mine, Redcap Cr., 3 miles N.E. of Mungana Rail. Stn. (Chillagoe line), Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pubs. 69, p. 6 (1891), and 134, p. 11 (1898).

8089. ——. *Assoc.with* Gold, Iron Pyrites, and Stibnite, in quartz reef. *Loc.* Queen Constance 5 North Mine, Mareeba Goldfield, Tinaroo Cr., 5 miles S.E. of Mareeba Rail. Stn., Walsh and Tinaroo Mineral Fields. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.Q. Pub. 97, p. 6 (1894).

8089A. ——. *Assoc.with* Galena, Massicot, Cerussite, Iron Pyrites, and Mispickel, in lode. *Loc.* Chillagoe Mine, off Wise's Nob, Oaks Goldfield, 30 miles (by road) S. of Einasleigh Rail. Stn. (Etheridge line). *Co.* Percy; *Dist.* Cook. *Ref.* A.R., p. 187 (1909).

8090. ——. *Assoc.with* Galena, in quartz. *Loc.* Fossilbrook, 28 miles S.S.W. of Almaden (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields. *Co.* Tate; *Dist.* Cook

——. *See* other Walsh and Tinaroo References, No. 8107, etc.

8091. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Cornucopia Claim, Horn Is. Goldfield, 3 miles E. of Thursday Island, Torres Strait. *Co.* Torres; *Dist.* Cook. *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

8092. ——. *Assoc.with* Gold, Galena, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Eclipse Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 6 (1896), and G.S.M.

8093. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Pioneer Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 5 (1896).

8094. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef in granite. *Loc.* Triumph Mine, Horn Is. Goldfield (*ante*). *Ref.* G.S.Q. Pub. 112, p. 4 (1896).

8095. ——. *Assoc.with* Galena, Copper Pyrites, and Mispickel, in chloritic rock. *Loc.* Doctor's Lode, Sel. 39, Jibbinbar, 20½ miles S.W.byW. of Stanthorpe. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

8096. ——. *Assoc.with* Silver, Galena, Iron Pyrites, and Mispickel, in quartz reef. *Loc.* Jibbinbar Silver Mine, Jibbinbar (*ante*). *Ref.* G.S.Q. Pub. 125, p. 29 (1897).

8097. ——. *Assoc.with* Gold, Silver, and Mispickel, in quartz in granite. *Loc.* Steele's Sel. (31), Jibbinbar (*ante*). *Assay: See* No. 3833A. *Ref.* G.S.Q. Pub. 67, p. 2 (1890).

8098. ——. *Assoc.with* Iron Pyrites, Copper Pyrites, Azurite, Malachite, Mispickel, and Cassiterite, in quartz, greisen, and slate. *Loc.* Ballandean Tin Mine, Severn R., 14 miles (by rail) S. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.M., B.D., and L.C.B.

8099. ——. *Assoc.with* Iron Pyrites, Galena, and Mispickel. *Loc.* Ballandean Tin Mine, Severn R. (*ante*). *Ref.* G.S.Q. Pub. 125, p. 30 (1897).

8100. ——. *Assoc.with* Copper Pyrites, Cassiterite, and Galena, in chlorite, quartz, and fluorspar. *Loc.* Severn R., 7 miles W. of Ballandean, 21 miles (by rail and road) S.S.W. of Stanthorpe. *Co.* Bentinck (*ante*).

8101. ——. *Assoc.with* Iron Pyrites, Galena, Copper Pyrites, and Mispickel, in lode. *Loc.* Silver Queen Silver Mine, Severn R., 6 miles W. of Ballandean, 20 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 2834. *Ref.* G.S.Q. Pub. 191, pp. 24, 39 (1904).

8102. ——. *Assoc.with* Iron Pyrites, Mispickel, Scorodite, Cassiterite, Hornblende, etc., in slate. *Loc.* Beacroft's Workings, Sundown Cr., 12 miles S.W.byW. of Ballandean, 26 miles (by rail and road) S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 191, p. 23 (1904).

8103. ——. *Assoc.with* Copper Pyrites, Cuprite, Azurite, Malachite, in quartz. *Loc.* Sel. 24, near Sundown Cr., 11 miles W.S.W. of Ballandean, 25 miles (by rail and road) S.W. of Stanthorpe (*ante*). *Ref.* G.S.Q. Pub. 67, p. 1 (1890).

8104. ——. *Assoc.with* Copper Pyrites, Cassiterite, Wolfram, Mispickel, Calcite, Chlorite, and Orthoclase, in quartz lode. *Loc.* Sundown Copper Mine, Sundown Cr., trib. of Severn R., 26 miles S.W. of Stanthorpe. *Co.* Bentinck (*ante*). *Assay: See* No. 2192. *Ref.* G.S.Q. Pub. 191, p. 22 (1904), and G.S.M. and B.D.

8105. ——. *Assoc.with* Copper Pyrites, Redruthite, Copper carbonate, Galena, Manganese-dioxide, and Ironstone, in lode. *Loc* Pikedale Silver Mine, Woolshed Gully, 20 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 87 (1898).

8106. ——. *Assoc.with* Gold, Pyrargyrite, Iron Pyrites, Galena, Cerussite, Cuprite, Tile Ore, Copper Pyrites, Malachite, Azurite, Smithsonite, Ironstone, and Calcite, in lode. *Loc.* Silver Spur Mine, 8 miles E. of Texas, 43 miles W.S.W. of Stanthorpe. *Co* Clive; *Dist.* Darling Downs. *Ref.* G.S.Q. Pubs. 120 (1898), 191 (1904).

8106A.——. *Assoc.with* Silver, Galena, and Copper Pyrites, in lode. *Loc.* Claim on Lucky Valley Goldfield, 12 miles S.S.E. of Warwick. *Co.* Merivale; *Dist.* Darling Downs. *Ref.* A.R., p. 223 (1910).

8107. ——. *Assoc.with* Galena and Bismuthinite. *Loc.* Great Britain Mine, Coolgarra, 9 miles N.N.E. of Mt. Garnet Rail. Stn., **Walsh and Tinaroo Mineral Fields.** *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* G.S.M.

8108. ——. *Assoc.with* Galena and Mispickel. *Loc.* Koh-i-noor Mine, Coolgarra (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

8109. ——. *Assoc.with* Galena and Iron Pyrites. *Loc.* P.C., Dry R., br. of Wild R., 12 miles S.S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

8110. ——. *Assoc.with* Copper Pyrites, Marcasite, and Galena, in quartz. *Loc.* Tryno-more Silver Mine, Dry R. (*ante*). *Ref.* G.S.Q. Pub. 13, p. 31 (1883).

8111. ——. *Assoc.with* Gold, Silver, Copper Pyrites, Bornite, Cuprite, Tenorite, Azurite, Malachite, Chalcanthite, Iron Pyrites, Mispickel, Hematite, Magnetite, Cerussite, and Minium, in quartz lodes in quartzite and porphyry. *Loc.* Mt. Garnet Mine, Return Cr., Wild R., 136 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 134, pp. 16-19 (1898).

8112. ——. *Assoc.with* Calamine. *Loc.* Lancelot Tin Mines, Newelton (Silver Valley), 9 miles S.W. of Herberton, Walsh and Tinaroo Mineral Fields. *Co.* Cardwell (*ante*).

8113. ——. *Assoc.with* Galena, Cerussite, Iron Pyrites, Copper Pyrites, etc., in slate and volcanic tuffs. *Loc.* Lancelot Tin Mine, Newelton (*ante*). *Ref.* L.B. 1, p. 479 (1883).

8114. ——. *Assoc.with* Cassiterite and Copper Pyrites. *Loc.* Smith's Cr. Proprietary Tin Mines, Nymbool, 28 miles (by rail) S.E.byS. of Lappa Junction (Mt. Garnet-Chillagoe line), 130 miles (by rail) S.W. of Cairns, Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* G.S.Q. Pub. 192, p. 29 (1904).

8115. ——. Woodleigh, Herbert R., 11 miles E. of Mt. Garnet Rail. Stn., Walsh and Tinaroo Mineral Fields (*ante*). *Ref.* P.R.S.Q., vol. 15, p. 53 (1900).

——. *See* other Walsh and Tinaroo References, No. 8081, etc.

8116. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Alexandra Hill G.M. Co.'s Mine, **Charters Towers** Goldfield, 82 miles S.W.byS. of Townsville, Gt. Northern Rail. *Co.* Davenport; *Dist.* Kennedy North. *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

Zinc Blende. In the following Charters Towers references (Nos. 8117-8134) the zinc occurs only in small quantities.

8117. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Blue Peter Lease No. 1 E., Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

8118. ——. *Assoc.with* Gold, Iron Pyrites, and Chlorite, in quartz reef. *Loc.* Bryan o' Lynn Mine, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, pp. 36, 49 (1887).

8119. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz and calcite. *Loc.* Carrington Lion 1 and 2 E. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

8120. ——. *Assoc.with* Gold, Galena, Copper Pyrites, Iron Pyrites, and Barytes, in quartz and calcite. *Loc.* Carrington's United Mines Tin Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T. and G.S.M.

8121. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, and Copper carbonate, in quartz. *Loc.* Comstock (Stockholm) Reef, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

8122. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Day Dawn P.C., Charters Towers Goldfield (*ante*). Mineral percentages: Iron Pyrites = 57·9, Galena = 11·5, Zinc Blende = 8·6, Silica = 22 per cent. *Assay:* Gold = 10 oz. per ton. *Ref.* A.R. D.M., p. 33 (1894).

8123. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Day Dawn 3A West Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

8124. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Hope Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

8125. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Mills Day Dawn United G.M. Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

8126. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* New Towers Extd. Mine, Charters Towers Goldfield (*ante*). Mineral percentages and gold yield, *see* No. 2899. *Ref.* A.R.D.M., p. 33 (1894).

8127. ——. *Assoc.with* Gold, Iron Pyrites, and Barytes, in quartz reef. *Loc.* Old Identity Mine, Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 36 (1887), and G.S.M.

8128. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Old Imperial Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

8129. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Pfeiffer's Day Dawn Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

8130. ——. *Assoc.with* Gold, Galena, and Iron Pyrites, in quartz. *Loc.* Queen Deep Mines Lease, Charters Towers Goldfield (*ante*). *Ref.* W.C.T.

8131. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Calcite, Gypsum, and Chlorite, in quartz. *Loc.* Queen Reef, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 26 (1879); P.R.S.Q., vol. 4, pp. 36, 47 (1887); G.S.M., and W.C.T.

8132. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* St. Patrick Block, Charters Towers Goldfield (*ante*). *Ref.* G.S.Q. Pub. 1, p. 28 (1879).

8133. ——. *Assoc.with* Gold, Galena, and Iron Pyrites, in quartz reef. *Loc.* Sunburst P.C., Charters Towers Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

8134. ——. Union Jack Mine, Charters Towers Goldfield (*ante*). *Ref.* G.S.M.

8135. ——. *Assoc.with* Gold and Iron Pyrites, in quartz reef. *Loc.* Mt. Elliott, 20 miles S.E.byS. of Townsville. *Co.* Elphinstone; *Dist.* Kennedy North. *Ref.* G.S.M.

8136. ——. *Assoc.with* Gold, Iron Pyrites, and Limonite, in quartz and calcite. *Loc.* Golden Valley Reef, Mt. Success, 15 miles N.N.W. of Ravenswood Junction. *Co.* Elphinstone (*ante*). *Ref.* G.S.Q. Pub. 133, p. 10 (1898), and G.S.M.

8137. ——. *Assoc.with* Gold and Iron Pyrites, in quartz. *Loc.* Mt. Success Reef, Mt. Success (*ante*). *Ref.* G.S.Q. Pub. 133, p. 9 (1898), and G.S.M.

8138. ——. *Assoc.with* Calcite. *Loc.* Black Jack Mine, ¼-mile N.E of Ravenswood Rail. Stn., **Ravenswood Goldfield.** *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.M.

8139. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Tenorite, Malachite, and Mispickel, in quartz. *Loc.* Buck Reef, 1 mile S.E. of Ravenswood, Ravenswood Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 76 (1887).

8140. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz. *Loc.* Crescent G.M. Lease, New Moon Reef, Ravenswood, 78 miles (by rail) S. of Townsville. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* W.C.T.

8141. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* New England 1 South Mine, ¼-mile N.W. of Ravenswood (*ante*). *Mineral percentages* and *Assay: See* No. 5246. *Ref.* A.R.D.M., p. 34 (1894).

8142. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* New England Reef, Elphinstone Cr., ¼-mile N.W. of Ravenswood (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

8143. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Shellmalier Reef, Elphinstone Cr., 30 chains N.N.E. of Ravenswood (*ante*). *Ref.* G.S.Q. Pub. 152, p. 8 (1900).

8144. ——. *Assoc.with* Gold and Copper Pyrites, in quartz reef. *Loc.* Wild Irish Girl Mine, Elphinstone Cr., 22 chains N.W. of Ravenswood Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

8145. ——. *Assoc.with* Gold, Galena, and Copper Pyrites, in quartz. *Loc.* Sunset Reef, ½-mile S. of Ravenswood Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 152, p. 7 (1900).

8146. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Sunset and General Grant Reef, ½-mile S. of Ravenswood Rail. Stn. (*ante*). *Ref.* G.S.Q. Pub. 183, pp. 2-6 (1903).

8147. ——. *Assoc.with* Gold and Galena, in quartz and Calcite. *Loc.* Donnybrook Reef, 6½ miles S. of Ravenswood Rail. Stn., Ravenswood Goldfield. *Co.* Gladstone; *Dist.* Kennedy North. *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

8148. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz. *Loc.* Cousin Jack Reef, Sandy Cr., 2½ miles E.S.E. of Ravenswood Rail. Stn., Ravenswood Goldfield (*ante*). *Ref.* G.S.Q. Pub. 152, p. 9 (1900).

8149. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* John Bull Block, Sandy Cr., 3 miles E.S.E. of Ravenswood Rail. Stn. (*ante*). *Ref.* G.S.M.

8150. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz and steatite. *Loc.* Politician Claim, Sandy Cr., 2¾ miles E.S.E. of Ravenswood Rail. Stn. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

8151. ——. *Assoc.with* Galena. *Loc.* Bonnie Dundee Mine, 1 mile N. of Ravenswood Rail. Stn. (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 48 (1887).

8152. ——. *Assoc.with* Silver, Galena, Iron Pyrites, Stibnite, and Copper Pyrites. *Loc.* King's Silver Lode, 1 mile N. of Ravenswood Rail. Stn. (*ante*) *Analysis: See* No. 2227. *Ref.* G.S.Q. Pub. 152, p. 11 (1900), and G.S.M.

8153. ——. *Assoc.with* Galena and Stibnite. *Loc.* Hannon's Silver Mine, 1 mile N. of Ravenswood (*ante*). *Ref.* G.S.M.

8154. ——. *Assoc.with* Galena. *Loc.* Pyramid Silver Lease, 1 mile N. of Ravenswood (*ante*). *Assay: See* No. 2935. *Ref.* P.R.S.Q., vol. 4, p. 47 (1887).

8155. ——. *Assoc.with* Cadmium-Blende. *Loc.* Ravenswood Goldfield, 75 miles (by rail) S. of Townsville (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 50 (1887).

8156. ——. *Assoc.with* Copper Pyrites and Iron Pyrites, in leader. *Loc.* Comstock Lease (187), **Kangaroo Hills Mineral Field,** 40 miles S.W.byS. of Ingham. *Co.* Wairuna; *Dist.* Kennedy North. *Assays: See* No. 2244.

8157. ——. *Assoc.with* Native Silver, Galena, Cerussite, Malachite, Mispickel, Chrysocolla, Manganese-dioxide, and Hematite, in lode. *Loc.* Hidden Treasure Lease (165), Kangaroo Hills Mineral Field (*ante*). *Assay: See* 1241. *Ref.* G.S.Q. Pubs. 82, p. 7 (1892), 71, p. 9 (1891).

8158. ——. *Assoc.with* Redruthite and Galena. *Loc.* Macauley Cr. Copper and Silver Lodes (*ante*). *Ref.* G.S.Q. Pub. 167, pp. 9, 10 (1901).

8159. ——. *Assoc.with* Galena, Cerussite, Minium, Chrysocolla, Copper carbonate, and Hematite, in gossan lode. *Loc.* White Wings P.A., Mt. Brown, Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2980. *Ref.* G.S.Q. Pub. 82, p. 10 (1892).

8160. ——. *Assoc.with* Native copper, Copper Pyrites, Cuprite, Atacamite, Chrysocolla, Copper carbonate, Linarite, Cerussite, Manganese-dioxide, Smithsonite, Mispickel, Hematite, Ironstone, Fluorspar, and Garnet in lode. *Loc.* Mt. Moss Lease (167), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 3 (1892).

8161. ——. *Assoc.with* Copper Pyrites, Bornite, Cuprite, Tenorite, Copper carbonate, Iron Pyrites, Ironstone, and Galena, in lode. *Loc.* Mt. Thekla Copper and Silver Mine, 4 miles W. of Ewan, Kangaroo Hills Mineral Field (*ante*). *Assay: See* No. 2972. *Ref.* G.S.Q. Pub. 167, p. 7 (1901).

8162. ——. *Assoc.with* Hematite, in quartz. *Loc.* Victory Lease (185), Kangaroo Hills Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 82, p. 8 (1892).

8163. ——. *Assoc.with* Galena, Iron Pyrites, and Stibnite, in lode. *Loc.* Murphy and Godson's Mineral Lease (73), Star R. Mineral Field, 50 miles (by road) N.W. of Ravenswood. *Co.* Wilkie Gray; *Dist.* Kennedy North. *Assay: See* No. 2987. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

8164. ——. *Assoc.with* Galena and Iron Pyrites, in lode. *Loc.* Northbrook (A. Beazley) Selection (179), Star R. Mineral Field (*ante*). *Assays: See* No. 2990. *Ref.* G.S.Q. Pub. 26, p. 8 (1886).

8165. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Cerussite, Anglesite, Minium, and Siderite. Union Silver-Lead Mine, Star R. Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 26, p. 5 (1886), and G.S.M.

8166. ——. *Assoc.with* Gold, Iron Pyrites, and Siderite, in quartz reef. *Loc.* Coral Tree P.C., Bee Cr. Diggings, 48 miles W.S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), 229, p. 29 (1910).

8166A.——. *Assoc.with* Gold, Iron Pyrites, Limonite, Siderite, Copper Pyrites, Malachite, and Galena, in quartz. *Loc.* Highland Mary P.C., Bee Cr. Diggings (*ante*). *Ref.* G.S.Q. Pubs. 54, p. 2 (1889), and 229, p. 30 (1910).

8167. ——. *Assoc.with* Galena, Copper Pyrites, and Malachite, in quartz. *Loc.* Mackay's Mine, Blue Mt., 9 miles S.W. of Eton, 32 miles (by rail and road) W. of Mackay. *Co.* Carlisle; *Dist.* Kennedy South. *Assay: See* No. 3008. *Ref.* G.S.Q. Pub. 53, p. 10 (1889).

8167A.——. *Assoc.with* Galena and Copper Pyrites, in quartz. *Loc.* Ben Mohr M.L. (8), Mt. Spencer Goldfield, 6 miles S.W. of Eton Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 229, p. 19 (1910).

8168. ——. *Assoc.with* Galena, Cerussite, Copper Pyrites, Malachite, Azurite, Iron Pyrites, and Mispickel, in quartz lode. *Loc.* Mt. Barker Silver Mine, 3 miles N.W. of Eungella Stn., 33 miles W. of Mirani, Mackay Rail. line. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 181, pp. 12-17 (1903).

8168A.——. *Assoc.with* Galena and Copper Pyrites, in quartz. Nr. Coolan's P.A., Mt. Wyatt Goldfield, about 60 miles S.S.E. of Ravenswood *Co.* Sellheim; *Dist.* Kennedy South. *Ref.* G.S.M.

8169. ——. *Assoc.with* Galena, Cerussite, and Iron Pyrites, in lode. *Loc.* Bonnie Dundee Mine, Sellheim Mineral Field, 92 miles S.W.byS. of Bowen. *Co.* Sellheim; *Dist.* Kennedy South. *Assays: See* No. 1288. *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

8170. ——. *Assoc.with* Galena, Minium, Cerussite, Copper Pyrites, and Clay, in lode. *Loc.* General Gordon Mine, Sellheim Mineral Field (*ante*). *Ref.* G.S.Q. Pub. 57, p. 6 (1889).

8171. ——. *Assoc.with* Galena, Anglesite, Cerussite, Minium, Iron Pyrites, and Ironstone. *Loc.* Pyramid Silver Mine (Argentine Shaft), Sellheim Mineral Field (*ante*). *Assay: See* 3016. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

8172. ——. *Assoc.with* Silver, Galena, Minium, Cerussite, Iron Pyrites, and Ironstone, in lode. *Loc.* Rob Roy Mine, Sellheim Mineral Field (*ante*). *Assay: See* No. 3017. *Ref.* G.S.Q. Pub. 57, p. 4 (1889).

8173. ——. *Assoc.with* Gold, Silver, Galena, Iron Pyrites, and Mispickel, in siliceous gangue. *Loc.* Monsildale Silver and Lead Mines, 35 miles N.byW. of Esk, 102 miles (by rail and road) N.N.W. of Brisbane. *Co.* Canning; *Dist.* **Moreton.** *Ref.* (and *Assays*) G.S.Q. Pub. 169, pp. 2, 3 (1901).

8173A.——. *Assoc.with* Copper Pyrites, in chloritic slate. *Loc.* Ashington Copper Syndicate, Blackbutt, 71 miles N.W. of Brisbane. *Co.* Cavendish; *Dist.* Moreton. *Ref.* G.S.M.

8174. ——. *Assoc.with* Galena, Iron Pyrites, Copper Pyrites, and Tenorite, in altered sedimentary rocks. *Loc.* Gt. Pyramid Mine (Saxon shaft), Cressbrook, 12 miles N. of Esk, 77 miles (by rail and road) W.N.W. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* G.S.Q. Pub. 169, p. 6 (1901).

8175. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Galena, in sedimentary rocks. *Loc.* Rising Star Copper Area, Cressbrook Cr. (*ante*). *Assay: See* No. 3029. *Ref.* G.S.Q. Pub. 169, p. 4 (1901).

8175A.——. *Assoc.with* Galena and Copper Pyrites, in slate and quartzite. *Loc.* Deep Rocky Gorge, between Murphy's Cr. and Perseverance, 4½ miles N.byE. of Murphy's Cr. Rail. Stn. (Main line) *Co* Cavendish; *Dist.* Moreton. *Ref.* O.R. (1910).

8175B.——. *Assoc.with* Galena and Iron Pyrites, in lode. *Loc.* Kipper Cr., 8 miles W. of Esk Rail. Stn. (Brisbane Valley Br.). *Co.* Cavendish (*ante*). *Ref.* A.R., p. 245 (1910).

8176. ——. *Assoc.with* Gold, Massicot, and Galena, in gossany quartz. *Loc.* Iceberg P.A., Mt. Langan, Emu Cr., 14½ miles W.N.W. of Kannungar, Brisbane Valley line. *Co.* Cavendish (*ante*). *Ref.* L.C.B.

8176A.——. *Assoc.with* Gold, Silver, and Galena, in lode. *Loc.* Langan's Mine, Mt. Langan (*ante*). *Ref.* A.R., p. 213 (1910).

8177. ——. *Assoc.with* Iron Pyrites, in quartz. *Loc.* McPhee's Sel., Mountain Camp, Enoggera, 6½ miles W. of Brisbane. *Co.* Stanley; *Dist.* Moreton.

8178. ——. *Assoc.with* Gold, Iron Pyrites, and Zinc Blende, in quartz. *Loc.* Perseverance Reef, Mountain Camp (*ante*). *Ref.* G.S.Q. Pub. 143, p. 9 (1899), and G.S.M.

8178A.——. *Assoc.with* Iron Pyrites, in lode. *Loc.* Geike's Sel., Upper Coomera, 38 miles (by rail) S.E. of Brisbane. *Co.* Ward; *Dist.* Moreton. *Ref.* G.S.M.

8179. ——. *Assoc.with* Galena, Iron Pyrites, and Copper Pyrites, in quartz reef. *Loc.* Friend's Mine, Barmundoo Goldfield, 28 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* **Port Curtis.** *Assay: See* No. 3036. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

8180. ——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz reef. *Loc.* Georgina Mine, Barmundoo Goldfield (*ante*). *Ref.* G.S.M.

8181. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Mispickel. *Loc.* Griffith's Reef, W. of Digger's Cr., Barmundoo Goldfield (*ante*). *Assay: See* No. 4235. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

8182. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel and Zinc Blende, in quartz reef. *Loc.* Roger's Mine, Bompa Goldfield, 44½ miles S.byE. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 58, p. 7 (1890).

8183. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Galena, in quartz and calcite. *Loc.* Stand-by Reef, Mt. Jacob Mine, Bompa Goldfield (*ante*). *Assay: See* No. 4251. *Ref.* G.S.Q. Pub. 58, p. 6 (1890).

8184. ——. *Assoc.with* Gold, Iron Pyrites, and Mispickel. *Loc.* Good Hope Mine, Crow's Cr., Barmundoo Run, 35 miles S.byW. of Gladstone. *Co.* Clinton; *Dist.* Port Curtis. *Assays: See* No. 4242. *Ref.* G.S.Q. Pub. 58, p. 5 (1890).

8185. ——. *Assoc.with* Copper Pyrites, Cuprite, Bornite, Tenorite, Malachite, Azurite, Galena, Hematite, Magnetite, Garnet, Chlorite, and Calcite. *Loc.* Glassford Cr. Copper Mines, Glassford Cr., 8 miles W.S.W. of Many Peaks Rail. Stn. (Boyne-Valley line), 66 miles (by rail and road) S. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 150, pp. 5-7 (1900), 194, p. 28 (1904).

8186. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, Galena, Mispickel, and Calcite, in quartz. *Loc.* Advance Reef, **Norton Goldfield,** 33 miles S.byE. of Gladstone. *Co.* Clinton (*ante*). *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), 208, p. 11 (1907), and G.S.M.

8187. ——. *Assoc.with* Gold, Silver, Iron Pyrites, and Galena, in quartz and calcite. *Loc.* All Nation's Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 13 (1907).

8188. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Malachite, in quartz. *Loc.* Brigham Young (Tadman's Tapautohaunga) Mine, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, pp. 15, 16 (1907).

8189. Zinc Blende. *Assoc.with* Gold, Silver, Copper Pyrites, Iron Pyrites, Mispickel, Redruthite, Azurite, Malachite, and Scorodite, in quartz. *Loc.* Chandler's Reef, Norton Goldfield (*ante*). *Assays: See* No. 4269. *Ref.* G.S.Q. Pub. 208, p. 18 (1907).

8190. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Mispickel, in quartz. *Loc.* Conran's Reef, Norton Goldfield (*ante*). *Assay: See* No. 4270. *Ref.* G.S.Q. Pub. 58, p. 8 (1890), and G.S.M.

8191. ——. *Assoc.with* Gold, Galena, Iron Pyrites, and Calcite, in quartz reef. *Loc.* Frampton United Mine, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

8192. ——. *Assoc.with* Gold, Iron Pyrites, Galena, and Mispickel, in quartz and calcite. *Loc.* Frampton Reef, Norton Goldfield (*ante*). *Ref.* G.S.M. and G.S.Q. Pub. 208, p. 21 (1907).

8193. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Galena, and Copper Pyrites, in quartz. *Loc.* Galena Reef, Norton Goldfield (*ante*). *Assay: See* No. 3048. *Ref.* G.S.Q. Pub. 208, pp. 22-24 (1907).

8194. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Galena, and Redruthite, in quartz. *Loc.* Goody's (Carmichael's) Reef, Norton Goldfield (*ante*). *Assay: See* No. 4277. *Ref.* G.S.Q. Pub. 208, p. 26 (1907).

8195. ——. *Assoc.with* Gold, Galena, Iron Pyrites, and Calcite, in quartz. *Loc.* Hickey's Reef, Norton Goldfield (*ante*). *Ref.* P.R.S.Q., vol. 4, p. 49 (1887).

8196. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Little Wonder Reef, Norton Goldfield (*ante*). *Assay: See* No. 4280. *Ref.* G.S.Q. Pub. 208, p. 29 (1907).

8197. ——. *Assoc.with* Gold, Silver, and Iron Pyrites, in quartz and calcite. *Loc.* Marodian Reef, Norton Goldfield (*ante*). *Ref.* (and *Assays*) G.S.Q. Pub. 208, p. 32 (1907).

8198. ——. *Assoc.with* Gold, Iron Pyrites, Mispickel, and Limonite, in quartz. *Loc.* Paddock Reef, Norton Goldfield (*ante*). *Ref.* G.S.Q. Pub. 208, p. 34 (1907).

8199. ——. *Assoc.with* Gold, Iron Pyrites, Copper Pyrites, and Mispickel, in quartz. *Loc.* Sulphide Reef, Norton Goldfield (*ante*). *Assay: See* No. 4292. *Ref.* G.S.Q. Pub. 208, p. 38 (1907).

8200. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, and Galena, in quartz and calcite. *Loc.* Who'd-ha'-thought-it Reef, Norton Goldfield (*ante*). *Assay: See* No. 4294. *Ref.* G.S.Q. Pubs. 21, p. 6 (1885), 208, p. 39 (1907).

8200A. ——. *Assoc.with* Gold, Silver, Galena, and Copper Pyrites, in quartz reef in diorite country. *Loc.* Britannia Mine, N. of Lake Learmouth, Canoona Goldfield, 35 miles N.byW. of Rockhampton. *Co.* Lieberg; *Dist.* Port Curtis. *Assay: See* No. 4315c. *Ref.* B.D.

8201. ——. *Assoc.with* Gold, Galena, and Dolomite, in quartz reef. *Loc.* Annie Mine, Cawarral Goldfield, 22 miles (by rail) N.N.E. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 125, p. 28 (1897), and G.S.M.

8202. —— (traces). *Assoc.with* Copper Ores. Mt. Chalmers, 3 miles N.W. of Tungamull Rail. Stn., 21 miles (by rail and road) N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* G.S.Q. Pub. 216 (1907).

8203. ——. *Assoc.with* Silver, Cuprite, Tenorite, Malachite, Cerussite, Iron Pyrites, and Barytes, in serpentinous shales. *Loc.* Mt. Warminster Copper-Lead Mine, 19 miles (by rail) N.E. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* B.D.

8203A. ——. *Assoc.with* Gold, Telluride of gold and silver, and Iron Pyrites, in calcite and quartz. *Loc.* Anglo-Saxon Mine, Mt. Usher, 6 miles N.E. of Mt. Morgan Rail. Stn. *Co.* Livingstone (*ante*). *Ref.* O.R.

8204. ——. *Assoc.with* Gold, Galena, and Copper Pyrites, in quartz reef. *Loc.* Mary Florence Mine, Blackfellow's Gully, Morinish Goldfield, 32 miles N.W. of Rockhampton. *Co.* Livingstone (*ante*). *Ref.* A.R.D.M., p. 60 (1885).

8205. ——. *Assoc.with* Mispickel and Copper Pyrites. *Loc.* Mine, nr. Cania Goldfield, 60 miles S.S.W. of Gladstone. *Co.* Pelham; *Dist.* Port Curtis. *Ref.* A.R. D.M., p. 34 (1894).

8206. ——. *Assoc.with* Gold, Copper Pyrites, Iron Pyrites, and Mispickel, in quartz. *Loc.* Queen of the Valley Mine, between Dee R. and Crocodile Cr., 4 miles N.E. of Mt. Morgan Rail. Stn. *Co.* Raglan; *Dist.* Port Curtis. *Ref.* G.S.Q. Pub. 132, p. 13 (1898).

8207. ——. *Assoc.with* Gold, Iron Pyrites, and Copper Pyrites, in quartz and calcite. *Loc.* Roxburgh Mine, between Dee R. and Gavial Cr., 14 miles S. of Rockhampton. *Co.* Raglan (*ante*). *Ref.* G.S.Q. Pub. 132, p. 14 (1898).

8208. ——. *Assoc.with* Copper Pyrites, Tetrahedrite, Azurite, Malachite, Galena, Iron Pyrites, and Calcite, in slate, diorite, andesite, etc. *Loc.* Blue Bell Copper Mine, Amamoor Cr., 19 miles S.S.E. of Gympie. *Co* Lennox; *Dist.* **Wide Bay.** *Ref.* L.C.B.

8209. ——. *Assoc.with* Gold, Silver, Iron Pyrites, Mispickel, Galena, and Copper Pyrites, in quartz and schorl. *Loc.* Victoria Reef, Black Snake, 10 miles S. of Kilkivan. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 7 (1886).

8210. ——. *Assoc.with* Copper Pyrites, Iron Pyrites, and Galena. *Loc.* Mellor and Elworthy's Stn., Imbill, 8 miles from Kandanga, 15 miles S. of Gympie. *Co.* Lennox (*ante*). *Assay: See* No. 3075. *Ref.* A.R., p. 93 (1907).

8210A.——. *Assoc.with* Gold, Iron Pyrites, and Galena, in quartz and calcite. *Loc.* Rise and Shine Reef, Kilkivan Goldfield, 48 miles (by rail) W. of Gympie. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 28, p. 2 (1886).

8211. ——. *Assoc.with* gold, Iron Pyrites, Copper carbonate, and Limonite, in quartz and calcite. *Loc.* Mt. Ruby, ½-mile W.N.W. of Glenbar head stn., 20 miles W. of Tiaro, Rail. Stn. (North Coast line). *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 59, p. 6 (1890).

8212. ——. *Assoc.with* Gold, Iron Pyrites, Galena, Calamine, Tenorite, and Copperas, in quartz. *Loc.* Beer and Dawson's Lease, Running Cr., Yorkey's Goldfield, 9 miles N. of Kilkivan Rail. Stn. *Co.* Lennox (*ante*). *Ref.* G.S.Q. Pub. 179, p. 8 (1902).

8213. ——. *Assoc.with* Gold, Hematite, Iron Pyrites, and Copper Pyrites, in quartz. *Loc.* Ortt's Mine, Yorkey's Goldfield (*ante*). *Ref.* G.S.M.

8214. ——. *Assoc.with* Gold, Iron Pyrites, Siderite, and Galena, in quartz. *Loc.* Enterprise Reef, on br. of Cochrane Cr., 5 miles N.W. of Gympie. *Co.* March; *Dist.* Wide Bay. *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

8215. ——. *Assoc.with* Gold and Galena, in quartz. *Loc.* Exhibition Reef, 6 miles N. of Gympie. *Co.* March (*ante*). *Ref.* G.S.Q. Pub. 52, p. 12 (1889).

8216. ——. *Assoc.with* Copper Pyrites and Galena. *Loc.* Mt. Widgee, 14 miles W. of Gympie. *Co.* March (*ante*). *Ref.* A.R., p. 163 (1908).

Zinc carbonates. *See* Aurichalcite and Calamine.

—— silicates. *See* Smithsonite and Willemite.

—— sulphate. *See* Goslarite.

—— sulphide. *See* Zinc Blende.

Zircon. *Compo.*, Silicate of zirconia. *Colour*, reddish, yellowish, colourless, etc. *Lustre*, adamantine. *H.* = 7·5. *Sp.gr.* = 4·68-4·70. *Varieties:* Hyacinth (red, yellow, brown); Jargoon (smoky). *See map*, Pls. 11, 13.

Mineral Note: Seldom found *in situ*, but very common in drift deposits in association with gold, tin, and sapphires, occurring also in many of the beach sands on the Queensland coast. Hyacinth, the precious variety, is a common associate of the sapphire at Anakie, and gems of beautiful colour and lustre, weighing over 30 carats, have been cut from stones found on this field.

The alluvial deposits at Anakie containing the zircons, sapphires, etc., are many square miles in extent, and rest on granite, altered sedimentary rocks and basalt, the latter rock being the "carrier" of the zircons, as it is of the other gemstones.

Large quantities of zircons are to be found in the watercourses at Eungella Goldfield, and, although too small for gem purposes, might ultimately become of economic value.

8216A.——. *Assoc.with* Cassiterite, Ilmenite, Rutile, Topaz, and Amethyst, in alluvial deposits. *Loc.* P.C. Workings, Rocky Cr., 5 miles above Brovinia Cr., br. of Cardarga Cr., 35½ miles S.S.W. of Gayndah, 60 miles (by road) *viâ* Cooranga Head Stn. *Co.* Newcastle; *Dist.* **Burnett.** *Ref.* Q.G.M.J., vol. 5, p. 62 (1904).

8217. ——. *Assoc.with* Ilmenite and Magnetite. *Loc.* In creeks forming the heads of the Boyne and Stuart Rivers 55 miles S. of Gladstone. *Co.* Fitzroy; *Dist.* Burnett. *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

8218. Zircon. In surface deposits, Greenhills Goldfield, 24 miles S.W.byS. of Georgetown. *Cos.* Gilbert; *Dist.* **Cook.** *Ref.* B.D.

8219. ——. Tate R., Fisherton, 24 miles W.S.W. of Almaden (Chillagoe Rail. line), Walsh and Tinaroo Mineral Fields. *Co.* Lynd; *Dist.* Cook. *Ref.* P.R.S.Q, vol. 15, p. 66 (1900).

8220. ——. In alluvial deposits, Henrietta Cr., Jordan Cr. Goldfield, 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* Cook. *Ref.* G.S.M.

8221. ——. *Assoc.with* Cassiterite, in alluvial deposits. *Loc.* Herberton, 82 miles (by rail) S.W. of Cairns (Cairns line), Walsh and Tinaroo Mineral Fields. *Co.* Cardwell; *Dist.* **Kennedy North.** *Ref.* P.R.S.Q., vol. 4, p. 66 (1887).

8221A. ——. *Assoc.with* Gold, Chalcedony, Jasper, Lydianstone, and Sapphire, in alluvial deposits. *Loc.* 14v, Bunerba, ½-mile S. of Don R., about 39 miles S. of Bowen. *Co.* Herbert; *Dist.* Kennedy North. *Ref.* Q.G.M.J., vol. 5, pp. 610, 611 (1904).

8222. ——. *Assoc.with* Gold and Garnet, in alluvial deposits. *Loc.* Black Waterhole Cr., 2 miles N.byE. of Hazledean, 24 miles S.W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pub. 164, p. 10 (1901).

8223. ——. Head of Constant Creek, Hampden, 20 miles N.W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.Q. Pub. 53, p. 9 (1889).

8224. ——. Mirani, 22 miles (by rail) W. of Mackay. *Co.* Carlisle (*ante*). *Ref.* G.S.M.

8225. ——. *Assoc.with* Magnetite, Ilmenite, and Cassiterite. *Loc.* Normanby Goldfield, 46 miles S. of Bowen. *Co.* Carlisle (*ante*). *Ref.* O.R.

8226. ——. *Assoc.with* Pleonaste, in quartz. *Loc.* Crow's Nest (Ravensbourne), 34 miles (by rail) N.N.E. of Toowoomba, 135 miles (by rail) W.N.W. of Brisbane. *Co.* Cavendish; *Dist.* **Moreton.**

8227. ——. *Assoc.with* Gold (alluvial), Ruby, Almandine, Spinel, Sapphire (blue), Topaz (white), and Zircon, in alluvial deposits. *Loc.* Wallace's and Eldridge's Claim, Seven-mile Diggings Goldfield (Nanango), 123 miles N.W.byN. of Brisbane. *Co.* Cavendish (*ante*). *Ref.* L.C.B.

8228. ——. *Assoc.with* Gold, Magnetite, Ilmenite, Mica, and Topaz, in alluvial deposits. *Loc.* 17 miles up Vanapa R., 32 miles N. of Port Moresby, **Brit. New Guinea.** *Ref.* G.S.Q. Pub. 56, p. 2 (1889).

8229. —— and **Hyacinth** (*var.*) (red, brown). *Assoc.with* Garnet, Tourmaline, Ruby, Sapphire, Corundum, and Topaz, in alluvial deposits. *Loc.* Jordan Cr. Goldfield, 22 miles W.S.W. of Geraldton. *Co.* Nares; *Dist.* **Cook.** *Ref.* G.S.Q. Pub. 157, p. 6 (1901).

8230. —— and —— (red). *Assoc.with* Cassiterite, Stannite, Topaz, Sapphire, Gold, Diamond, and Amethyst, in alluvial deposits. *Loc.* Broadwater and tributaries, Stanthorpe, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck; *Dist.* **Darling Downs.** *Ref.* G.S.Q. Pub. 120, p. 31 (1898).

8231. —— and ——. *Assoc.with* Sapphire, Tourmaline, Rock Crystal, Cairngorm, and Cassiterite, in alluvial deposits. *Loc.* Camp Reserve, Spring Cr., 6 miles W.byS. of Stanthorpe. *Co.* Bentinck (*ante*). *Ref.* B.D.

8232 —— and ——. *Assoc.with* Gold, Cassiterite, Cairngorm, Topaz, Sapphire, Spinel, Garnet, and Diamond, in alluvial deposits. *Loc.* Spring Cr. and its tributaries, Stanthorpe, 207 miles (by rail) S.W. of Brisbane. *Co.* Bentinck (*ante*). *Ref.* G.S.Q. Pub. 120, p. 32 (1893).

8233. —— and —— (red). *Assoc.with* Diamond, Sapphire, Garnet, Spinel, Beryl, Topaz, Tourmaline, Amethyst, Rock Crystal, Cassiterite, and traces of Gold, in alluvial deposits. *Loc.* Hunt's, Quart Pot, Sugarloaf, Lode, Arbouin's, Cannon, and Kettle Swamp Creeks, and Severn R., Stanthorpe (*ante*). *Ref.* G.S.Q. Pub. 120 (1898), and B.D.

8234. —— and —— (red), in alluvial deposits. *Loc.* Eungella Goldfield, head of Broken R., 50 miles W. of Mackay. *Co.* Carlisle; *Dist.* **Kennedy South.** *Ref.* G.S.Q. Pubs. 125, p. 22 (1897), 159, p. 18 (1901).

8235. —— and ——. *Loc.* Mt. McGregor, 2½ miles E. of Mt. Toby, 2½ miles N.N.E. of Miriam Vale Rail. Stn. (Mackay line). *Co.* Carlisle (*ante*). *Ref.* G.S.M.

8236. —— and —— (red, brown). *Assoc.with* Gold, Sapphire, Spinel, Garnet, Amethyst, Cairngorm, Chalcedony, Jasper, Rutile, Topaz, Diamond, Magnetite, Ilmenite, Magnesite, Tourmaline, and Hornblende, in alluvial deposits. *Loc.* Retreat, Sheep Station, Policeman, Tomahawk, and Central Creeks, Anakie Sapphire Field, 193 miles (by rail) W. of Rockhampton. *Cos.* Clermont and Plantagenet; *Dist.* **Leichhardt.** *Ref.* G.S.Q. Pubs. 81 (1892), 125 (1897), 172, p. 20 (1902).

8237. —— and —— (red, brown). In alluvial deposits. *Loc.* Policeman Knob, Policeman Cr., 10 miles N.W.byN. of Anakie. *Co.* Clermont (*ante*). *Ref.* G.S.Q. Pub. 172, p. 7 (1902).

8238. —— and —— (red, brown). *Assoc.with* Gold, Garnet, Magnetite, and Tourmaline, in alluvial deposits below basalt. *Loc.* Basalt Diggings, 3 miles N. of Borilla Rail. Stn., 7 miles W. of Anakie. *Co.* Plantagenet; *Dist.* Leichhardt. *Ref.* G.S.Q. Pub. 172, p. 7 (1902).

Zirconium (Zr). *Atom.Wt.* = 90·6. *Sp.gr.* = 4·2 Amorphous; 5·3 Crystalline. *Colour,* greyish-metallic.

MINERALS: *See* Zircon.

USES: The metallic form of Zirconium has no industrial application, but the oxide, zirconia, is used in the fabric of incandescent gas mantles. Thoria has, however, superseded zirconia for this purpose to a great extent, as its incandescence produces greater brilliancy. Zircon, the silicate, occurs as pebbles and grains with sapphires at Anakie, and is usually a bright-coloured stone, the larger specimens being in demand for gem-making.

—— silicate. *See* Zircon.

Zoicite. *Syn.* Thulite. *Compo.,* Silicate of alumina and lime. *Colour,* red, yellow, grey, etc. *Streak,* uncoloured. *Lustre,* vitreous, pearly on cleavage face. *H.* = 6-6.5. *Sp.gr.* = 3·25-3·37.

8239. ——. *Assoc.with* Epidote. *Loc.* Table Mountain, 5 miles E.byS. of Stanwell, 21 miles (by rail and road) S.W.byW. of Rockhampton. *Co.* Livingstone; *Dist.* Port Curtis. *Ref.* G.S.M

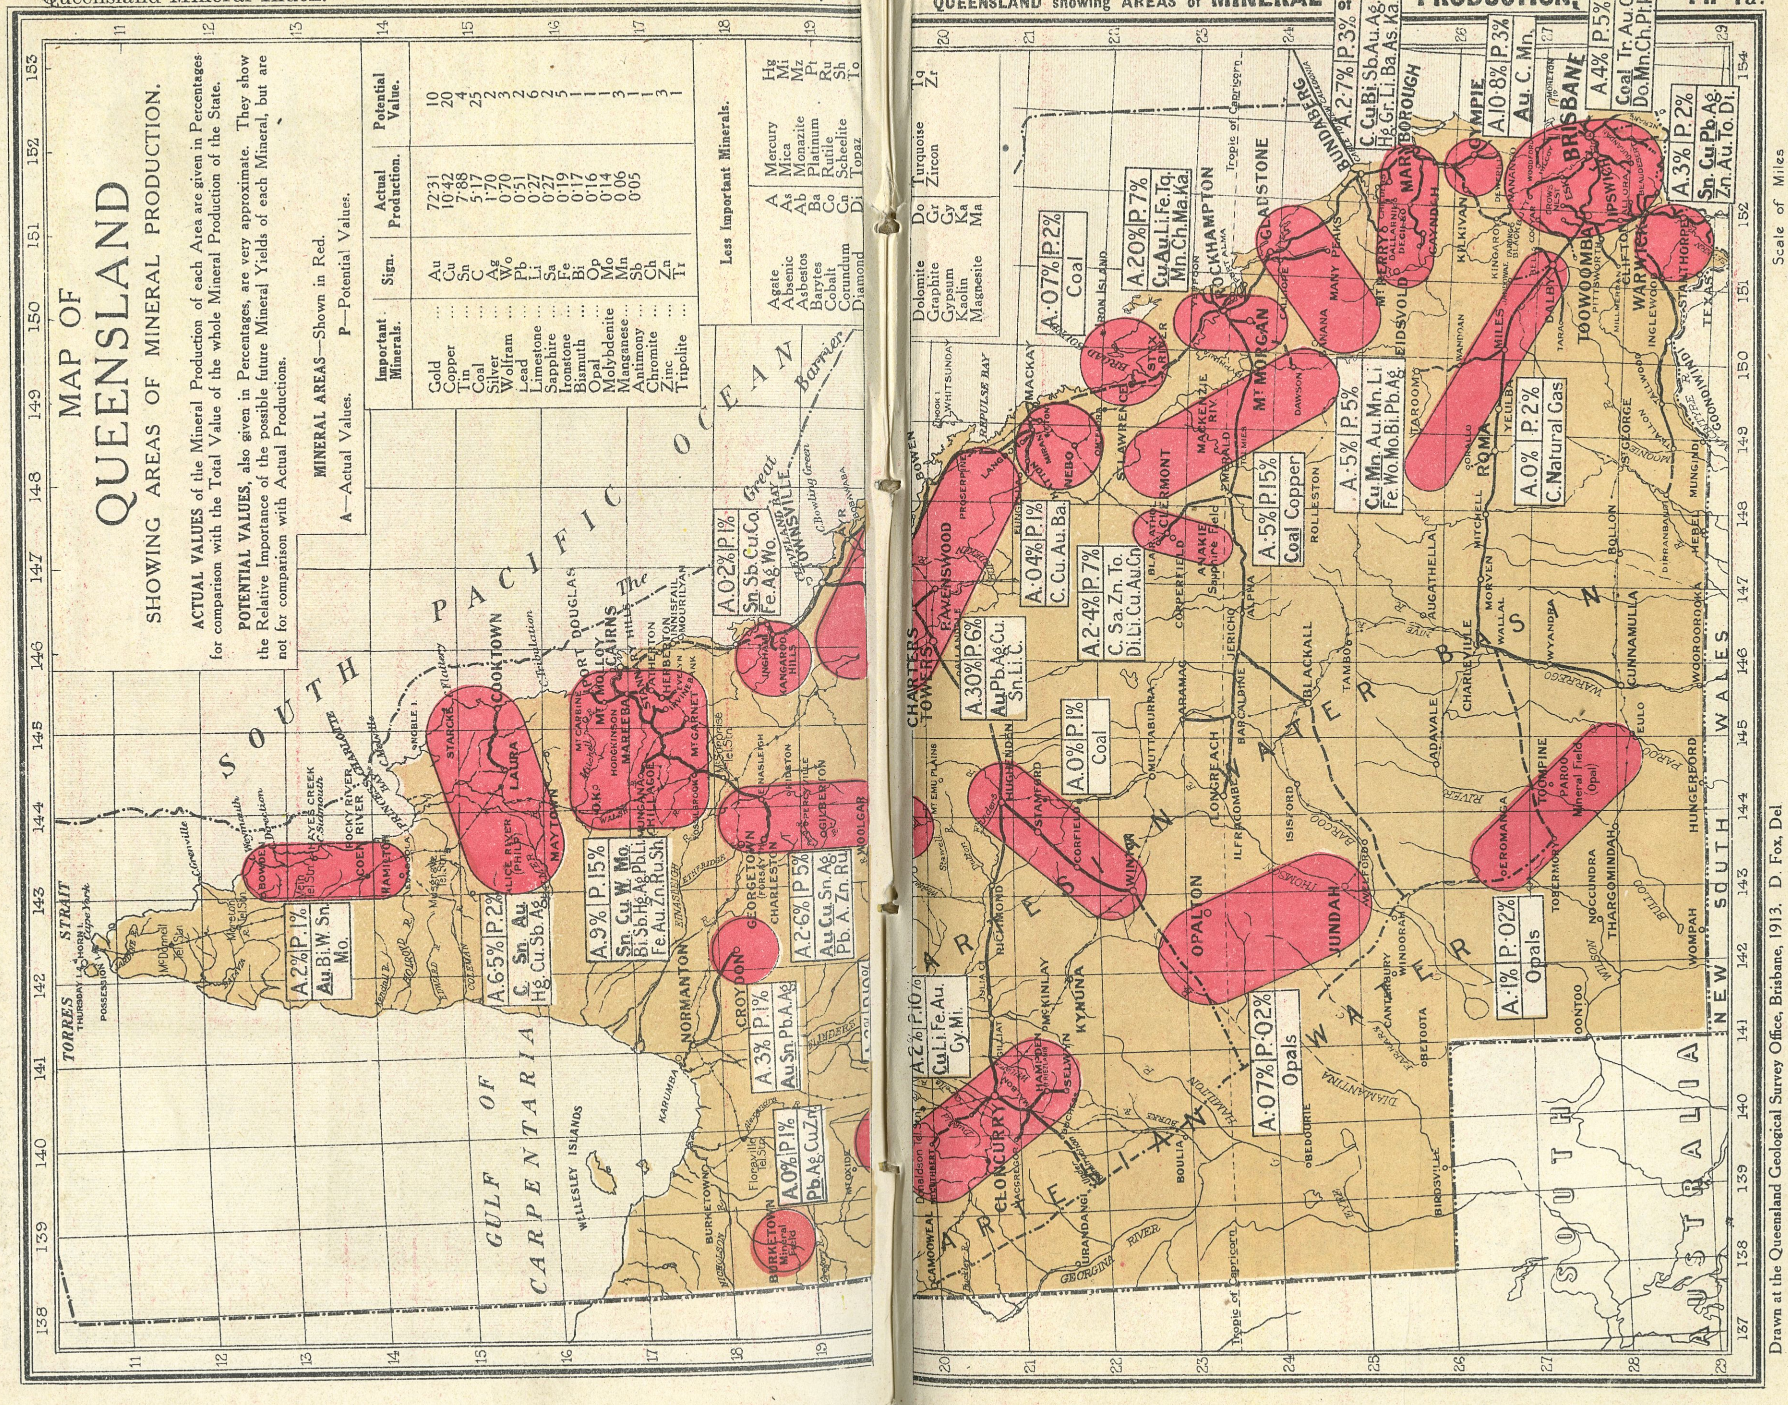
Map of QUEENSLAND showing AREAS of MINERAL PRODUCTION, Pl. 1a.



MAP OF QUEENSLAND

SHOWING AREAS OF MINERAL PRODUCTION.

ACTUAL VALUES of the Mineral Production of each Area are given in Percentages for comparison with the Total Value of the whole Mineral Production of the State.

POTENTIAL VALUES, also given in Percentages, are very approximate. They show the Relative Importance of the possible future Mineral Yields of each Mineral, but are not for comparison with Actual Productions.

MINERAL AREAS—Shown in Red.

A—Actual Values. P—Potential Values.

Important Minerals.	Sign.	Actual Production.	Potential Value.
Gold ...	Au	72·31	10
Copper ...	Cu	10·42	20
Tin ...	Sn	7·88	4
Coal ...	C	5·17	25
Silver ...	Ag	1·70	2
Wolfram ...	Wo	0·70	3
Lead ...	Pb	0·51	2
Limestone ...	Li	0·27	6
Sapphire ...	Sa	0·27	2

* Includes (1908) Alice River, 40 oz.; Balcoomba and Lucky, 40 oz.; Coen and Rocky, 2,270 oz.; Hamilton, 480 oz.; and Horn Island, 100 oz.

** Includes (1909) Alice River, 11 oz.; Balcoomba, &c., 50 oz.; Coen and Rocky, 1,510 oz.; Hamilton, 2, 073 oz.; and Horn Island, 82 oz.

§ Includes (1910) Balcoomba, &c., 12 oz.; Coen and Rocky, 1748 oz.; Hamilton, 1502 oz.; Horn Island, 12 oz.; Hughenden, 58 oz.; and Palmer, 44 oz.

† Includes some Star River Returns.

‡ Estimated. Silver and Lead Returns up to 1893 were not separated.

†† Includes 247 oz. of value of £60 obtained in 1874.

§§ Includes (1911) Balcoomba, &c., 16 oz.; Batavia River, 367 oz.; Coen and Rocky, 1,074 oz.; Hamilton G.F., 422 oz.; Palmer, 10 oz.

¶ Includes (1911) Balcoomba, &c., 10 oz.; Batavia River, 220 oz.; Coen and Rocky. 1,275 oz. Hamilton, 903 oz.; Mount Emu, 120 oz.; Palmer, 20 oz.

** Total yield of all gold to end of 1877.

1910, £286. [§ GRAPHITE.—Value of Yield in 1905, £272; 1906, £200; 1907, £200; and 1908, £60.

SUBSIDIARY FIELDS AND MINING CENTRES.

(*Principal Field Names on Opposite Page.*)

First column of numbers refer to District Maps; second column to Fields shown on District Maps. Yields (if any) are included in the groups (Districts or Fields) mentioned in Table 46-46A, opposite. For locality descriptions, *see* under names in Text :—
